LIEUTENANT-Colonel B. T. Morgan, 54th New York Volunteers, Acting Assistant Inspector-General, Department of the South, has been relieved from duty in that Department, and ordered to report to H. S. Olcott, Special Commissioner of the War Department, at New York City. Captain George E. Gouraud, A. D. C., is appointed Acting Assistant Inspector-General in Lieutenant-Colonel Morgan's place.

BRIGADIER-General J. B. Carr, who has for some months past been in command of the District of Yorktown and Williamsburg, has resigned, and leaves the command to remain under him, and reported to Major-General Butler. It is understood he is to take command of the division of colored troops in that department, now commanded by Brigadier-General Hinck, who is incapacitated for duty in consequence of wounds received in battle.

MAJOR-General Schuyler is not, as has been stated, in command of the convalescent camp at Nashville. On the consolidation of the Eleventh and Twelfth corps, he reported to Major-General Sherman, and while waiting for an active command in the field, undertook, by desire of the latter, the formation of a large camp of instruction for a large number of new troops then coming from the North. This camp was intended to form the nucleus of a large reserve force, but it became unnecessary, as there was not such a long line of railroad, and General Schurz consequently reports for orders, waiting for a new command.

THE order of General Halleck, in the following officers serving in his Department, have been dismissed the service of the United States:—Captain James K. Fuller, One Hundred and Thirty-first Indiana, "for culpable inefficiency, neglect of good order and military discipline," and "neglect of duty." First Lieutenant E. H. Hass, First United States Infantry, for "conduct unbecoming an officer and a gentleman, breach of arrest," &c. Colonel William M. Grosvenor, Seventh Regiment of Infantry, Ind'Affaire, for conduct unbecoming an officer and a gentleman." Captain Andrew J. Mulhern, Seventeenth Infantry, Corps d'Afrique, for "disobedience of orders." Captain Algernon S. Lawrence, Ninety-fourth Illinois Volunteers, for "conduct unbecoming an officer and a gentleman," &c. First Lieutenant Wm. H. Bowen, Ninety-fourth Illinois Volunteers, for "disobedience of orders, breach of arrest," &c. Assistant Surgeon P. J. Gibert, Second Louisiana Cavalry, "neglect of duty."

CAPTAIN Eben Everett, 1st Cavalry, New Mexican Volunteers, was tried by general court-martial, at Santa Fe, New Mexico, May 4th, 1864, on charges of drunkenness on duty and conduct unbecoming an officer and gentleman. The specification of the first charge was as follows:—"In Eben Everett, 1st Cavalry, N. M. Volunteers, having given a written pledge to abstain from the use of intoxicating liquors, in camp, on the march, or elsewhere, at Albuquerque, New Mexico, July 12th, 1863.—" I hereby pledge myself as an officer and a gentleman, that for one year from this date, I will not drink or use as a beverage any intoxicating liquid in any manner or shape whatever"—(Signed), EBEN EVERETT, Captain 1st N. M. Vols, did violate said pledge, by becoming intoxicated in camp, at Fort Craig, N. M., while on duty as officer of the day, on or about the 1st day of November, 1863, having been found guilty of each and each specification except one. Captain Everett was sentenced to be cashiered. The proceedings of the court were approved by Brigadier-General Carleton and the sentence ordered to be executed.

APPOINTMENTS and promotions to fill vacancies occasioned by deaths and disabilities resulting from wounds:—Sixth Indiana, Delaney Kavanaugh, major; Nineteenth Indiana, John M. Lindley, colonel; Fortieth Indiana, Henry Learnard, lieutenant-colonel; Forty-second Indiana, George H. Thompson and Alfred Gladdis, majors; Forty-eighth Indiana, Barnet Byrkel, lieutenant-colonel, and William Rice, major; Fifty-second Indiana, W. C. Kise, colonel; Sixtieth Indiana, Theodore Pleish, major; Sixty-third Indiana, Daniel Morris, lieutenant-colonel; Sixty-fifth Illinois, major; Sixty-fifth Indiana, W. S. Hodge, lieutenant-colonel; Seventy-fifth Indiana, W. H. Loyd, major; Seventy-seventh Indiana, Thomas J. Lucas, colonel; Eighty-third Indiana, Samuel P. Chapman, lieutenant-colonel, and George H. Scott, major; Eighty-eighth Indiana, Joseph R. Welborne, major; Eighty-ninth Indiana, Lewis Washington, major; One Hundred and Twenty-third Indiana, David C. Mellen, lieutenant-colonel; Thomas Gladdis, major; One Hundred and Twenty-sixth Indiana, Edward Henderson, major; One Hundred and Twenty-ninth Indiana, Charles A. Zollinger, major; One Hundred and Thirty-second, and Samuel B. Maguire, major; One Hundred and Thirty-first Indiana, R. E. Moore, major.

THE REBEL WEEKS AT AUGUSTA, GA.—A Rebel paper published at Augusta, Ga., gives some facts in regard to the extent of the work done at the Government works in that place:

During two months previous to the close of May, the following war materials were supplied to the Rebel armies:—Six thousand rounds fixed ammunition (shot and shell attached to cartridge for Napoleon guns. Six thousand five hundred Colonel Rains's percussion hand grenades. One thousand five hundred rifle shells for field artillery. Fifteen hundred and sixty rifle shells for 12-pr. columbiads. One hundred tons of gunpowder. Three complete batteries of brass 12-pounder Napoleon guns, with carriages, limbers, caissons, harness, artillery implements complete, including forges, &c. One battery of three-inch rifle and banded iron guns and twelve pound bronze howitzers, with carriages complete at all points, with carriages, limbers, caissons, harness, ammunition, implements, &c.

All of the above guns, except the rifle battery for General Morgan, were sent to General Johnston's army, which has been operating against Sherman's forces. Most guns which were mainly manufactured in every part at the Government Foundry and Machine Works and Gun Carriage Departments in the city.

The most of these batteries are composed of the new 12 pounder Napoleon guns, introduced in the service of this war by the present Emperor of the French; of these, over eighty-five, weighing in the aggregate more than fifty tons, have been cast at the Government Foundry in this city, mainly within the past year. In the same period over five hundred tons of the first quality of gunpowder have been made at the Powder Works and distributed throughout the Confederacy.

In addition to the foregoing, there has been an immense number of small arm cartridges, cartridge bags, fixed ammunition, canteens, haversacks, horse shoes, time fuses and percussion caps made at the Arsenal, as well as large quantities of artillery and foot gear, tools of artificers' use, infantry accoutrements, &c., manufactured within the past twelve months.

The following farewell address has been issued by Field-Marshal Count WRANGEL to the allied PRUSSO-Austrian army :—

"HEADQUARTERS, HORSENS, May 20th.

"His Majesty the King, my most gracious master, has deigned to relieve me from the chief command of the allied army by a cabinet order of the 18th inst., and at the same time to confer upon me the rank of count. Until further notice the chief command is entrusted to his Royal Highness Prince FREDERICK CHARLES of Prussia, as the senior general present at the seat of war, while General VOGEL VON FALCKENSTEIN, of the infantry, undertakes the post of commanding general of the Prussian army corps. His Majesty has given me his royal thanks for the glorious campaign, which he has carried at a pause, and summons me to be near his gracious person at Horsens. I am, at my age, unfitted to be exposed, as I formerly was, and after an arduous winter campaign, to the possibility of new fatigues. I, therefore, take leave of you, dear comrades of the allied army, who have victoriously overcome the enemy in a campaign of several months, and endured the hardships of an unusually severe winter. The allied army holds up to posterity how it has brilliantly fulfilled its appointed task—the occupation of the Duchy of Schleswig-Holstein and hundreds of guns and thousands of prisoners remain in our hands, and that the enemy is expelled from the continental portion of his kingdom. The allied troops, as the worthy successors of their two grand armies, have fought side by side in faithful comradeship with most praiseworthy zeal, and have thus attained an object which, being gained, is a cause for the very warmest satisfaction. I am proud to be by the favor of our illustrious monarch. For all this I return my grateful thanks. Allied commanders and the allied army my warmest and most heartfelt thanks. At your head I have passed the proudest and happiest days which the favor of my King has granted me in my life. Fare you well, and do not forget your veteran leader, who will recollect you and your exploits with thankfulness and pride until the last hour of his life.

(Signed) "VON WRANGEL, Field-Marshal."

BLUCHER AND HIS PIPE.—Here is an incident of 1815, which the English journals are relating: On the morning of the memorable battle of Waterloo, BLUCHER had just mounted his horse, when a lighted pipe, which a cannon ball struck the ground close by, scattering earth and gravel all over it, was presented to him by the white negro of which BLUCHER was mounted to spring aside—a manœuvre that broke the pipe into a thousand pieces before the owner had time even to utter a curse.

"Just keep a lighted pipe ready for me; I shall be back in a few moments, after I have driven away the rascals" were BLUCHER'S words.

With these words BLUCHER gave the command, "Forward, boys!" and the battle began with his usual impetuosity. However, of a chase of a few minutes, it was a rapid march of nearly a whole hot summer day, as we all know from history. About 8 P. M. the meeting took place with WELLINGTON to the place where he first got a glimpse of the combatting armies, and nearing the spot where BLUCHER had halted in the morning, he saw the white negro still standing near, his head tied with a handkerchief, one arm in a sling, and calmly smoking a pipe!

"Dieble mein Herr!" cried BLUCHER, "why, that is my Hessenjan. How you look, boy; what are you doing here so?"

"Waiting for your speedy return," was the grumbling answer. "You have come at last! I have waited for you here, pipe in mouth, for the whole day, but this is the last pipe in the box. The cursed French have shot away every pipe from my mouth, have ripped the flesh from my head and almost every tooth with their accursed bullets. It is well there is so end to the battle, or you would have had no black servant to wait upon you."

Saying which, he handed to BLUCHER the pipe, to enjoy the remaining fumes of the weed. WELLINGTON, who had remained silent up to this moment, now turned back to BLUCHER, "You have just admired the unflinching loyalty and bravery of my Highlanders, what shall I say to this true and devoted negro? But your Highlanders had no pipe to regale themselves with."

WE have lately examined and tested a Patent Adding Machine, invented by Mr. G. B. FOWLER, of New York. It is a simple, compact, and easily worked affair, the sum of which the longest columns of figures may be added with mechanical exactitude, by any one who learns—as it may be done in a few hours—the manner of working the machine. One of its main advantages seems to be its simplicity and the ease with which one may acquire proficiency in its use. The cabinet is so light and of such convenient size that it may be easily carried in the coat pocket. We were asked to examine the machine with reference to its probability for the use of accounting officers of the Army and Navy, and are very glad to call the attention of those officers to it, as we think it is one that will make it of real service. Amongst mercantile accountants the machine finds many who speak very highly in its favor.

THE Richmond *Whig* says:—At Spotsylvania Court-House Brigadier-General Henry A. Wilcox, of A. P. Hill's corps, lost his foot. At D. H. Hill's attack upon the entrenched camp at Bermuda Hundred, Brigadier-General Wm. S. Walker, commanding, was wounded in both knees *seriatim*. Major-General H. T. Walker was shot through the foot in the recent engagement near Dallas, Georgia, between Johnston and Sherman. The commander of the Stonewall brigade, General James L. Walker, was badly wounded in the great battle of May 12th, when Ed Johnston's division suffered great loss. General Marmaduke killed in a duel General Marsh Walker, of Arkansas.

COVINGTON, Kentucky, and the country around it, within a radius of ten miles, is added to the Northern Department, under command of Major-General Heintzelman.

NOTICES TO CORRESPONDENTS.

The Editor of the JOURNAL will always be glad to receive from officers in the service, communications and general news items of a character suited to its columns. It is necessary that the name of the writer should, in all cases, accompany his communications, not for publication, but as a guarantee of good faith.

Officers are especially requested to send us early notification of all personal matters of general interest; of the movements of vessels of cantonments among officers; and military and naval events.

The Editor will, at all times, be pleased to respond, to these columns, to enquiries in regard to tactical and other matters.

The subscription price of THE ARMY AND NAVY JOURNAL is FIVE DOLLARS a year, or FOUR DOLLARS for six months, invariably in advance. Remittances may be made in United States funds, or Quartermaster's, Paymaster's or other drafts, which should be so payable to the order of the Proprietor, W. O. Chaffee.

Subscribers who fail to receive their paper promptly, will please give immediate notice of the fact.

Subscribers ordering the address of their paper to be changed, should be careful to give their previous address.

The Editor does not hold himself responsible for individual expressions of opinion, in communications addressed to the JOURNAL.

The postage on the JOURNAL is twenty cents a year, payable quarterly in advance, at the office where received.

All communications should be addressed to the ARMY AND NAVY JOURNAL, New York.

PUBLICATION OFFICE 29 PARK ROW, TIMES BUILDING.

The editorial and business offices of the ARMY AND NAVY JOURNAL have been removed to No. 29 PARK ROW, (Daily Times Building), directly opposite the City Hall Park, second floor front.

ANSWERS TO CORRESPONDENTS.

R.—An officer of colored troops who has passed General CASEY'S Board and resigned on account of ill health, can be examined again with the permission of the Secretary of War.

MILITIA.—Your last question, we believe, has been already answered in the JOURNAL. The reviewing officer should not salute the colors upon going down the lines, but will do so when the colors pass him before.

BROWN.—In deploying a column by division, right in front on first division—from a halt each captain slips his own company, and commands "Forward—" See page 1 of Scott's Tactics.

P. C. L.—The expressionin the regimental order you refer to, as quoted is not correct. Moreover, it is especially directed in a General Order from the War Department that no soldier be sentenced to do scanlinl duty as a punishment, as it is clearly wrong to associate any idea of degradation with so responsible a service.

FORT ISLAND, S. C.—The pay of United States Volunteers has been raised, as we have said, by the act of Congress for that purpose, published on page 313, No. 44 of this journal.

SURGEON.—In all Volunteer organizations, officers of the same grade take rank according to date of their muster into the service of the United States. See answer to "U. S. Colored Troops," page 802, No. 42.

SERGEANT PROGRESSIVE LITERARY SOCIETY.—The "Articles of War" have settled your question in advance of its debate, by declaring (article 39) that "all officers and soldiers" convicted of desertion in time of war "shall suffer death, or such other punishment as, by sentence of court-martial, shall be inflicted."

ITALIAN.—You will have to settle the matter of your disability with the War Department, before appearing before the General Casey's Board. We believe the Board have no discretion in the matter of physical examination—all officers being required to submit to it, whatever their present rank and services may be, and the examination with tactics is the chief requisite in an examination. MAHAN'S Light Infantry and Field works will answer your purpose as well as any work we think of. In addition to these, you can obtain Jomini, Hardee, Duane's Strategy and Halleck's Military Art and Science. We know of no one work which covers the whole subject of projectiles in Rodman's practice both. THOMAS' Field Artillery is a most suggestive theoretical work. TENDAIT'S Story of the Guns is a valuable work. On artillery practice we have GILMER'S Gunnery, GIBBON'S Artillerists' Manual, and REYNE'S Ordnance.

J. B.—Colonel McCallum's address is: Colonel D. C. McCallum, 296 G Street, Washington.

The SECRETARY of the Navy, having been directed by the House of Representatives to furnish a list of United States steam vessels suitable to be employed in carrying the mails to and from foreign ports, with a statement of their necessary expenses, &c., has furnished the following table, with the remark that the pay-roll and daily consumption of coal by no means exhibit the expense of running a steamer, and that a sum equal to half of those two items should probably be allowed to cover repairs to hull and machinery, and all other expenses:

Powpanoosuc—Tonnage 3,500 tons; maximum speed expected, 14 knots; complement of officers and crew required for service, 164; small purposes, 226; monthly pay roll for war purposes, $9,100; for peace or foul purposes, $6,751; coal consumed per day for small purposes at 240 lbs.s per day, 65 tons; number guns for war purposes, 12; guns for peace purposes, 8.

Nahaunaug—Tonnage, 3,200 tons; speed, 14 knots; officers and crew for war, 362; for peace or small purposes, 226; monthly pay roll, $9,100; for peace or mails, $6,751; coal consumed per day for mails, 65 tons; guns for war, 12; for peace purposes, 8.

Monohansett—Tonnage, 3,200 tons; speed, 14 knots; officers and crew for war, 362; for peace or mails, 226; monthly pay roll for war, $9,100; for peace or mails, $6,751; coal consumed per day for mails, 65 tons; guns for war, 12; for peace purposes, 8.

Mohican—Tonnage, 3,200 tons; speed, 13 knots; officers and crew for war, 362; for peace or mails, 226; monthly pay roll for war, $9,100; for peace or mails, $6,751; coal consumed per day for mails, 65 tons; guns for war, 12; for peace purposes, 8.

Mahaska—Tonnage, 3,200 tons; speed, 13 knots; officers and crew for war, 362; for peace or mails, 226; monthly pay roll for war, $9,100; for peace or mails, $6,751; coal consumed per day for mails, 65 tons; guns for war, 12; for peace purposes, 8. Mohaska, Monohansett, Kenaugum, Catskonoog, Wyalusing, Tuspayatit, Wakusa, Arapaho, Pushmataha, Wyandotte, Menitou, all the same as the Hasaka.

We are requested to say that the Medical Department is much in need of assistant surgeons for colored troops.

U. S. ARMY AND NAVY JOURNAL.

NEW YORK, SATURDAY, JULY 2, 1864.

THE ARMY AND THE PEOPLE.

INCOMPLETE as the Virginia campaign is, it has already developed sufficiently vast proportions to reveal to the Nation the magnitude of the task before it. To declare that the present is to be the last and the most rapid campaign of the war is more than any one cares to assume—except it be those rash fomenters of public exhilaration, who have never ceased to proclaim each immediate success of our arms from Drainesville to Spottsylvania, "the beginning of the end." No, if indeed an unpopular end is nigh, there is still a bloody interval, which must be expended in stern and incessant labor, before an enemy like that we now contend with, can be beaten into subjection. Instead of every day sending the horoscope of the country for an impending dissolution of the Rebellion, and announcing that its fall "becomes "only a question of time," it would be at least as well to remember that it is a question of endurance and of reinforcement. The oracular phrase, "time," has become ambiguous from the very lapse of time itself. Without constant and patriotic effort there would indeed be a question of time, but a question too quickly and fatally solved.

To one who soberly reflects on the disclosures of the campaign thus far, there is nothing to excite trepidation, for everything promises well. No military men of judgment, probably, thought that a very rapid decision under this grave arbitrament of arms. But there is some disappointment to the more sanguine of our people, and especially to those who were misled by prophecies of time, or by the occupation of territory. Five times since the march from Culpepper, the enemy has set himself across our path, and four times has been defeated. Brought daily to bay, at length, he has contended with success unequalled at any previous stronghold, unless it be that at the Chickahominy.

In a word, the resistance presented to our progress has increased, as might have been, but generally was not, anticipated, at each of its five points. Terrible and mysterious as was the man-to-man struggle in the dense, and gloomy thickets of the Wilderness, it had been well for us, had it continued, on the terms it exacted, ten days instead of two. There were but partial entrenchments to carry, and, while a familiar region and some preparation were advantages to the enemy, equal valor and greater numbers must have turned the scale towards us. The strategy of GRANT was at first directed to procuring an equal field. The excellence of the overland road was in its possibility of affording such fields, whereon the deadly preliminary trial of strength might be made, before the weaker party should recoil to his strong covert at Richmond. That advantage we had in the Wilderness, but nowhere since—a drawn battle, then, where the losses were indeed appalling, but falling equally on either party. But afterwards, the wide détours in flanking movements, the exhausting marches and changes of position, and, above all, the necessity of assaulting prepared defences with repeated and hitherto fruitless shocks, have been attended with losses proportionate to the enemy's certainly as 3 to 2, possibly as 5 to 3. Some tolerably accurate tabulation of our losses, it might be easy, if wise, to compile. For the widely different estimates of authorities who should be trusted, have been compelled to be reached by observing that the lesser often denotes the number persistently given to the army, while the other includes all who are temporarily *hors du combat*—stragglers, exhausted men, sick men, slightly wounded men. With either enumeration, the total makes a loss larger, perhaps, than had been anticipated by the Government for the prelogue to the Richmond drama.

But in war, it is not the first only, but every step, that costs. Let it be remembered that the Army must suffer other depletion, also, from the expiring service of many veterans who enlisted three years ago, and from the disease and exhaustion incident, as experience fatally teaches us, to any vigorous July campaign in Southeastern Virginia.

What then is the lesson for the people to learn from its past and its prospective sacrifice? It is the necessity of yet other cheerful and strenuous efforts to keep the Army full and strong—to stand ready to make personal devotion, if need be, to the war. The lesson is for the Government to resort to no devices for procuring money instead of men. The experience of the past has shown that the American people are willing to cheerfully go to the extreme of personal devotion to the cause of national honor, and this latest and most heroic of campaigns has exerted at length from the observers in the declaration—"the Northerners are not mercenaries." This spectacle of a people bearing adverse fortune with equanimity, is more grateful than that of a nation jubilant and intoxicated with conquest.

Military men have ever been accustomed to look at the next step in longer and more undertaking than those who thought more earnestly of the success of the cause than of the difficulty of maintaining it. Popular impatience, and more especially, official impatience, has often wronged many a gallant officer whose patriotism was most unquestionable. In the early part of the Rebellion, to urge the equipment of one half the forces which have already been lost in the struggle, was accepted as a sign of insanity in one case, and of treason in others. But lukewarmness in the cause of national honor should be tardily charged against the soldier who seals his testimony by his blood. Let it always be remembered that while many noisier patriots have evaded their sacrifice by setting this or that year as the time when our country will be vindicated if at all, thousands of gallant officers, less exultant at the outset, less confident of success, more willing to attribute good qualities to their opponents, have fought far beyond the time so foolishly prescribed, and are fighting now with a patriotism which knows no tithe or measurement of time, labor, or suffering as the offering due to the country.

As to the Army now in Virginia, it is difficult to convey an adequate appreciation of its determination, its spirit, and its gallantry. Its ranks have been riddled and thinned by the long campaign. Whole regiments, whole companies have been destroyed. Battalions and brigades have lost their distinctive appellations. By the influx of new material the character of divisions and of corps has been changed. The reckless gallantry of officers has swept them off by hundreds, and new captains may command the ranks of regiments or of brigades. Of the men who made the entire campaign across Richmond, not a few have traversed the ground again. And yet, exhausted and wounded, as they are, the spirit and enthusiasm of the Army remain perfect. No thought of failure enters their breasts. Deprived of the leadership of many of their old officers and of the companionship of many comrades in camp and field, fired in a score of battles, they yet look on Richmond as their legitimate prize, long delayed, but sure at the last.

It is, therefore, in the invincible spirit of the armies now in the field and the vast resources of the country yet untouched, that one may found his confidence in the final issue. There needs no call to the men in the Virginia trenches to "stiffen the sinews "and summon up the blood" at the blast of war. There is only need of the Government standing ready to keep the ranks full, and to preserve the present superiority of their force to that of the enemy. Let the people of the North stand ready to the gates of Petersburgh, saw, from Fair Oaks, the dim church-towers of Richmond. Yet it was not for that Army then to enter the beleagured capital. Now at last, with the Government, the people and the Army schooled by the experience of that elder campaign, the prospect of success may be made brighter. Let the reserve in the North stand ready to the past, and there need be no doubt of through triumph.

A MAJORITY Report from the Special Senate Committee on naval supplies, signed by Senators HALE and BUCKALEW, commences by censuring the Secretary of the Navy for neglect of the Committee, which, it seems, was aware that the Hon. "Secretary needs no endorsement at their hands, "yet they feel that simply justice requires them to "say that in all their investigations, they discovered "nothing to cast a suspicion upon his uprightness as "a man, and his integrity as an officer." But the Committee have not an equally good opinion of some of his subordinates. Indeed, they—to use their own words—"start with the announcement that the investi"gations which they have made satisfy them beyond

"a doubt, that in the matter of naval supplies last "year, the Government must have been grossly de"frauded by having to pay most exhorbitant and "enormous prices for very any of the articles pro"cured by contract with the heads of bureaus."

This position the Committee endeavor to substantiate by presenting facts to show how contractors altered and changed their bids in such a manner as to secure profitable jobs. The Committee recommend to those who shall be informed on this matter, to examine this testimony, for they do not advise any additional legislation. The abuses which have been practiced have not been for want of law, but from neglect and violation of law. "Unless," say the Committee, "those entrusted with the execution of "the law are faithful and vigilant, the wisdom of the "wisest is incompetent to the framing of laws to pro"tect the public from the lawless rapacity of the dis"honest. At a time like the present, when taxes are "so high, and the burdens of the war fall so heavily "on the people, they have a right to expect and de"mand from those entrusted with the disbursement of "the public money fidelity, vigilance and economy."

The majority report thus sums up the result of the examinations of the Committee:

1st. In the matter of contracts for naval supplies last year, Government has been grossly defrauded.

2d. These frauds could not have been perpetrated without aid from those in the employment of Government in the bureaus.

3d. These remarks apply to the Bureau of Steam Engineering, the Bureau of Construction, and the Bureau of Yards and Docks.

The emissaries of our enemy have at great pains, and, apparently, at no little expense, endeavored to blacken the character of the dead Colonel DAHLGREN, by publishing what purports to be a photo-lithograph of the orders and instructions found on the body of the slain officer. In this pretended fac-simile, orders are given for the destruction of the city of Richmond, and the massacre of Mr. JEFFERSON DAVIS and his Cabinet. Of course, the moral sense of our French and English friends is rudely violated, and Colonel DAHLGREN'S honorable name is held up to execration. It is well, therefore, that we are able to say that these documents are not in the handwriting of the gallant young Colonel; that even his name is mis-spelled; and that the whole heare evidence of being a bold and outrageous forgery. Colonel DAHLGREN'S handwriting is familiar to his many friends, and they have taken pains to procure a copy of the photograph, and now do not hesitate to denounce it as an unprincipled attempt to defame the character of a young and chivalrous enemy. To those who had previously investigated the facts in regard to the cavalry raid upon Richmond, there was needed nothing to convince them of the falsity of the last stories circulated by the enemy to make it appear that he had died in an undertaking unworthy of the true and chivalrous soldier he was.

BRIGADIER-General Z. B. TOWER, U. S. Volunteers, and Major of Engineers, has been ordered to relieve Colonel A. H. BOWMAN, U. S. Corps of Engineers, as Superintendent of the Military Academy at West Point.

General TOWER, the newly-appointed Superintendent, is an officer of long and distinguished service in the Engineer Corps. All who know him will recognize his eminent fitness for the responsible position to which he has been assigned. He was graduated at the Academy in 1841, leading his class, in which were such men as HORATIO G. WRIGHT, who stood next to him, NATHANIEL LYON, who was killed in the early days of the war, SAMUEL JONES, the Rebel General, the lamented JOHN F. REYNOLDS, DON CARLOS BUELL, WM. T. H. BROOKS, GUSTAVUS A. DEARING, RICHARD B. GARNETT, and other well-known officers of the Union and Rebel Armies. Soon after his graduation, he served as an Acting and afterwards as a full Assistant Professor of Engineering in the Academy (1842-3), with whose traditions and system of instruction he is thoroughly familiar. During the Mexican War, he distinguished himself in the battles of Cerro Gordo, Contreras, and Churubusco, and at Chapultepec he was wounded, and won a brevet rank as Major of Engineers for gallant and meritorious services. In 1850 he, with General (then Major) BARNARD, was engaged in the work of constructing the fortifications of San Francisco; and when Major BARNARD was ordered to West Point in 1855, as Superintendent of the Military Academy, Major TOWER remained in California and took charge of the engineering operations. He came East at the outbreak of the Rebellion, and in November, 1861, was made Brigadier-General of Volunteers, and at the same time brevet Lieutenant-Colonel in his corps. During the present war he has added to his previous reputation, while to his Chapultepec wound he adds a wound received at the second Bull Run battle.

Colonel BOWMAN retires from the Academy after having held the position of Superintendent for a little more than three years. It will be remembered that in a Summary of the U. S. Major DELAFIELD, who had twice held the command at West Point, was relieved by Captain and Brevet-Major P. G. T. BEAUREGARD, who, five days afterwards, was ordered to transfer the command back to Major DELAFIELD, who, on the first of March of the same year, was in turn succeeded by Major BOWMAN. General TOWER will be the fifteenth Superintendent of the Academy, and will enter upon his labors under the happiest auspices. He will find the institution in a condition of great prosperity, more than ever before honored among the people, and the pride of the Army.

BRIGADIER-General JOSEPH P. TAYLOR, Commissary-General of Subsistence of the United States Army, died in Washington, on Wednesday, the 29th of June. General TAYLOR, who was a native of Kentucky, and a brother of General ZACHARY TAYLOR, entered the military service of the United States in 1813 as third-lieutenant of the Twenty-eighth infantry, and acted in the subsistence department for most of the time thereafter until 1829, when he was appointed a captain. In 1838 he attained the rank of Major, and in 1841 was made Assistant Commissary-General with the rank of lieutenant-colonel. During the war with Mexico his able administration gained for him a brevet, and on the death of Brevet-Major-General GEORGE GIBSON, late Commissary-General of Subsistence, he succeeded that officer with the rank of colonel. Under the act of February 9, 1863, providing for the addition of a brigadier-general to the Subsistence Department, Colonel TAYLOR was selected for that position.

General TAYLOR was, we believe, the uncle of General RICHARD TAYLOR of the Rebel Army. His son, JOSEPH H. TAYLOR, is a captain in the Sixth Cavalry, and Assistant Adjutant-General and Lieutenant-Colonel on the staff of General AUGUR. Colonel HENRY F. CLARKE, of the Subsistence Department, is a son-in-law of General TAYLOR.

MR. GEORGE B. SMITH, a gentleman who has had much experience in similar work, has prepared for Congress a complete Register of the Regular and Volunteer Armies. It includes the names of the officers of every regiment which has been sent to the field; the names of officers killed, wounded, and who have died, with the particulars and attendant circumstances in brief. Some idea of the extent of the labor spent upon it may be obtained, when it is known that the number of regiments will reach about two thousand. It is easy to see how valuable such a work must be to the country, and to what constant use it may be put as a book of reference. We are told that the compiler has fine qualifications for his task, and has enjoyed rare facilities. By our Congressional record it will be seen that a large number of copies have been ordered to be printed, for sale to the Army, at the nominal price of one dollar.

In announcing the reorganization of the artillery of the Army of the Potomac into batteries of four guns, we were led by our informant into the error of stating that the calibre of the guns in a battery was mixed. We were surprised at this statement at the time, knowing that all experience was in favor of guns of like calibre, but our informant was positive—and, as it proves, wrong. We may say that the rifled guns in use are principally the 3-inch ordnance gun, there being but four or five Parrott batteries. There is a difference of opinion amongst artillery officers as to whether or no the mobility of thearm is increased by the new organization, for with the same number of guns, the number of battery wagons, forage, and baggage wagons is increased one-third.

Two junior officers of the *Sassacus* have been promoted for their share in the action of that vessel with the Rebel ram *Albemarle*, and Captain SMITH has received the congratulations of the Department for the same affair. Lieutenant-Commander FRANCIS ROE, the commander of the *Sassacus*, has also been advanced five grades; and JAMES M. HOBBEY, the engineer of the *Sassacus*, thirty numbers in his grade.

The British *Army and Navy Gazette* informs us that it is intended to replace the 110-pounders now on board the *Enterprise* and *Research* with the new pattern breech-loading guns, which instead of being called, as heretofore, 9-inch guns, will be denominated 7-inch Armstrong breech-loaders. These guns will fire the 100-lb. rifle projectiles now in active preparation in the Royal Arsenal, but it is not intended at present to alter their fine grooving, or to fire any other than lead-coated projectiles from them. The rear chock naval carriages supplied for the heavy Armstrongs are not, as Sir W. ARMSTRONG has represented, at all adapted for fighting-guns in a sea-way, and that in both Mr. REED'S new vessels great difficulties have been consequently experienced in working the guns efficiently. The 150 breech-loader 70-pounder guns, which were made and finished at Woolwich on Sir WILLIAM ARMSTRONG'S pattern, and under his superintendence, are to be converted. They will be rebuked with a bore of the size to take a 32lb. ball, will be closed at the breech, and thus made into muzzle-loaders and rifled, will be served out to the Navy with all dispatch. It is said that the guns will be made on the plan of the "Frederick" gun, which has lately had a short trial at Portsmouth.

CONGRESS has at length heeded the demands of necessity, and we are likely to have an amended Enrollment law, which will do something to assist the Government in its task of filling up the Armies of the Union. The endeavor of Congress will be to encourage an effort to obtain the larger portion, at least, of the recruits, by volunteering. The people have at length come to an appreciation of the fact that the war is not to be ended in a single campaign, and that no immediate success which we may hope for, however great such success may be, will enable them to lessen their efforts against the enemy, whom at all hazards, and, however great the expense, the national welfare and the national honor call upon us to discomfit and destroy. The severity of this measure will always make a conscription unpopular, but we have faith in the people to believe that they will not stop at necessary sacrifice to accomplish the work in which they are engaged.

THE Navy list shows the British Navy to contain at present in commission 240 steamships of all sizes, from the stately three-decker down to the tiny gunboat. These mount between them 3,000 guns; they are manned by about 45,000 men and boys, and are propelled by a steam-power exceeding 60,000 horses nominal. In addition, there are 48 sailing-vessels, mounting upwards of 600 guns, and manned by about 6,500 men and boys. The sailing-vessels are naturally only fit for harbor duty and training-ships. They are never intended to go to sea again, and therefore should not be regarded as belonging to the effective naval force.

AMONGST our announcements of deaths, this week, will be found the names of three sons of CHARLES T. and JULIANA FLUSSER—OTTOKAR, CHARLES W. and GUY,—the first and last killed in the service of the enemy, the other dying gloriously in defence of his flag. The divided allegiance of this brave family is a forcible commentary on the sad results of a civil war. But however deep may be the parental sorrow, the mourning for a son like the gallant naval hero FLUSSER must be assuaged by the memory of his great services to his country, and the honor in which all true Men hold his name.

AN Italian telegram lately originated a story to the effect that the anniversary of the battle of Magenta had been celebrated in Austria as a national victory. The simple fact is that they keep the day as one of mourning, the Catholic officers attending a grand mass for the souls of those who fell in the battle. The officers wear crape round their arms, and salvos of artillery are fired.

COLONEL J. J. ABERCROMBIE, Seventh U. S. infantry, has been mustered out as Brigadier-General of Vols. Brigadier-General JAMES N. TUTTLE, U. S. Vols., has resigned. Brigadier-General L. C. HUNT, U. S. Vols., has been ordered to report to Major-General DIX, for duty.

BILLS RELATING TO THE NAVY.

AN ACT to authorize the Secretary of the Navy to provide for the education of naval engineers and engineer officers of the Navy, and for other purposes.

Be it enacted by the Senate and House of Representatives of the United States of America in Congress Assembled, That the Secretary of the Navy be, and he hereby, authorized to provide by regulations to be issued by him, for the education of such midshipmen or others in the Naval Academy as elect a particular branch thereof in steam engineering, or send such steam engineers, and may form a separate class for that purpose, or detail such midshipmen or others as may be selected for such a scientific and special education as will fit them for such purposes.

SEC. 2. *And be it further enacted*, That, upon the recommendation of the academic board, or otherwise connected with the scientific and educational class as graduate therein, with credit, may be immediately commissioned as assistant naval engineers in the engineer corps of the Navy.

SEC. 3. *And be it further enacted*, That the present naval constructors and assistant naval constructors may be commissioned, taking rank from their commissions as constructors.

SEC. 4. *And be it further enacted*, That the list of steam engineer officers in the United States Navy shall be divided into six grades as follows, viz:

First, Chief engineers.

Second, Chief engineers.

Third, First assistant engineers.

Fourth, Second assistant engineers.

Fifth, Third assistant engineers.

Sixth, Fourth assistant engineers.

SEC. 5. *And be it further enacted*, That the number of first engineers shall not exceed fifteen, who shall be selected by the President of the United States, and confirmed by the Senate, from the list of chief engineers in the Navy of the United States, according to their seniority as to rank in the list of chief engineers; that the number of second engineers shall be one for each first and second rate vessel in the Navy, with such first, second and third assistants as the Secretary of the Navy may deem necessary for the navy, as the wants of the service actually require.

SEC. 6. *And be it further enacted*, That such engineers shall be appointed by the Secretary of the Navy: *Provided*, That no person shall be eligible for such appointment who does not produce satisfactory evidence that he has been employed at least two years in the actual fabrication of steam engines. The candidate must also be under the age of forty-one, and shall pass a medical and physical examination.

SEC. 7. *And be it further enacted*, That the Secretary of the Navy be, and he hereby is, authorized to provide, by regulations to be issued by him, for the examination of candidates for the office of engineer officer, and may form a separate class for this purpose, and supply such other means and facilities for a proper examination of candidates as may be for the interest of the service.

SEC. 8. *And be it further enacted*, That when appointed, such engineers shall be attached to the Naval Academy where they shall be examined according to the regulations which shall be established by the Secretary of the Navy, and if deficient in any examination, or disinclined for examination, shall be ordered to any other station or vessel where they may be required in the exchange or to the service, unless upon recommendation of the academic board they are commissioned in the engineer corps of the Navy.

SEC. 9. *And be it further enacted*, That the pay of cadet engineers shall be the same as that of midshipmen.

SEC. 10. *And be it further enacted*, That first assistant engineers shall be commissioned by the President, by and with the advice and consent of the Senate.

SEC. 11. *And be it further enacted*, That the pay of engineer officers of the Navy shall be equal to that of medical officers.

Passed the House of Representatives, June 18, 1864.

JOINT RESOLUTION Authorizing the Secretary of the Navy to amend the contract with John Ericsson, for the construction of two impregnable iron-clad vessels of peculiar model and construction.

Whereas the Navy Department on the twenty-sixth day of July, eighteen hundred and sixty, entered into a contract with John Ericsson, of the city of New York, for the construction of two impregnable iron-clad vessels, the *Dictator* and the *Puritan*, of peculiar model and construction with a similar coat of varnish to actual conflict and during a united service of the Army and Navy in the capture of Fort Fisher, improvements could be made to render them more complete and efficient in the event of a future war, as there appeared no other means of testing to the cost of construction of each of these vessels, rendering it impossible for the contractor to complete the vessels within the time specified in said contract, and whereas it is the utmost importance to the honor and interest of the country that the vessels be finished in the best manner and in the earliest moment: Therefore,

Resolved by the Senate and House of Representatives of the United States of America in Congress assembled, That the Secretary of the Navy be, and he is hereby, authorized to amend the existing contract for the construction of the vessels *Dictator* and *Puritan*, and to engage a competent board to perform the present value, as far as completed, of said vessels, and all of this or any other work absolutely necessary to new construction, and to pay to Captain John Ericsson, the contractor, the amount of valuation so ascertained, and to contract with him for such timely extended towards the completion of said vessels and their equipment as the Secretary of the Navy may deem necessary, and the rights of contractor to any portion thereof, and whenever, after the return day as the libel, all the parties to which shall thereupon be present to complete said vessel under such arrangements as may be deemed necessary and expedient by the Secretary of the Navy: *Provided*, That nothing herein contained shall in any manner affect the contract for the construction of the *Dictator*, which shall remain in force and the contractor upon the same terms and conditions as if this resolution had not been passed: *And provided, further*, That no money shall be paid under this resolution until said contractor shall have signed to the Secretary of the Navy a writing, to be approved by the attorney-general of the willingness to superintend to completion the construction of the *Puritan*: *Provided further*, That the contractor shall give bonds to the United States for the faithful performance of the contract: *Provided, also*, That the Secretary of the Navy shall not be required to make any payment to the contractor under this resolution except upon the certificate of the board of valuation and the approval of the President.

Approved June 30, 1864.

AN ACT to amend an act entitled "An act to provide for the collection of certain disputed claims against the United States," approved March third, eighteen hundred and sixty-three.

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That it shall be the duty of the commissioner of claims to cause the documents and papers in any case pending before him, and which may be transferred to the court of claims under the provisions of the act to which this is an amendment, to be delivered to the clerk of said court, or to the attorney thereof, and to take his receipt therefor, and to report the same to the court of claims at the next session thereof;

ing an stipulation to the claimants, he shall, in case the same shall be condemned, be entitled to one-half the above commissions on the amount adjudged by the Court to be paid into the Treasury of the United upon the stipulation. No charges of the marshal for expenses or disbursements shall be allowed except upon his oath that the same have been actually and necessarily incurred for the purpose stated.

Sec. 29. *And be it further enacted*, That neither the marshal nor the clerk shall be permitted to retain for all official services, at every fiscal, reporting time or interval thereof, more than the maximum compensation allowed to be retained by him by the third section of the act of the twenty-sixth of August, eighteen hundred and fifty-six, and that any and the additional compensation which either of said officers shall be permitted to retain under the provisions of this act shall be reported as part of the maximum compensation allowed to them, respectively, in the aforesaid act.

Sec. 30. *And be it further enacted*, That the District attorney and prize-commissioners, clerks, and marshal shall be allowed such fees and reasonable compensation for their respective services in each prize cause as the court shall deem proper, not exceeding the fees allowed in like cases in the district courts.

Sec. 31. *And be it further enacted*, That each District Attorney and each clerk of the District and Circuit Courts, and each officer in the Navy of the United States, shall be credited to the fund for paying said penalties.

Sec. 32. *And be it further enacted*, That the solicitors employed to assist in cases of prize, and the counsel employed to assist the commissioners, in cases to be established by the Secretary of the Navy, not to exceed, in any case, one per centum upon the amount awarded to the captors, shall be in full for the expenses as well as the services, and in no case to such solicitor or counsel shall there be allowed any separate and compensation as the court shall deem just under the circumstances of each case.

Sec. 33. *And be it further enacted*, That in any case of capture heretofore made or that may hereafter be made, in which the Secretary of the Navy may employ special counsel for captors when, in his judgment, the interests of the United require such employment in any particular case, for the protection of the interests of the captors and of the Navy pending the trial, the counsel so employed shall be entitled to such reasonable compensation for their services and such proceedings in the case as may be determined by the Secretary of the Navy and the commissioners, the court may allow such compensation as it shall deem just under the circumstances of the case, not to exceed one per centum upon the amount distributed thereby or upon the moiety, whether appointed by a decree of the court or by the Secretary of the Navy, and the same shall be paid out of the moiety of the United States, and the court may apportion the entire fund or from the portion awarded to the captors, but no such allowance shall be made except upon the application of counsel in which such the party the counsel represents has an adverse interest to the United states, or, where the United States is the only claimant, in which the court to be represented by special counsel, or for services rendered in a condemnation case where no claim is interposed, or for merely formal acts of the proceeds.

Sec. 34. *And be it further enacted*, That fees of special counsel in prize cause incurred or authorized by any department of the Government, or the fees of counsel or solicitors employed in the defense of claimants in the district court, not paid by claimants, nor from the prize fund in the hands of the marshal, may be allowed by the Secretary of the Navy, or by the Solicitor of the Treasury, both of whom are hereby authorized to make such allowances, for defraying the expenses of suits in which the United States is a party or interested.

Sec. 35. *And be it further enacted*, That whenever the court shall after first hearing of a prize cause, in which the United States is claimant of the district in which the court sits, and there is no money subject to its order in the hands of the marshal, or in the Treasury, directing him to repaid to him from any money deposited to the order of the court in said cause; and in all cases where the United States is claimant the court may exercise first guilt by him in cases in which the United States is a party.

Sec. 36. *And be it further enacted*, That no prize property shall be delivered to the claimants, or proceeds thereof, by the marshal, except in where there has been a decree of restitution and the captors have appealed therefrom, and given bonds with sureties to the claimants, in such sum as the court may deliver the property or stipulation or deposit of its value, if it cannot be delivered, with the like conditions as are by the United States and captors, or of other claimants, will not be prejudiced thereby; a satisfactory release shall be executed to the marshal, which shall be given to the District Attorney and naval prize commissioner to be kept as the court may direct, and upon the execution of such release and the fees of attorney, and all money collected on a stipulation, and remaining, shall, after the decree on appeal, be paid over in the same manner as the proceeds of sales.

Sec. 37. *And be it further enacted*, That whenever any captured vessel, armed or unarmed, or any other property, shall be taken into the service of the government before it comes into the custody of a prize court, it shall be surveyed, appraised, and duly described by two competent persons to be appointed by the court, and the survey, appraisement and inventory thereof shall be made in duplicate, and certified on oath by the said persons before afterwards, sufficient sureties shall first be given to enable the court to have the property forthcoming to answer the decree of the court in the case, and to pay the same.

Sec. 38. *And be it further enacted*, That no prize property shall be delivered to the claimants, or proceeds thereof, by the marshal, except in where there has been a decree of restitution and the captors have appealed therefrom, and given bonds with sureties to the claimants, in such sum as the court may deliver the property or stipulation or deposit of its value, if it cannot be delivered, with the like conditions as are by the United States and captors, or of other claimants, will not be prejudiced thereby; a satisfactory release shall be executed to the marshal, which shall be given to the District Attorney and naval prize commissioner to be kept as the court may direct, and upon the execution of such release and the fees of attorney, and all money collected on a stipulation, and remaining, shall, after the decree on appeal, be paid over in the same manner as the proceeds of sales.

Sec. 39. *And be it further enacted*, That whenever any captured vessel, armed or unarmed, or any other property, shall be taken into the service of the government before it comes into the custody of a prize court, it shall be surveyed, appraised, and duly described by two competent persons to be appointed by the court, and the survey, appraisement and inventory thereof shall be made in duplicate, and certified on oath by the said persons before afterwards, sufficient sureties must still first be given to enable the court to have the property forthcoming to answer the decree of the court in the case, and to pay the same.

Sec. 40. *And be it further enacted*, That no prize property shall be delivered to the claimants, or proceeds thereof, by the marshal, except in where there has been a decree of restitution and the captors have appealed therefrom, and given bonds with sureties to the claimants, in such sum as the court may deliver the property or stipulation or deposit of its value, if it cannot be delivered, with the like conditions as are by the United States and captors, or of other claimants, will not be prejudiced thereby; a satisfactory release shall be executed to the marshal, which shall be given to the District Attorney and naval prize commissioner to be kept as the court may direct, and upon the execution of such release and the fees of attorney, and all money collected on a stipulation, and remaining, shall, after the decree on appeal, be paid over in the same manner as the proceeds of sales.

Sec. 41. *And be it further enacted*, That whenever any captured vessel, armed or unarmed, or any other property, shall be taken into the service of the government before it comes into the custody of a prize court, it shall be surveyed, appraised, and duly described by two competent persons to be appointed by the court, and the survey, appraisement and inventory thereof shall be made in duplicate, and certified on oath by the said persons before afterwards, sufficient sureties must still first be given to enable the court to have the property forthcoming to answer the decree of the court in the case, and to pay the same.

Sec. 42. *And be it further enacted*, That no prize property shall be delivered to the claimants, or proceeds thereof, by the marshal, except in where there has been a decree of restitution and the captors have appealed therefrom, and given bonds with sureties to the claimants, in such sum as the court may deliver the property or stipulation or deposit of its value, if it cannot be delivered, with the like conditions as are by the United States and captors, or of other claimants, will not be prejudiced thereby; a satisfactory release shall be executed to the marshal, which shall be given to the District Attorney and naval prize commissioner to be kept as the court may direct, and upon the execution of such release and the fees of attorney, and all money collected on a stipulation, and remaining, shall, after the decree on appeal, be paid over in the same manner as the proceeds of sales.

Sec. 43. *And be it further enacted*, That whenever any captured vessel, armed or unarmed, or any other property, shall be taken into the service of the government before it comes into the custody of a prize court, it shall be surveyed, appraised, and duly described by two competent persons to be appointed by the court, and the survey, appraisement and inventory thereof shall be made in duplicate, and certified on oath by the said persons before afterwards, sufficient sureties must still first be given to enable the court to have the property forthcoming to answer the decree of the court in the case, and to pay the same.

Sec. 44. *And be it further enacted*, That no prize property shall be delivered to the claimants, or proceeds thereof, by the marshal, except in where there has been a decree of restitution and the captors have appealed therefrom, and given bonds with sureties to the claimants, in such sum as the court may deliver the property or stipulation or deposit of its value, if it cannot be delivered, with the like conditions as are by the United States and captors, or of other claimants, will not be prejudiced thereby; a satisfactory release shall be executed to the marshal, which shall be given to the District Attorney and naval prize commissioner to be kept as the court may direct, and upon the execution of such release and the fees of attorney, and all money collected on a stipulation, and remaining, shall, after the decree on appeal, be paid over in the same manner as the proceeds of sales.

Sec. 45. *And be it further enacted*, That whenever any captured vessel, armed or unarmed, or any other property, shall be taken into the service of the government before it comes into the custody of a prize court, it shall be surveyed, appraised, and duly described by two competent persons to be appointed by the court, and the survey, appraisement and inventory thereof shall be made in duplicate, and certified on oath by the said persons before afterwards, sufficient sureties must still first be given to enable the court to have the property forthcoming to answer the decree of the court in the case, and to pay the same.

Sec. 46. *And be it further enacted*, That no prize property shall be delivered to the claimants, or proceeds thereof, by the marshal, except in where there has been a decree of restitution and the captors have appealed therefrom, and given bonds with sureties to the claimants, in such sum as the court may deliver the property or stipulation or deposit of its value, if it cannot be delivered, with the like conditions as are by the United States and captors, or of other claimants, will not be prejudiced thereby; a satisfactory release shall be executed to the marshal, which shall be given to the District Attorney and naval prize commissioner to be kept as the court may direct, and upon the execution of such release and the fees of attorney, and all money collected on a stipulation, and remaining, shall, after the decree on appeal, be paid over in the same manner as the proceeds of sales.

Sec. 47. *And be it further enacted*, That whenever any captured vessel, armed or unarmed, or any other property, shall be taken into the service of the government before it comes into the custody of a prize court, it shall be surveyed, appraised, and duly described by two competent persons to be appointed by the court, and the survey, appraisement and inventory thereof shall be made in duplicate, and certified on oath by the said persons before afterwards, sufficient sureties must still first be given to enable the court to have the property forthcoming to answer the decree of the court in the case, and to pay the same.

Sec. 48. *And be it further enacted*, That no prize property shall be delivered to the claimants, or proceeds thereof, by the marshal, except in where there has been a decree of restitution and the captors have appealed therefrom, and given bonds with sureties to the claimants, in such sum as the court may deliver the property or stipulation or deposit of its value, if it cannot be delivered, with the like conditions as are by the United States and captors, or of other claimants, will not be prejudiced thereby; a satisfactory release shall be executed to the marshal, which shall be given to the District Attorney and naval prize commissioner to be kept as the court may direct, and upon the execution of such release and the fees of attorney, and all money collected on a stipulation, and remaining, shall, after the decree on appeal, be paid over in the same manner as the proceeds of sales.

Sec. 49. *And be it further enacted*, That whenever any captured vessel, armed or unarmed, or any other property, shall be taken into the service of the government before it comes into the custody of a prize court, it shall be surveyed, appraised, and duly described by two competent persons to be appointed by the court, and the survey, appraisement and inventory thereof shall be made in duplicate, and certified on oath by the said persons before afterwards, sufficient sureties must still first be given to enable the court to have the property forthcoming to answer the decree of the court in the case, and to pay the same.

Sec. 50. *And be it further enacted*, That no prize property shall be delivered to the claimants, or proceeds thereof, by the marshal, except in where there has been a decree of restitution and the captors have appealed therefrom, and given bonds with sureties to the claimants, in such sum as the court may deliver the property or stipulation or deposit of its value, if it cannot be delivered, with the like conditions as are by the United States and captors, or of other claimants, will not be prejudiced thereby; a satisfactory release shall be executed to the marshal, which shall be given to the District Attorney and naval prize commissioner to be kept as the court may direct, and upon the execution of such release and the fees of attorney, and all money collected on a stipulation, and remaining, shall, after the decree on appeal, be paid over in the same manner as the proceeds of sales.

Sec. 51. *And be it further enacted*, That whenever any captured vessel, armed or unarmed, or any other property, shall be taken into the service of the government before it comes into the custody of a prize court, it shall be surveyed, appraised, and duly described by two competent persons to be appointed by the court, and the survey, appraisement and inventory thereof shall be made in duplicate, and certified on oath by the said persons before afterwards, sufficient sureties must still first be given to enable the court to have the property forthcoming to answer the decree of the court in the case, and to pay the same.

Sec. 52. *And be it further enacted*, That no prize property shall be delivered to the claimants, or proceeds thereof, by the marshal, except in where there has been a decree of restitution and the captors have appealed therefrom, and given bonds with sureties to the claimants, in such sum as the court may deliver the property or stipulation or deposit of its value, if it cannot be delivered, with the like conditions as are by the United States and captors, or of other claimants, will not be prejudiced thereby; a satisfactory release shall be executed to the marshal, which shall be given to the District Attorney and naval prize commissioner to be kept as the court may direct, and upon the execution of such release and the fees of attorney, and all money collected on a stipulation, and remaining, shall, after the decree on appeal, be paid over in the same manner as the proceeds of sales.

Sec. 53. *And be it further enacted*, That if any person shall willfully destroy, or injure, or attempt to destroy, or injure, or retinue to be wrongly in, wantonly, preservation, sale, or other disposition of any property captured as prize, or in the custody of any officer or person connected with the property, or to any deposition or other document or paper belonging to such property, or in the custody of any officer of the United States, or any captor or claimant of such property, he shall, upon conviction thereof, be punished by a fine not exceeding five hundred, or by imprisonment not exceeding five years, or both, at the discretion of the court.

Sec. 54. *And be it further enacted*, That in the term "vessels of the Navy of the United States" shall be included all vessels of the Revenue-Marine service and manned by the United States, and under the control of the Secretary of the Navy.

Sec. 55. *And be it further enacted*, That the provisions of this act shall be in force in the United States and its Territories, and in the District of Columbia, and shall be adopted and ratified by the President of the United States.

Sec. 56. *And be it further enacted*, That this act shall apply to all prize proceedings now pending.

Sec. 57. *And be it further enacted*, That the act entitled "An act providing for salvage in cases of recapture," approved on the third day of March, in the year eighteen hundred and sixty-three, and the act in addition to the act concerning letters of marque, prizes and prize goods, approved on the twenty-sixth day of July, in the year eighteen hundred and fifty-six, and the act entitled "An act in addition to an act entitled an act for the better administration of the law of prize, approved on the twenty-third day of June, in the year eighteen hundred and sixty; and the second, third, and fourth sections of the act entitled "An act to promote the efficiency of the Navy of the United States," approved on the twenty-eighth day of July, in the year eighteen hundred and sixty-two, be and the same are hereby repealed; but nothing contained in said act further to regulate proceedings in prize cases, approved on the twenty-third day of June, in the year 1860, approved on the third day of March, eighteen hundred and sixty-three, and the other acts and parts of acts hereinbefore herewith are hereby repealed.

VARIOUS NAVAL MATTERS.

SLOOP *St. Louis*, 16, Commander G. H. Preble, was at Algesiras June 9, waiting orders.

MAJOR ALEXANDER Ryland, commandant of marines at the Mare Island Navy Yard, is dead.

The gunboat *Galatea* was spoken June 22, lat. 33 25, lon. 19 29, cruising; all well.

The U. S. steamer *Kearsarge* was in Flushing Road on the 12th of June, and passed Deal on the 13th June, bound west.

The following vessels were at Pensacola, June 15:—*Lackawanna*, *Seminole*, *Metacomet*, *Oneaco*, *Penobscot*, *Conifer*, *Octorara*, *Jamestown*, *Princeton*.

SURGEON EDWARD F. Gorson, of the *Mohican*, died at his father's residence at Plymouth, Pa., on the 23d ult., of a fever contracted in the discharge of his duty. He was one of the youngest surgeons in the service, but stood high in his profession.

THE San Francisco Chamber of Commerce and Board of Supervisors will memorialize Congress to increase the bounty on timber intended to be constructed forthwith. All her parts have been saved, but the contractors refused to do the work on account of the desperation of greenbacks, since their contract, made eighteen months ago.

A CONSTRUCTION has been received by the Navy Department, from Admiral Dahlgren, in relation to the capture of the expedition to the Atchafalaya River, by Lieutenant-Commander Ramsel, with the steamers *Chillicothe*, *Neosho* and *Fort Hindman*. When about a mile and a half down the Atchafalaya River the above steamers fell upon them. The rebels were driven away, and the battery, containing two 32-pounder Parrotts, was captured. One of the guns, however, was rendered useless by the rebels before capture. Our loss was small—one man only being wounded, it is thought, mortally.

THE U. S. steamer *Eolus* has received orders to report for block, and will proceed to Wilmington, N. C., on the completion of her repairs, for the purpose of exchanging her heavy guns for some of smaller calibre, and was to proceed to sea as soon as she was in readiness. The steamer *Nansemond* was ordered to Norfolk for the same purpose, and relieved by the U. S. steamer *Sassacus*. The iron-clad monitor *Tecumseh* has been ordered for duty at Mobile.

On Friday the 17th inst., the 30-pounder rifled Parrott in the gunboat *Commodore Perry*, in the James River, burst at the breech, instantly killing one man and wounding six others. On the day previous, the same gunboat had two guns exploded, the explosion of the rebel Fort Clifton with the heavy rifled Parrott, and did considerable execution. Two of the rebel guns were dismounted and the others were injured.

The following additional prize cases have been adjudicated by the Fourth Auditor, and are ready for payment:—*Fort Henry*, captured *Anna Dale*, *Ida*, *Ida Bell*, *Lizzie*, *Robert Bell*, *Rosa*, *Sarah Jane*, *Swan*, *Venus*, captured 14 bales of cotton. *De Soto*, captured *Montgomery*. *Sea of the Sun*, captured *Richard*. *San Jacinto*, captured *Lizzie Weeks*. *Commodore Perry*, captured *Rosebud*, *Rosebud*, *Rosebud*, and 10½ bales of cotton. *Adolph Hugel*, captured cargo of the schooner *Katie*. *North Point Packet*, captured *Goose Bird*.

The *New Ironsides*, which arrived at Philadelphia on Friday of last week, has been on duty in Charleston harbor for eighteen months, and during that time has participated in eighteen engagements, in all of which only one man was killed, Acting Ensign Charles W. Howard, and a sailor wounded. She was hit 222 times in one engagement. Only two of the shots penetrated her armor of iron and wood, and one of these struck a locker, doing very trifling damage. In one engagement, lasting four hours and ten minutes, they fired 723 shells, weighing 155 pounds each. On another occasion they fired 337 shells in three hours and ten minutes. The work of repairing her will begin at once. The following is a list of her officers:—Commodore, Stephen C. Rowan; Lieutenant-Commander, T. Pickens Dunlop; Surgeon, M. Darrell; Paymaster, Georgs Plunkett; Chief Engineer, Alexander Greer; Lieutenants, H. B. Robeson, J. J. Read and J. Barlow; Marine officers, Lieutenants E. A. Bartlett and George B Haycock; Acting Master, Alex. Shillings; Assistant Engineers, S. S. Littig, J. J. Noble, R. Patullo, H. O. Beckwith, F. T. Saunders, and William C. Wilkes; Acting Assistant Surgeon, Mann, J. C. Caswell and Thomas Hedden.

On the afternoon of June 15, 1864, while the crew of the U. S. Supply *Pocahontas* were bathing and in the harbor of Cape Haytien, the commander of the *Pocahontas* felt from the vessel's yard, and, although his fall was much broken by striking the awning in his descent, the poor fellow died from the effects of the injury received on his way down. The deceased was a native of Ireland, was much esteemed by both the officers and his shipmates. He left a mother who depended on his entirely for support. Contributions to the amount of over one hundred dollars were at once raised and handed among the officers and crew of the *Pocahontas* for the deceased's mother.

THE Bermuda *Royal Gazette*, a file of which to June 14 has been received, records the recent arrival at that place of various steamers, with valuable cargoes, from Wilmington, North Carolina. On the 8th, they say, the *Advance* had safely arrived from Wilmington, N. C., with 621 bales of cotton; on the 9th the steamer *Index*, Captain Marshall, arrived with 805 bales of cotton and 200 boxes of tobacco; on the 10th, steamer *Cornubia*, Captain Lewis, arrived from same port, with 536 bales of cotton, 150 half barrels and 627 boxes of tobacco; on the 11th, steamer *Celeste*, Captain Dixon, arrived from same port, with 494 bales of cotton and 200 boxes of tobacco; and on the 13th, steamer *City of Petersburg* arrived from same port with 619 bales of cotton and 200 boxes of tobacco.

THE U. S. steamer *Unadilla*, 7, Lieutenant Commanding James Stillwell, arrived at Philadelphia on the 29th, from the South Atlantic Blockade Squadron. The *Unadilla* comes North for repairs to her hull and machinery.

THE proceedings of the Court of Inquiry at the Charlestown Yard, in the case of Com. Stephen D. Trenchard, U. S. N., commander of the Navy Yard at Boston, have been forwarded to the territorial jurisdiction of Great Britain by pursuing and firing into the British steamer *Margaret and Jessie* within the said jurisdiction, and the decision of the Court is that Com. Stephen D. Trenchard commander Trenchard was desirous and anxious to avoid any violation of said jurisdiction, and was also of opinion that no violation of it was committed by the vessel pursued, and that the firing was ordered by the Secretary of the Navy, but Commander Trenchard is virtually exonerated from all blame, and will be restored to his command.

CHARLES has been relieved at the Charlestown Yard for the immediate construction of another steam sloop-of-war of about 200 feet in length and 2,500 tons burthen. Her frame will be set up on the ways now occupied by the *Kearsarge*. Extensive improvements are planked up and will be completed with dispatch. The four-sided *Monadnock* lies under the sheers at the lower yard, and will not be ready for service for some weeks. The number of men on board the receiving ship is now over the thousand.

AT the Brooklyn Navy Yard there are at present under the care of the naval constructor and his assistants, the following iron steamers and other vessels. The vessels which have sailed the past week have been the steam-tugs Vesco and Goss on the 22d, also the steam-tug Catskill on the 23d, and the steamer *Ethan Allen* and *Sumpter* on the 28th. The *Neptune* arrived on the 24th, and the *Tatnuc* on the 25th. The steamer *Susquehanna* has had some difficulty in getting her machinery to work satisfactorily, and her commander, Captain Bell, will probably be ready for sea in about two weeks. The *New Hampshire* will be ready for launching in the course of the month. *Sangor* and *Fulton* are expected to be complete within the week. The ground for her officers on board, and is waiting orders. The supply steamer *Supply* is ready for sea, and will probably sail in a few days. The steamer *Admiral* for the Gulf on the same day. She will not stop at Port Royal; but will land mails and passengers at Key West.

BELLIGERENT CRUISERS.

The following important instructions have just been sent by the English government to the Governors of colonies, respecting the treatment of prizes captured by Federal or Confederate cruisers, if brought into British waters:—

DOWNING STREET, June 1, 1864.

SIR—I think it well to communicate to you the decisions at which her Majesty's government have arrived in the recent questions which have arisen respecting the treatment of prizes captured by Federal or Confederate cruisers, if brought into British waters.

1. If any prize captured by a ship of war of either of the belligerent powers shall be brought into any of the ports of her Majesty's jurisdiction, notice shall be given by the Governor to the captain immediately to depart with such prize.

2. A vessel which shall have been actually and bona fide converted into a ship of war shall be deemed to be such ship of war, and to be entitled to be a prize, within the meaning of these rules.

3. The Governor of each colony in which her Majesty's jurisdiction is thereby more rivers of wealthier or other extent and unavailable to belligerent ships of war generally, may, for her convenience, draw up such rules as may conduce to be necessary.

4. No ship of war shall be removed at the time prescribed in the captors by the Governor, the Governor may detain such prize until the expiration of twenty-four hours after her departure.

5. If any prize shall have been captured in violation of the neutrality of any port or waters of the colony, the Governor may detain such prize until her Majesty's pleasure be known.

6. The Governor may, where he may not thought it necessary to take any additional measures for the execution of the foregoing rules, or where he may consider her Majesty's orders apply as much to prize cargoes or vessels which may be brought by any armed ships or privateers of either belligerent into British waters as to the captured vessels themselves. Such orders may extend to all cases in which any have formed part of any such cargoes if brought within British waters, and may be applied to cargoes which have been transshipped, but by other persons who may have acquired or may claim property in the same, after the first capture as prize.

These rules are the full guidance of the executive authority, and will be observed by you in any way with reference to any court of justice. I have, &c.,

EDWARD CARDWELL.

BRIGADIER-GENERAL A. L. Chetlain, United States Volunteers, is charged with the immediate supervision of the organization of colored troops in Kentucky, subject to such instructions as he may receive from Brigadier-General L. Thomas, Adjutant-General, United States Army. The assignment of Brigadier-General Chetlain to this duty will in no way interfere with his present position as commander of colored troops in West Tennessee. General Chetlain will establish his headquarters at Louisville, Ky.

ARMY GAZETTE.

OFFICIAL DISPATCHES.

SIXTY-EIGHTH DISPATCH.

WASHINGTON, Tuesday, June 28.

To Major-General Dix:

A despatch from Lieutenant-General Grant, dated yesterday, the 27th, at 2.30 P. M., at his headquarters, reports that his operations in front extend from our own grain, which fed into the bridge at Petersburgh from a diameter of two thousand yards. The dispatch gives the following intelligence from rebel papers:—A Petersburgh paper of the 25th inst. states that General Kershaw's division, of Longstreet's corps, about forty miles south of Richmond, and near that of Beauregard, with which they suppose he will do with most of his forces, will join that of Hoke, and will be safe.

The same paper accuses General Hunter of destroying a great amount of private property, and stealing a large number of wagons, horses and mules.

Its same paper also states that General Wise destroyed a train of 150 loaded with provisions and forage, which could not be brought up on account of the destruction of the track, and was still pushing south.

A despatch from General Sherman, received this morning, reports that yesterday, June 27, no material change had occurred in the position of the enemy's position, which resulted in a loss of between two and three thousand. The following particulars are given:

Pursuant to my orders of the 24th inst. a diversion was made on each flank of the enemy yesterday morning, the fourth inst. At 9 A. M. General McPherson attacked at the southwest end of Kennesaw, and General Thomas at a point about a mile further south. At the same time Schofield's skirmishers and artillery along the whole line kept up a sharp fire. Neither attack succeeded, though General Thomas reached the enemy's works which are very strong.

General McPherson speaks for his loss about 500, and General Thomas about 2,000.

The loss is particularly heavy in general field officers. General Harrow is reported mortally wounded; also, Colonel Dan. McCook, commanding a brigade; Colonel Bice, Fifty-second Ohio, severely wounded; Generals Schaff, Fortieth Illinois, and Augustine, Fifty fifth Illinois, are killed.

General McPherson took one hundred prisoners and General Thomas about as many. I will be able to report more fully to-morrow. I am well, as is my staff, except Colonel Strong, who is sick.

EDWIN M. STANTON, Secretary of War.

SIXTY-NINTH DISPATCH.

WASHINGTON, June 28, 1864—7 P. M.

Major-General Dix:

The following despatch has just been received from General Banks:

"I have to-day the report that our expedition up the Red river was successful, inflicting great injury upon the enemy, and returning in every respect safe. Among the slain of distinguished rebels, was Governor Moore, who is eulogized by the rebel papers as a man of great ability, and the leading spirit of Louisiana. Among the wounded is Governor Allen, who is reported mortally wounded. Our loss in killed, wounded and missing will be about 2,000. The loss of the enemy is much greater. Among the captured are Generals Mouton, Polignac, Green, Wilson, and Major-General Taylor's son-in-law. The enemy's force was about 30,000, and ours about 20,000. The expedition left Alexandria on the 10th inst., and returned on the 26th inst. Our forces have captured and destroyed a large amount of cotton, and have brought away a large number of horses and mules. The expedition has been a complete success."

EDWIN M. STANTON, Secretary of War.

MAILS TO AND FROM CITY POINT.

HEADQUARTERS ARMIES OF THE UNITED STATES, CITY POINT, June 28, 1864.

Special Orders No. 147.

To further facilitate the transmission of the mails to and from the armies operating before Petersburgh and Richmond, the following regulations are published:

1. Lt. Markland, an authorized agent of the Post Office Department, at City Point, Va., will receive and forward all army mails to their destination. Commanding officers of detachments will, on his application, detail from the rocks to report to him such number of men as may be necessary to assist in the proper discharge of his duties.

2. Army corps commanders will appoint from officers detailed for field service or from non commissioned officers, persons to act as corps postmasters, who will report in person at least once a week to the agent of the Post Office Department at City Point all mail matter from their corps, and receive, sort, forward and distribute properly and promptly all mail matter that may arrive at City Point for the corps.

3. Corps postmasters will put up in neatly-tied packages all letters received for, and in postal letters around for the unpaid letters, marking each package "paid" or "unpaid," as the case may be, and distribute to the different commands accordingly.

4. The agent of the Post Office Department will furnish twine and wrapping paper to corps postmasters.

5. Transportation for mails from City Point will be provided by the Quartermaster's department.

By command of Lieutenant-General Grant:

T. S. BOWERS, Assistant Adjutant-General.

ORDER CONCERNING ENROLLMENT.

WAR DEPARTMENT, PROVOST-MARSHAL-GENERAL'S OFFICE, WASHINGTON, D. C., June 23, 1864.

Circular No. 21.

The attention of Boards of Enrollment is called to Section 6 of the Act approved March 3, 1863, entitled "An Act to amend the Enrolling Acts."

Sec. 6. *And be it further enacted*, That Boards of Enrollment shall and they are hereby liable to and under the provisions of this Act, and the Act to which this is an amendment, to enroll and draft any men known to them to be persons liable to draft, officers, all persons who shall serve at the age of 20 years before the draft, and all persons who shall come into the service of the United States after they have been exempted under the provisions of the Act to which this is an amendment, or who are not exempted by the provisions of the Act; and said Boards of Enrollment shall enroll and draft all persons, and all persons who, between the time of the enrollment and draft, shall have arrived at the age of 20 years, and shall not be exempted by law or persons from the enrollment."

Attention is also called to paragraphs 84, 85, 87, 88, 89, 90, 91 and 92 Revised Regulations for the Bureau of the Provost-Marshal-General.

It is to be borne in mind by the Boards, that their duties in regard to the enrollment of the enrolled men will be over with the revision as recently completed or now in progress. On the contrary, the revision and correction of those lists is a continuing service, by which the lists of all Boards must be directed. The names of persons who have died, or who have left the State, or who have been drafted the last time, or sufficient thereof must be served upon the other Board of Enrollment concerned.

The Boards will also ascertain and report to the Enrollment Bureau upon the examination of the public and private records of their respective public offices, what persons have been drafted, and report to the Board and claim to have a name stricken off the list. Also, to report to the adjutant of the Board, that the name of a person has been duly enrolled on account of 1. Alienage? 2. Non-residence? 3. Over age? 4. Permanent physical disability? 5. Any degree in which the person non a proper subject for enrollment under the law and regulations.

Civil officers, clergymen, and all other prominent citizens are invited by a paper at all times before the Board to point out errors in the lists, and to give such information in their possession as may aid in the correction of those lists.

To the duty of hearing and acting upon claims for exemption, appeals from persons who claim to be over the age of 45 years, &c., is opened from other less pressing duties. They will report to the Provost-Marshal-General, at the expiration of every month, on the 1st day of each month, upon blanks of Consolidated Enrollment Lists, the names and residences of all persons who have been added to or stricken from the rolls during the month. They will send with such report a descriptive list of each person, the name of whom is enrolled at the time of forwarding the last list, the number stricken from the enrollment, and the reason for so striking from the list, and *its actual condition at date of report.*

JAMES B. FRY, Provost-Marshal-General.

SUBSTITUTION OF EXEMPTS.

WAR DEPARTMENT, PROVOST-MARSHAL-GENERAL'S OFFICE, WASHINGTON, D. C., June 20, 1864.

Circular No. 23.

PERSONS NOT FIT for military duty and not liable to draft, from age or bodily infirmity, may be substituted for drafted persons or volunteers in the Army. In addition to the contributions they have made in the draft, they will be required to furnish a substitute, or pay the commutation money, in order to be relieved from liability. A special application to the proper Board of Enrollment is necessary in all such cases, and all persons claiming exemption on account of bodily infirmity will be required to appear before the Board for examination, and to produce the certificate of the personal representative in the service will be forwarded from this office, to be filled out and and attested by Provost-Marshals of the States, and by Commissioners of Recruiting.

JAMES B. FRY, Provost-Marshal-General.

CONCERNING MEMBERS OF CONGRESS, HEADS OF DEPARTMENTS, AND OTHER OFFICERS.

WAR DEPARTMENT, ADJUTANT-GENERAL'S OFFICE, WASHINGTON, June 15, 1864.

General Orders No. 212.

The following act of Congress is published for the information of all concerned:

PUBLIC—No. 87

An act relating to members of Congress, heads of Departments, and all other officers of the Government.

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That no member of the Senate or House of Representatives shall, after his election and during his continuance in office, be appointed to any civil office of emolument, head of a bureau, clerk, or any other officer of the Government, except in the line of promotion in any competitive service, directly or indirectly, for any services rendered, or to be rendered, after the passage of this act to any person or party by himself or another, in relation to any proceeding, contract, claim, controversy, charge, accusation, demand, or to any other matter to be prosecuted before the United States, the Military Commission instituted by Special Orders No. 1, dated Headquarters Department of Washington, or naval commission whatever. And any person offending against any provision of this act shall upon conviction thereof be punished by a fine of not more than $10,000, or by imprisonment for not exceeding ten thousand dollars, and by such other punishment, not exceeding two years, at the discretion of the court trying the same, and shall be, forever there after incapable of holding any office of honor, trust, or profit under the Government of the United States.

Approved June 15, 1864.

By order of the Secretary of War:

E. D. TOWNSEND, Assistant Adjutant-General.

COMMUTATION OF FUEL AND QUARTERS.

WAR DEPARTMENT, ADJUTANT GENERAL'S OFFICE, WASHINGTON, June 6, 1864.

General Orders No. 208.

All buildings and structures of whatever kind, or tents in the possession of the troops of the United States, or hired by or required, for the time being, as the property of the Government, and are to be used for military purposes, or which may be erected upon ground owned by the Government, or tents in the possession of the United States, no matter whether owned or hired, are hereby declared to be military stations, and shall be designated as such by the Quartermaster General of the Government. No such officer or enlisted man, in the service of the United States, shall receive commutation of fuel and quarters unless paid in such cases, will be immediately refunded. Officers of the Quartermaster's Department, at the head of their respective offices or stations, or to any officer serving personally in the field, will immediately report to the Paymaster General, by naval communication, the names of those to whom they have been made, to the Paymaster General, by naval communication, the names of those to whom they have been made, to the Paymaster General, by naval communication, the names of those to whom they have been made,

CASUALTIES among Officers of the 1st Brigade, 3d Division, 6th Army Corps, Wounded in the Battle of Wednesday, in the Battle of Gaul River, Va., June 3, 1864:—

1st Lieut. Wm. Cox—Major W. Hubbell, mortally wounded—Captain W. H. Morris, slightly.

93rd Pennsylvania Vols.—Adjutant E. Swaine, mortally wounded; Lieutenant George Smith, slightly; Lieutenant Louis Lichtenberger, captured.

107th Pennsylvania Vols.—Lieutenant-Colonel W. L. McIlvaine, severely wounded and captured; Major Mitchell Lewis, slightly—Captain W. S. Day, slightly; Lieutenant George Duff, mortally; Lieutenant Joseph Jones, severely; Lieutenant Wm. Hall, slightly.

139th Pennsylvania Vols.—Lieutenant-Colonel W. H. Moody, severely wounded and captured; Lieut. A. Dyer, severely—Captain C. Farr, fatal; acquitted, Captain E. C. Sedgwick, fatal; acquitted; Lieutenant Wm. Hall, severely—Lieutenant A. S. Warner, severely; Lieutenant A. Watson, severely.

THE OFFICERS AND HIS MEN.—The following observations by the Rev. Dr. Henry Ward Beecher are worthy the attentive consideration of every officer:—

The moral character of a regiment, be it good or bad, fairly reflects the moral character of those of the officers in the well-being of their men. The soldier wanders out of garrison or encampment, and comes in contact with vice. There is no inducement to remain within the precincts of the barrack square. He goes abroad in search of amusement, and he finds the most convenient for his comfort leading him on to ruin. This would not happen if regimental officers did their duty to their men. It is not merely the duty of an officer to drill his company, to manœuvre his troops or regiment, to mount guard, to sanction promotions, to see the pay issued, to sign monthly returns, and to wear a coat with a standing collar. The officer has higher duties to perform; a duty to his Sovereign, a duty to his neighbors, a duty to his God, and a duty to discharge in the observance of these military formalities. He stands in *loco parentis*—he is the father of his men. His treatment of them should be such as he would for their comfort and satisfaction, and incite in them a strong feeling of shame on being detected by him in the commission of unworthy actions. It is his duty to study their characters, to interest himself in their pursuits, to enhance their comforts, to assist and encourage with counsel and praise every good effort, to extend his sympathy to them in distress, to console them in affliction, to show by every means in his power that he considers them as members of their kindred, they have yet a friend upon earth who will not desert them. These are the duties of the officer to his men, which cannot be performed without an abundant recompense.

MARRIED.

IRWIN—SPARE.—At St. John's church, Quincy, Ill., on the 20th inst. by Rev. H. N. Sloving, D. D., Rt. Rev. D. Irwin, Bishop of Western Africa, to Miss Sarah Spare, of Quincy, Ill.

NATIONAL PHOTOGRAPHIC GALLERY,

763 Broadway, corner of 10th street,

NEW YORK.

Mr. M. B. Brady begs to announce that in addition to his collection of Historical Portraits, begun by the late Hon. Wm. H. Seward, and continued by George of the Leslies' Executive Committee, the Illustrated Record Committee, the Art Journal Committee, and the Sanitary Committee of the Metropolitan Fair, he has now in progress a collection, including the most interesting views of the present struggle as well as portraits—which, when completed, will be the most complete and extensive ever brought into prominence by the exigencies of the times.

Copies de Visite of all celebrities constantly on hand.

THE NORTH AMERICAN REVIEW.

No. CCIV.—For JULY, 1864.

Edited by

Prof. JAMES RUSSELL LOWELL

AND

CHARLES ELIOT NORTON, Esq.

CONTENTS.

ART. I.—A Physical Theory of the Universe.
II.—The Progress of Ships of Marginal Women.
III.—The Sympathy of Races and Time.
IV.—Recent Publications on Indian Affairs.
V.—The Navy of the United States.
VI.—Old Times in Virginia.
VII.—A National Currency.
VIII.—The Political Crisis and our Consequences.
IX.—Critical Notices.

The North American Review will maintain, in the hands of its new editors, its established reputation for fairness and impartiality in the discussion of current questions in politics and literature.

Edited in the interest of no party, clique, or publishing house, its discussions and criticisms, whether political, social, or literary, will be entirely free from prejudice, partiality, or bias.

Thoroughly national and loyal in its spirit, devoted to the encouragement and elevation of American Literature and of a higher standard of criticism, it claims the support of all who have at heart the best interests of our country.

The North American Review is published quarterly for three dollars per annum, or seventy-five cents per number. The numbers of about three hundred pages each, containing matter equal to four octavo volumes of ordinary size.

Terms.—Five dollars a year, or one dollar and twenty-five cents per number.

CROSBY & NICHOLS, Publishers,

117 Washington-st., Boston.

Supplied in New York by the American News Company, and D. G. Francis.

THE SALEM LEG.—Send to the Salem Leg Company, Salem, Mass., for Circular Number Four. It contains a description of the Leg, a list of testimonials, references, and other artificial legs, testimonials in its favor from eminent surgeons, and many of the cases which have been treated by this original and ingenious method.

This Leg is under the patronage of the United States Government, for the use of the Army.

D. VAN NOSTRAND,

192 BROADWAY, NEW YORK.

Have recently published the following works:

LIFE OF NAPOLEON.

By Baron Jomini,

General-in-Chief and Aide-de-Camp to the Emperor of Russia.

Translated from the French, with Notes,

By R. W. Hallock, LL.D.,

Major-General United States army; author of "Elements of Military Art and Science;" "International Law and the Laws of War," &c., &c.

In four volumes octavo, with an Atlas of Sixty Maps.

Price, in red cloth binding.....$35 00.

"It is accident to say anything in praise of Jomini as a writer on the science of war."

"General Halleck has told the professional soldier and the student of military history under equal obligations by the service he has done to the cause of military literature in the preparation of this work for the press. His rare qualifications for the task thus undertaken will be acknowledged by all."

"The notes with which the text is illustrated by General Halleck are not among the least of the merits of the publication, which, in this form, has a value not possessed by the original work."

"It is an inspiring autobiography of the Emperor as conceived and written by JOMINI in the name of the EMPEROR, and whether regarded as a military study or as a single history, is the most interesting to professional and unprofessional readers."—*National Intelligencer.*

"In Jomini's hands the great events of Napoleon's career become so many illustrations of a great science, his difficulties so many abstract problems, and his triumphs the scientific solution. The narrative is brief, divested of unnecessary rhetoric, but clear and exact, and the remarks in which from time to time his scientific deductions are stated or events are summed up, are logical, perspicuous, simple and complete."—*Boston Daily Advertiser.*

THE FENINSULAR CAMPAIGN AND ITS ANTECEDENTS.

As developed by the Report of Major-General George B. McClellan and other published documents. By D. H. Mahan, Lieutenant-Colonel of Engineers, and Brigadier-General of Volunteers, and Chief Engineer in the Army of the Potomac from the organization to the close of the Peninsular Campaign. 1 vol. octavo with map. Cloth, $1 00.

NAVAL BOOKS.

THE NATIONAL MILITARY JOURNAL.

OF THE

UNITED STATES

ARMY AND NAVY JOURNAL,

AND

Gazette of the Regular and Volunteer Forces.

Officers of the Army and Navy will find in this Journal the only paper in the United States exclusively devoted to Military and Naval affairs, and the only one in their interest which has ever secured sufficient circulation and influence in this country to enable it to meet its cost so long felt, of an organ which should adequately represent them in the Press. Starting under the most favorable auspices, enjoying the encouragement and aid of a large number of officers in the country, wielding politics and partisanship of all kinds, and entered into with eagerness of purpose to the impartial discussion of military questions, and to the dissemination of correct information, it has, in less than six months, established the position as the authoritative organ of military discussion and criticism in the United States. The terms with which it has secured a circulation, hardly credited by that of any paper of its class in the world, and the enormous mail which it has been created in the Army and Navy, and by the more intelligent of civilians, present to the necessity for such a Journal, and afford gratifying evidence that the effort to establish a paper which should stand side by side in utility and completeness with the best of the military Journals of England and France, has not been in vain. As a Gazette of Military and Naval matters, it is proving itself indispensable to officers and soldiers who desire to keep the intelligent observer of the war it must be invaluable for its accurate history of military operations, and for its judicious suggestions and discussions of the questions of the day in the line of the ablest military writers, and its special preference information in fuller, more accurate, and scientific than that of any paper which has ever issued in this country.

Of the numerous notices of the newspaper press we have room only for the following:

From Major-General George G. Meade.

"I have received several numbers of the Army and Navy Journal, and have been much gratified at the evidence they bear of the promises of success in the future. It is difficult to conceive how a better publication can be maintained."

From Major-General W. H. French.

"I say that the Army and Navy Journal is commencing its career under the auspices of a representation of our present military establishment."

From Major-General Charles Sykes.

"Your Journal starts with good will to the army. I cordially recommend it to the notice of the members of the army. Its success will be complete, and deserved. I consider the project a most happy one."

From Commodore J. C. Long, U.S.N.

"Your Journal is not only the best, but the only paper of the kind that has ever been published in the United States."

From Major-General O. H. Tillman.

"It will afford me much pleasure to recommend the Army and Navy Journal to officers of my command. I have read it and I take this opportunity to express the satisfaction with which I find it conducted."

From Prof. H. Coppee, *University of Pennsylvania.*

"I have received the first number of your new paper. Every former effort within my knowledge has been a failure; but I feel confident that you will succeed. The Army and Navy are deserving of and need an able international—its excellent articles on military subjects, and its full and accurate reports of naval affairs, would be invaluable. In short, your prospectus satisfies: and your own military experience will enable you to carry out your plans. I wish you success in your service."

From the New York Times.

"The Army and Navy Journal has shown itself entitled to the favor it has received. It has secured the services of many of the most distinguished officers of the army and navy and military editors, who spoke from their knowledge of the wants of their profession, and who knew how to supply them. It should be taken by every army officer in the field. It is the only paper which gives the army and navy the news which they want to know, and which they can get nowhere else. It is the only paper which gives the official reports of battles, while we have such a deep interest in all military affairs, and is the only chronicler of the highest value and interest.

From the Boston Post.

"The Army and Navy Journal has proved a success from the start. Its editorship originally was ably conducted, and thereby conducted, this paper leaves little to be desired. It is a weekly publication of sixteen pages, and in its already attained to a very respectable number of thousands of regular and permanent readers. It has the largest circulation of any paper in the United States. Among the contributors to its columns are many officers of distinction, and the letters from the army of the Potomac and other departments by officers of the staff, and of subordinate rank, are of the highest interest. Its correspondence with the general public, who now take such a deep interest in all military affairs, will be a chronicle of the highest value and interest.

From the Boston Journal.

"The Army and Navy Journal has proved a success from the start. Its editorship originally was ably conducted, and thereby conducted, this paper leaves little to be desired. It is a weekly publication of sixteen pages, and in its already attained to a very respectable number of thousands of regular and permanent readers. It has the largest circulation of any paper in the United States. Among the contributors to its columns are many officers of distinction, and the letters from the army of the Potomac and other departments by officers of the staff, and of subordinate rank, are of the highest interest. Its correspondence with the general public, who now take such a deep interest in all military affairs, will be a chronicle of the highest value and interest.

From the New York Tribune.

"It is rare now-a-days to see such stupid criticisms of new publications as the ordinary reviews of the daily and weekly press exhibit weekly made its appearance. We commend it as the only paper which can be relied upon for leading military facts, a periodical of which the country may well be proud."

From the New York Herald.

"We can honestly and heartily recommend it as one which will be found indispensable to officers of the army and navy, and to all persons who desire to obtain accurate, intelligent and impartial information. It is worth all the other papers put together for accurate information about the army and navy."

From various Journals.

"The best authority in military matters."—*New Haven Palladium.*

"There is nothing partisan or political about it, and it is the only paper published in this country for leading military and naval men."—*Boston Transcript.*

"Contains an able review of the situation, shrewd criticisms on military movements, and a large amount of interesting matter valuable for reading, preservation, and reference."—*Cincinnati Gazette.*

"The best military journal now published, and no honor is misplaced to the service."—*Albany Evening Journal.*

TERMS.

The terms of the paper are Five Dollars a year, payable in advance to Army and Navy Journal, 192 Broadway, New York. Single copies, Ten Cents. For sale by all newsdealers. It is published weekly in a large sized quarto sheet of 16 pages, handsomely printed, and printed in the best manner on fine paper.

By a recent arrangement with Mr. DERINGER, the subscribers have obtained the exclusive agency for New York and New England, of the well-known pocket arm of which he is the inventor and only manufacturer. They propose keeping constantly in store a full assortment of the various sizes and varieties of the unique pistol, and will be at all times able to fill Orders for which they have hitherto been necessarily delay. The arrangement has been made necessary on account of the great demand, in order to protect the public from spurious and worthless imitations of the name, and to guarantee only, wholesale or retail, will be sole who appreciate this fact.

JUST PUBLISHED.
CHAPLAIN QUINT'S ARMY NOTES.
THE POTOMAC AND THE RAPIDAN ARMY
From the Failure at Winchester to the Reinforcement of Rosecrans. 1864.
BY ALONZO B. QUINT,
Chaplain of the Second Massachusetts Infantry.
1 vol. 12mo.—pp. 400.—Price $1 75.
With a Map of the Virginia Campaign.

Mr. Quint is widely known as one of the most popular and effective writers for the religious press, while his army letters have been so generally read and commended at the North, that it is unnecessary to say that his statements are reliable and his views comprehensive. *The Potomac and the Rapidan Army* of the most late, seeing volumes pertaining to the Rebellion yet published, containing, as it does, a full and detailed sketch of the Campaign in the Shenandoah Valley under GEN. BANKS, and the movements of the Army, MCCLELLAN, BURNSIDE, POPE and MEADE.

* Orders from the Trade solicited.

CROSBY & NICHOLS,

THE CAMPAIGN IN VIRGINIA.

REVIEWING the operations of the last ten days in front of Petersburgh, it will be seen that since the two affairs near the Weldon Railroad on the 22d and 23d of June, the main Army has been comparatively at rest. Our loss in prisoners by the former engagement is now stated by alleged official count of the enemy, to be about 1,700 men and officers. After the sudden envelopment of the fine Vermont brigade of the Sixth corps, upon the 23d, the troops were massed more closely in the direction of the Jerusalem road. Divisions of the Fifth corps were rapidly moved down to supporting distance on the same evening, and our line was sheltered by throwing up breastworks. The next morning, Friday, marchings and countermarchings to get position and to strengthen the line, were promptly conducted, and, during the process, a part of the Fifth corps was at one time brought under a hot and accurate artillery fire from the enemy, which was eventually checked by our batteries. The enemy, however, had, in the main, withdrawn from its advanced position on our left, towards the railroad again, and now concentrated a tremendous fire on the Eighteenth corps at the right. As this corps held the southerly bank of the Appomattox, to which its right nearly reached, the enemy was able to open a series of heavy batteries on its flank from the opposite side of the river, which is held by him. Fortunately, strong works had been thrown up to guard against an enfilading fire from this quarter, and the men were well protected from the iron shower. This commanding, accordingly, though one of the most startling and terrific of the campaign, effected little damage. The charge by HAGOOD's brigade on BURNEY's brigade, at its extreme right, as has been described, in our capture of the attacking skirmish line, consisting of rather more than 150 men of the Eleventh and Twenty-seventh South Carolina. The position occupied by Colonel HENRY's brigade, whose right is about 300 yards from the Appomattox, is more favorable for assault than any other on the front of the corps, as the enemy can approach nearly all the way under cover. Their skirmish line was decoyed by Colonel HENRY into his "French pits," from which, of course, they could not get out. In rear of the skirmishing regiment were two or three brigades, who speedily returned. Our loss is killed and wounded was very small, much smaller, obviously, than that of the enemy. The entire loss was 306.

On the opening of this main attack, the artillery at other points of the line, and especially in front of the Fifth and Second corps began a rapid fire. For a short time the roar was continuous. But at these other points, it died away rapidly, and a slight demonstration of infantry in BURNEY's front, was speedily repelled. After more than an hour of incessant thunder of cannon and mortars, and crash of bursting shells, in SMITH's front, there was a lull also there. During all the day of Friday, however, there was a rattling fire along the picket lines, the sharpshooters of the two Armies rivalling each other in fatal dexterity. Desultory cannonading also broke out here and there, and, during the forenoon, the enemy shelled the batteries in BUTLER's front with some spirit, but no damage. In the afternoon there was a little skirmishing on the left of the line, in front of the Sixth corps, and our forces crept out slowly towards the enemy, who was found to have retired from the advanced breastworks held by him on the day preceding. In this direction, there were mysterious general movements by the enemy, and our own forces were marched to anticipate him; but nothing serious was attempted.

On Saturday, the 25th, SHERIDAN's cavalry, consisting of TORBERT's and GREGG's divisions, succeeded in crossing the James safely, four or five miles above Fort Powhatan, where the pontoon bridge could be guarded by gunboats, and the enemy kept away from his rear. The wagon train was several miles in length, and the cavalry in addition, marching across two abreast, and about six thousand strong, made the passage an extended one. The enemy was active upon SHERIDAN's rear, but, with the aid of the gunboats, the latter was soon safe. Loud as have been the praises of this cavalry expedition, it is pretty certain that both its use and its glory have been overestimated. Its movement towards Gordonsville was less successful than had been anticipated. It traversed an exhausted region, and what with terrible heat and drought, and roads pulverized into dust, the horses became badly jaded. Men and animals were both wearied by the long march and the lack of food and forage. WADE HAMPTON followed the column all the way, but did not venture to seriously harass it until towards its close, when he coolly crossed the Mattapony and Pamunkey ahead of SHERIDAN, outrode him, and made that attack on the trains which SHERIDAN had fortunately left at White-House, of which an account has been given. General ABERCROMBIE, with two or three thousand men and some field artillery, and especially with the gunboats, drove off the enemy's cavalry, and, soon after, SHERIDAN came up, and charged on the retreating enemy. After a little rest and reenrollment, SHERIDAN took up his guns and long trains, and set out towards the James. So soon as the enemy discovered that he had got this valuable material with him, they again approached him. About ten miles south of White-House, near Jones's Bridge on the Chickahominy, a slight skirmish ensued, on the 23d. Thence the column proceeded slowly towards Charles City Court-House, and, near St. Mary's Church, on the 24th, found the enemy had again anticipated him, and was disputing the way. One of the briskest and severest cavalry battles of the campaign ensued. General GREGG's division was protecting the trains, against which the enemy's attack was directed. From 2 o'clock in the afternoon till evening he succeeded in keeping the enemy at bay, hurrying his wagons along as rapidly as possible, and fighting from one position to another. His artillery at length was got into position, and though the enemy charged it frequently, they did not succeed in capturing it. At nightfall the enemy desisted from the pursuit, and the whole expedition got under cover of the gunboats near Wilcox's Wharf, having saved every wagon and every gun, with the loss of five or six hundred men, including three or four colonels. The light artillery, which was admirably served, contributed most to the repulse of the fierce Rebel assaults.

On Saturday, the 25th, the oppressive heat, the dust, and all the inconceivable discomfort and sickness caused by a month's drouth, were the principal obstacles to contend with. The enemy was busy repairing the damage on the Weldon Railroad, and our forces were strengthening themselves. Some changes were made in the disposition of forces on the left, and all along the line there was skirmishing, resulting from the proximity of the opposing pickets. There were occasional outbursts of artillery, also, but without serious fighting. About 10 P. M., a sharp attack was made on the right of the Fifth corps, and the left of the Ninth, and an assault attempted. It resulted probably from the advance of a working party who were erecting entrenchments a little nearer the enemy's front. For an hour the firing was rapid and sharp, and the attack somewhat persistent. It resulted in the repulse of the enemy, with less than a score of wounded on our side. The enemy's loss was somewhat greater. The noise awoke the line, and there was more or less firing during the night, in front of the Fifth, Ninth and Eighteenth corps, at successive alarms. There was a brief skirmish also in MARTINDALE's front.

On Sunday, the 26th, the same comparative quiet reigned, with the same record of picket firing, skirmishing near the working parties, and desultory cannonading of the batteries. The weather also continued intensely hot and dry, though a few drops of rain fell. In SMITH's front, it had now become such a custom to throw a 30-pounder Parrott shell into Petersburgh at intervals of five minutes, as to produce something of the sound and character of a siege. Our earthworks were advanced steadily and strengthened almost to impregnability. The advance of our working parties is always the signal for skirmishing and picket firing to break out. The firing of our artillery on the Rebel lines gradually became very creditable and accurate, and has so continued up to the present time. In the afternoon, General BURNSIDE witnessed a formal review of FERRERO's colored division. In the evening, there was some musketry firing in front of WILCOX's division of the Ninth corps.

On Monday the 27th, there were no other noticeable operations in front, except from our batteries, which fired into the Petersburgh Bridge at a distance of two thousand yards. In the afternoon the gunboat *Hunchback* shelled the enemy in the vicinity of Four Mile Creek. He was supposed to have increased his force in FOSTER's front, but made no demonstration. The 30-pounder Parrott sent its five minute messenger into the city with such regularity as to gain the name amongst the soldiers of the "Petersburgh Express." About 11 o'clock, the enemy retaliated on this battery with a fierce discharge from their heavy guns on the opposite side of the Appomattox. The other batteries in SMITH's front, where a considerable part of our artillery is in position, opened in reply, shelling the city and the enemy's skirmish pits, as well as his guns, until noon. By a tacit agreement in some parts of the line and a formal one in others, the pickets had entered into an agreement not to fire at each other; and, accordingly, one of the quietest days of the campaign was enjoyed. But an order was found necessary by General BURNEY, that while the picket firing might cease, there should be no intermingling or communication between the opposing lines. The men therefore lay quiet, such as had kept their shelter tents having put them up along the lines as a shelter from the sun. Towards evening, a refreshing shower of rain cooled the air and laid the dust, and caused a general exhilaration of spirits. On the left, some movements were made in the Second

corps to protect our flank against possible demonstrations of the enemy. General HANCOCK resumed command of his corps in the evening.

Tuesday, the 28th, and Wednesday, the 29th, were also quiet days. At one o'clock in the morning of the 28th, there was a false alarm, which got the Eighteenth corps under arms at once, and the guns were doubleshotted. Some very heavy siege guns, having been put into position, began the practice of bursting a shell over the city every fifteen minutes during the night. This was continued on succeeding evenings, and on Thursday night a large fire was kindled by them in the city, and the bells set a-ringing. The desultory cannonading day after day had ceased to be a matter of interest. The weather grew a little cooler, and the troops profited by that change and by their period of rest. The Sanitary and Christian Commissions were busy in their admirable labors, distributing luxuries and vegetables amongst the trenches. The news of the movement at home to send vegetables to the Army was received with pleasure, and the news that the commutation clause had been stricken from the Enrollment Act, with positive enthusiasm. On Wednesday a new earthwork for a siege battery, which LEDLIE had thrown up on his front, was the target for rapid cannonading and musketry, with which the enemy endeavored in vain to reduce the work. Towards noon came news that WILSON's cavalry had been intercepted on their return to the Army. And Sixth corps were promptly moved out to their assistance, and GIBBON's division of the Second were marched in, to take the position vacated by the Sixth.

WILSON'S CAVALRY ADVENTURES.

The particulars of WILSON'S movement against the Danville Railroad are as follows:—About two o'clock on the morning of the 22d of June, WILSON set out from his camps on Blackwater Creek, a little south of Prince George Court-House. His force consisted of the Third cavalry division and KAUTZ's brigade, numbering 6,000 men, with four batteries of horse artillery of four guns each, half rifled ordnance and half light twelve-pounders, and one battery of four small mountain howitzers. KAUTZ had crossed from Bermuda Hundred, and joined WILSON on the 21st. The column struck the Petersburgh and Weldon Railroad at Reims', where the road was cut, the track torn up and burned for several hundred yards, the depot, depôt and public buildings burned. At Dutch Cross roads, near-by, a saw-mill was burned. Crossing the country, the column moved by way of Dinwiddie Court-House to Sutherland's Station, where it struck the Petersburgh and Lynchburgh Railroad, and thence marched on to Ford's Station, about twenty-two miles west of Petersburgh, KAUTZ being in advance. This was reached before evening, and, by midnight, two locomotives, sixteen cars, a depôt and a few stores were burned, and several miles of track destroyed, and the command then bivouacked for the night.

About two o'clock on the morning of the 23d KAUTZ again started out in advance, and by rapid marching soon left a wide gap between himself and the rest of the troops. He struck out along the Southside Railroad, towards Burkesville, the important junction of the Petersburgh and Lynchburgh and Richmond and Danville Railroads. WILSON's Station was reached about four o'clock, "Black's and White's" about three hours later, and Nottoway by noon, and then passed on to Burkesville. Here he destroyed depôts, cars, and similar property, and several miles of track east and west. The railroad was constructed of strap rails, laid on longitudinal stringers of dry yellow pine. Dry rails were piled up against the stringers, and the whole set on fire. The flames burst out everywhere with great vehemence; and with such method and celerity were the various detachments of working parties deployed along the road and put into action, that miles of the railroad were burning at once, by night or day. Meanwhile, the rear was engaged in firing the depôts and other buildings adjoining the road. The work was accomplished handsomely and swiftly.

But, meanwhile, the main column was some miles in rear of the advance, and, about 3 P. M., while near Nottoway Court-House, was encountered on its right flank by a force of about a brigade, comprising a North Carolina regiment, under Colonel BARRINGER, and a Virginia regiment, under General DEARING. Colonel CHAPMAN's Second brigade was formed in line, and a sharp fight ensued till nightfall, when the enemy drew off. Our loss was reported as sixty or seventy men; that of the enemy about the same. We had thirty-four men prisoners. WILSON bivouacked at Nottoway, and KAUTZ, not far from Burkesville.

On the 24th, both forces marched towards Meherrin, WILSON across country and KAUTZ along the railroad. There a junction was formed, and the column moved on to Keysville, and bivouacked for the night, KAUTZ's men working hard on the railroad all day, and destroying eighteen miles of track, besides other railroad property. Early on the 25th the march was resumed, and the work of destruction with it. The column pressed rapidly forward until, about the middle of the afternoon, it came up to and came up to the covered bridge on the Staunton River. It is claimed that every rod of track had been destroyed from Burkesville to this bridge, a distance of about thirty-five miles, and an aggregate of track so far of about fifty miles. It was greatly desired to destroy this important bridge. But while our men had been burning the intermediate track, the enemy had been collecting in force at the bridge, of whose value they were quite as well aware as we. The troops principally consisted of Virginia and North Carolina militia, some of whom had come up from Danville. They were well entrenched, and had some artillery in earthworks, and a piece of ordnance mounted on a platform car, to move along the railroad. The enemy opened with grape and canister. KAUTZ's four regiments immediately deployed, with SPEAR's brigade of the Third New York and Fifth Pennsylvania on the right of the main road, and the First District of Columbia and Eleventh Pennsylvania on the left. Sharp skirmishing, with considerable loss on our side, was kept up for some time, but nothing effectual accomplished by us, and we were compelled to withdraw. The depôt and some of the track were burned, but the bridge was not. KAUTZ's command were the chief force engaged. After the possession of Staunton Bridge, the column moved up at night to Weyland's, which was reached about daylight of the 26th, and halted an hour. The raid being mainly accomplished, more leisure was taken in returning, the route lying through Christianville, thence to Meherrin Creek, and thence to the Double Bridges on the Nottoway. The enemy's cavalry here again appeared on our left flank, and occasioned some unimportant skirmishing. About noon of the 28th, the Nottoway River was reached at Double Bridges, and MCINTOSH's Second brigade being in advance, drove the pickets easily upon and across the bridge. It was designed to cross the Petersburgh and Weldon Railroad at Jarrett's, but it being learned that a large force of militia and Weldon troops were there, the route was changed to Stony Creek, the crossing of which is two miles from the Station. MCINTOSH's brigade, the Second Ohio and Third Indiana, dashed across the bridge, and at once met a spirited resistance. Our men, however, all got over, and MCINTOSH formed line of battle. The Rebels were found to have a considerable force lying on the road to the Station. Some skirmishing took place, but our men immediately began to act on the defensive, and scraped together breastworks of rails, logs and earth, in the customary fashion, and were quite prepared to dispose of any attack. Meanwhile, the enemy were raking our flank and capturing guns and trains. At length, it was not so much a question of whether we could hold our ground as whether the entire force would not be captured. The accounts of this fight are more confused than that of anything preceding in the campaign, but there seemed to be a strong desire to bring off as many men as possible. Finally, there were orders for a general stampede, *a sauve qui peut*, by organizations or regiments, or companies. KAUTZ started with his command pretty nearly due South, while SPEAR's brigade was first to reach the railroad. Other detachments moved hither and thither, and a general helter-skelter race for our lines was made, over ditch and fence, through swamp and wood, dodging into by-paths to escape the enemy, who hotly pursued, shooting at fugitives and caissons, and increasing the amount of his slaughter only by the speed of his defeated opponents. The enemy followed close up to our lines, and there gave up the pursuit. On the evening of the 28th the main part of KAUTZ's force reached the picket reserve, and there were able to camp all night, after terrible exhaustion and excitement. The old camp was reached on the evening of the 30th. For two or three days, squads and solitary horsemen straggled into the lines every hour. KAUTZ's familiarity with the country enabled him to get his men through rapidly; but they were utterly exhausted, some of them "riding along asleep on their saddles," and all thoroughly used up.

On Friday, July 1st, the main part of WILSON's force also rode in. He had retreated under cover of night towards Suffolk, crossed the Nottoway about thirty miles below Petersburgh, then crossed the railroad at Jarrett's and the Blackwater at County Bridge, reached Black Point, and thence rode into the lines about five miles from Powhatan. It had been feared that he had been captured with all his men; but his enormous circuit and desperate fight had saved him. The whole force, like that of KAUTZ, was in a pitiable and wretched condition, both men and horses jaded and worn beyond description. After their hard march, their service for days and the relentless harrassing of the enemy. Their apparel and accoutrements were torn and spoiled, their coats gone, their horses hardly able to walk. At the hands of the enemy they had lost all they had to lose, namely—the entire wagon train, the ambulance train, all their guns (sixteen in number), nearly all their caissons and many of their men. The total loss was somewhere between ten and fifteen hundred. General LEE's official account says that he took one thousand prisoners during the raid. Our men had collected one or two thousand negroes, who were following them to camp, but of these the greater part were recaptured. The ambulances, filled with wounded and sick, had been left on the field at Reims', under a hospital flag. Some of the wagons, which had been corralled, were burned. FITZHUGH's battery was handsomely served during the last fight, and its caissons were brought off. The enemy's loss was probably not great, as they so far outnumbered us as to have an easy victory. PETTIGREW LEE's entire force of cavalry attacked our men in the flank, while MAHONE's veteran division of infantry, with FINNEGAN's brigade in advance, supported by field artillery, attacked in front, and drove us rapidly. Had some of our infantry been at hand, the result would have been otherwise. The very large force of the enemy was observed to be moving down towards Reims', and the result of the contest cleared up the many speculations in which our men in camp indulged as they saw them move by. At Jarratt's the enemy's pursuit was abandoned. In spite of the heavy losses, General GRANT expressed himself satisfied with the result, as the Danville road had been completely destroyed.

OPERATIONS AT PETERSBURGH.

About 8 o'clock on the morning of Wednesday, the 29th, Captain WHITTAKER with 40 men of the Third New York cavalry cut his way through from Reims's to General MEADE's headquarters, bringing news of WILSON's situation, and arriving about 10½ A. M. Early in the afternoon, the Sixth corps started in the lightest marching order to WILSON's assistance, and the same day, General SHERIDAN, crossing the James with his two divisions, proceeded as rapidly as possible in the same direction. The Sixth corps arrived near the scene of action during the night, but the affair was already over. The men accordingly took position

and occupied their time in destroying the railroad and telegraph for a few miles, and in burning several buildings. They found no enemy to oppose them at Reins'. About noon of the 30th it was ascertained that SHERIDAN was well on his way, and the corps then retraced its steps towards its former camping ground, going into line of battle at night along the Jerusalem turnpike. Many cow-brands were recovered by this advance of the Sixth corps.

The same evening, General WARREN's corps demonstrated towards Petersburgh, with the intention of advancing his lines. The mistake of a brigade commander disclosed the intended surprise. The enemy opened a tremendous fire from his circle of batteries and the whole line was recalled. Our forces had already begun to assault COLQUITT's Georgia brigade and CRADLE's Alabama brigade, but were at once called off. Our loss was only twenty or thirty men, principally confined to BARTON's brigade, which was on the left of the Eighteenth corps, lying along the Prince George county road. The mortar firing on both sides was regular and accurate. A large fire which broke out in the city of Petersburgh was thought to have resulted from our shells.

Friday, July 1st, was a very quiet day, especially on the left. At ten o'clock, however, a heavy musketry fire broke out in front of the Ninth corps, and a charge was supposed to be made and repulsed. The work which General LEDLIE had been throwing up for several days and nights, and in erecting which he had lost very many men, shot by the enemy's marksmen. The enemy had often played upon this work with artillery, and now, as it approached completion, attempted to carry it by a desperate charge. The conflict was very sharp, but of short duration. The enemy was driven back with considerable loss. Our own loss was about twenty. The guns had not then been put into position, but the fort was well defended by flanking batteries. The firing continued at intervals, after the repulse, through the night. Saturday, the 2d, was comparatively quiet. Our forces continued throw shells into the town, and on Sunday, at daybreak, the contest was quite brisk, but slackened towards mid-day. The artillery firing on Saturday was a sharp two-hours' duel in the afternoon between the batteries on SMITH's front and the enemy on the other side of the Appomattox. Monday, the Fourth of July, was celebrated by a salvo of thirty-five double shotted discharges from SMITH's batteries. There were some festivities also in camp. But there was no Vicksburgh or Gettysburgh this year, wherewith to gladden the heart of the nation on its general holiday.

GENERAL SHERMAN'S OPERATIONS.

We have detailed accounts this week of the assault by General SHERMAN on the Rebel position on Kenesaw, of which we were able to give no more last week than the bare announcement that it had resulted in a repulse. The additional accounts received prove that the worst was told in the dispatch from General SHERMAN, announcing his ill success. That is the action which his Rebel foes will make in this strong position has been of little avail to them, is proved by the statement we now have that, though repulsing assault, the steady compression of our enveloping lines has compelled them finally to evacuate their position at Marietta and Kenesaw Mountain, and fall back upon, or beyond, the Chattahoochee.

At the date of our last detailed accounts, June 30, the enemy had been forced from their position on Lost Mountain and Pine Knob and compelled to draw in their left flank and centre, upon which Howard and PALMER were effectively at work, and mass upon their right, presented being held in front by SCHOFIELD, who had wheeled around Pine Knob, and was pressing along the Dallas and Marietta Road. An additional motive for this movement was found in the fact that while our forces had been so successfully at work upon their centre and left, MCPHERSON on our far left had put them in a dangerous position on their right, pressing them from about Big Shanty and Brush Mountain. On the 22d of June the Rebels appear to have lain under the shelter of Kenesaw Mountain, with their centre thrown forward on to the mountain, and both wings drawn in so as to form nearly the two sides of a triangle with the mountain at its apex. Our right have, meanwhile, forced its way across and two miles beyond Noses Creek, on the Dalton and Marietta road. This creek it had been found impossible to cross before, because of the swollen condition of the stream. The stream was to be crossed by a bridge, close beyond which the Rebels had a heavy line of skirmishers to repel any attempt to cross. In the face of a raking fire of musketry, four regiments charged over the bridge at a doublequick, driving the Rebels before them, and making way for our advance forces. No serious opposition appears, however, to have been made to this advance, the Rebel left being already refused. Their position in front of our right was thus materially curtailed at this time unchanged, their troops resting there behind strong works. Our centre, at this date, had worked up the base of Kenesaw Mountain, and had carried some knobs west of the mountain, thus securing a position for an annoying enfilading fire upon the mountain. These hands, which had been lost by the Rebels through negligence, were held by our troops so firmly that all efforts to dislodge them were in vain.

In the position thus secured it was no longer possible for our wings to make a further advance without cutting themselves loose from the centre, whose further progress was stayed by the formidable defences of Kenesaw Mountain. Pressing on as closely as they could, therefore, to the Rebel lines, they were forced to content themselves with simply maintaining their position while the centre was busy unmasking the Rebel batteries upon the mountain and preparing for the assault to which they intended to hurl them. On the 25d, the Rebels assaulted the left of SCHOFIELD and the right of HOOKER, but were promptly repulsed. From that date to the 27th no forward movement was undertaken. On June 27, an advance was ordered along the entire line, with the purpose of covering an attempt to force the Rebels from their position on Kenesaw Mountain by assault. The Seventeenth corps (BLAIR's) circled the eastern point of the mountain and threatened the enemy's right. The Sixteenth corps (DODGE's), next on the right, assaulted the heights on the northern slope of the mountain. The Fifteenth (LOGAN's) the western slope of the mountain. On the centre, DAVIS' division of the Fourteenth corps and NEWTON's of the Fourth, constituted the assaulting column, supported on the right by GEARY and BUTTERFIELD of HOOKER's corps. On the extreme right of our line was stationed SCHOFIELD, who moved forward his whole force, driving the enemy from a line of light works. The position to be attempted was a strong one, and offered but little desperate chance of success. On the summit of the rugged mountain peak, covered with a dense growth of underbrush, the Rebels had stationed a battery of twelve guns, from which they maintained a withering cross fire on our troops engaged in forcing a passage up the steep sides of the mountain, and over the abrupts and rifle-pits, behind which the enemy lay sheltered. With that dashing bravery, which had so often before stood them in good stead, our men charged up the mountain, through the tangled thicket, and in the face of the deadly missiles whose flight concentrated on their lines. Two lines of abattis were forced, and the steep sides of the mountain, and over a hundred prisoners, from a line of rifle-pits. But the most stubborn determination could do no more. Exposed to a galling fire of infantry in front and enfiladed by the Rebel guns above, after an hour of hard fighting our troops were forced to acknowledge the position too strong for them, and content themselves with holding on to such ground as they had already secured. Our assaulting columns halted, and works were thrown up so near the Rebel defences that the men cast stones at each other. Numbers of our men were indeed injured during the assault by huge rocks hurled down upon them from a perpendicular cliff thirty feet high, upon which the Rebels had formed a line, staying our further advance.

This is the assault on Kenesaw Mountain which resulted in a loss of some 2,500 or 3,000 men. Of its immediate gain we have no definite account; and we are as yet unable to trace its connection with the movements by which the enemy left Kenesaw and Marietta, which is reported in a dispatch from General SHERMAN published elsewhere. Though it failed in its direct object it seems to have so tightened the folds with which we are enveloping the Rebel position that a speedy evacuation was found expedient. Their next line of defence is along the Chattahoochee, whose high banks furnish strong positions for defence. So steadily and surely have they been pressed back thus far, that they can hardly retain a hope of maintaining their hold upon Atlanta much longer, should the present elements in the situation continue substantially unchanged.

OTHER OPERATIONS.

The great public excitement at this present writing is the raid of the enemy in the direction of Harper's Ferry and Hagerstown. So very contradictory and extravagant are the statements about the enemy's force and progress, that it is better to leave the news where the press dispatches leave it than to speculate without trustworthy facts. The enemy first appeared on Saturday, July 2d, in the region of Martinsburgh. General STOEL at once withdrew his forces to points at which he believed he could make a successful resistance, viz., at Harper's Ferry and held the heights which commanded it. Meanwhile, the enemy began to divide up into marauding parties, as his chief object seems at present to be to obtain horses, forage, and other plunder. There has been some slight skirmishing between detachments of our troops and the enemy's parties, but nothing of importance thus far. On Tuesday, the 5th, a cavalry force entered Hagerstown, drove our men out, and plundered the place. Similar raids have been made on Middletown and the adjoining region. On the 6th, the enemy, about 100 strong, were driven out of Middletown by our cavalry. It will be seen that thus far the enemy has nowhere been found in force. For the General there has felt justified in calling the militia of adjoining States to its assistance, and troops are rapidly moving to Washington. Small squads of the enemy are now across the Potomac. In the vicinity of Sharpsburg they are plundering the people, and carrying off horses and other booty. At Harper's Ferry the enemy is reported to have destroyed all the railroad property and seize forage.

THE CARNAGE IN AMERICA.

We take the paragraph below from the London *Times*:

It would hardly, perhaps, be an exaggeration to say that the killed and wounded in the Federal army, since the Americans together during the present brief campaign, are reckoned at 150,000. We cannot realize such a sacrifice—and yet it does not appear improbable that from early ages the Americans were just as new to such things. They were even more ignorant of war and its doings than we were. We had to deal with experience and innocence. Millions of great contests, and notwithstanding an unusual interval of peace the world remains aware of the consequences of war. But the Americans had no such history, and one of the most astonishing incidents of the remarkable struggle that battles which appear to be decisive by their numbers should have been fought by Armies and Generals extemporized for the occasion. It is a lesson which should be carefully noted. Those who are disposed by possibility to scoff at the enormous hosts which are contending with such unparalleled ferocity and resolution. The "veterans" who are occasionally described by possibility be soldiers of more than three years' standing. Our own Volunteers are older troops than the American troops would allow of. There is not a regiment in either camp which was raised before the spring of 1861; for the numbers of the small regular Army almost vanished in the mass, and it has never been found practicable to give it any material increase of strength. The whole of this dreadful fighting has been done by Volunteers, and by Volunteers without an exception as our own veterans. Yet these raw companies, without professional spirit or experimental traditions, with captains snatched from the counter or the store, and with generals to own attorneys a few months ago, are fighting with as much heroism, and certainly with as much science, as the Germany's bravest warriors. There may be little science in the business, but of all that makes soldiers there is as much as in any war we know of. To add to the wonder of this story, we are assured that the Americans themselves look upon all this with less sensation than we do. The successive repulses of Generals Grant—with their tremendous details, but New York regards the returns without concernment, and receives them with a quarter of a crisis. Not forty or less one-tenth part of these numbers without the deepest concern, but no such effect seems to be produced in America.

CAPTAIN SEMMES, of the rebel steamer *Alabama*, requested the London *Times* to insert the reasons why Rebel cruisers burnt their prizes, and his suggestion for a remedy. The communication is a long column and a half in that paper. He says it was his intention to have sent all his prizes for adjudication into the ports most convenient for the parties concerned in his destruction, but was prohibited by Jefferson Davis' Order in Council. Captain SEMMES asks, was it expected that he would run the risk of capture by sending a ship, or that he would be guilty of the child's play of capturing the enemy's ships with one hand and releasing them with the other. Further, he inquires what decision would a Great Britain, for example, could privateers have grown out of the fact of the captured vessel lying quietly in the port of Liverpool in charge of a shipkeeper and prize agent until she could be adjudicated; and if she should be condemned why should she not have been sold as quietly as if she had been seized and sold under any execution for debt. Captain SEMMES takes credit to himself and his officers for every ship set on fire, inasmuch as they sacrificed their own chances of prize money to the good of the Rebel government. The London *Times* of June 17 replies to Captain SEMMES' arguments, and shows them to be fallacious and palpably unsound.

MARCHING OF TROOPS IN LARGE BODIES.

NO. II.

FIRST, the *column* is to be *started with great care* at a slow pace, and so that the last file may be fully under way before the full step is begun. A signal from the rear will give notice when the last file is in motion, and then only the full rapidity of the step is taken. An side-de-camp, watch in hand, and a good judge of pace, should be at the head of the column and regulate the rate of marching. This he maybe either by respectfully hinting to the leading regimental commander, when necessary, that his troops move too *fast* or too *slow*; or, what is much better, a detail of sixteen or twenty well-trained men may be put under his immediate orders to lead and regulate the marching. It should be the *sole* business of this aide, knowing what is expected of the column, to take them over the distance in the most judicious way, so far as regards the pace used at the various parts of the route. The *heads* of columns move too fast. I was one of the last orders of an excellent and highly educated officer, after having had his command for a year or more. That so sensible a man had thus just found out this palpable truth, may illustrate, though it cannot explain, why the ignoring of it is still a terrible curse to our armies. We hear of divisions and corps coming up "too late," of their being "too" far in rear;" while the fact is, in perhaps nine cases out of ten, that those in advance were *too far ahead* and came into action too soon. We hear of attacking by brigades or regiments, instead of in force; why? Very often, if not always, the head of the column has marched in such a way, that if preceding regimente or brigades have kept their own men together, no more could be reasonably expected of them, for it might almost be said that, in a long column, the difficulty of marching was the cause of the rear of one brigade or leading regiment. As it is, the road is often lined with dislocated brigades, with separate regiments, with scattering files, and even a good vanguard is of little use, for it will take the column *all day* to be ready for battle.

Second, the *march* should be begun *slowly* and *step off instantly* and on the very *spot* at the word of command. This for a battalion can be done, and the distance between battalions, 22 feet, will allow for the delay in their taking up the order one from another, if a field officer or the adjutant be continually on the *alert* to notice, and report to, the 1st foot, one officer of each battalion, marching at its head, should be responsible for this, and have nothing else to do. Everything depends on the files keeping their exact distance, and, if left irregularly, they cannot but close on each other. A cautionary command to this effect is of no purpose; but if the discipline as to the stepping-off and halting be not as iron on this point, a greator or less number of tired men will take liberties, and the whole column is at once in confusion at the rear.

Third, the *personal marching of the men.* Allowing 22 inches on the average front space occupied by a file when in line, it is obvious that, when the files are doubled and faced to the flank, 44 inches will be all the room allowed each man. From this his own depth and that of his knapsack must be deducted to obtain the distance from the middle of breast to the knapsack of his leader. Calling this deduction 17 inches, there will remain 27 inches, more or less, according to the size of the man to be kept by the succeeding files. It may seem difficult to preserve exactly this distance, but with attention to the following rule it will be found. It being provided, always, that most is the word, and that *the files observe never relax in their duty of surveillance.*

(a) It being understood that the leading staff officers have picked out the best path for the whole; what is good enough for one is good enough for another, and no more and water, through sand and over stones, each man must follow exactly in the track of the one before him. The sets of fours may open out sideways, but they must keep aligning on their rear rank guide. Each rear rank man, if this be found more convenient for the file closers in watching the distances, the object being not to allow the remainder of the file to take their case, as in case of the guides of a column, but merely to give a point of correction when needed.

(b) Each man is in marching to lean (not steep) forward, the more the better. The Prussian soldiers are, perhaps, the best marchers in Europe, and the manner in which they bring the breast forward over the feet is most striking. The chin is to be thrown up, the head rolling loosely back between the shoulders, the shoulders thrown back, the arms held back and brought toward each other, drawing the shoulder-blades after them. The upper part of the chest is to be filled with air and pressed forward and upward.

If now, as the upper part of the chest is thus brought forward and up ward under the head, the lower ribs, thighs and knees are allowed to turn outward to each side (motions to which a natural inclination will at once be felt, and which can hardly be better expressed than by saying that each sidehalf of the body from the pit of the stomach, opens outward), the whole frame will receive a more perfect connection of its parts, caused by allowing the lungs to fill to their full extent, and to act the part which nature intended they, by the elasticity of the air contained in them, should act, as the grand control bracing point and spring for all motions of the animal frame.

Marching in this way, viz., *stretching forward the neck; keeping the elbows back; and drawing on the legs by filling and pressing forward the upper part of the chest*, it will be found that the feet of themselves, although they may seem to linger behind to the last moment, come up in abundance of time to catch the next step, and that with a natural freedom, and that the motion takes place as it should, not by a push from the legs, but from the upper part of the body, as it were, continually falling forward and being as constantly supported, and the downward component of the force counteracted by the advancing foot. The very heel of the foot which the weight falls, and the raised chest aided by slight movements of the head so adjusts the balance, that the foot merely sustains it in that line; whereas were the propelling force a shove from the foot, any inequality would produce a stumble.

The *double quick* should be performed upon the same principles, with the simple addition of retaining the air more forcibly in the lungs, and leaning even more decidedly forward. To retain the air the breath may be partially held, allowing it only to pass out slowly by the nostrils, and when absolutely necessary to open the mouth for a single inspiration through the mouth; or, as prescribed in the tactics, the man may be instructed to breathe through the nose. This retaining of the breath sends it into every little cell of the lungs, opening them all out and giving the chest its utmost development and *elasticity*. This produces a more violent action of the legs and chest, in the double quick than in the common step; the principle of stretching the neck forward and of the weight going in advance of the feet must be observed as before.

(c) Changing direction by file left or right, causes more trouble in marching than might be supposed. The directions in the present infantry tactics are not very precise on this subject, being merely to the effect that the inner men should shorten the step somewhat. In Scott's tactics, although the same directions are given in the text, the explanations to the plate direct also that the outer men shall lengthen the step. The *Austrian* tactics, from which (as we believe) the method of doubling the files has, through the French, come to us, prescribe one Austrian step (about 30 inches English) as the radius of the circle which the inner man of their file of six (they double on three ranks) makes his wheel. Reference is made to the rules for changing directions with single files, which only differ in giving half a step as the radius. These rules are: that the touch of the elbow is always to be kept; that the front rank, and that the inner man is to shorten his step to one quarter of the usual length. Likening the revolving files to the spokes of a wheel moving around the centre of its nave, we shall have 44 inches between the spokes at the follies, 66 inches for the length along the circumference of the Austrian file of three men, and fifteen inches from that point to the centre for the radius used with single files. A short calculation will show that this will allow only 8 inches between the spokes at the point where the inner men are supposed to circle a space manifestly insufficient for the depth of a man and his knapsack; but provision is made for this by the proportion of the steps of the inner and outer men, it will be found, the latter stepping 30 inches, and the former fifty one quarter that length, that while the outer men require four steps to pass over their rank and 132 inches, the inner men clear their area of 222 inches in three steps. By this means the first flank moves in advance of the outer flank; or, to continue the simile, the spoke swings somewhat forward as its hub moves, and at the same time that this continues to circle around the centre, the spoke is bent by an expedient similar to that employed in the infantry tactics for clearing the pivot point for the successive wheels of the sub-division of a column, additional room is given near the pivot, between the files, and although the inner men crowd pretty closely, the depth of a man and his knapsack can be accommodated. The inner men, of course, recover the alignment, when the outer men have completed the wheel, by stepping somewhat sideways.

The above method, it will be seen, makes no provision for keeping distances when the front rank is on the inner flank, but it may answer with well-drilled men when they are allow to elbow, and when, above all, they are *not tired*, but it is too precise a movement for the route march. In looking for a substitute better adapted to troops undergoing a fatiguing journey, it may be remarked, that it is desirable to avoid bringing the men elbow to elbow as a preliminary; to have the movement performed on all occasions in exactly the same way, and to have it as little complicated as possible. For these reasons we should reject anything like the moveable pivot of infantry tactics; or the keeping distances on one of the centre men, while the outer men move faster and the inner men slower than the ordinary gait; or (because we believe it easier to increase the gait in order to come into line), than to slacken it in accordance with the movements of others) the keeping distances on the outer flank.

We should then propose for changes of direction by file when on the route march, that distances be always kept by the inner flank; and that, while this flank describes the requisite area at the regular gait, the outer flank hurry round so as not to fall much out of its alignment. For this purpose we must reject the infantry turn (where the pivot man faces at once in the new direction) because of its disorderly character; in fact it is almost impossible of execution when distances are so small from the mixing of the files; and we we must reject making the inner area a minimum, viz., 44 inches, because the outer man, in order to keep aligned, would, with 124 inches breadth of file, be obliged to increase the pace about fifteen miles an hour, a speed scarcely to be expected, even for a few yards.

To proportion the gait, so that while the inner men went round in quick time, the outer men might do so at double quick, would require a radius of 134 feet for the inner arc; this seems unnecessarily great. *It would seem well, therefore, to fix the radius of the inner arc at 8 feet*, which would cause the outer man to move at something above the double quick for the ordinary gait, and would not require very extraordinary exertion for him to maintain his place even when the inner men moved at the double quick. It may be remarked that we have allowed the utmost distance (12 inches) for the separation of the men sideways. If thus reduced to six inches, all the movements become easier. Whatever it be, however, it should be maintained throughout the column, as the most simple consequence *from each man following in the track of the one before him, and the pivot man.*

The cavalry tactics for the trooper dismounted and changing direction in column by fours, direct that the inner men should not slacken the pace, that the inner are be five paces (which gives a radius of a little over 71 feet), and that the men on the outer flank lengthen the step.

It may be asked how often has any one observed in practice that the wheels in changing direction by file are made with *sufficient care*, or this failing *on a sufficient arc* to prevent a hindrance of the march?

(d) Changing front. The non-commissioned officer should mark the centre point of the arc, for if that be allowed to recede, the files will be obviously crowding back on the column.

(e) That all the endeavors of regimental commanders to keep up a *steady, regular, assured* movement, while on the march, may not fail in their grand object of sparing fatigue to the men, the General commanding the column must pay the utmost attention to giving *immediate notice whenever the head of the column will be delayed for more than five minutes.* When a regiment is halted by delay over five minutes notice will be given, regimental commanders can always insist that no man even rests a musket on the ground without leave, and this such officers should then be held to do under severe penalties. How many an opportunity to cook a meal or take rest, even when soon about to be needed, is thus lost, simply because this care of ascertaining the length of delay and giving notice through the column, was not taken.

(*e*) Mounted staff officers (in an army where there is no *mounted rear guide*) should be always used exploring the track and marking, in their own persons, or by other *distinct* means, the best places for crossing brooks or for avoiding obstacles. Where from defiles, or other difficult passages, a delay is unavoidable, a practiced officer (the length of a column being known) and the rate of marching by fours can almost always calculate what time for rest may be allowed to the different portions,* and notice may at once be given, "such battalions so many minutes," and "such battalions (further on) so many," and when the order to fall in is given, that it may be executed as ordered (and not small they move off even a little double quick, to make up when too much time has been reckoned, will be well paid for by the quiet rest obtained.

(*f*) There is yet one condition indispensable for ensuring such a march as will spare the men fatigue, give them time to get their meals and bring them into camp before dark. It has been referred to already, but its importance merits a repetition: *All staff-officers must be unceasingly on the alert in apprehending the fire immediately in front of them.* Where soldiers are marching by fours officers and non-commissioned officers without hesitation, there will be little difficulty for even the last named to keep every man in his

* With things on their proper basis, the officer at the head of every body of troops which may cut another, or of any train which for some reason may have right of pass-go, should be able at once to answer to the question, How much time will you need?

place. Should such difficulty, however, arise, the circumstances, like those of a sentinel sleeping on his post, will justify very harsh measures. In this case the man endangers the safety of the army by leaving it unguarded; in that by interrupting its progress. The colonel should seldom find fault with individual men for being out of ranks or distances; but, instead of this, always hold the non-officers, who can see them, responsible for permitting it. Prompt and unsparing punishment of men reported by non-commissioned officers, and prompt degradation of non-commissioned officers who are slack in their duty, will soon establish a proper relation between them. In fact, when a non-commissioned officer can say, "I shall suffer if I do not report you," it gives him the best possible excuse he can have in the eyes of the men for doing so.

Discipline, however, does not stop here. Colonels should promptly give to lieutenants, and generals to subordinate field officers or to senior captains, a chance of trying their hands at producing order, where the regular head does not succeed. A few days reflection under arrest will open the eyes of all who are fit to command.

The ability of cavalry and artillery to keep well up, depends so much on the condition of the horses, that the subject becomes as much concerned with their treatment as with the discipline of the men. Cavalry in column on our roads must invariably lengthen out, if the horses be properly cared for, both it and the artillery can generally be kept out of the line of the infantry columns and still be able to do their part in action. One might almost say that every cavalry officer should be a horse-jockey, at least he should know enough to have some supply of watch with prompt him to learn and exercise every care which may aid to keep it in the best condition.

THE DESTRUCTION OF THE ALABAMA.

The event of the week which has absorbed public attention, in the absence of exciting news from the Army, is the fight between the *Kearsarge* and the Rebel privateer *Alabama*, off the coast of France. Though we are mainly dependent for our account of the affair upon the English papers, we are unable to endeavor to belittle it as much as possible, the facts which they cannot conceal prove it to have been one of the most fairly-fought, as well as one of the most brilliant and decisive engagement of which our naval annals bear record.

Though the Captain of the *Alabama* has, we believe, made a boast of his ability to destroy the *Kearsarge* in a fair fight, he appears to have been drawn into the encounter by stress of circumstances rather than by any uncontrollable anxiety for a fight. According to the account of the "Richmond correspondent of the New York *Times*," a gentleman for whose reliability we can vouch, it was only upon finding that he was blockaded by the *Kearsarge* in the French port of Cherbourg that SEMMES determined to make the best of the matter, by challenging his opponent to a fight which seems unavoidable, establish for himself, if possible, a more honorable reputation than that of a mere freebooter.

The *Alabama* arrived at Cherbourg, June 10, after a remarkably short voyage of seven days from the Cape of Good Hope, bringing with her the crews of two merchantmen which she had destroyed on the way. As soon as the American Minister at Paris was informed of her arrival, he telegraphed immediately to Captain WINSLOW, of the *Kearsarge*, then lying in one of the ports of Holland, and the vessel sailing from *Leeds*, supposed to be at Calais, instructing them to repair immediately to Cherburg to catch the *Alabama* if possible. Mr. DAYTON also protested at once to the French Government against the admission of the *Alabama*, and reminded the Foreign Secretary of a previous promise in regard to the matter. As the result of this protest, SEMMES, after the thing had gone through the "circumlocution office," received a notice from the Maritime PREFECT to leave as soon as he had provisioned and sealed, and not to wait for repairs, as he had expected to do. On the same day that this notice was sent to SEMMES, Mr. WILLIAM DAYTON, JR., with instructions to Capt. WINSLOW to make preparations for a fight.

"Capt. SEMMES, finding that he had no alternative, determined to put the best face on the matter, and to make as much capital for himself as possible. He therefore wrote a letter to the Maritime Prefect, requesting him to inform Capt. WINSLOW that he considered the latter's conduct, in pretending to lie off and blockade him in a neutral port as an insult (!) and that he intended to come out and drive him off. WINSLOW replied, 'Let him come out and try it.' Both parties made their preparations accordingly. SEMMES, whose business it was to run and not to fight, was so hedged in and worried by the taunts of our side, by the pats on the back of his friends and sympathizers, and by the restrictions of the French authorities, that it was better than he would have been driven by desperation to fight; and Capt. WINSLOW, who properly estimated all these circumstances, felt perfectly sure that SEMMES was going to fight. SEMMES left all his valuables in the hands of the consul at English officer, belonging to the *Alabama*, who informed Captain WINSLOW that the latter was in a shaking condition, and asked for boats to rescue the men.

All the available boats of the *Kearsarge* were now lowered and manned; but before a single one could reach her the *Alabama* went down. She was at this time about six miles outside the port, and about five hundred yards distant from the *Kearsarge*. When her stern was completely under water Captain SEMMES gave orders for the men to save themselves as best they could, and every one jumped into the sea and swam to the boats which had put off to their rescue. The *Kearsarge*'s boats picked up thirty-eight persons, of whom fourteen were wounded, and of whom three died. The others were picked up by the English yacht *Deerhound*, Captain LANCASTER, with the assistance of the *Alabama*'s launch, which was lowered and dingy. Among them were SEMMES and thirteen officers, beside which forty men were saved by the *Deerhound*, which at once put into Southampton with them, thus saving them from their legitimate captor, the *Kearsarge*.

The engagement between the two vessels was witnessed from Cherbourg by a large number of people who had been attracted to the spot *en masse*. As soon as it was known that the *Alabama* was leaving port, and before the first shot was fired, hundreds were gazing from the high cliffs and commanding views of the harbor. Many of the spectators crowded shot, distinctly heard in this town, brought with it all who had been waiting for a certainty, and a crowd of excursionists, which had come from Paris, without the remotest idea that one of the prettiest naval contests of the age was to be thrown in for their amusement. In a few minutes thousands of people were assembled, all the high land looking out upon the open sea, where the contestants were engaged in deadly combat.

All the military and naval authorities of the port were assembled there, with spyglasses in their hands, and witnessed the fight with great satisfaction. Even with the naked eye the combat could be distinctly observed; for the day was particularly bright and clear.

THE COMBATANTS.

It would have been hard to find two vessels more equally matched than the *Kearsarge* and the *Alabama*. They were of nearly the same burden, the former 1,031 tons, English measurement, the latter 1,013, American tonnage. Their armaments too were as nearly equal as was possible, with different and offer patterns which differ, as do the English and American.

The *Alabama* carried six Blakely rifled 100-pounder gun, one 68-pounder smooth bore gun, counted by the log as the English service, and six 32-pounders. The *Kearsarge* had two eleven-inch guns, pivot, four 32-pounders, broadside, and one 30-pounder rifled gun, on the after pivot.

The *Alabama* was an iron steamer of 1,200 tons burden, 220 feet long, 31 feet wide, and 17 feet depth of hold. She was built in England by Mr. LAIRD of Birkenhead, and for some time went by the name of "290," that being the number by which she was known on the docks.

The *Kearsarge* is a regular navy built screw-sloop, 1,300 burden, about 250 feet long, 34 feet wide, and some 18 feet depth of hold. She was built at Philadelphia, and with her consort, the *Tuscarora*, has been principally engaged for the last eighteen months in watching the movements of piratical craft in Europe.

Captain JOHN A. WINSLOW of the *Kearsarge*, is the twenty-fifth officer of that name in the navy, he graduated here in 1841. He is a native of Wilmington, North Carolina, where he was born in 1811, and a resident of Roxbury, Mass., of which State his father was a native, being of the old Puritan stock of WINSLOWS. He is therefore fifty-three years of age, having been thirty-seven years in the Navy, being indebted to Mr. WELLES' service for his early appointment at midshipmon.

He has been about eighteen years at sea, having cruised on the coast of Africa, the Pacific, the coast of Brazil, and the East Indies, besides having commanded navy yards on two occasions. He has been in charge of the *Kearsarge* he has frequently been heard of in connection with important expeditions, and has several times won high praise from his superiors in the service. Lieut. Gen. GRANT has met him in the Vicksburgh campaign, and was seriously wounded before the capture of that stronghold. He is home on leave as his condition would permit, and immediately upon sufficient recovery from his wounds he took command of the *Kearsarge*.

The executive officer of the *Kearsarge* is JAMES S. THORNTON, of New Hampshire; an officer of the Regular Navy, the fifteenth officer of the list of Lieutenant-commanders, and a graduate of the Naval Academy. He entered the service in 1841, and was promoted to his present rank the same year that Capt. WINSLOW was, July 16, 1862. Now, at 42 years active service, ashore and afloat, 13 have been at sea.

The officers of the *Kearsarge* are Lieutenant John M. Brown; Paymaster Joseph A. Smith; Engineers: Chief, William H. Cushman; Second Assistant, William H. Badham; Third Assistants, Frederick A. Miller, Sidney L. Smith and Henry McConvell; Boatswain, James C. Walton; Acting Gunner, Franklin A. Graham.

The officers of the *Alabama* are Captain RAPHAEL SEMMES, a native of Maryland. He was the fifty-eighth commander in the United States Navy when he resigned. Captain SEMMES, now Commander of the Brooklyn Navy Yard, had been a year in the service before him. Admiral DAHLGREN was a lucky midshipman. Captain SEMMES appointed to command our great harbor battery; Captain BOGGS, of the *Perons*; Commodore GOLDSBOROUGH, of the *Minnesota*; Captain MCRAE, Captain DEARING, of the *Preble*, and other distinguished men, were his schoolmates. He entered the service April 21, 1826, and was promoted to the rank of Commander Sept. 14, 1855, and had seen no sea service whatever since obtaining that commission, and for several years previous. He is now about forty-three years of age and nine months forte up eleven years and one month, his shore duty ten years and ten months, and unemployed twelve years

and ten months. He was but at sea as an officer of the United States April, 1840, seven years when you enforce his resignation. He has left the reputation in our Navy of being a man of intelligent and energy, but one but little devoted to his profession. He kept himself aloof as much as possible from active service, managing through political influence to avoid active duty so long as to enable him to enter upon the practice of the law while still holding his commission. He was in command of the brig *Somers*, which sank off Vera Cruz during the Mexican war in 1846. He is the author of a book entitled "Ashore and Afloat."

CORRESPONDENCE.

A UNIFORM FOR HOT CLIMATES.

To the Editor of the Army and Navy Journal:

SIR:—Permit me to offer you an imaginary chair for a few moments, in front of headquarters, —in Regimeut U. S. Col. Infantry. I strive to make my uniform suitable and civil, which, particularly in the Department of the Gulf, requires prompt redress. Perchance in the remote future is ruled, which may be instituted by the raising of this pen and by the printing press of the JOURNAL.

Fancy, if you can, in your delightful June weather of the North—at night, perhaps, of the blue waves of the Bay, and the breezy heights of Staten Island—a broad expanse of muddy bottom, a narrow strip of cheap land or coarse bank and then the endless cypress stretching off into the plains of Texas and "trembling" prairies of Western Louisiana. Think too of the pestilential fogs and miasma-fields, all over all glares the pitiless sun.

We are waiting for inspection by the division inspector. We have just returned to the tour of the camp to see that everything is in shape, and there the short exposure to the sun has proved a bad one. It is a short one, I assure you.

Now I look over to the gunboat lying in the bayou, and I see officers and men on duty and off duty, clad in white from head to foot. I look around the camp and see my officers and men—to be sure the latter are black, but what of that—in their dark blue uniforms, and light blue but light pants, while the black felt hats and the heavy and the heavy knapsacks of the men ready to be added to the general burden. Enlisted men are permitted to wear out, or assemblage the heat, in blouses, but officers must appear in uniform.

Not a word have I to say against inspections or inspectors, but can't the War Department make some change in uniform, at least, for the hot months in this climate?

Inspection is over! Thanks to an appreciation of circumstances, the Inspector let us off easily, but could you have seen the sweat bathed in the office, you would, for that short time, you would have joined with me in a fervent prayer for their total extinguished uniform.

It cost the British Government ten years of experience and the lives of many gallant officers before the uniform was modified for the climate. It is time for a change in the uniform of clothed more there before they did that of officers.

Three years of experience have not worked the change for us, but let us hope that it will not take seven more to accomplish it. Q. E. D.

BRAZOS CITY, LA., June 17th, 1864.

LETTER FROM WASHINGTON.

To the Editor of the Army and Navy Journal:

SIR:—Having been, I have been covered with an officer who came to the city on a brief business visit from the Army, and who by his military experience and official position is qualified to give a thorough view of the condition of the condition of matters at Petersburgh. His representations fully confirm all the conclusions my own observations and reasoning successfully. Some recent events may have led many to believe that the Army was making no progress and the attack on the works surrounding Petersburgh having failed, it was reduced very much to the position of Gen. MCCLELLAN'S forces in 1862 on the Chickahominy—a position in which, perhaps, it would be the ability to hold its ground, it is incapable of offensive movements, and can only wait, if somewhere else, for something to turn up. Such opinions are erroneous. The Army is making steady progress to take Petersburgh and then Richmond. Its operations are necessarily slow, but its ability to overcome them, and, second, on his ability so to crowd and compress the Rebel forces by the secondary operations that their only alternative will be to drive him away or surrender.

The Army is just as really investing Richmond as though it occupied a circle around that city, with a radius of five miles for the Virginia State Journal to measure with, and it would be doing did it be on the north or east side of the Rebel capital. It is in fact investing Richmond on the White-House. To these days of railroads and other internal improvements the practice of war has undergone many modifications, and the city can be besieged and invested at a distance. The operation of cutting railroads has been considered, from past experience, as of little moment, on account of the facility with which they are repaired, but when an army lies in such a position that it can constantly interrupt transportation, destroying continually the work of repair, confidence and energy must finally give way to despair and abandonment of effort. Our Army occupies such a position, though a long one, and is now essential for the consummation of its renewed attacks on the communications of the Rebel capital, and though some derangement of the Army plans may be occasioned by the raid in Virginia, yet in the end our resolution and pertinacity will triumph.

But more direct movements are contemplated against the works in the front of our lines. It is important that the public should believe this, and not suppose that cavalry expeditions and artillery firing are to be the sole occupations of the summer. Such military preparations are constantly in progress and will be for the next fortnight or more, as human sagacity justify the prediction—either give the Army the necessary means for Rebel encroachments, or cause Lee to fight openly and boldly for their preservation. Patience, hope, confidence, may for some time be called into exercise, but the result will show that they have not been exercised in vain.

Great apprehensions have prevailed of the appearance of desolating diseases in this city. The hospitals are crowded, and the weather is terribly hot. Dangers from such causes might be obviated here as elsewhere, if the local authorities would take the proper precautions. As they have shown an disposition to do so, the Military Governor of the District has put to work a large force of contrabands, armed with brooms and shovels, and the expenses are to be assessed upon the property holders who neglect cleanliness! Means should also be devised to keep the hospitals cool and comfortable, as recent experience has shown that we had largely overrated the capacity to endure heat. Small stationary steam engines to move fans would be very desirable. Unfortunately, just at this time a plentiful supply of water is necessary, the Chief Engineer of the Washington Aqueduct notifies the Mayor that the supply will be inadequate for the next month or longer freely syringed. The reason is said to be the refusal of Congress to give certain appropriations.

And the entire country hailing the celebration of this anniversary, I cannot avoid recalling the scenes and incidents among which our Fourth" for three previous years have been spent. In 1861 I was a member of one of the three months volunteer brigades, and we were lying near Alexandria. Our brigade commander (Gen. ——, I think) we did) than ever since—for in those unsophisticated days a man thought he was doing a brave thing if he stood on guard for 24 hours. The General in question had a pretty speech from our General and a lively time all round, with lots of patriotism and considerable Bourbon. In 1862 we were lying behind our entrenchments at Harrison's Landing, the remnants of a brave and courageous, but exhausted army. There was one thing that was being done on that day. In 1863 we had just fought and won the glorious battle of Gettysburgh. The Fourth of that year ought to be memorable. Vicksburg surrendered on the 4th, and in the far West our arms had been successful. There is no prospect yet that we shall have such ample cause for rejoicing this year, but there are certain causes for observing the day with gratitude and hope.

X.

WASHINGTON, July 4, 1864.

NEGRO TROOPS.

To the Editor of the Army and Navy Journal:

SIR:—Let us examine J. E. D.'s mode of damning with faint praise.

At Morris Island, he says, "they, as well as the white troops were led up to Fort Wagner, and like the whites they were repulsed with heavy slaughter." Not that they took the parapet of Fort Wagner and held it for more than half an hour, and when the white troops intended to support the storming party, they found but little one-third of their number killed and wounded.

At Olustee, J. E. D. "had not heard of their behaving more precipitate in retreat than the whites"—but he ought to have added that after the white troops were surprised and driven in confusion, and had rallied enough to the fight at double quick, and by their hard fighting saved the remains of the Army. He even leaves a doubt (by his weak praise) as to the manner upon which all others agree, that the Southern negro will stand the Southern climate better than our white Northern soldiers. He makes the statistic of forgetting that Massachusetts has sent out an act equalising the pay of black soldiers from the 1st of January last, and that Governor ANDREW has declared that they are good for garrison and ditch-digging duty, he asserts with the advantage of your late number before his eyes—that "they are not good for any other duty, being the very worst of their qualities in the field." How absurdly unfair is this when we have the records of their attacks at Port Hudson and Fort Wagner, and the testimony of Generals Gilmore, and, more lately, during General SHERMAN'S retreat, when they alone prevented an utter rout by retaining their ground and covering the flight of the whites. The negro has had thrown away their guns in utter panic, and of their gallant conduct in the late retreat Wilder is the assertor.

If all this be an "insufficient test," I will not quote the unanimous statements of the New York reporters of the Army of the Cumberland, from Chattanooga to Atlanta, at Missionary Ridge, but will merely repeat (what you have already given in extense) the closing words of Major General W. F. SMITH, in his report of the late battle, as follows:

"The colored troops comprising the Division of General HINCKS the commanding general would call the attention of his command. With the veterans of the 18th Corps they have shared the honors of the recent victory, driving and taking guns and prisoners, and in the whole affair they have displayed all the qualities of good soldiers."

Not a few have declared that the colored troops—the worst of them are better than that too large class of whites who enlist from no other motive than to get the bounty and to take the chance of desertion—are better than the Southern climate better than the white man; they do picket duty—the most hazardous of all duty—about as well as the average white soldier; they seldom desert—they have a motive for fighting beyond mere bounty or pay; they are more obedient than white troops; and to-day the Department of South Carolina is entrusted chiefly to black troops, many of whom have seen their families suffering without having received the first cent of the pay which was promised them, while others have been forced into the service at $10 per month. Would you have the War Department to take care of any white troops smarting under such enhancement to mutiny and desertion?

We are about to have another call for troops;—we can and must get the greater part from our white populations, but we shall get this part *quicker* and *cheaper*, and shall put down the Shenandoah's Jacobins many months earlier, if we properly appreciate and use the reserve of 700,000 blacks which are within the reach of energetic action.

All experienced recruiting sergeants will assure you that men come in a great deal faster when they see the Army filling up than while the enlistment drags. If you want 300,000 more men, give us the *credit* of 300,000 more *already*, and I will get the other 300,000 men in less time than you can get 100,000 for a cuckoo out of your whole number before we are scared.

I do not forget that large numbers of the able-bodied slaves have been driven off by the enemy inland. I am assured by those who have had most experience in recruiting near the Rebel lines, that soldier's treatment, soldier's pay, and a reasonable bounty in premium, will bring the blacks from within the enemy's lines as fast as they can be properly organized into regiments.

AUDAX.

GRANT AND LEE.

A CORRESPONDENT, whom, from his signature, we recognize as Professor MAHAN, of West Point, sends to the New York *Times* a discussion of the relative merits of the two great opponents in Virginia. Both of these generals, like most others of our general officers, were the pupils of the learned and excellent professor of Military Ascape.

The article in the *Times* of May 23, headed the "Chivalry of the Rebel General Lee," copies one of the many self-assertions which are so common with the Rebels. The Southerners as grounds of preeminence over the North, and which, strange to say, Northerners seem quietly to have admitted, and to be willing to concede. Instead of the armament of those Southerners who, from long residence in the South, have come to know and appreciate the foolish trait of Southern character. The fact is, the North and the South had not, before this Rebellion, a fair opportunity of estimating each other. The Army, for the most part, were represented North by visitors of their most cultivated class, whilst from the North too many of a class were South who were not the best representatives of Northern cultivation or Northern character, and those of the latter class who went there were permitted to see nothing but an outside of rest.

Among these claims of Southern superiority is the one of superior horsemanship. This is part of the chivalry, and particularly in the case of General LEE. Now, strange as it may sound, in such an almost universal granting of General Lee's great abilities as a soldier, that we have known in every circle North, there is nothing either in his antecedents before he was placed in his present position, nor in anything that he has accomplished so it, that stamps him, either as a man or a soldier, above fair ability.

General LEE is now advancing in his fifty-fifth year. He was graduated at the Military Academy at West Point in twenty-fourth year, and although second on the roll of merit in his class, he was only fifteenth in the list below any tradition of ability behind him, like MASON, who was graduated at the head of the class, and BUCKINGHAM, who was lower down. Of LEE, as a cadet, it is on record that he performed all his duties properly, patiently and laboriously, for which he was justly rewarded, and earned the reputation of a safe, reliable boy, who would never be the head of his ability the work assigned him. The subsequent career of General LEE, up to the inception of the Rebellion, is what we should be found to have been with but little peculiarity. As an officer of engineers he has left no claims that he possessed more than the ordinary ability. No one ever thought of quoting him as an authority in his corps, as they would TOTTEN, TRAUTE, DELAFIELD, or BARNARD. He has not been consulted by him, by those who served with him, that he was seldom, if ever, known to put forth an independent opinion on a professional subject under discussion. His professional reading was very limited, and his resort to professional work confined only for the occasion.

General LEE never served in the Mexican war with considerable prestige. He had the general respect of the Army, and the high estimation of those who appreciated merit. His functions there were those which usually fall to the staff officer in the field; the collecting information for military movements, and the conveying of orders to troops. These duties he performed with zeal and gallantry, confirming his previous reputation for reliability. But among his younger associates he had acquired a reputation for selfdecisship. The names of MASON, BRAINERD and others were more highly spoken of in this connection than that of LEE.

Soon after the Mexican war, General LEE was sent as superintendent to the Military Academy, which he especially he served for about three years. His administration of the institution was respectable, and nothing more. He resigned his position under circumstances of promotion as an engineer officer, in 1855, to accept that of Lieutenant-Colonel of one of the new cavalry regiments organized by the government. The Secretary of War, JEFF DAVIS, in command of troops for the first time during his military career, and he was generally spoken of as a failure, even in the want of the soldierly qualities for command. Subsequently to this he spent the most of his time at Arlington, on a protected farm of his wife's, where the position of Virginia found him and carried him into its vortex.

We now come to General LEE's new career, upon which his previous career is to be considered as a target for criticism. His chief work here was the least complex of military problems—that of defending a territory exceedingly difficult to penetrate, offering a series of strong defensible positions, assailable only at the risk of great loss to the assailant in front, and subjecting him to the greater risks of a flank movement in his attempts to turn them. Having had years of time to prepare these defensive points, with a complete knowledge of every inch of ground, having communications to the rear ample and unobstructed, and a population deadly hostile to the invading force, a general must, indeed, have been bitter unfortunate who could not have conducted his defensive campaigns as repeatedly as General LEE has done. He has been assisted with an almost passive resist-

ance, and when he has assumed the offensive he has always been with an eager look to the rear. At the second battle of Bull Run no able general would have let go so easily his grasp on the demoralized troops of Pope. Subsequently at Antietam, with an exhausted and almost demoralized army to contend with, no able general, with the advantages that Lee had already secured, would have failed to have struck home, with such a momentous stake within his reach. In the perilous retirement of Burnside to Fredericksburgh, it required but ordinary military skill to have driven in a army into the Rappahannock. Hooker and Sedgwick owed more to their want of skill than to anything else, their retirement in Lee than to the fighting qualities of their troops. Finally, at Gettysburgh, after a handsome first success, with its troops concentrated, and well in hand, would an able general have been satisfied to get himself out of the scrape and withdraw his force, with such prospects a second time before him? For his great position and unequaled ability, General Lee is indebted, in no small degree, to his family connections and to the extraordinary talent which is the power of strength of men of mediocrity, *Aberdeen* Gordon, his thoroughly moral, and his social relations of strict integrity, he has always been ready to help his friends, but lacking in those qualities of a commander which beget the enthusiasm and implicit reliance of the soldier under all circumstances. There is nothing to relieve Lee in his prominence than in his boldness; of audacity he has shown none.

A few words with regard to General Lee's present opponent, General Grant, may not be out of place here. Grant is Lee's junior in age thirteen years, and was graduated at the Military Academy four years after Lee. He is remembered at his *Alma Mater*, as having a cheery, and, at the same time, firm aspect and a prompt, decided manner. His character was unmilitary, and his conduct has given to the line of the army some of its most valuable officers, like Lyon, Rousseau, Sherman, &c. Unlike Lee, subsequently to the commencement of the war, and toward distinction which social position in private life and resources in the government placed in military life afford. The present contest has revealed as much to the world, probably, as to his country, his prominent military traits, for the development of which the opportunities have been previously afforded. These are now too familiar to the public to need dwelling upon. His game, in the momentous campaign now drawing to a close, is opposite to that of General Lee. Having the strategical disadvantages of a constantly lengthening line of operations, through an unprovided and unsympathizing country, constantly on the flanks of his line of communications exposed; and the tactical one of always fighting a position assailed and carefully prepared for resistance, he elects opening battles on the rules of flank movements within short striking distance of the enemy's line of battle, as has played his game from up to the present hour, whatever may be the sequel, has yet the seat to his high capacity as a General.

Handling successfully a army of at least one hundred and fifty thousand men, in a broken country, and in contact with the enemy, is of itself no small test of generalship. General Grant has not only done this, but abandoned one base and taking up a new one in succession, from the Rapidan to Fredericksburgh, from the Po to the Ny, and now from the White House to the James, he has moved his army around from the Wilderness to Spottsylvania Court-House, from there to the North Anna, from that stream to the Chickahominy, and now from the Chickahominy to the South side of the James, with an order and orderly subsidence of his forces, that has not allowed the rapid retrograde movements from strongly entrenched positions, when, in each, he was held only so long as was necessary to have everything in readiness for the onward step. The loss of life in these movements has been great, but unexpected and incommensurate with the importance of the object to be attained.

The peculiar tactics of the rebels was only partially successful at the time, but the most consummate battle field favorite manœuvre has been met by a counter one and foiled. General Lee, in the peculiarity of his dispatches, only thanks God for victory, but does not pray for it, and General Grant, by moving over the line from the Rapidan to the Chickahominy, has been able effectually to destroy the railroads from Richmond to Washington, and by removing Lee from the very doors of Washington, where he has so long lain, to the defence of Richmond, has at least been able to place the Army of the Potomac in its true strategical position, south of the James, threatening the separation of Lee's and Beauregard's armies.

In what rank as a General, posterity, the only impartial earthly judge, will place General Grant, must be left to the future. If tenacity, fidelity, capacity and skill are among the criterions of military capacity, he has already vindicated his claim to a position at least in the ranks next below the Grand Captains of the world. The Republic, with the Duke of Wellington, if there is anything he does know, it is how to feed and handle an army.

ARMY AND NAVY IN CONGRESS.

SENATE.

On Thursday, June 30th, the Senate insisted on its disagreement to the pension act, and appointed a Committee of Conference. The bill for the punishment of "guerrilla marauders" was taken up.

Mr. Wilson offered an amendment as a new section to the effect that persons in the habit of acting after formal discharge shall be held to have died in the service.

Also an amendment allowing, upon the paymasters' accounts, money paid for articles of the kind of subsistence and previous to mustering in of accounts are otherwise correct. Objection was made that these amendments were not germain to the bill, but they were agreed to. The bill was passed.

On Friday, July 1st, the House bill reimbursing Pennsylvania, New York and New Jersey for expenses in calling out the militia during the Rebel invasion of last year, was taken up and debated. Mr. Sherman made a report on the bill reorganizing the Quartermaster's Department, and was adopted. The report was a bill making appropriations for fortifications. The bill includes the appropriation of $37,500 for a sea wall at Buffalo. The Boston harbor appropriation was excluded. The bill providing for the construction of a railroad from the Ohio valley to East Tennessee was briefly debated.

On Saturday, July 2d, Mr. Sumner made a report from the Conference Committee on the disagreeing amendments to the bill to provide for the more speedy punishment of guerrilla marauders, &c., which occurred in. The House also concurred in the report the same day. The Senate then refused to concur in the Conference Committee's Enrollment bill, which was substantially that of the House —yeas 16, nays 18.

Mr. Sherman moved that a second Committee of Conference be appointed on the bill, which was adopted—yeas 23, nays 8. Mr. Conness then moved to reconsider the vote appointing the Conference Committee, on the ground that there was danger that the bill might fail for want of a quorum in the House. The motion was carried by yeas 23, nays 17, and the former report was finally concurred in by the following vote:—Yeas 27, nays 8.

Mr. Hale called up the House bill to authorize the Secretary of War to cause the construction of naval constructors and steam engineers, and explained that the passage of this bill was very important, almost vital to the usefulness of the Navy. The statute proposed for these officers of different grades are to be raised about twenty per centum. The bill was passed.

HOUSE.

On Thursday, June 30th, the House passed the Senate bill authorizing the Secretary of the Navy to invest the naval pension fund in bonds. The bill to punish persons aiding seamen to escape, and the bill providing for the efficiency of the Navy. The latter repeals the case in the Enrollment act which exempts persons of foreign birth who have been the same bounties as soldiers. The House concurred in the Senate's amendment to the bill maintaining the rank of Commodore on the retired list. On the report of the Committee of Conference on the disagreeing amendment to the bill reorganizing the Quartermaster's Department. The Enrollment bill was then taken up and amended and passed from the Senate, and a long discussion ensued, but no vote was taken.

On Friday, July 1st, the Senate bill providing for the satisfaction of bounty land claims, was passed. The Enrollment bill was then taken up. The House has taken up The Senate bill prohibits recruiting in the Rebel States, while the House authorizes it. Finally the subject was referred to the Committee of the whole.

On Saturday, July 2d, the report of the Committee on Conference on the Senate bill was concurred in. The House has increased the appropriation from fifteen dollars per month, but the Senate disagreed to the latter and the House receded from its amendment.

Mr. Schenck reported a bill authorizing the President to raise a force of one hundred thousand men over forty-five years of age, to be called the "Veteran Corps."

Mr. Garfield, from the Committee of Conference on the Enrollment Bill, made a report thereon, and clearly explained all the points of difference. The report was agreed to by yeas 95, nays 53.

The following is the Act as agreed to by both Houses:

Further to regulate and provide for the enrolling and calling out of the national forces, and for other purposes.

The President may, whenever, in his discretion, at any time hereafter, call for any number of men as volunteers, for the respective terms of one, two, and three years, for infantry, cavalry, or artillery service, or in case of a draft, as hereinafter provided, any substitute shall be credited to the town, township, ward, or city-precinct or election district of a congressional district of which he may have volunteered or engaged as a substitute, and every volunteer credited to a district for raising the service for a term of one year, unless sooner discharged, shall receive and be paid by the United States a bounty of one hundred dollars; and for a term of two years, unless sooner discharged, a bounty of two hundred dollars; and if for a term of three years, unless sooner discharged, a bounty of three hundred dollars; and the said bounty shall be paid to the soldier at the time of his being mustered into the service, one-third at the expiration of one-half of his term of service, and one-third at the expiration of his term of service; and in case of his death while in the service, the bounty shall be paid to his widow, if he left a widow; if he shall have left a widow; if not, to his children; or if there be none, to his mother, in case she be a widow.

In case the quota, or any part thereof, of any town, township, ward of a city, precinct or election district, or of any county not so subdivided, shall not be filled within the space of ten days after the draft, the Provost-Marshal shall immediately order a draft for one year, to fill such quota, or any part thereof, which may be unfilled, and in case of any such draft no payment of money shall be accepted or received by the Government, as commutation to release any person drafted from personal obligation to perform military service.

It shall be lawful for the Executive of any of the States to send recruits to fill any part of the quota of such State to be in relation, except the States of Arkansas, Tennessee, and Louisiana, and to recruit volunteers under any call, under the provisions of this Act, to be credited to the State and the respective subdivisions thereof, which may procure the enlistment.

Drafted men, substitutes, and volunteers, when mustered in, shall be organized in or assigned to regiments, batteries, or other organizations of the service in which they are to serve as practicable shall, when assigned, be permitted to select their own regiments, batteries, or other organizations from the same State, which may be organized at the time of their assignment may not be filled to their maximum number.

The twentieth section of the act entitled "An act to amend an act entitled an act for enrolling and calling out the national forces," approved February 24, 1864, shall be construed to mean that the Secretary of War shall discharge minors under the age of eighteen years, under the circumstances provided in said section, at any time before and hereafter, if any officer of the United States shall enlist, or muster into the military service, any person under the age of eighteen years without the consent of his parents or guardian, such person so enlisted or recruited shall be immediately and unconditionally discharged upon the repayment of all bounty received, and such recruiting or mustering-officer who knowingly enlists a person under sixteen years of age, shall be dismissed the service, with the forfeiture of all pay and allowances, and shall be subject to such further punishment as a court-martial may decide.

Sixth. Section three of an act entitled "An act to amend an act entitled an act for enrolling and calling out the national forces, and for other purposes," approved February 24, 1864, be and the same is hereby repealed, so as to authorize and direct district provost-marshals, under the supervision of the Provost-Marshal-General, to make a draft for one hundred per centum in addition to the number required to fill the quota of any district, as provided by said section.

Seventh. That instead of travelling pay, all drafted persons reporting at the place of rendezvous shall be allowed transportation from their places of residence, and persons discharged at the place of rendezvous shall be allowed transportation to their places of residence.

Eighth. All persons in the naval service of the United States who have entered said service during the present Rebellion, and who have credited to the quotas of any town, district, ward, or State, by reason of their being in said service, and not enrolled prior to February 24, 1864, shall, on relinquishing proof of their discharge, certified to the Secretary of War, be enrolled and credited to the quotas of the town, ward, district, or State, in which they respectively reside.

Ninth. If any person, duly drafted, shall be absent from home at the rendezvous on his usual business, the provost-marshal of the district shall cause him to be duly notified as soon as may be, and he shall not be deemed a deserter, nor liable to be arrested as such, until he has given him such reasonable time allowed for him to return and report to the provost-marshal of his district, but such absence shall not otherwise affect his liability under the law.

Tenth and Eleventh. Nothing contained in this act is to be construed to relieve in any way affect the law relative to those conscientiously opposed to bearing arms, or to affect the rights of persons to procure substitutes.

Twelfth. That the Speaker of the House pro tem the Clerk to test submarine inventions. Mr. Ecklet, of Ohio, asked leave to offer a resolution to exempt the Ohio one-hundred day men from the draft, but the House refused to suspend the rules to enable him to do so.

At 12 o'clock, both Houses adjourned *sine die*, the House indulging in the usual disorderly and jubilant scene of close. All the bills passed by both Houses and presented to the President received his signature, except the bill providing republican governments for States overthrown or usurped by Rebellion.

ARMY AND NAVY PERSONAL.

Major-General Dana has been ordered to report to General Canby for duty west of the Mississippi.

Colonel Burbank, Second U. S. Infantry, has been ordered to Louisville, Ky., as Superintendent of recruiting service at that point.

Lieutenant-Colonel J. R. Smith, U. S. A., has been assigned to duty as Assistant Commissary of musters for the Northern Department.

Brigadier-General Fitz Henry Warren has been relieved of his command at Baton Rouge, La., and Brigadier-General Benton assigned there.

Reverend Daniel P. Cilley, of the Eighth New Hampshire, has been appointed Post Chaplain of the U. S. Marine Hospital at New Orleans.

Major-General Gordon Granger, Hurlbut and McCook, Brigadier-Generals Robert C. and James B. Fry, have been ordered to report for duty to Major-General Canby.

The citizens of Covington and Newport, Ky., with the surrounding country have been attached to the Northern Department, and to the Ohio and Indiana commanding.

Doctor McCormick, Medical Director of General Butler's command, has been assigned to duty as Medical Director of the armies in the field, including the Army of the Potomac.

Colonel Fish, formerly Provost-Marshal of Baltimore, has not been ordered to report to Major-General Schenck, but the century is busily engaged at that point in making shoes for the soldiers.

Surgeon Sanford B. Hunt, U. S. V., Assistant Medical Director of the Northern Department, has been ordered to report to Major-General F. Steele, commanding the Department of Arkansas.

Brigadier-General T. A. Rowley has been ordered to command the old Department of the Monongahela, in Pennsylvania. He succeeds Brigadier-General Couch, commanding the Department of the Susquehanna.

Brigadier-General Vandever has been ordered to report to Major-General Steedman, Brigadier-General Robert McArthur, formerly commanding at Vicksburgh, has also received orders to report to General Sherman.

At a recent meeting of the Society of the Cincinnati in Boston, the following gentlemen were admitted members: Brigadier-General Hunt, Chief of Artillery in the Army of the Potomac, and Colonel Robert F. Stockton, U. S. Army.

A Court of Inquiry is in session at Memphis to investigate the facts concerning the recent disaster under Brigadier-General Sturgis. The members of the following officers: Brigadier Generals Brayman and Buckland, Colonel Kappner, with Captain A. Goddis as Judge-Advocate.

Brigadier-General Kenner (the great Cuba builder) has gone to Vicksburgh with an engineer brigade, for the purpose of completing the Shreveport and Vicksburgh Railroad. General Canby is now busily engaged in collecting and forwarding railroad material to Vicksburgh.

Major-General J. J. Reynolds, who for some time past has been in command of the Department of Texas, will take the field immediately as commander of the Nineteenth Corps. Brigadier-General Sherman, who had charge of the forces before General Reynolds, will resume his old position.

NOTICES TO CORRESPONDENTS.

The Editor of this JOURNAL will always be glad to receive from officers in the two services, correspondence and general communications of a character suited to its columns. It is necessary that the name of the writer should, in all cases, accompany his communications, not for publication, but as a guarantee of good faith.

Officers are especially requested to give us early notification of all personal matters of general interest; of the movements of vessels of cavalries among officers; and military and naval events.

The Editor will, at all times, be pleased to respond, in these columns, to enquiries in regard to statistical and other matters.

The subscription price of THE ARMY AND NAVY JOURNAL is FIVE DOLLARS a year, or THREE DOLLARS for six months, invariably in advance. Remittances may be made in United States funds, or Quartermaster's, Paymaster's or other checks, which should be so drawn as to be the order of the Proprietor, W. C. Church.

Subscribers who fail to receive their paper promptly, will please give immediate notice of the fact.

Subscribers ordering the address of their paper to be changed, should be careful to give their previous address.

The Editor does not hold himself responsible for individual expressions of opinion, in communications addressed to the JOURNAL.

The postage on the JOURNAL is twenty cents a year, payable quarterly in advance, at the office where received.

All communications should be addressed to the ARMY AND NAVY JOURNAL, New York.

PUBLICATION OFFICE 20 PARK ROW, TIMES BUILDING.

THE editorial and business office of the ARMY AND NAVY JOURNAL has been removed to No. 20 PARK ROW, (Daily Times Building), directly opposite the City Hall Park, second floor front.

U. S. ARMY AND NAVY JOURNAL.

NEW YORK, SATURDAY, JULY 9, 1864.

THE KEARSARGE AND THE ALABAMA.

THE remarkable action which has just taken place in the English Channel, off Cherbourg, is not only the first which has been fought between steam war vessels at sea, but also the first which has been fought on the broad ocean since the introduction of horizontal shell-firing, the recent Danish naval fight, perhaps, excepted. As such, it has an extraordinary significance. The relief of the country from the pestilent enemy of all its commerce, and the removal of the constant chagrin of its Navy, have been accomplished in this fight. But this is not all. It has given, to a partial extent, an illustration of the comparative merits of the two types of naval architecture and armament of England and America. Our Navy, with all its shortcomings, we take to be already the equal of any that floats, in the character of its ordnance, as time may prove it, also, in the speed of its vessels.

There is a mistaken impression prevalent, that because the *Alabama* went to sea under false colors as a merchantman she is a merchant-built vessel. She is a war-vessel in all respects, built purposely for the service in which she lived and in which she went down, by one of the best shipbuilders in the United Kingdom. She was fitted with every improvement of modern British naval art, and embodied its ideas. In fact, all this, though forgotten, now that she was a "dreadfully overmatched," was stated in fuller and more fulsome terms than we care now to see, at that time when she was driving American commerce from the seas, with no vessel in our Navy fleet enough, it was said, to overhaul and capture her. Indeed, in respect to the protection of her boilers and machinery, the *Alabama* was less vulnerable than the war-vessels of the class to which her antagonist belonged.

It has been said that the *Kearsarge* was an overmatch for her opponent, because she was partly ironclad. But the only iron covering on the *Kearsarge* was put there before action, by faking her chain cable outside her, over the boilers, to protect them from shot. The same expedient was open to the *Alabama*, who had similar cables. In fact, it is still a matter of doubt with navy officers how much is gained by this extra cover, some contending for it and some against it. Captain SEMMES evidently thought it was a bad plan for him, or otherwise he would have used it.

The armament of two hostile vessels is rarely found so well matched as in these, so far as comparison can be made with ordnance of different patterns. The elaborate counter-statements of a part of the English press on this subject evaporate at the test of simple fact. The *Kearsarge* had two 11-inch pivot guns, upon whose efficiency the English dwell, and at whose muzzles the more candid lay the battery. Of this concession one need not be ashamed, when it is remembered that their offset in the *Alabama* was one 68-pounder, of a pattern which the English, after protracted experiments with Armstrong weapons, had asserted to be their crack gun, and not only so, but the best gun ever made. The *Alabama* also had one 100-pounder rifled Blakely gun, of a similar pattern to that we are now finding it well to introduce in place of the forward 11-inch pivot gun. For broadsides, the *Kearsarge* mounted four 32-pounders, in place of six of the same calibre on the *Alabama*. In addition, the *Kearsarge* had one light 28-pounder rifle on the forecastle. The *Kearsarge* carried one gun less than the *Alabama*.

Less candid critics lay stress on the fact that the *Kearsarge* carried ten more men. The discrepancy is so slight that, in any event, it is of no import. As the well might the slight superiority of the *Alabama* in tonnage be taken into the reckoning. However, it is evident that each vessel had all the men required to work the ship and to develop the power of its guns. If Captain SEMMES had wanted more, he could undoubtedly have drawn them from the Confederate vessel *Rappahannock*, which was detained at Calais, and some of the crew of which had visited the *Alabama*. Besides, the loss of men on neither side by the action was sufficient to affect the efficiency of the vessel.

The main point which has struck some persons in comparing the two ships, is that the *Alabama* was thought to be out of repair. The question whether this or the other vessel was in need of repairs cannot enter into the discussion. Because, if the *Alabama* did want repairs, as is asserted, these would be of the nature of copper and sailmaking, which would not much affect her efficiency, except in a gale of wind. She had no weakness which would trouble her on a smooth sea, and there was nothing more than a light breeze blowing at that time. But probably the *Alabama* was, in fact, in sufficiently good repair. Captain SEMMES need not have gone out unless he chose. The challenge was from him, and if he be the old naval hero that Southampton says he is, he should not have gone out like a boy in bravado, with a vessel out of repair. At least, he was probably a good judge of his own condition, and found it fit for challenging. To allege that he did not know the strength of the *Kearsarge* is an ingloious admission, if true. But it is not true, for the *Kearsarge* had lain long enough in European ports to have her measurement and power reckoned a dozen times, as in fact it had been.

Our opinion is, also, that the *Kearsarge* was as *fast* a vessel at the *Alabama*. But that is a point which never has been and perhaps never will be settled. At all events, it was not decided off Cherbourg, because there was no attempt to run or follow in competition. Nor was either vessel put to full speed in the manœuvring.

The question, then, which that battle decided, was one of gunnery and manœuvring. The *Kearsarge*, as fought her antagonist. The English journalists declare that SEMMES's chief advantage in going into action was that some of his best gunners were trained aboard the *Excellent*, the British training-ship. Granting that point, the inference which it seems anxious to establish is that our training is not greatly inferior to that of British training-ships, and our gunners to British gunners. The *Alabama* is described as firing with much greater rapidity than the *Kearsarge*. While this fact settles the former question as to whether she had a full complement in her crew, it also shows that her gunners were not drilled according to our method of teaching. With us, the main effort of officers, when firing beyond point-blank ranges, is to have the men fire deliberately.

It must be added that, in this engagement, the theories of Admiral DAHLGREN, to whose skill and untiring energy the present perfection of the ordnance of the American Navy is so much indebted, have been put to an interesting test. Without assigning more weight or scope to the results than they exhibit, it will be gratifying to the Admiral to observe how much of the merit of the victory is, perforce, awarded to him by the admissions and apologies of English commentators. The DAHLGREN 11-inch gun, with a plain spherical shell and a time fuse, and a charge of powder sufficient for this simple purpose, was able to force a shell through the side of the *Alabama*, just far enough to permit it to explode within the vessel. That, according to Sir HOWARD DOUGLAS, who as a naval authority in the present century has no superior, is the perfection of horizontal shell-firing.

The contest off Cherbourg shows to what brief compass of duration naval actions will be brought, when a single shell or two may decide the conflict. The shell which struck the steering apparatus of the *Alabama* decided her fate. This strange and fatal meeting will doubtless be of the deepest significance to the European marine world, as it has to our own. The day of Trafalgars, of Aboukirs and Copenhagens is gone by. Here, after a circling fight of sixty minutes, with an adversary from 900 to 1200 yards distant, the terror of commerce and the pride of British dockyards struck, and in twenty minutes more was the vessel under her.

We are not inclined to look upon this contest with too much care for minor questions. But the personal conduct of SEMMES in the affair and the responsive enthusiasm which it found in the British hosts ought not to be passed without comment. Is has already been seen, from the character of the excuses he gave for his defeat, with what bait he caught gudgeons. It would seem that the possibility of skill and courage on the part of the Union conquered did not enter greatly into the estimate of the reason of the victory. The complaint of SEMMES, made to excite sympathy, that four or five shots were fired into him after his surrender, is unworthy of a man who calls himself a sailor. The men at the guns, as he must know, would not discover the fact that the enemy's flag was down in an instant, and probably not until after orders from the captain of the ship to cease firing. The captain might naturally believe the battle-flag had been shot away, until he saw the white flag hoisted. The account of Minister DAYTON's son, who was aboard the *Kearsarge* during the fight, shows that it was not known that the *Alabama*'s flag had been pulled down until some time after the fact. It is only surprising that more shots were not fired in the interval, especially with the distance so great as that at which this battle was fought.

That Captain SEMMES expected to conquer the *Kearsarge* with his model vessel and gunners from the training-ships, is of course to be conceded. His slumbering professional pride appears at length to have been aroused by the taunts to which he might have been subjected by the British public, as a coward and antagonist. It would have been a profitable and a useful, but not a specially glorious record, to have always made exclusive war on merchantmen, without a single attempt to cripple an armed enemy. For the case of the *Hatteras* was not a fight—not even a surrender. He threw her over now, as gallant a gentleman as ever scuttled a ship. Captain WINSLOW could hardly hope to have his victory mentioned on the same day with SEMMES' defeat.

The escape of SEMMES has thrown a trifling cloud in the estimation of some upon the brightness of the victory. But, reviewing all the attendant circumstances, a candid man will see that it could hardly to be prevented. Even were circumstances more adverse, Captain WINSLOW has done what should be enough to put him beyond reproach for what he did not do. That modest dispatch of his to the Secretary of the Navy is not of a character to excite a glow in all transatlantic hearts, but it informs our people to be satisfied with the man who, across the ocean, fought the vessel that bore American colors. He has not made so much sensation as his rival, but he blew him and his ship out of water.

IN an article on "Naval Tactics"—an article of so much interest to our American Navy that we hope to copy it in full another week—the *United Service Magazine*, of England, remarks upon the comparative lack of practical books by British Navy officers upon subjects connected with their profession. It says that such works are continually issuing from the French press, and that "in the United States of America, the naval officers have been exceedingly active in giving their views to the world. One publisher in New York has produced, during the last few years, more

books of a professional character than all the English publishers put together." The Navy will easily understand that the publisher alluded to is Mr. VAN NOSTRAND, whose imprint is on, by far, the larger portion of the many able works which our scientific officers have given to the profession and the public. The English magazine proceeds to discuss at some length the book of Commander PARKER on "Squadron Tactics under Steam," to which it gives the highest praise.

NEUTRAL RIGHTS AND WRONGS.

The late naval contest between the *Kearsarge* and *Alabama* has given rise to some discussion as to whether the British private yacht *Deerhound* had any legal right to take the Captain and a portion of the crew of the *Alabama* to Southampton, when they with their ship had surrendered to the American man-of-war; and second, whether or not the British government may be required to render up these fugitives, on demand of the Government of the United States.

Without stopping to discuss these questions at length we will merely state a few points which will probably prove important in the future consideration of the case. It is the fact, as we asserted, that our Minister in England is about to make a demand for the surrender of Captain SEMMES. First, it will be well to look at the circumstances under which the British yacht picked up the drowning men, and we therefore quote the letter of Mr. LANCASTER, owner of the yacht, and the statements made at the Coroner's inquest before a boat is made. At twelve o'clock the sight intermission was given. At half-past twelve firing, the *Alabama* was under sail, and sleeping her course for the land, distant about nine miles. At half-past twelve the *Kearsarge* was seen coming out of Cherbourg harbor. She immediately made towards her, and on passing the *Kearsarge* were required to remain in sight of the *Alabama* guns. At ten minutes to one, when within a distance of two hundred yards, the *Alabama* sank by the bow, bowed to the *Kearsarge*, and, in the resistance of the *Alabama*'s whole-boat and dingy, succeeded in saving about fifty men, including Captain SEMMES and thirteen officers. At one P. M. we steered for Southampton.

I may state, that the shot from the *Kearsarge* was apparently much disabled. The *Alabama*'s loss, so far as at present ascertained, is killed and wounded, 40; the *Kearsarge*'s firing, the *Alabama* after man one man drowned, six men killed and one officer and sixteen men wounded. Captain SEMMES received a slight wound in the left hand. The *Kearsarge*'s boats were, after some delay, lowered, and, with the assistance of the *Deerhound*, succeeded in picking up the remaining survivors. JOHN LANCASTER.

Messrs Fredk. Dawkins & Co., of Cowes, June 19, 1864.

The London *News* of June 21st gives this account of the rescue:

When the battle was at an end the *Deerhound* steamed over to the *Kearsarge*, and Captain LANCASTER was asked by the officer of the vessel ship to try and pick up the scarce of the *Alabama*'s crew and officers who were already in the water, apparently, he lowered his yacht boats, and one of them, commanded by a man named ADAMS, was steering his boat quite a good way from the smoking ship when he passed a drowning man at some short distance with an officer's cap on.

One of the men in the boat cried out "*That's* SEMMES," and the man called out to the boat to come to his assistance.

ADAMS turned and dragged him into the boat. SEMMES then said:—"*For God's sake save me, for I have a large sum of gold put out on board your yacht.*"

ADAMS promised to do so, and laid dowsen down in the bottom, and covered him with a sail to conceal him from the *Kearsarge*'s boats, which were rapidly approaching the sinking ship. When ADAMS had saved a boat load he took them on board the yacht, and SEMMES was at once placed below. As soon as all that were seen in the water were picked up, Mr. LANCASTER was anxious to get away, and began to steer out to sea. In consequence of the yacht not having been brought to by a shot from the *Kearsarge*, but she was too distant to do so, the latter vessel continued to overhaul her, and thus SEMMES escaped being made prisoner.

It will thus be seen that the British yacht, having possibly already in charge for safe-keeping, some of the effects of Captain SEMMES, put out to sea again from Cherbourg, ostensibly to witness the fight. At ten minutes before one, the *Alabama*, having surrendered to the *Kearsarge*, was observed from the deck of the yacht to be sinking; that thereupon the yacht, as is alleged, being so requested by the *Kearsarge*, proceeded to pick up the men who were seen floating about in the water. Having picked up SEMMES, and being informed of his identity, he was concealed, and at one o'clock the yacht steamed away in the direction of the English coast, in great trepidation lest she should be overhauled by the *Kearsarge*.

It is questionable whether a case parallel to this ever occurred in the annals of naval warfare. At present much remains to be cleared up, and the alleged request of the officers of the *Kearsarge* that the yacht should assist in saving the drowning men, needs confirmation. Whether such a request would give the right to hold acknowledged prisoners of war, convey them to a neutral port, and thereby secure to them at least doubtful. The following passages from distinguished authorities on the rights of neutrals, bear upon the general question; further than this we reserve our judgment until we are in possession of all the facts and precedents:

"Of the same nature with the carrying of contraband goods is the transportation of military persons or dispatches in the service of the enemy. A neutral vessel, which is used as a transport for the enemy's forces, is subject to confiscation if captured by the opposite belligerent. As to the number of military persons necessary to subject the vessel to confiscation, it is difficult to define; since fewer persons will be required to constitute a force of much more importance than a much greater number of persons of lower condition. To carry a veteran general, under some circumstances, might be a much more important act than the conveyance of a whole regiment. The consequences of such assistance are greater, and, therefore, the belligerent has a stronger right to prevent and punish it; nor is it material, by the law of nations, that the vessel, which is the master be ignorant of the character of the service on which he is engaged."—*Wheaton's Elements of International Law*, p. 662, 663.

"On the other hand, a belligerent has the undoubted right to retreat to my enemies, when defeated and two much weakened to escape me, and allows them time to recover and watch a favorable opportunity of making a second attack on my territories, this conduct so prejudicial to my safety and interests, would be incompatible with neutrality. If, therefore, my enemies, on suffering a discomfiture, retreat into his country, although in clearly will not allow him to refuse them permission to pass in security, he is bound to make them continue their march beyond his frontiers as soon as possible, and not suffer them to remain in his territories, or even watch for a convenient opportunity to attack me anew; otherwise he gives me a right to enter his country in pursuit of them."—*Vattel's Law of Nations*, p. 344.

We may remark, finally, that if we had Captain SEMMES and his English crew in our hands, we should probably find the piracy question an ugly one to deal with; and it is not impossible that the United States Government may have given orders to the commanders of our cruisers, during forward to some such event as the present; to this surmise the fact that Captain WINSLOW paroled all his prisoners at Cherbourg would seem to give some color.

THE arrest of Major-General DIX, on a warrant issued by Judge RUSSELL, City Judge of New York, has brought before our courts one of the most important questions that has ever arisen at any time in the history of this nation. It is whether a General commanding a military department in a time of civil war, can be arrested and deprived of his liberty by the civil authorities. The warrant for the arrest was issuing a military order, issued by the PRESIDENT of the United States. Our readers will remember that when the forged proclamation of the PRESIDENT appeared in the *World* and the *Journal of Commerce*, the PRESIDENT issued an order to General DIX, directing him to arrest the publishers and to stop the publication of these papers. That order was obeyed by General DIX. Subsequently the Governor of New York, caused this matter to be brought to the notice of the Grand Jury; and as that body judged it to be inexpedient to investigate the case, he directed the District Attorney to institute a prosecution in relation to it. In accordance with his instructions, the District Attorney procured warrants for the arrest of General DIX and those of his officers who were engaged in executing the order of the PRESIDENT. General DIX at once signified his readiness to submit to the authority of the courts; but subsequently to the issue of the warrants, he received an order from the PRESIDENT which directs him, during the continuance of the civil war, not to relieve himself of his command, nor to be deprived of his liberty, for obeying any order of a military nature, which the PRESIDENT of the United States may direct him to execute.

This order, if the case for the prosecution be sustained, will place General DIX in a position, where he must, as a military commander, either disobey the express order of the Commander-in-Chief, or violate the order of the civil courts of the State. The issue thus directly made between the military authorities and the civil courts, is certainly one of the greatest importance, and will test the decision of any tribunal. A preliminary hearing took place on the 6th instant, before Judge RUSSELL, and the case was adjourned to the 9th instant, when it will be fully argued by able counsel on both sides.

ONE of the New York daily papers is in error in taking it for granted that the omission of General G. K. STRONG'S name in the list of fallen general officers which General MCCLELLAN gave in his oration at West Point, was intentional. And, inasmuch, as we have in our possession facts to correct the erroneous impression, it seems no more than due that we should state that, as soon as the omission occurred to General MCCLELLAN he was anxious to have is inserted in the report of the oration published in the JOURNAL. The request to insert General STRONG'S name came, however, too late for us to make the desired correction.

THE *Kamerad* of Vienna gives the following estimate of the regular troops at the disposal of the EMPEROR of Mexico:—The corps will comprise in all about 6,000 men, distributed as follows: three battalions of light infantry, a regiment of lancers, a regiment of hussers, two batteries of eight pieces of rifled artillery, a company of engineers and a company of pioneers. The officers and soldiers are enlisted for six years. The officers will probably have permission to return with their rank, after a certain time, to the Austrian Army. The private soldiers will receive 50 florins, and the non-commissioned officers 25 to 50, according to their rank. After six years, the officers and non-commissioned officers can continue to serve or can be sent gratuitously back to Europe, or perhaps they may receive lands and means of sustaining themselves instead.

FOR the information of subscribers we would state that we are able to supply complete sets of the ARMY AND NAVY JOURNAL, as well as any single numbers that may be desired. At the close of the volume next month we shall furnish an index for binding.

SINCE RUSSIA has vindicated her claim to be considered a first-rate power in European affairs, and more especially since her Government has given indubitable proof that her policy is to be on friendly terms with our own country, it has been a matter of great interest to know what is her actual and effective military strength. Of her naval strength, we have been able heretofore to inform our readers. Her military strength now appears from a digest which appears in the official Government organ, under date of March 26th, and which gives the figures of the Imperial force, according to the report presented to the EMPEROR on the first of January of the present year, by the Minister of War. Our advices, it may be added, indicate, that with the threatening appearance of affairs in Northern Europe, in which Russia is intimately concerned, and especially in the present doubt whether the Conference may be able to adjust peacefully the questions in the Danish dispute, Russia has put itself on a still better war-footing.

The present strength of Russia, then, may be tabulated with considerable accuracy as follows:—

I. ACTIVE TROOPS IN THE FIELD.		
	1st January, 1863	1st January, 1864.
Infantry	374,427	624,581
Cavalry	57,000	82,161
Artillery	41,344	68,733
Engineers, miners, &c.	12,442	17,000
Total	417,676	792,479
II. LOCAL TROOPS IN FIELD.		
Battalions of the line	69,455	74,651
Regiments in Garrison	"	23,472
Artillery	"	20,000
Total	166,395	127,623
III. RESERVES AND NON-COMBATANTS.		
Reserve of all arms	67,259	36,218
Interior Guards	121,000	123,261
Soldiers unassigned	23,000	23,000
Gendarmerie	6,264	6,541
Troops in instruction	1,040	900
Total	254,676	189,960
Total of regular troops	812,795	1,110,062

From this synopsis, it will be seen that the numerical strength of the Russian military system is such as to be remarkable. In what actual condition this army of more than a million now stands, must be proved by subsequent events.

AN important order from Adjutant-General Thomas has been read to the negro troops at Nashville, of which the following is the substance:—The incorporation into the Army of the United States of colored troops renders it necessary that they should be brought, as speedily as possible, to the highest state of discipline. Accordingly, the practice which has hitherto prevailed, no doubt from necessity, of requiring these troops to perform most of the labor on fortifications, and the labor and fatigue duties of permanent stations and camps, will cease, and they will only be required to take their fair share of fatigue duty with white troops. This is necessary to prepare them for the higher duties of conflict with the enemy.

HON. WILLIAM WHITING, the Solicitor of the War Department, has prepared a work of about one hundred pages on "Military Government of Hostile Territory in Time of War." The subjects discussed are, as the preface states, of great and growing importance. Clear and just views of the rights, powers and obligations of the Government are necessary to a wise and consistent administration of affairs in the insurrectionary districts, during their transition from open hostilities to their peaceful restoration to the Union. Mr. Whiting has carefully collected, compiled and considered the authorities bearing on the settlement of constitutional law, and the questions involved are vigorously and ably discussed.

NEW PUBLICATIONS.

HISTORY OF THE ADMINISTRATION OF PRESIDENT LINCOLN. By HENRY J. RAYMOND. New York: DERBY & MILLER. This volume consists of a short account of the life of PRESIDENT LINCOLN, and a full account of his administration. The main part of the latter is made up of the speeches, letters, addresses, proclamations and messages of the PRESIDENT, with such connecting thread of history and commentary as was essential to putting them in a proper light. The book does not pretend to the dignity or value of a history of the times. It is, indeed, rather a biography than a history. The rapidity of execution which is obvious in the work will prevent it from being of permanent historical value. It sets out at full length much material which will also be in the hands of future writers, who will digest and summarize it, and present it in more elaborate form. One of the most interesting parts of the book is the dissension of the Virginia campaign of 1862. These chapters are written with an obvious leaning towards MR. LINCOLN, which is no more than might naturally be expected in his own biographer.

THE TANNER BOY. By Major FENNIMAN. Boston: ROBERTS & BROTHERS. This is a pleasant boy's book, with a misquotation from WORDSWORTH on the title page. From the style in which the subsequent chapters are written, it may be judged that "Major" is a *nom de plume*. Considerable skill is shown in grouping together such personal incidents and stories of the Lieutenant-General as will interest and instruct children. We are sorry to notice, however, that in the account of the battle of Iuka it is quite possible date the incorrect statement of GRANT's receiving and rejecting a flag of truce for the burial of dead at Spottsylvania, is introduced. The reported conduct of GRANT at this time excited some indignation in Europe until the fact became known. It can hardly therefore be set up with propriety for the admiration of children, especially as the alleged action did not occur.

A few blemishes of this kind apart, this is a praiseworthy attempt to set before the minds of American youth the story of a gallant soldier for their emulation. If it only endeavors, especially in such times as these, if made in the right spirit, should be encouraged. A year or two ago, the model for our children was "The Bobbin Boy." Now, it is "The Tanner Boy." The Bobbin Boy has not turned out very well of late, according to the statements of some of his enemies, and his official conduct has been made the subject of investigation by Congress The Tanner boy, no doubt, will prove himself a fit model for the young to follow.

THE ATLANTIC MONTHLY. July, 1864. Boston: TICKNOR & FIELDS. The present number opens the fourteenth volume of the work. Of its literary merits we have already now need be said. Its staff of contributors is not equalled by that of any other American periodical, and the magazine has performed an incalculable service in elevating the intellectual tone of the country. The danger apprehended at the start, that its circulation would be of necessity very limited as to appeal chiefly to those trained minds of whom the Atlantic writers are only exponents. But the liberality and skill of the publishers have spread the magazine far and wide, and have made it a household companion in many places where it could hardly have hoped to find an entrance. The promptness and the unreserved devotion with which the Atlantic threw its influence into the war at the outset, hoisting the starry flag on its sober cover, will always be a pleasurable remembrance for those who contributed it to the cause. Its tone has always been patriotic, instructive, and patriotic. Enterprise and energy, directed towards the spread of sound thought and patriotic feeling, must always command our congratulation and support.

THE NORTHERN MONTHLY. Portland, July 1, 1864. Amongst other matters in the current number is a pleasant little account of a "Fallen Hero," whose adventures will remind some of our readers of similar heroes of their own acquaintance. The personage in question is no less than a large, black Newfoundland cross-breed dog, of about 140 lbs. weight. In January, 1861, while the Maine militia regiment was on its way to the seat of war, our hero joined it on the cars at Portsmouth, N. H. He had already "served out a three months' term with the First New Hampshire regiment, and with that organization participated in the battle of Bull Run. He returned with the regiment to his native State, and after a short stay at home, like the greater part of our returned soldiers, he tired of the monotony of every day civil life, and when he saw the train full of blue uniforms arrive, his patriotism and the strange and mysterious fascination of camp life proving stronger than the love of home, he at once re-enlisted, and again went forward to the wars." Although he had seen service, he joined "B." Co. of the Tenth apparently as a private. But he was at once christened "Major," and held that rank unquestioned till the battle of Bull Run. He returned with the two Majors, which puzzles the beginner in CÆSAR's Tactics, seems in the Tenth Maine to have had a practical illustration. The Major at once began to endure with patience and fortitude the vicissitudes of soldier life. "At the Relay House, where the regiment was stationed during the early part of its term of service, he was always among the most advanced of the pickets, and no dog was ever allowed to cross the lines with impunity. In General BANKS' retreat from Winchester, he was very nearly taken prisoner by a dastardly attempt on the part of the enemy to cut off his rear. Although foot-sore and leg-weary, Major was too much a soldier to allow his fellow beasts to ride, and after an absence of two days within the enemy's lines, he met a member of company F, whose acquaintance he had never deigned to acknowledge in camp, and following him, messaged to reach the regiment in safety, where he immediately rejoined his own company, and would recognize no one but a member of it. Major invariably accompanied the regiment on the march and in all its movements; and no member of his company, during all the tedious marches and privations which the regiment was called upon to undergo, ever became so weary or famished that he was not ready to share his last biscuit with him or resent any insult offered to him. At the battles of Cedar Mountain and Antietam, and other actions in which the regiment was engaged, he was on the front rank, and escaped unharmed.

In May, 1863, Major was mustered out of service at Portland, with his regiment, and a silver collar, with the leaf engraved thereon, was presented to him. He was then given to Lieutenant BLAKE, till the latter joined the Twentyninth regiment, when "he again returned to service with him, and many were the acts of self-sacrifice in the Tenth. He served with his accustomed fidelity and good nature up to the battle of Mansfield, Louisiana, on the 8th of April

in which he, as usual, engaged, and where, it is said, he promiscuously engaged the Rebels on his own account. During the fight he was killed by a musket-ball; thus gloriously laying down his life for the support of principles which he had not capacity to comprehend."

JOURNAL DES SCIENCES MILITAIRES. Paris: J. CORBEARD. The May number, just received, contains the following articles: Artillery Studies, by M. CAVALIER DE CHEVREVILLE, Lieutenant in the Navy; Studies upon a Rational Form for Axles of Wagons, and the technical advantages of axles of cast-steel, by Professor ADOLPHE SCHERFLER, translated from the German by M. SERRIGNY, civil engineer; Notes upon the Campaign of 1859, giving Light to Officers in their subterranean labors; Captain COLES and Captain ERICSSON; History of Perspective (continued), by M. le Commandant POUDRA; Military and Maritime Review.

The article on Captain COLES and Mr. ERICSSON is a reprint of the article of the ARMY AND NAVY JOURNAL, which our readers will remember, on the same subject.

THE SIXTH ANNUAL REPORT OF THE CHAMBER OF COMMERCE OF THE STATE OF NEW-YORK, FOR THE YEAR 1863–4, is a volume of much more general interest and varied information than the ordinary reports of corporate bodies are expected to be. Beside the usual statistics of the corporation, proceedings of its meetings, etc., it contains a most interesting series of special reports on various branches of trade, statistics of trade and finance of the United States, together with several important papers issued by the Chamber during the year in pamphlet form. Something of the interest of the volume, is no doubt due to the fact that the Chamber of Commerce is fortunate in having for its Secretary a gentleman, Mr. JOHN AUSTIN STEVENS, jr., who unites to strong literary abilities to those more essential qualifications for his office, which he is known to possess in so eminent a degree.

CAPTAIN WINSLOW'S REPORTS.

UNITED STATES STEAMER KEARSARGE, June 19.

SIR:—I have the honor to inform the Department that I have received from the arrival of the *Kearsarge* off this port on the 14th inst., I received a note from Captain SEMMES, begging that the *Kearsarge* would not depart, as he intended to fight her, and would not delay her but a day or two.

According to this notice the *Alabama* left the port of Cherbourg the morning of Sunday, the 19th of June.

At twenty minutes past ten A. M. we discovered her steering toward us. Fearing the question of jurisdiction might arise we steamed to sea, until a distance of six or seven miles was obtained from the Cherbourg breakwater, when we rounded to and commenced steering for the *Alabama*.

As we approached her within about twelve hundred yards she opened her starboard broadside, and threw a shell from each gun.

The action continued, the respective steamers making a circle round and round, at a distance of from one thousand yards from each other.

At the expiration of an hour the *Alabama* struck, going down in about twenty minutes afterwards and carrying many persons with her.

It affords me great gratification to announce to the Department that every officer and man did his duty, exhibiting a degree of coolness and fortitude which pure premise at the commencement of the fight, I have no doubt, will be respectfully, your obedient servant,

JOHN A. WINSLOW, Captain.

Hon. GIDEON WELLES, Secretary of the Navy.

UNITED STATES STEAMER KEARSARGE, CHERBOURG, France, June 29, 1864.

SIR:—I enclose herewith the surgeon's report of the casualties on board this vessel in the late action with the *Alabama*.

Although we received some twenty-five or thirty shots, twelve or thirteen taking effect in the hull, by the mercy of God we have been spared the loss of any of our lives, whereas in the case of the *Alabama* the carnage, I learn, was dreadful.

The ships were about equal in match, the tonnage being the same, the *Alabama* carrying a one hundred pounder rifle, with one heavy sixty-eight pounder and six pounders; the *Kearsarge*, a one hundred pounder rifle, one broadside thirty-two pounders, two eleven-inch and one twenty-eight pounder rifle—one gun less than the *Alabama*.

The only shot from the 11 inch gun fired by any trouble is a hundred pounder rifle shell, which entered our stern post and remains at present unexploded.

I would most respectfully call attention to particulate the conduct of any one man or officer, in which all had done their duty with a fortitude and coolness which cannot be too well praised; but I feel it due to my executive officer, Lieutenant-Commander THORNTON, who superintended the working of the battery, to particularly call him for an example of coolness and encouragement to the men while fighting, which contributed much towards the success of the action. I have the honor to be, very respectfully, your obedient servant,

JOHN A. WINSLOW, Captain.

Hon. GIDEON WELLES, Secretary of the Navy.

OFFICIAL DISPATCHES.

SEVENTEETH DISPATCH.

WAR DEPARTMENT, WASHINGTON, July 3—9 P. M.

Major-General DIX:

A dispatch from General GRANT's headquarters, dated at 9 o'clock this morning, announces the important result of General WEBB's operations:

Thirty miles of railroad was thoroughly destroyed. The Danville Road, General WEBB reports, could not be repaired in less than four days, even if all the material were on hand. He has destroyed the bridges, and where the rails might be straightened, and all the mile posts scraped, the former could be burned. The enemy's force which attacked General WEBB consisted of eight regiments in about 400 negroes and many of the vast number of horses and mules which belong to the army. He reports that he has not heard from them, but seems the negroes which they retook. Wilson's loss of property is a small matter, but the army needs ambulances, his ambulance train, and 12 cannon. The horses of the artillery and wagons were generally brought off. The enemy burned a few wagons other than the carriages, the wheels of which were broken, and thrown into the fire, and one caisson which had been accidentally blown up during its transitions before it was abandoned. He estimates his total loss at one hundred and fifty, including those taken prisoners. KAUTZ's division.

A rebel force made its appearance near Martinsburgh this morning, and were driven back. Reinforcements have been sent during the night to Martinsburgh. The reports received as yet are too confused and contradictory to determine the character of the force, or the extent of its operations.

EDWIN M. STANTON, Secretary of War.

SEVENTY-FIRST DISPATCH.

WAR DEPARTMENT, WASHINGTON, July 3—9 P. M.

To Major-General DIX:

The following telegram dated to-day at Marietta, Ga., was received this evening from General Sherman, giving the successful result of the flanking operations by which we cause days back:

The movement on our right caused the enemy to evacuate. We occupied Kenesaw Mountain and Marietta this morning. Thomas is moving down the main road toward the Chattahoochee, and McPherson is moving on his left flank. Schofield is on the railroad, with our cavalry in on the extreme flanks. Whether the enemy will halt on the Chattahoochee, is unknown. He will soon be driven. Marietta is almost entirely abandoned by its inhabitants. More than a mile of the railroad track has been destroyed between this point and the foot of the Kenesaw.

EDWIN M. STANTON, Secretary of War.

OBITUARY.

CAPTAIN AUGUSTUS MANNING WRIGHT.

This promising young officer deserves more than ordinary mention, for, after gallantry of conduct and steadiness of service by day in the position he so honorably held. Captain WRIGHT entered the United States service in August, 1861, as orderly sergeant in the 13TH N. Y. VOLUNTEERS. He was subsequently promoted to a lieutenancy in the same regiment, and while in this position passed through nearly every battle of importance in which the Army of the Potomac was engaged. During this period he was also once exceedingly reduced by typhoid fever, but his unusually good constitution overcame this dreaded malady, and he returned to duty with an ardent desire to eclipse the previous acts of gallantry for which he had had favorable notice. During the battles of Antietam and Gettysburgh he sustained two very narrow escapes from immediate death. In 1863 he was promoted to a captaincy, for courageous conduct in the face of the enemy. In the battles before Petersburgh he was severely wounded, from which wounds he never was so to necessitate amputation, from the effects of which he died on the 2d of July. The friends of Captain WRIGHT may well have been proud of the consistency with which he conducted himself in battle, well, their admiration for his soldierly qualities and upright character as a gentleman being only exceeded by their deep grief for his untimely end. C. D. J.

WE are indebted to a correspondent for the following correction of a year time of June 25th, 1864, under the head of Army and Navy Personal, you mention that the first monument in the National Cemetery at Chattanooga is erected to the memory of Captains Russell and La Fevre, and that LeFevre was of the Eighty-eighth Missouri Volunteer. Captain LEFEVRE was of Company F, Company F, Eighty-eighth Indiana Volunteers, and at the time of his death was Topographical Engineer on the staff of Brigadier-General John Beatty, of General Negley's division.

A SHORT time since an account of a heartrending scene at a wedding in Charleston was going the rounds of the press. It was asserted that a daughter of Governor PICKENS was killed by a shell from the blockade fleet at the marriage altar. It turns out that the whole story was a hoax.

IMMENSE hospital barracks, capable of accommodating eight thousand patients, are in course of erection at Annapolis, Md.

ARMY GAZETTE.

APPOINTMENTS BY THE PRESIDENT,

BY AND WITH THE ADVICE AND CONSENT OF THE SENATE.

TO BE MAJOR-GENERAL OF VOLUNTEERS.

Brigadier-General Quincy A. Gillmore, to be major-general of volunteers, July 10, 1864.

TO BE BRIGADIER-GENERALS OF VOLUNTEERS.

Colonel Joshua L. Chamberlain, of the 20th Maine Volunteers, to be brigadier-general, for gallant and meritorious conduct in leading to brigade against the enemy at Petersburg, Virginia, where he was dangerously wounded, to rank from June 18, 1864.

Colonel John C. Robinson, of the 1st Division, 5th Army, to be brigadier-general.

Colonel William Blaisdell, of the 10th Massachusetts Volunteers, to be brigadier-general, to rank from the date of his gallant and meritorious conduct, to date June 23, 1864.

Colonel Daniel D. Bankhead, of the 12th Pennsylvania Reserve Corps, to be brigadier-general of volunteers.

TO BE COMMISSARY-GENERAL OF SUBSISTENCE.

Colonel Amos B. Eaton, assistant commissary-general of subsistence United States Army, to be commissary-general of subsistence U. S. Army, with the rank of brigadier-general, June 29, 1864, vice Taylor, deceased.

QUARTERMASTER'S DEPARTMENT.

Major Robert E. Clary, Quartermaster, to be deputy quartermaster general with the rank of lieutenant-colonel, April 16, 1864, vice Shumway, resigned.

TO BE ASSISTANT QUARTERMASTERS, WITH THE RANK OF CAPTAIN.

Captain W. W. McKim assistant quartermaster of volunteers, vice Dickerson, resigned.

Captain Charles B. Sledge, assistant quartermaster of volunteers, vice Cady, resigned.

Captain J. G. Lee, assistant quartermaster of volunteers, vice Ogden, resigned.

Captain James M. Moore, assistant quartermaster of volunteers, vice Ferguson, dismissed.

COMMISSARY-GENERAL'S DEPARTMENT.

Major Delavan D. Perkins, additional aide-de-camp, and captain in the 4th United States Artillery, to be assistant commissary-general, with the rank of major, June 1, 1864, vice Hartstuff, promoted.

Captain Robert Murray, of the 14th United States Infantry, to be assistant commissary-general, with the rank of major, June 24, 1864, vice McLean, resigned.

CORPS OF ENGINEERS.

Lieutenant-Colonel Henry Brewerton, to be Colonel, April 25, 1864, vice Delafield, deceased, to rank from that date.

Major Leonard Shiverick, to be lieutenant-colonel, April 23, 1864, vice Brewerton, promoted.

Captain Emmanuel Meisner, to be major, April 23, 1864, vice Shiverick, promoted.

First Lieutenant Edward Maynadier, to be captain, April 23, 1864, vice Meisner, promoted.

1. Cadet Alexander Mackenzie, to be first lieutenant, June 15, 1864, to fill an original vacancy.

2. Cadet Oswald H. Ernst, to be first lieutenant, June 13, 1864, to fill an original vacancy.

3. Cadet Charles E. Kilbourn, to be first lieutenant, June 13, 1864, to fill an original vacancy.

4. Cadet Edward Burgh, to be first lieutenant, June 13, 1864, vice Wilson, promoted.

5. Cadet William Sadtler, to be first lieutenant, June 13, 1864, vice Babcock, promoted.

6. Cadet Robert E. Phillips, to be first lieutenant, June 13, 1864, vice J. M. Wilson, promoted.

7. Cadet Mason Brayman, to be first lieutenant, June 13, 1864, vice Harwood, promoted.

11. Cadet John T. Sidewell, to be first lieutenant, June 13, 1864, vice Barlow, promoted.

12. Cadet Andrew Moore Dunnell, to be first lieutenant, June 13, 1864, vice Charles, killed in battle.

13. Cadet Charles Ezra Watrous, to be first lieutenant, June 13, 1864, vice Hale, promoted.

14. Cadet Vanderbilt Allen, to be first lieutenant, June 13, 1864, vice Babb, deceased.

15. Cadet Charles J. Allen, to be first lieutenant, June 13, 1864, vice Ferguson, resigned.

First Lieutenant Peter G. Hoines, to be captain, July 18, 1863, vice Putnam, killed in battle.

First Lieutenant Francis U. Farquhar, to be captain, August 1, 1863, vice Mackenzie, appointed assistant adjutant-general.

First Lieutenant Arthur B. Dutton, to be captain, October 5, 1863, vice Craig, promoted.

First Lieutenant Randal Sibbet McKenzie, to be captain, November 5, 1863, vice Haley, resigned.

ORDNANCE DEPARTMENT.

First Lieutenant Howard Stockton of the 2d Rhode Island Cavalry, to be second lieutenant in the Ordnance Department of the United States.

2. Cadet Allen Bryant, to be second lieutenant, June 13, 1864, vice Morris, promoted.

18. Cadet Martin L. Poland, to be second lieutenant, June 13, 1864, vice Arnold, promoted.

FIRST REGIMENT OF ARTILLERY.

48. Cadet E. Van Arsdale Andrus, to be second lieutenant, June 13, 1864, vice Hall, promoted.

52. Cadet Irene W. McKay, to be second lieutenant, June 13, 1864, vice Southerland, promoted.

53. Cadet Edward D. Wheeler, to be second lieutenant, June 13, 1864, vice Kingsbury, promoted.

SECOND REGIMENT OF ARTILLERY.

31. Cadet Alexander Piper, to be second lieutenant, June 13, 1864, vice Wilson, promoted.

33. Cadet John Bilfield, to be second lieutenant, June 13, 1864, vice Gauf, promoted.

35. Cadet Melville R. Lough, to be second lieutenant, June 13, 1864, vice McIntire, promoted.

36. Cadet Edward Wells, to be second lieutenant, June 13, 1864, vice Murray, promoted.

38. Cadet William F. Rose, to be second lieutenant, June 13, 1864, vice Lord, promoted.

41. Cadet Joseph W. Kinney, to be second lieutenant, June 13, 1864, vice McGarvey, promoted.

FIRST REGIMENT OF ARTILLERY.

28. Cadet William Rossie, to be second lieutenant, June 13, 1864, vice Butler, transferred to the Ordnance Department.

FIRST REGIMENT OF CAVALRY.

Second Lieutenant Edward Myers, to be first lieutenant, September 30, 1863, vice Summey, promoted.

Second Lieutenant Harrison Moulton, to be first lieutenant, December 29, 1863, vice Hopping, promoted.

Second Lieutenant John McDonald, to be first lieutenant, February 15, 1864, vice Bennett, promoted.

Second Lieutenant John S. Walker, to be first lieutenant, April 25, 1864, vice Hudson, promoted.

SECOND REGIMENT OF CAVALRY.

Second Lieutenant Edward M. Wells, to be first lieutenant, November 25, 1863, vice Burnham, dismissed.

Second Lieutenant Paul Quirk, to be first lieutenant, February 10 1864, vice McQuesten, promoted.

THIRD REGIMENT OF CAVALRY.

Major George Stonemans, of the 8th cavalry, to be lieutenant-colonel, March 30, 1864, vice Ruff, retired.

FIFTH REGIMENT OF CAVALRY.

Captain William P. Chamblies, of the 5th cavalry, to be Major, March 30, 1864, vice Stonemans, of the 3d cavalry.

Second Lieutenant Eldridge G. Hoyt, to be first lieutenant, December 1, 1863, vice Wilson, promoted.

Second Lieutenant Joseph Breidenbach, to be first lieutenant, December 15, 1863, vice Amory, resigned.

FIRST REGIMENT OF CAVALRY.

First Lieutenant Samuel S. Sumner, to be captain, March 30, 1864, vice Chambliss, promoted to the 5th cavalry.

Second Lieutenant George T. Huntley, to be first lieutenant, March 30, 1864, vice Sumner, promoted.

SECOND REGIMENT OF ARTILLERY.

Second Lieutenant John McGilvray, to be first lieutenant, April 6, 1864, vice Bindley, deceased.

SECOND REGIMENT OF INFANTRY.

First Lieutenant Adolph W. Keuntinger, to be captain, April 11, 1864, vice McKee, deceased.

Second Lieutenant Henry Sommer, to be first lieutenant, April 11, 1864, vice Keuntinger, promoted.

Second Lieutenant Michael Dehne, to be first lieutenant, April 21, 1864, vice Lacy, dismissed.

Second Lieutenant Thomas Drury, to be first lieutenant, April 21, vice Dehne, promoted.

First Sergeant Samuel D. Southworth, of Battery B, 5th United States Artillery, to be second lieutenant, vice Wilson, promoted.

THIRD REGIMENT OF INFANTRY.

Captain Samuel Ayres, of the 5th infantry, to be major, March 30, 1864, vice Prince, retired.

FOURTH REGIMENT OF INFANTRY.

First Sergeant Robert McDonald, of company E, to be second lieutenant, vice Wilson, promoted.

First Lieutenant Stephen Cleveland, to be captain, March 30, 1864, vice Ashley, promoted to the 6th infantry.

Second Lieutenant Charles A. Curtis, to be first lieutenant, March 30, 1864, vice Goodwin, promoted.

SIXTH REGIMENT OF INFANTRY.

First Lieutenant Wright Sives, to be captain, February 23, 1864, vice Woods, deceased.

Second Lieutenant Byron Kirby, to be first lieutenant, February 23, 1864, vice Sives, promoted.

NINTH REGIMENT OF INFANTRY.

Major Frederick Townsend, of the 15th infantry, to be lieutenant-colonel, April 29, 1864, vice Silby, promoted to the 16th infantry.

Captain Thomas Wilhelm, of the 15th infantry, to be major, April 29, 1864, vice Woods, promoted to the 16th infantry.

First Lieutenant Alfred H. Bolton, to be first lieutenant, April 29, 1864, vice Pollock, promoted.

Private Joseph Hayes, of the 19th U. S. Infantry, to be second lieutenant, vice Marshall, deceased.

TENTH REGIMENT OF INFANTRY.

AN ACT to provide for the examination of certain officers of the Army.

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That every Quartermaster and Assistant Quartermaster, and every Commissary and Additional Commissary of Subsistence, and every Surgeon and Additional Paymaster shall, as soon as practicable, be ordered to appear before a board of not less than three officers before a Board to be composed of officers of the corps to which he belongs if recognized mustering officers, or if not, of officers of the line of the volunteer service, to be convened by a competent authority, and his qualifications of officers who may appear before the board in pursuance of this act, and shall also keep accounts and make a full and true record of the examination in each case. And all members of such Boards of examination shall be sworn faithfully to discharge all their duties as herein provided, sworn or affirm that they will conduct examinations of officers appearing before it in a fair test of the qualifications of the person or persons to be examined, and that they will not communicate to any person the result of any examination of any officer who may appear before them.

SEC. 2. *And be it further enacted*, That such Boards of examination shall be convened under the direction of the Secretary of War, by the Quartermaster-General, Commissary-General of Subsistence, and the Paymaster-General at convenient places; and general rules and regulations are hereby authorized to be established, governed by said officers, subject to the approval of the Secretary of War, and when published to govern such examinations.

SEC. 3. *And be it further enacted*, That after such general orders shall have been published for sixty days, if any officer who may have been ordered before a Board of examiners, under the provisions of this act, shall fail to appear before such Board, without special orders for delay, or sufficient excuse for absence, such absence shall cause said officer to be forfeited until he does appear before such Board and passes such examination; and for a further period of thirty days on to appear he shall thereupon be dropped from the rolls of the Army: *Provided, however*, That officers who have been in the service and have been occasioned by wounds or sickness, or other physical disability, have been relieved from duty by reason of such disability, and such disability has been removed; but if it sixty days after the disability has been removed he shall not appear he shall be entitled to be dropped from the rolls as in other cases.

SEC. 4. *And be it further enacted*, That if the board of examination shall report that any officer does not possess the requisite business qualifications they shall recommend that he be given examination of such officer to the head of the bureau to which he may belong, and if he does not pass such examination he shall be dropped, and the Board so shall forward the same through the Secretary of War to the President of the United States, and the President shall confirm the same the officer so failing in his examination shall, if commissioned, be dismissed the service, and if not commissioned his name shall not be commissioned his appointment shall be revoked. And if the Board shall report that any officer has been guilty of conduct unbecoming and of the character of an officer and a gentleman, or other misconduct, they shall forward the same, with the evidence in the case, to the President, who may cause such misconduct to be investigated, as before provided, to the President and confirmed, and if found to be true shall cause the officer to be dismissed the service without pay, and shall not be permitted to re-enter the service as an officer; but the President may remit such sentence in whole or in part under existing laws for any offense he may have committed.

SEC. 5. *And be it further enacted*, That the boards of examination shall forward all their records of examination to the house of the Secretary of War, and every officer appearing before the Board in the proper purchase with a suitable index; and any officer who may desire it shall be given a copy of the record in his case upon paying the cost of copying the same.

Approved, June 20, 1864.

DISMISSALS

For the week ending June 25, 1864.

Lieutenant-Colonel James M. Sanderson, Major, additional Aide-de-Camp on the staff of Brigadier-General United States Volunteers, to date June 4, 1864; published in the discharges notice of each soldier given in the Provost-Marshal-General's Bureau circular, Captain and Commissary of Subsistence United States Volunteers.

Captain Isaac H. Baker, 10th regiment veteran reserve corps, to date June 25, 1864, for absence without leave and conduct unbecoming an officer and gentleman.

Captain John Quinn, 32d Missouri Vols., and First Lieutenant Geo. E. O'Neil, 50th Ohio Vols., to date June 21, 1864, with loss of all pay and allowances due at date of dismissal.

Assistant Surgeon John O'Donnell, 9th U. S. colored troops, to date February 14, 1864, for incompetency.

First Lieutenant Charles D. Root, Merrill's Horse, Missouri Vols., to date June 24, 1864, for absence without leave and conduct prejudicial to the good order and discipline in the service, in appropriating to his own use Government property, and money received from the sale of the same, and refusal to deliver to their lawful owner.

First Lieutenant William C. Harris, veteran reserve corps, to date June 25, 1864.

First Lieutenant John J. Sulter, 8th Minnesota Vols., to date June 25, 1864, for absence without leave, and conduct unbecoming an officer and gentleman, in appropriating to his own use public property and selling the same, and signing false statements of the ordinal men of his command in procuring the receipts for the rations drawn by them, and drawing on a distant expeditionary.

First Lieutenant Seth F. Watson, 39th U. S. colored troops, to date June 24, 1864, for having tendered his resignation, and being physically disqualified for active service, and for habitual disease contracted through his own indiscretion.

Lieutenant-Colonel Edward Moseschester Vols., to date June 21, 1864, for absence without leave, and conduct unbecoming an officer and gentleman.

The following officers, to date May 30, 1864, for absence without leave, and conduct unbecoming an officer and gentleman, to date before the Commission:

Captain William Flory, 1st Potomac Home brigade cavalry, Maryland Vols.

First Lieutenant John D. Baker, 91st New York cavalry.

DISMISSALS CONFIRMED.

The orders of dismissal heretofore issued in the following cases have been confirmed:

Captain Jay Cook, Captain James Speed, First Lieutenant Lemar P. Gray, First Lieutenant Charles A. Robinson, regimental quartermaster, and Second Lieutenant John Stone, 1st Texas cavalry, to date June 4, 1864, with loss of all pay and allowances due at date of dismissal.

Captain Charles Hall, 1st Virginia cavalry, for absence without leave, and conduct unbecoming an officer and gentleman, to date June 4, 1864.

Captain Oliver Hall, 1st Potomac Home brigade cavalry, Maryland Vols., to date January 16, 1864, for absence without leave, and conduct unbecoming an officer and gentleman.

DISHONORABLY DISCHARGED

First Lieutenant Charles T. Bowne, 12th Pennsylvania Vols., having tendered his resignation, has been dishonorably discharged, to date June 21, 1864, on account of physical disability, directly caused by his own misconduct, while commanded in the field, as ordered May 6, 1864, and for absence without leave.

DISHONORABLE DISCHARGES CONFIRMED.

The order dishonorably discharging First Lieutenant and Adjutant A. E. Wagstaff, 103d Illinois Vols., to date June 15, 1864, for having tendered his resignation, based on the good of the service and for cowardice and misconduct exhibited in the face of the enemy at Resaca and Dallas, Ga., has been confirmed.

DISHONORABLE MUSTER-OUT CONFIRMED.

The order dishonorably mustering out of service Captain S. Seitz, 18th Iowa Vols., to date April 18th, 1864, for drunkenness and cowardice in the face of the enemy, has been approved.

RESTORED TO COMMISSION.

The following officers heretofore dismissed have been restored, with pay from the date at which they rejoin their original regiments for duty, provided the vacancies have not been filled by the appointment of their friends:

Captain Benjamin Warren, 39th Massachusetts Vols.

Captain Thomas Hall, 1st Potomac Home brigade cavalry.

Second Lieutenant J. Cain, 5th Ohio independent battery.

RESIGNATIONS.

The following officers having been reported at the headquarters of the Army for the muster-out of service specified, are hereby notified that they will stand dismissed the service of the United States, unless they appear before the Board at which they appear before the Military Commission, in session in Washington, D. C., of which Major-General Lewis Wallace, U. S. Volunteers, is President, and make satisfactory defense to the charges against them:

Acting Ensign John C. Mowe, of the *Metacomet*, to Acting Master.

The Navy Department has received information of the capture of the sloop *Phoebe Snedeker*, by the *Tacony*, 27th. She was captured on the 24th of June, coming out of the middle entrance of Fort River, Mississippi Sound. She was loaded with cotton.

VARIOUS NAVAL MATTERS.

The prize steamers *Minnie* and *Young Republic* have been sold at auction in Boston. The *Minnie* was sold for $87,000, and the *Young Republic* for $91,000.

Orders have been received at the Portsmouth Yard to build three large steamers, and the work on two of them—the *Illinois* and the *Pittsburgh*—has already commenced.

The following additional prizes have been adjudicated at the office of the Fourth Auditor of the Treasury for the past fortnight:—Condemn, capture 47 bales of cotton; *Isaac*, capture *Mirora*.

If we learn that several of the employees at the Portsmouth Navy Yard have left for Key West, Fla., since the middle of last week. The cleaner was brought to the Yard by the steamer *De Soto*, from the Gulf.

The U. S. steamer *Nyack*, on the 27th ultimo, off Sapelo Sound, S. C., captured the sloop *Julia*, with a cargo of 90 bags of salt. The prize was sent to the port of London, Fran Nassau, N. P., was chosen by the United States steamer *Penguin*, and is now at Key West. Inquiry, at the office of South Carolina, on the morning of the 24 of the Gulf Stream, was brought to the shore. The vessel was destroyed by Acting Master Lee, who commanded the *Wanamie*.

The steamship *Courier*, 4, from Boston, bound for New Orleans, was wrecked on Leonard's Keys, Bahamas, on the 16th ult. The vessel was a total loss. The guns, small arms, ammunition, were saved and sent to Nassau. Officers and crew were all saved. The officers of the *Courier* when last at Boston were as follows:—Acting Lieutenant Commanding, S. C. Gray; Acting Master, Henry Kersey; Acting Ensigns, Edwin R. Pratt, Edward C. Sawyer, Albert J. Mansfield; Acting Assistant Paymaster, Benjamin F. Hall; Paymaster's Mate, Lewis Sattre. Ensigns Pratt and Simpson and Paymaster Brown have arrived at New York.

A letter from Surgeon J. Wesley Boyden, of the U. S. gunboat *Wave*, who was taken prisoner at the time of the capture of that vessel and the gunboat *Granite State*, at Culpeper Fair, to-day, informs us that Surgeon Boyden was on board the steamer *Connecticut* on the 17th of June, on his way to Mobile to report to Admiral Farragut. He says Paymaster John Reed, of the *Granite State*, is also a prisoner. Surgeon Boyden is now his own master. He had received word that Ensign Berry, of the *Granite State*, was in a low condition. He was shot in the leg, and has suffered amputation below the knee. Surgeon Boyden left with Dr. Gravatte, of the *Granite State*. Dr. Boyden says.—"None of the officers or men of the *Wave* were killed; though we fought half an hour longer than the *Granite State*. The other officers of the *Granite State* and *Wave* are now confined at Camp Groce, Texas, except Dr. Vermuiler, who is still at Culpeper with Ensign Berry and several wounded men."

The steamer *Ethan Allen*, Acting Lieutenant-Commander Crosby, arrived off Fort Royal on the 24th. Another account of Secretion June 27th. The *Flambeau* arrived off Charleston from New York, on the 21st. The Monitor *Nahant*, Lieutenant-Commander Miller, arrived off Charleston from Port Royal, on the same night. Also the *Winona*, late from Ossabaw. The *Pawnee* and the *Norwich* arrived off Charleston from the St. John's on Sunday week. The *Seneca* arrived off Charleston on the 21st. The *Aquia* left Port Royal for Wilmington. The *Saratoga* arrived off Charleston on June 20 Lieutenant-Commander Gibson, of the *Lehigh*, has been relieved by Lieutenant-Commander Parker. The sale of the *Ino*, late of the Navy, by direction of Paymaster Cowdrey, of the *Lehigh*, has been accepted. He is represented by Paymaster Butler, of the *Catskill*, who has been ordered by General Franch. Paymaster Butler, of the *Catskill*, has been relieved by Paymaster Tuttle. Edward Carney, of the *Pigsie*, and Edward Hughes, of the *Ethan Allen*, seamen, have been sentenced to three years imprisonment with hard labor, for stealing and other offences.

The United States steamer *Tioga*, Lieutenant-Commander McCauley commanding, has arrived at the Portsmouth Navy Yard, seven days from Key West, having left that port on Sunday, June 19. The *Tioga* was ordered North by Admiral Bailey, of the East Gulf Squadron, in consequence of the breaking out of the yellow fever on board whilst lying in the harbor of Key West. In consequence of the serious illness from the fever of the surgeon, Dr. Hobbs, at the time of her sailing, Assistant Surgeon George B. Cooke, of the East Gulf Squadron, was ordered to her, in charge of the sick. Dr. Cooke reported and died on board the *Tioga* before Key West, and were buried at sea. Their names are as follows:—Acting Assistant Paymaster Charles T. Fitch, Third Assistant Engineer James B. Hall, Second Assistant Engineer Wm. Bell, Landsman; John Stevens, marine. Annexed is a list of the officers of the United States steamer *Tioga*:—Lieutenant-Commander, E. T. McCauley; Lieutenant, H. W. McGregor; Acting Master, Benjamin George H. Cooke, in charge, Frank L. DuBois; Acting Masters, L. C. MacIntire and Charles G'Neil; Acting Ensigns, Hamilton Bogert, Jr., Edward Hopkins, Richard Cushman, Charles Stevens, —— Lovett and —— Somes; Engineer, W. H. Messinger, acting chief; Third Assistant, J. Keely, H. P. Tupene, G. A. Pitts.

Having received the necessary repairs at the Brooklyn Navy Yard, some undergoing repairs, others put in commission and awaiting orders:—*Susquehanna*, *Merrimack*, acting Master Rodgers, *Oswego*, *Ossipee*, Acting Lieutenant Commander Pendergrast, *Tallapoosa*, *Florida*, *R. R. Cuyler*, Commander Bowne, *Saluda*, recently in commission, Lieutenant Rodgers commanding; *Kansas*, Acting Lieutenant Commander Corbin, *Shawnee*, *Monongahela*, Commander Breese, *Sassacus*, Commander Gansevoort, *Mahaska*, Lieutenant Commander Smith, *Ranahan*, Lieutenant Kellett, formerly the *Tacony*, *Penguin*, Lieutenant Commander Grace, recently in from blockade and needing repairs, *Bienville*, and the supply steamers *Nestorian*, *Union* and *Rachael Seaman*; the most of the above are now in the dry-dock, having had their bottoms painted; the monitor *Montauk* is being rapidly completed; the *Mahaska* is under the always preparatory to receiving her new boilers and armament; the *Ossipee* has been undergoing repairs at the Philadelphia Yard, is now lying in Buttermilk Channel, and will be brought to the Yard next week; the repairs on the *Florida* are hurried on by night and day in the East Gulf Squadron, and sailed again on the 25th; the *Sea Foam*, arriving on the 16th, the *Gertie* on the 20th, and the steamer *Governor Henry Grace* by Ensign L. B. King commanding, on the 23d, from Pensacola, all sailed again on the 26th ult. The old frigate *Sarannah*, now a school-ship for officers, has been hauled out into the stream to her old moorings. A detachment of seamen from the *North Carolina* will be sent to Portsmouth to man the *Colorado*.

The following vessels are being repaired in the vicinity of the Yard. The *Acushnet*, foot of 9th street, the *Kensington*, at the Fulton Iron Works; the *Pequot* and *Shamrock* at the Atlantic Dock; the *Tuscarora* at the Continental; the *Vanderbilt* near the foot of Jackson street; the *Wyoming* and *Peoria* at Delamy street.

Dearne the year ending June 30, 1863, there were purchased for the United States 173,632 horses and 86,264 mules, and there were captured 7,783 horses and 6,965 mules, which, added to those on hand at the commencement of the year, made the number 197,467 horses and 110,063 mules. There were condemned, sold, died, or lost by capture, during the year, 87,676 horses and 17,179 mules. More than one horse out of every four was lost in the *contest*, while scarcely one mule in every seven was used-up beast. Yet $16,631 66 was paid for veterinary surgeons, and $30,292 30 for medicines for horses and mules.

By an advertisement in another place, it will be seen that Colonel THOMAS B. VAN BUREN, late Paymaster-General of the State of New York, has formed a copartnership with MESSRS. ALLEN & LUCKEY, 243 Broadway, for the transaction of a general banking business, with especial reference to the collection of Army and Navy Claims for Bounty, Pay, Prize Money, &c., &c. The reputation of Colonel VAN BUREN, as well as that of his partners, who are gentlemen of character and means, will ensure the success and stability of this new firm.

BUSINESS NOTICES.

BROWN'S ESSENCE OF JAMAICA GINGER.—We would call the attention of our readers to the advertisement of this valuable family medicine. Considering of the necessity of its being to every householder should be distributed among our brave soldiers. It is easily carried in the pocket, and in the midst of camp life, as a teaspoonful in a little water restores a soldier who gives out from fatigue or exposure to the rain.

PREDY & BROWN, Sole Proprietors,
No. 1 Chestnut street, Philadelphia.

BUSINESS NOTICE.

We notice that C. S. HERRARD, of New Haven, Conn., is Agent for "PARSON BROWNLOW'S papers, at $2 00 per year in advance—cheap enough. Try it a year.

D. VAN NOSTRAND,
No. 192 BROADWAY, NEW YORK,
Have recently published the following works:

LIFE OF NAPOLEON,
By BARON JOMINI,
General-in-Chief and Aide-de-Camp to the Emperor of Russia.
Translated from the French, with Notes.
By H. W. HALLECK, LL.D.,
Major-General United States Army: author of "Elements of Military Art and Science;" "International Law and the Laws of War," &c., &c.

In four volumes octavo, with an Atlas of fifty Maps.
Price, in red cloth binding.....$20 00.

"It is needless to say anything in praise of JOMINI as a writer on the science of war."

"General HALLECK has had the professional soldier and the student of military history under equal obligations by the service he has done to the cause of military literature in the preparation of this work for the press. His rare qualifications for the task thus undertaken will be acknowledged by all."

"The notes with which the text is illustrated by General HALLECK are not among the least of the merits of the publication, which, in this respect, has a value not possessed by the original work."

"It is an imaginary autobiography of the EMPEROR as corrected and written by JOMINI in the name of the EMPEROR, and whether regarded as a military study or as a study in history, it is equally interesting to the student and unprofessional reader."—*National Intelligencer.*

"In Jomini's hands the great events of Napoleon's career become so many illustrations of great principles of his difficulties so many abstract problems, and his triumphs the scientific solution. The narrative is brief, divested of unnecessary detail, clear and succinct, and the remarks with which from time to time the current of historical events is interrupted are summed-up, are logical, perspicuous, simple and complete."—*Boston Daily Advertiser.*

THE PENINSULAR CAMPAIGN AND ITS ANTECEDENTS.

PROPOSALS FOR TIMBER AND MATERIALS FOR THE NAVY.

NAVY DEPARTMENT,
BUREAU OF CONSTRUCTION AND REPAIR,
June 30, 1864.

Sealed proposals to furnish Timber and Materials for the Navy, for the fiscal year ending June 30, 1865, will be received at the Bureau of Construction and Repair, until 12 o'clock of the 1st day of August next, at which time the opening will be publicly had.

Proposals must be endorsed "Proposals for Timber and Materials for the Navy," and may be distinguished from other business letters, and directed to the Chief of the Bureau of Construction and Repair.

The materials and articles embraced in the classes below are generally described in the printed schedules, any of which will be furnished to such as may apply for them, application to the Commandants of the respective yards or to the Navy Agent nearest the locality of the live-oak and the timber required by the Bureau.

In framing into classes bating for the convenience of dealers in each, each classes only will be furnished at the navy yard designated for this. The Commandant and Navy Agent for each station will, in addition to the schedules, have copies of their yards, together with copy of the schedules of the other Yards for examination and bids. Any bid for any class or classes that will be desirable to make application for any of the classes of those Yards. All other things being equal, preference will be given to articles of American manufacture.

Offers must be made for the whole of the class at one price, upon one of the printed schedules, and in strict conformity therewith, or they will not be considered.

Proposals relative to the delivery of timber and plank on the yard, or to any Navy Agent, the form of offer, guarantee, and other necessary information respecting the proposals, will be furnished.

Bids must be inclosed in a sealed envelope with the name of the party writing on the outside, and be addressed to the Chief of the Bureau, and must distinctly specify the class or classes for which they are offered.

The contracts will bear date the day the notification is given and delivery are to be demanded within 60 days.

Deliveries in the fall amount will be required to sign the contract, and their responsibility certified to by a Navy Agent, United States Judge, United States District Attorney, Collector, or Navy Agent. As additional guarantee for the faithful fulfillment of the contract, the amount of the bills until the contracts shall have been executed, will be withheld by the certifying officer approved in triplicate by the commandants of the respective yards, will be paid by the Navy Agent at the points of delivery, in funds or certificates, at the option of the contractors, which shall clear all duties. All warrants for the same shall have been passed by the Auditor for the Navy Department.

The following are the classes required at the respective Navy Yards:

NEW MUSIC. — "THE DYING DRUMMER," one of the sweetest songs ever written.

Hear—Hear you come to see your darling dying?

For him home so sadly, mother?

For him home so sadly, mother, today?

"His Head lies pillowed on my bosom, mother's eyes today and beautiful song, suggested by seeing a little lame boy on the sad day, mother, and I am a father mother through her tears, said, "This land ever struck me, mother."

The above songs are from the pen of the popular composer, Mrs. Rosa Vertner Jeffrey, and are now 25 cents. Mailed free. HORACE WATERS, Publisher, No. 481 Broadway, New York.

BALTIMORE AND OHIO RAILROAD.

RE-OPENED!

This great National thoroughfare is again open for FREIGHT AND PASSENGER. The cars and machinery destroyed are being replaced by new and improved stock with all recent improvements, and the track and tracks are again in substantial condition, the welcoming and restoration of this Road for SPEED, SECURITY AND COMFORT, will be more than sustained under the reorganization of the business. In addition to the unequaled attractions of natural scenery heretofore conceded to this route, the recent transfers upon the Border have established marvelous points on the Road, between the Valley and Harper's Ferry, with painful but instructive interest.

CONNECTIONS

At the Ohio River, with Cleveland and Pittsburgh, Central Ohio, and Marietta and Cincinnati Railroads, and through them with the whole Railway System of the Northwest and Canada. At Parkersburg, with Washington Junction, with the Washington Branch to Washington City, and with the Kanawha and Ohio Railroads with four daily trains for Philadelphia and New York.

TWO DAILY TRAINS additional on Through Tickets to Baltimore or the Seaboard, will be run between Parkersburg and Washington City en route.

This is the ONLY ROUTE by which passengers can obtain Tickets and through checks to WASHINGTON CITY.

THE NORTH AMERICAN REVIEW.

No. CCIV.—For JULY, 1864.

Edited by

Prof. JAMES RUSSELL LOWELL

AND

CHARLES ELIOT NORTON, Esq.

CONTENTS.

ART. I.—A Physical Theory of the Universe.

II.—Sir Gregory Page and Martha Wemes.

III.—The Philosophy of Space and Time.

IV.—The Constitution in its Defects.

V.—The Navy of the United States.

VI.—Our Soldiers.

VII.—A National Currency.

VIII.—Recent Criticism in the Gascon and consequences.

IX.—Political Notices.

The NORTH AMERICAN REVIEW will maintain, in the hands of its new editors, its established reputation for the thoroughness and ability of its discussions, and for the variety and interest of its articles.

Edited in the interests of no party, sect, or publication, it will continue to discuss, in a liberal spirit, political, social, or literary, will be without prejudice, and without fear.

Thoroughly national and loyal in its spirit, devoted to the encouragement and development of American literature and of a higher standard of criticism, it will be found worthy of all the support at least the best interests of our country.

The NORTH AMERICAN REVIEW is published quarterly, on the first days of January, April, July, and October, in the number of about three hundred pages each, containing matter equal to four ordinary octavo volumes.

TERMS.—Five dollars a year, or one dollar and twenty-five cents per number.

CROSBY & NICHOLS, Publishers,

Mr. M. B. BRADY begs to announce that in addition to his collection of Historical PORTRAITS, SCENES OF THE WAR, &c., he has added a Photographic Gallery of Portraits of Officers of the Army and Navy, Civil Officers of the Government, Executive Councillors, the Art Committee, and the Arms and Trophies Committee of the Metropolitan Fair; as well as Photographic representing the most prominent features of the Art Gallery, the Arms and Trophies Department, the Knickerbocker Kitchen, the Shipping Department, &c., &c.

Mr. BRADY, having the corps of operators in the field is continually adding to his collection the most interesting subjects, and invites strangers as well as portraits—both military, naval and civilian—of those brought into the metropolis by the exigencies of the times.

Photos de Visite of all celebrities constantly on hand.

M. SNYDER, JR.,
Late of the U. S. Treasury Department,
ARMY AND NAVY AGENCY,
39 Nassau-street, New York City.
ARMY DISCHARGES, ARREARS OF PAY, AND NAVAL PRIZE MONEY collected; collections made on all parts of the United States; and claims of all descriptions against the Government promptly adjusted.
Officers discharged on account of wounds received in battle can procure their bounty of one hundred dollars by applying to me.

THE DERINGER PISTOL.
TIFFANY & CO.,
260 AND 352 BROADWAY, NEW YORK;
SOLE AGENTS FOR MR. DERINGER'S NEW AND UNEASTERN STATES.
By a recent arrangement with Mr. DERINGER, the subscribers have negotiated the exclusive agency for New York and New England, of the well-known pocket arm of which he is the inventor and manufacturer. They propose keeping constantly in store a full assortment, comprising all sizes and calibres of this unique pistol, and will be at all times able to fill Trade Orders with promptness, as manufacturers' prices. The arrangement has become necessary because of Mr. DERINGER'S inability to supply the public from spurious articles assuming to be his worse, and, as the purchaser only is defrauded at retail, will be safe who appreciates the genuine article.

THE CAMPAIGN IN VIRGINIA.

THE transfer of a formidable force of the enemy to Maryland, and its serious operations in that State, form the leading military topic of the week. So extremely conflicting and untrustworthy are the telegrams upon this demonstration, that it is unusually difficult to be both accurate and particular in narrating it. Whether the scheme of a Northern raid was contemplated independently of our counter attack on Lynchburgh is now a little uncertain; but its intimate connection therewith is obvious. It was towards the last of June, advices came from the Army at Petersburgh that "EWELL's (now EARLY's) entire corps, two brigades of HILL's corps, and BRECKINRIDGE's division or command," had left, probably for Lynchburgh. At another time, it was stated that nine brigades had gone to Lynchburgh. When HUNTER was checked at Lynchburgh, he found that the force in his front was large, and rapidly increasing. He retreated Northwest, leaving the Shenandoah Valley, and striking across the mountains to the valley of the Kanawha. At once, the enemy moved up the Shenandoah, and, on Saturday, July 2d, evidences of their approach were numerous.

The Department of the Shenandoah Valley was that of General HUNTER. Of his three subordinates, General SIGEL had his headquarters at Martinsburgh, which was a large dépôt of supplies, while General KELLY was at Cumberland, and General MAX WEBER at Harper's Ferry. News soon reached General SIGEL that the enemy under EWELL was approaching in three columns, one on the turnpike towards Shepardstown, a second towards Martinsburgh, near the line of the railroad, and the third, west of it. He determined to evacuate Martinsburgh, and a part of the stores were removed, including nearly all the rolling stock of the railroad company, and heavy trains loaded with supplies for HUNTER. But a quantity of valuable stores were lost. The enemy made his appearance first at North Mountain, about eight miles north of Martinsburgh, thus flanking the town on the north. On Sunday morning, at 6 o'clock, SIGEL was attacked at Leetown by the enemy in force, and slowly driven from his position. The flanking of Martinsburgh compelled his falling back to Harper's Ferry, which he did, and, with General STAHL, held the strong position on Maryland Heights, having evacuated the town. It was clear that the enemy's main line of advance was by way of Martinsburgh and North Mountain, across the Potomac to Hagerstown. Refugees, farmers, and citizens, soon passed East towards Baltimore, and the roads were filled with pedestrians, with droves of cattle, and with wagons of all species of construction, carrying such goods and valuables as the frightened owners had dared to stay to pick up. The livid terror of the fugitives was rather humiliating, and their stories of what they had seen and heard incredibly extravagant. The panic was wide-spread and universal, and the region for miles became depopulated. The enemy's cavalry had everything their own way in the valley, and broke up into bodies for securing forage, horses, and all other plunder, and for visiting the various farms and settlements on their way, marauding and levying contributions on the people. There were some soldiers straggling from SIGEL's command towards Baltimore, who also had large stories to tell. It was certain that Martinsburgh had been occupied by the enemy without firing a gun. Winchester, of course, had already fallen into their possession, and the travel on the Baltimore and Ohio Railroad was suspended. The country between Winchester and Williamsport was in the hands of the enemy by the night of Monday, July 4th. That day, a party of MOSBY's cavalry crossed the Potomac at Point of Rocks, with two light field pieces. They drove off a rather larger number of the Potomac Home Brigade, and captured the place with whatever could be found in it. The shopkeepers were plundered, and a train was fired into by the same party. Finally, at evening, Colonel MULLIGAN's forces evacuated Bolivar Heights and Harper's Ferry, burning the magnificent iron tressel bridge over the Potomac at that point. About nine at night, SIGEL came up and took possession of Maryland Heights, and the enemy soon after occupied the town and all the Virginia side. They also sent a party to the Chesapeake and Ohio Canal. This was badly damaged, and a number of boats burned and teams captured.

On Tuesday, the 5th, about thirty Union soldiers, wounded at Leetown on Sunday, arrived by cars at Frederick, Md. At this latter point, all the Government stores were loaded on railroad trains, and every preparation made for evacuating the city without loss. During the afternoon, the wagon and railroad trains with the stores moved off towards the North. All that day, as on the preceding, the enemy continued their plundering, far and wide. In the afternoon, a small squad of cavalry entered Hagerstown, and were driven back, after a brief skirmish, by our own cavalry detachment in that town. A little later, they entered in larger force, and took possession of the place, and plundered the stores, and the next day, Wednesday, MCCAUSLAND's cavalry brigade, with a battery, came into Hagerstown, plundered the stores and people, and made a requisition on the latter for some outfits and $20,000. The money was paid. Afterwards, the raiding party left. The enemy continued to hold the Baltimore and Ohio railroad as far down as Sandy Hook, and tore up a considerable portion of it. At Sandy Hook much property was burned, and the Shenandoah bridge was consumed.

On Tuesday, the PRESIDENT having called for 12,000 Pennsylvania militia, 12,000 from New York, 5,000 from Massachusetts, the various Governors issued stirring proclamations, and militia began to assemble. General COUCH's headquarters were at Chambersburgh, Pa., whither many of the Pennsylvania troops repaired, and General WALLACE's at Baltimore. HUNTER's forces were approaching the scene of action. The enemy were scattering in various directions, crossing the Potomac at several points, both below and above Harper's Ferry.

On Wednesday, the 6th, there was some skirmishing between Major COLES's cavalry and a few of the enemy's cavalry, between Hagerstown and Frederick. There was a little firing at Harper's Ferry, also, but nothing important, except at night, when the enemy again fired the bridge. Our forces, which moved out of Hagerstown on Wednesday, fell back on Greencastle, and subsequently fell back again towards Chambersburgh, the enemy having crossed the State line. There was slight skirmishing at various points on the Potomac and north of it. The enemy's cavalry occupied Williamsport, Sharpsburgh, and the neighboring towns, and began, on Wednesday evening, to move down towards Boonsboro'. Early on Thursday morning, the 8th, General WALLACE, whose headquarters were now at Monocacy, four miles southeast of Frederick, sent out several companies of Colonel CLENDENNIN's Eighth Illinois cavalry and two 12-pounders on a reconnoissance. At Hagan's Mountain, near Middletown, they met the enemy, and were briskly repulsed, without getting any definite knowledge of the enemy's force. The Rebels, having occupied Boonsboro' and Middletown now followed our retreating forces down the road to Frederick City, and at evening took position within a mile of the city, and threw a few shots into it. Our men, having been strongly reinforced, began again to skirmish with the enemy. But, while the latter with his advance was demonstrating in front, the country in his rear was carefully secured for horses, forage, provisions and money. Before midnight, the enemy's advance was called off from Frederick to operate in another quarter, without endeavoring to occupy the city. On Friday morning, the enemy's force left Harper's Ferry, and either this or another party, under IMBODEN, again entered Hagerstown, from Williamsport, and again plundered the inhabitants, exacting another contribution of $1,500. Several buildings were burned. The road between this town and Fredericks was still occupied by the enemy in force, their main body being behind Kittocton Mountain.

THE BATTLE AT MONOCACY.

About 11 o'clock on Friday evening General WALLACE evacuated Frederick, having removed all his stores, and withdrew to Monocacy Junction. At sunrise, the enemy was in the town, and a heavy contribution was at once levied on the city authorities, with the alternative of the loss of goods. It was accepted and paid. Early in the morning the enemy moved out against WALLACE and drove in his skirmishers. About 9 o'clock a battle began, the enemy moving his guns down to Monocacy River and exchanging shots with our batteries, posted on the opposite side, and protecting the railroad and the Baltimore turnpike. RICKETTS' veteran division was deployed to the left of the railroad, the remaining forces, including the hundred-day men, on the right. The attack was principally on the left. After considerable artillery firing, the enemy brought up their infantry force. General WALLACE reports their number at 20,000. If this should be true, they must have outnumbered our forces by more than two to one. Deploying their men into two or three lines, the enemy forced the passage of the stream, fording it at all points. On the left, the battle was fought with varying success for some hours. At length, however, RICKETTS' division of the Sixth corps was compelled to give way under the pressure in its front. At the same time, the enemy had completely flanked the right, end, appearing in the rear, poured in a reverse fire, and swept off about six hundred men and officers, including Brigadier-General TYLER. General TYLER afterwards effected his escape. Thus outflanked, General WALLACE was compelled to fall back, which he did, the enemy pursuing him several miles on the Baltimore turnpike towards Ellicott's Mills. Our loss was severe, it being reported at about 1,200 men, including many officers.

The defeat of WALLACE and the inference drown from it as to the size of the enemy's force, put Baltimore and Washington into great excitement. On

Sunday, the 10th, at six o'clock in the morning, the alarm bells at Baltimore were rung, and the citizens were mustered for the defence of the city. From that time to the present, there has been great stir in the two cities, and constant preparation to repel the expected attacks. On Sunday morning, a battalion of Rebel cavalry dashed into Dorchester, about twenty-one miles from Washington, making a raid on the stables and stores, and again leaving for Frederick. The enemy continued Sunday and Monday to gather up horses, hogs, and sheep, sending all live stock across the Potomac, whose various fords they held by small cavalry forces. On Saturday evening, the enemy reached and occupied Westminster, and, the next morning, Reisterstown, sixteen miles from Baltimore. Both these places were plundered. Thence the enemy moved to the Northern Central Railroad, and tore it up at Cockeysville and at Texas, fourteen miles from Baltimore. They also burned the bridge at Ashland, and cut the telegraph line of the railroad, as well as that of the Inland Telegraph Company. Some of the railroad bridges were protected by our gunboats. The enemy also threw forces out towards Washington, and entered Rockville, about fourteen miles distant from that city, taking away provisions and horses. At Washington, preparation was made by General AUGUR to resist attack, and, in addition to the ordinary forces, the marines, the home guards, and a large body of department employés were called out. Meantime, our forces began to close in on the enemy's rear. General COUCH's cavalry occupied Hagerstown on Saturday, and a part of HUNTER's command took possession of Martinsburgh, both of which places had been abandoned by the enemy. Small detachments of Rebel cavalry operated during Sunday on the railroads and in the country from ten to twenty miles above Baltimore, but the main body moved down towards Washington.

On Monday, operations in burning the bridges of the Northern Central Railroad were resumed, and travel on the road was suspended. A cavalry force also crossed over to the Philadelphia, Baltimore and upon the chain of heathe batteries on the further side Wilmington road, and captured and fired the station at Magnolia Station, seventeen miles south of Havre de Grace. In the second train, Major-General FRANKLIN happened to be, in citizen's dress, and was captured. The operations of the raiders were almost entirely confined to robbing the passengers and burning the trains. Some damage was done to the track, and Gunpowder Bridge was partially burned, by setting fire to the second train and running it on the bridge. But the damage was not great. Railroad and telegraphic communication between Washington and the North was for a time suspended, but was soon resumed. The raiding party at Magnolia was only about a hundred strong. General FRANKLIN is since known to have escaped. Near Washington, a squad of ten Rebels burned down Governor BRADFORD's residence, five miles from the city on the Charles street road. There was also some skirmishing about six miles from Washington at Silver Springs. A report stated the place where the Rebels appeared was be Crystal Springs. But this must be an error for the other point, as Crystal Springs is within our lines. On Monday evening, the enemy lay on the west of the Seventh-street road, six or eight miles from the city. On Tuesday morning they moved nearer, extending their line to the east of the road, and advanced their skirmishers towards Fort Stevens, formerly called Fort Massachusetts. This fort is situated, if we remember aright, about five miles in a direct line from the Patent Office on the high ground back of Washington, beyond Meridian Hill. It lies between Fort Slocum and Fort Pennsylvania. These are all regularly built permanent works, mounting about 15 guns each, and with an interval of about three-fourths of a mile between them. Fort Stevens is the most accessible of the three. There is level ground in its front, and, at our last knowledge of the fort, some woods and buildings under its guns had been left standing, instead of being cleared away as usual. There are also some adjacent ravines, which might shelter the approach of so attacking party. But the fort is strong, and, even if taken, would be under the fire of its neighbors.

Toward evening, the Rebel sharpshooters had become so annoying, and the fact of their presence at the National Capitol so humiliating, that an attempt was made by General AUGUR to dislodge them. A brigade of veteran infantry was dispatched along the Seventh-street road, and attacked and completely routed the enemy, who left about a hundred of their dead and wounded on the field, near Silver Spring. Our own loss was reported at about 200. On Wednesday morning, there was no enemy to be seen in the vicinity. Between 8 and 10 o'clock the same morning, the force under Bladensburg moved off, carrying cattle and horses with them. Many head of cattle were sent across the Potomac the same day at Poolesville, and the enemy moved in force towards that point and Edward's Ferry. Washington was perfectly secure with the presence of the reinforcements, which had come up rapidly from Petersburgh, and a part of the Nineteenth corps, from New Orleans and more lately from Fortress Monroe.

BEFORE PETERSBURGH.

The principal changes in the position of the Army before Petersburgh has been the transfer of troops to checkmate the enemy's movement into Maryland. There have also been the customary demonstrations of artillery and of picket firing, but the week, upon the whole, has been the most quiet with the main body since camp was broken at Brandy Station, two months and more ago. The opening of the week our main line was as follows:—On the Eighteenth corps on the right, the Ninth on the right centre, the Fifth at the centre, the Second on the left centre, the Sixth on the extreme left. A part of the Tenth corps was in front of Bermuda Hundred, and FOSTER's division of that corps was north of the James, at Deep Bottom. The Eighteenth corps rested its right a few hundred yards from the Appomattox, and the Sixth extended towards the Weldon and Petersburgh Railroad. On the extreme left, a part of our cavalry were in camp. The firing during the week has been chiefly on the right and left centre of the main line. It results principally from the first of which is the determination of our batteries to make the status of Petersburgh as much as possible that of a city besieged. Accordingly, there is a regular play of artillery into the city, and upon the bridge in its rear, and teries reply to the enemy's. Another part of the operations of the raiders were almost entirely confined to robbing the passengers and burning the trains. Some damage was done to the track, and Gunpowder Bridge was partially burned, by setting fire to the second train and running it on the bridge. But the damage was not great. Railroad and telegraphic communication between Washington and the North was for a time suspended, but was soon resumed. The raiding party at Magnolia was only about a hundred strong. General FRANKLIN is since known to have escaped. Near Washington, a squad of ten Rebels burned down Governor BRADFORD's residence, five miles from the city on the Charles street road. There was also some skirmishing about six miles from Washington at Silver Springs. A report stated the place where the Rebels appeared was be Crystal Springs. But this must be an error for the other point, as Crystal Springs is within our lines. On Monday evening, the enemy lay on the west of the Seventh-street road, six or eight miles from the city. On Tuesday morning they moved nearer, extending their line to the east of the road, and advanced their skirmishers towards Fort Stevens, formerly called Fort Massachusetts. This fort is situated, if we remember aright, about five miles in a direct line from the Patent Office on the high ground back of Washington, beyond Meridian Hill. It lies between Fort Slocum and Fort Pennsylvania. These are all regularly built permanent works, mounting about 15 guns each, and with an interval of about three-fourths of a mile between them. Fort Stevens is the most accessible of the three. There is level ground in its front, and, at our last knowledge of the fort, some woods and buildings under its guns had been left standing, instead of being cleared away as usual. There are also some adjacent ravines, which might shelter the approach of so attacking party. But the fort is strong, and, even if taken, would be under the fire of its neighbors.

Toward evening, the Rebel sharpshooters had become so annoying, and the fact of their presence at the National Capitol so humiliating, that an attempt was made by General AUGUR to dislodge them. A brigade of veteran infantry was dispatched along the

were also National salutes of shotted guns from BUTLER and from the Navy. The day was further celebrated by a "scrub race" of officers' horses, and other amusements, and by the playing, all along the line, of the bands, which moved out towards the front, and repeated National airs. There was also the novelty of a fresh breeze; but the next day came on with the usual heat and humid heat, and all the sufferings of a six weeks' drought.

On Thursday, July 7th, a battery of heavy guns in front of the Fifth corps opened upon a working party of the enemy, who were discovered to be throwing up a new work. The result was a general cannonading at that point, and the sharpshooters, following the lead, broke their armistice without ceremony. On Friday morning, before daybreak, there was a little firing from the Rebels, but until noon the day was unusually quiet and intensely sultry. About 4 o'clock in the afternoon, the enemy suddenly sprang to their feet with their loud battle-yell, and poured a volley of musketry at our entrenchments in front of TERRY's division, on the left of the Eighteenth corps. They quickly deployed a skirmishing line and made for our works, extending along the front of MARTINDALE and STANNARD. The entire space between the forces in front of the Eighteenth and Ninth corps was soon dense with smoke and fire. The musketry firing was very sharp for a short time, and the enemy were driven back without having reached our breastworks. Meanwhile, the batteries all along the three right corps were opened, dropping shells from the works across the intervening field, and thowing shot and shell into the city and across the river. The enemy's batteries were soon overpowered by the superior weight of metal Our men, being well protected, lost perhaps not more than a score or two in killed and wounded. The enemy's loss, in their unsuccessful charge, was, of course, greater. Their movement was known as a reconnoissance. The cannonading was over at dusk.

Since the affair of Friday, the principal event has been the departure of troops for Maryland. The lines are quiet at present, but there are signs that the interval of rest will not long continue. It is not to be decided that the opening of the Shenandoah to the enemy was a mistake, but it is an axiom an campaign was ever fought without a mistake. At present it seems to have been a mistake unattended with serious, or rather decisive, consequences, though it promises to replenish the Rebel commissary chest and supply them with horses for their cavalry.

GENERAL SHERMAN'S OPERATIONS.

We have no official information, this week, in regard to General SHERMAN, and no information of any kind, worthy of note. At the date, our Army was reported to have advanced nine miles beyond Marietta, with its flanks resting on the Chattahoochee, above and below the railroad bridge. The main body of the Rebels were then across the river, HARDEE's corps, however, occupying the *tete du pont* on the north side. The evacuation of Kenesaw Mountain and Marietta was announced June 30, in consequence of the flank movement undertaken by General SHERMAN immediately after the unsuccessful assault on the 27th. On the 1st of July, our forces advanced in pursuit of the Rebels, taking many prisoners from among their stragglers and rear-guard—as many as 3,000, it is said. There has been no fighting reported since the battle of June 27. On the 30th, the armistice for burying the dead and patrolling the wounded was declared, at the suggestion of the Rebels.

We continue to receive reports of guerrilla operations on General SHERMAN's lines, between the Buzzard's Roost Range and Resaca. "Six trains are stated to have been destroyed, and the road all the way to Cartersville is described as strewn with the wreck of burnt and demolished trains. According to the latest report, General SHERMAN's Army has crossed the Chattahoochee, and is advancing upon Atlanta.

BRIGADIER-General De Trobriand has been relieved from the command of New York city and harbor, and ordered to report to Lieutenant-General Grant. He will probably be assigned to the command of his old division in the Second Corps. Brigadier-General L. C. Hunt has been assigned to the command made vacant by the transfer of General De Trobriand.

THE ESCAPE OF SEMMES.

It appears to us unwise to attach a great importance to the liberty of Captain SEMMES. Were he now either drowned, or hanged, or a prisoner—another could easily be found to do equal service to the cause of the Rebellion, or the cause of British neutrality—to which he was devoted. But far more unwise would it be for our Government to embarrass itself by any action towards a neutral power in respect to him, unless obliged to do so in order to vindicate a clear right given by international law.

In an old-fashioned fight between two ships, moved only by sails and manned in the old way, a private sailing vessel could hardly have ventured to be within hail of either combatant. But we had, for the first time, made it possible for a vessel, the *Deerhound*, with safety to herself, to be near the *Kearsarge* at the moment the combat with the *Alabama* ended. We should in vain search the annals of naval warfare for any similar case.

For the purpose of battle and its consequences the ships of belligerents may be said to have a temporary exclusive use of the bit of sea within range of their guns. If a neutral vessel gets hit by a stray shot she suffers by her own fault, if voluntarily present; and if her presence interferes in any way with the action or the results of battle, when not realized or anticipated, such vessel may be fired upon by a combatant. There can be no question it seems to us, that had the owner of the *Deerhound*, of his own motion, and without any notice from the victor, picked up SEMMES or any of the crew, thus preventing either their capture or the alternative of their drowning, the vessel might have been then and there fired upon or otherwise resisted by the *Kearsarge* to surrender the rescued persons. The British jurisdiction under which the vessel was, in the first instance, though on the open seas, would have been temporarily divested by the act of the owner and master—a private citizen—placing himself, by his illegal interference, within the belligerent jurisdiction of the victorious combatant. The national rights of Great Britain, or its government, would not have been violated in such a case by our national ship, nor, on the other hand, would the trespass against international law by the British private citizens have imposed any responsibility upon his own nation or its government.

But, had a British public ship saved SEMMES from capture, or an alternative death by drowning, by a similar voluntary interference, the British jurisdiction over such a vessel would not, though on the open sea and in the immediate vicinity of the belligerent victor, have been in like manner divested. Such would still public ship, notwithstanding the illegal interference, be placed within the belligerent jurisdiction of the victor. The *Kearsarge* would not, in such a case, have had a right to use force, even on the instant, against such vessel; or, if force had been so used, it would have been an act of war—not, as in the other case, an act of belligerent jurisdiction. The character of the interfering ship would have thrown the responsibility of the act upon the British Government, against whom the aggrieved party would not have the power to vindicate the violated right. The sphere of action of the combatants would not, therefore, be limited by the subject matter passing within the province of diplomatic negotiation, after which it might or might not become a ground of reprisal, or of war.

If he had been thus, by voluntary undesired interference, taken on board a British war vessel, SEMMES might properly be demanded, as long as his person remained within British jurisdiction, or satisfaction in other ways might be required. But if the *Deerhound*, the private ship, had, after such supposed voluntary interference, got off unmolested and landed SEMMES in a French, German, Dutch or English port—it matters not which—the belligerent right of jurisdiction, above spoken of, not having been exercised from the beginning to the end of the interference, would cease. Granted, that the vessel or its owner and master had violated international law, the government of which was the subject is not liable for the acts of a private citizen in violation of such law, either within the territorial jurisdiction of another nation or at sea, unless it afterwards makes them its own. The nation whose rights have been infringed by the private individual, may vindicate them against that individual, according to the extent of the jurisdiction. In the case supposed, such right of vindication against the *Deerhound* would last only, at the farthest, while SEMMES was on board. When SEMMES was once within the territorial jurisdiction of Great Britain it could make no difference to the British Government how he got there, whether by the wrongful connivance or assistance of a private British subject or not.

If this view be correct, it is quite immaterial on the question of a claim against the British Government, how the question of honesty or of honor stands, as between Mr. LANCASTER and Captain WINSLOW. Whatever communication Captain WINSLOW may have had with Mr. LANCASTER, and whatever the former may have intended, or in whatever sense the latter may have understood it, it cannot make the question of claim any stronger for us than it would be under the circumstances above supposed.

It seems idle for us to trouble ourselves about the propriety of Mr. LANCASTER's conduct, or about the judgment of the British Yacht Club, or about Captain SEMMES's notions of honor. A Chevalier BAYARD, a SENESCHAL DE JOINVILLE, might have preferred captivity to an escape, whereby the honor of another might even be questioned. But we ought to know by this time that the refined chivalry of our Southern brethren is of a pattern unknown to the rough knights of old, and, if we want any settlement with the honesty and honor of Mr. LANCASTER's associates in English society, we had better talk of the day the *Alabama* sailed out of Liverpool then of the day she sank in the Channel.

Besides, on what ground should the officers of the *Alabama* be demanded? As the officers of a Confederate man-of-war? As pirates—after the cases of the *Chesapeake* and the *Gerrity*? Our Government should have let them go when they would have been treated if captured. Had they been taken, we think it would not have been a bad move if Mr. ADAMS had politely offered to place the whole set of prisoners at the disposal of the British Government, as a set of fellows who had roved the seas in a ship which sailed first out of Liverpool, bearing with it the British jurisdiction, like any other British vessel leaving a British port under the flag of England, and which had never changed that jurisdiction by any act recognized by the law of nations.

On Saturday, the 9th inst., a few personal and political friends of Judge MCCUNN, of the New York Superior Court, assembled on board the steamer *City of London* to bid him farewell in his departure for his native land—Ireland. Before the course of some remarks in response to a toast, "His Honor" improved the occasion to preach a crusade which he purposes to undertake abroad, on behalf of the principles of the Peace Democracy to which he declared his unalterable adhesion. It may be well, in view of this declaration, for us to suggest to those abroad, who are in danger of being moved by the Judge's eloquence, that his conversion to peace principles dates from the sudden shock given to his warlike ardor by his peremptory dismissal from the command of the Thirty-seventh regiment New York Volunteers, for "conduct unbecoming an officer and a gentleman."

We get from General SHERMAN's Army private accounts which speak in the highest terms of the health of the men, and the cheerful patience with which they bear hardship and fatigue. They are having a rough campaign, but are supported under trial by the expectation of a great success. The luxuries of the season do not yet appear on their mess tables, and cigars and spirits and tobacco are infrequent consolers, yet they are peculiarly at work, daily marching to some fresh point, though it be but a few yards. They feel confident that their prize is not long to be kept from them; and even though it be delayed, they are willing to wait for it.

THE monster twenty-inch army gun made at the Fort Pitt Works, Pittsburgh, Pa., has been finished for some time, and now only awaits the completion of the big gun-boats upon which to ascertain its exact weight, and the arrival of the new truck necessary for its transportation. The cooler has been completed, and the gun has been received. The estimated weight of the gun is 116,200 pounds, and in order to distribute the immense weight so that there would not be too much bearing at any one point on the bridges that it will have to cross, a trunk of peculiar construction was necessary. This was done by building two very strong trucks, each eight feet wide in the clear, and nineteen feet long; they are coupled together in such a manner as to leave one feet space between their floors. A strong bridge is then built from one to the other, the bearing resting on the centre of each car, and the ends turning on pivots, while the whole is supported on eight wheels. The gun will start at Altoona, and it is thought will answer all purposes for which it was designed

MARCHING TROOPS IN LARGE BODIES.*

NO. III.

AMONG the impediments to the good marching of troops, which *come from without*, the *Train* stands conspicuous. A better organization would do much to alleviate the misfortune. Were the train now equipped with as much system as the artillery; did the drivers stand to horses, harness, and unharness, by word of command; had it captains, lieutenants, and non-commissioned officers, who took a pride in considering themselves and their men thorough soldiers; were there a manual for loading, unloading; and were the drivers and a certain number of men assigned to each wagon, to handle its contents, trained as soldiers, and expected with their muskets and perhaps a mountain howitzer or two, according to the number of wagons, to aid materially in the defence of their convoy, it might require more men and more horses to begin with, but it would add to with more horses and a better provided army. The notion of short trains has also its limits. A long train lightly loaded *and with good rest of cattle*, will cause less hindrance than half a dozen wagons which are continually sticking in the mud. It might be worthy of investigation whether the train of one-horse carts for the *immediate* following of the army, as suggested by some writer in your columns not long ago, or light two-horse wagons, would not be an improvement. Either would require more men, hardly more horses than the present vehicles. They would also require somewhat more room, although since light carts could move on almost any part of the road, the space required under such a train organization and discipline as we have spoken of, might not be so great in practice But as to remove a broken cart or to repair it would be no great job, and the grand question is which form of train most hinders the army.

All officers who have tried to preserve the entrenching tools belonging to our infantry regiment, know how very apt they are to become "lost" on fatiguing marches. They are, in truth, hard to carry, and particularly so at double quick. A very common pack-horse or mule would obviate every excuse on this score: it should follow with the mounted officers in rear and with a commander whose orders are obeyed; there would be no danger of the animal being loaded with aught else than the tools and some oats.

To the most excellent rules, under the head of "March of a Brigade," which appeared in a late number of the Journal, we should add the following: *If anyone any part of the rear of a column is too far behind, the head always waits for it. The reserve is the rear to be hurried up.*" Excepting under *very* peculiar circumstances, such as gaining a choice position, the like exertion is only to be asked from picked troops, of which, though in rear and with a flank them in greater numbers or of finer quality, we, as before said, as yet have none.

The situation of the Duke of WELLINGTON's army in Portugal and Spain was in so many respects similar to our own; the country formed of new troops and new officers fresh from civil life, or with little military education, that it may not be out of place to quote his military experience in the shape of orders wrung from him by these circumstances and the roads he traversed.

European warfare commonly differs from our own for two reasons: 1st. The numerous villages, each of which has a *bakery* and stores for its inhabitants. 2d. The excellence of the roads. For the latter reason, also, European books always calculate on a march with a front of at least twelve or sixteen abreast. A collection of the Duke of WELLINGTON's orders were published many years since; the following summary we take from SUARSO:

"COIMBRA, 3d May, 1809.

"Regular disposition of march to be kept up to halt every hour and a half for five minutes, and no man to fall out and quit the ranks while on the march except during the halts."

"BADAJOS, 31st October, 1809.

"Divisions to *practice twice a week the route march*, and to perform about three leagues (14 miles English) in marching order, the cavalry and artillery to be likewise so frequently practiced."

"BADAJOS, 14th November, 1809.

"Those marches to be discontinued on account of the bad weather."

"LISBO, 18th March, 1811.

"To secure the progress in column by ordering the march by threes."

"VILLA FORMOSA, April 15th, 1811.

"The *practice of the route march* to be continued."

"PRENADA, 7th October, 1811.

"The *route march* to be *practiced* once or twice a week."

"MADRID, 22d August, 1812.

"Divisions of infantry to *march every third morning from six to eight* miles and to manœuvre the other days."

"QUINTANA, 17th June, 1813.

"When distances are lost the head to halt and not the rear run up, which occasions considerable fatigue to troops."

* In No. II. of this series of articles, several typographical errors occurred through the negligence of the proof-reader; and as they affect the whole argument, we subjoin a table carefully by which the reader may correct them here. In the first column, 36th line from the top, "prefer" should be "proper;" 2d column, 4th line, "ranks" should be "carts;" same column, 22d line, "12th inches" should be "12½ inches;" 3d column, 35th line, "if time produced" should be, *if this be reduced*.

We will now close these articles by adding some general suggestions in regard to the marching of troops:

1. Oftentimes a word of praise to those who are doing well, or an explanation as to the necessity there is for order in the interest of the whole, or unfolding the *sinfulness* of misconduct, and thus bringing on the offender the opprobrium of his fellows, will have a good effect; but a large number of men, so soon *as inconveniently tired*, need something more than these to spur them on. It is, however, on the other hand, astonishing how many men, particularly in our armies will still themselves before they give in, and these also should be looked after in a different way. If company officers and the sergeant know the men as they should, it is easily done.

2. Bugle signals answer an excellent purpose for putting a column in motion, if the commands of execution be given by the voice; but bugle-signals cannot be used when good marching is, above all times, essential, that is, when near the enemy; what in some European armies is called the *pas-accéléré* is infinitely preferable. This consists simply in certain designated officers or non-commissioned officers along the line repeating successively and as rapidly as possible the word of command, turning at the same time in the direction in which it passes, so that the voice may not be interrupted by the back of the speaker. It is unnecessary to what application this may, by proper practice, be brought. In a dark night, movements may thus be concealed which would else be betrayed. If all the file closers participate, and are attentive, or, when marching by large sub-divisions, the distances between the guides be filled up, the command thus may in this way be passed almost in a whisper. It is obvious that when eyesight is useless in ascertaining that the order is understood, the cautionary command should be returned from the extreme point before that of execution is given. Information concerning the condition of the rear of a column or the flanks of a line may in the same way be conveyed to the commanding officer in answer to inquiries thus passed. It is well sometimes first to pass down the word, Attention! but like everything else to be used on the field, it should be practiced at drill, as if the men were in battle, before it can be executed in battle as if they were on drill.

3. We remember have much on officer who won high distinction in the present war and who must unquestionably ed a battalion of the line in the double-quick, when what was called Hardee's tactics were first introduced, insisted on *carrying the weight of the body forward*.

The advantage of deep breathing was many years ago illustrated in the 7th regt. of militia on parade exercise, by a Frenchman, Mons. Monguin, who professed to have learned it as one of a battalion of picked men, with whom a commencement in gymnastic exercises for the French army was first made under Charles X. Mons. Monguin also insisted much on feeding the head and chin, as above described.

4. Some fuller explanation of wheels on a movable pivot may be useful. It is evident that when the pivot man is directed to step 91 inches, this being the step belonging also to the man at one-third the front from the pivot, the *same third* of the sub-division swings forward. When, as in column at half distance, the pivot man is directed to step 14 inches, and the wheel is performed (see plates to Scott) with a radius of a half times the sub-division front; the step of 14 inches being that also of the man at the end of the half-radius distance from the pivot, the inner sub-division breaks here, that is, the *inner quarter* swings forward. The former provision will give one-third the marching distances between the nearest points of two consecutive sub-divisions during the wheel; the latter one-half the marching distances. The French tactics seem to have intended to make provision for companies of as low as 21 files, which would (reckoning 5 files to 4 paces) make these "nearest points" between front ranks; for a column at full distance with company front, *fire and a half paces*, and for a column by division at half distance *right and two-fifths* paces. In column closed in mass this will be reduced to *three paces*, but here something is gained from the rear guides beginning to cover the leading guides so soon as the commencement, by which means the second sub-division slides somewhat inward toward the pivot, and the others not only do the same but increase it by commencing to circle round at the same time with the leading guide; *i. e.*, with four sub-divisions at *twenty-four paces* from that point. There would seem to be a mistake in our translation which directs the guide to "oblique outward." The French has it "obliquer *de ce côté*," not à ce côté and "*s'appuyer à ce côté*," which certainly does not mean to press that side out of place. Beside, moving outward it not the method best adopted for covering a guide who on the arc of the circle is continually moving inward.

Major Charles W. Smith, 8th U. S. C. Artillery, has been appointed Chief of Artillery and Ordnance for the District of Natchez, vice Major Reynolds appointed Provost-Marshal.

NEW PUBLICATIONS.

Two copies of the Annual Report of Adjutant-General A. L. Russell, of Pennsylvania, for the year 1863, have been received by the courtesy of the Adjutant-General and by that of Hon. Geo. W. Scott. It contains a full and interesting synopsis of the military strength of the State up to the 1st of January, 1864, and will be of great use for reference.

The Christian Examiner for July, comes "rejoicing from the East" in that excellence of type and paper, and accuracy in proof reading which it is a luxury to read anything issued from the University Press at Cambridge. The contents are as follows:—Character and Historical Position of Theodore Parker; The new Ring of Greece; Robert Browning; Marsh's "Man and Nature"; Robert Lowell; Read's Critical Essays; Edward Livingston; A Word on the War; Review of Current Literature. Boston: Walker, Wise & Co.

Guide-Book of the Central Railroad of New Jersey. This is a handy little book for travellers in the section which it describes, illustrated with many handsome little plates. It describes minutely the scenes of the old Railroad through the coal-fields of Pennsylvania. New York: Harper & Brothers.

The Second Annual Report of the U. S. Christian Commission for 1863, has been published. It contains a full statement of the operations of the Society, and many interesting letters from its agents and its beneficiaries. The Commission has accomplished already a work fully repaying the outlay of money which it required. During the present campaign it has been found to be a facility of operation which is to be commended. At Fredericksburgh, West Point, and Bermuda Hundred, the Army were pleased with the promptness with which its agents were present with supplies, pushing through to the front at the earliest opportunity.

Journal des Armes Speciales et de l'Etat-Major. 15th May, 1864. This able periodical comes at this time with very little variety of matter, but its articles are interesting. The contents are: The Organization, Composition, and Strength of the Army of Great Britain, compiled by Captain Adam Neale—continued and concluded; New Studies on Rifled Arms for Infantry, by Captain De Reffye, translated from the German by Captain J. E. Tarbell—continued; Theory and General Construction of Rifled Cannon, by Lieutenant Andre Retbet, translated from the German by Maurice Bergeau, Civil Engineer—continued; Panoply or Arms of All Times and all Peoples, by A. M. Parrot, Geographer, with 24 plates—continued; Military and Maritime Review. Paris: J. Corbeard.

NEW MUSIC.

When Dear Friends are Gone. By S. C. Foster.
Give this to Mother. By S. C. Foster.
Let me Die with my Face to the Foe. The last words of General Rice. By J. G. Clark.
Come into my Garden, Maud. By M. W. Balfe.
So Shave beneath that Starry Flag. Words by G. L. Taylor, music by Mrs. Parkhurst.
Norah Dearest. By Mrs. Parkhurst.
The preceding are from Horace Waters.

THE SINKING OF THE ALABAMA.

The European steamers arriving during the past week have brought us additional accounts of the engagement between the *Kearsarge* and the *Alabama*. Though adding many interesting details, they do not vary substantially after the description of the fight we have already published. Under date of June 28, Galignani's *Messenger* publishes a portion of Captain Winslow's detailed official account of the action, of which the following is an extract:

On discerning the enemy, the *Kearsarge* was turned shortly round, and steered immediately for the *Alabama*, to get within close range, the *Kearsarge*'s guns having been loaded with shell for five hours previously.

On approaching the *Alabama*, when about one mile off, the *Alabama* shered and fired a broadside, nearly a raking fire, on the *Kearsarge*. At the same time the *Kearsarge* to shorten the distance, and a slight sheer to prevent a raking fire. Again the *Alabama* fired a second broadside, the *Kearsarge* closing, and a part of the third broadside, fired, when the *Kearsarge* sheered and opened on the *Alabama*, in her action continued, the respective vessels making a circuit at a distance of some seven hundred yards, and described six or seven circles. At the expiration of an hour and five minutes the *Alabama* had all the damage done to the *Kearsarge* was so trifling that her Captain could not believe his eyes. The *Alabama* had struck, as he judged that the *Alabama*, like the *Kearsarge*, could not have been seriously injured. It was only when the bost of the *Alabama* came alongside of the *Kearsarge* that her true condition was known. The *Kearsarge* had three men wounded. The *Alabama*'s loss, it was believed, was between thirty and forty killed and drowned, twenty-one or two wounded were saved. The *Kearsarge*, above and below, received some twenty-eight shot, thirteen of which penetrated her hull and bulwarks. The length of the *Kearsarge* is 210 feet in the midship section, for twenty feet in length, the chains belonging to her chest anchor were hung outside and covered with light boards to prevent dirt. They were stopped to eyebolts in the stern, and when wanted were taken off and sent to the anchors. With the object of protecting the chain cables, was to protect the bottom from rifle shot, when the coal was consumed in the bunkers. This was the case at the time the action ensued. The *Alabama* had all her bunkers full, and did not need this protection, but she could have adopted the same plan without any trouble in a few minutes. Two 32-pound shell, or shot, struck the chains, which were of value as they would not have perforated the ship's side. The same shot forward of the chain bits had not gone through. The hundred-pound rifle would no doubt have done better work. The *Kearsarge* was to have a grand carnage from the fire of the *Kearsarge*. How and where shot and shell struck will be questionable to state. The *Kearsarge* is a third-class sloop, 1,031 tons, carries seven guns—two 11-inch, four 32 and one 30-pounder. The *Alabama* was a second class, of 1,040 tons, carrying eight guns, as follows: one 100-pounder, six 32-pounder, and one six 32-pounders. The *Kearsarge*'s crew, officers and men, numbered 167 to 160. The *Alabama* was, according to accounts, 160.

In the first part of the action the *Alabama* fired quickly, but very wildly, overshooting her shot, and striking the *Kearsarge*. The *Kearsarge* fired with the most deliberation, and much slower. The number of shot and shell fired by the *Kearsarge* was only 63, which, sixty 32-pounders, forty-eight 30-pound shot.

Mr. Captain Semmes complains that he was fired into after striking, and that the boats of the *Kearsarge* was not sent soon enough. Captain Semmes knows well that had it been necessary, the 11-inch would have sunk the *Alabama*, one gun would never have been discharged, and the two vessels should boats were sent immediately when his condition was known. The *Kearsarge* remained by the *Alabama* until the crew from one who did not hesitate, and availed himself of the means sent in the cause of humanity to save life to make his escape. The fact that the Captain of the *Alabama* believed it was possible for the commander of the *Deerhound* to have acted so dishonorably, he would have instantly sank the *Deerhound*.

The correspondent of the Paris London *Herald* gives the following correspondence passing between Captain Winslow and M. Bonfils, the Confederate agent at Cherbourg.

U. S. S. *Kearsarge*, Cherbourg, June 21, 1864.

To Monsieur Bonfils:

Monsieur:—Certain pilot-boats which I allowed *through humanity* to save several prisoners after the sinking of the rebel pirate, have been detained by you. These officers and men are nevertheless subject to the obligations imposed by the laws of war; they are my prisoners *and demand that they be delivered to me on board the Kearsarge*. Any delay or shift attempting to release themselves from the obligation, through the means that have been employed, should a similar case arise, I am ordered by my duty to expect. I am, &c.

John A. Winslow, Captain.

To Capt. John A. Winslow:

Sir:—I have received your letter dated June 21. The subject of your claim *is wholly beyond my control*, and I cannot but regret that you should have addressed me, undressed, not to me, but to the French Government, under whose shelter the unfortunate men you refer to have found a refuge.

I am not not aware of any law of war which prohibits a soldier making his escape from the field of battle after a reverse, *even after he has been captured*—and I cannot see why a sailor should be debarred of the privilege of swimming away from a sinking ship.

I must decline acting as your intermediary with certain persons, whose names you do not even mention, and whom, nevertheless, you consider to be your prisoners.

Neither can I understand how the authorities of the United States can claim to detain prisoners within the territory of the French Empire. I am, &c.

Bonfils.

In a letter to the London *News*, Captain Winslow says:—

Such stuff as the *Alabama* firing when she was going down, and all such talk, is twaddle. The *Alabama*, toward the last, hoisted sail to get away, when the *Kearsarge* was laid across her bows. The *Alabama* have raked her had she not surrendered, which she had done, and was going down, her flags down, and showing a white flag over the stern. The officers of the *Alabama* were all saved in the boats, my third officer ship was a perfect slaughter-house, and was completely torn to pieces. This is all I know of the *Alabama*.

An officer of the *Kearsarge*, who sends an account of the fight to the London *Star*, says:

"Right shot struck our hull proper; one carried port lifeboay away. This is the only record of the shots which struck us, but I have since seen the places where the others were: 1 rifle shell, starboard quarter and rudder-post; 1 rifle shell, hammock nail net; 2 32-pounders, port bulwarks (boarding netting); 1 explosive shell, after pivot port; 1 ditto, after end chain casting; 1 8-inch shell, starboard gangway, between the main and mizen gangway-room skylight; 2 rifles, abreast boiler hatch below plank sheer; 1 ditto, foretopmast rigging; 1 32-pounder, forward pivot port through waist, and knocked topsail off; 1 rifle, through smoke stack; 1 ditto, starboard forehead main sail cord; 1 ditto, starboard maintopmast hack stay; 1 rifle, starboard after-side of mizen topmast rigging; 1 ditto, maintopsail tye; 1 main trysail outhaul; 1 maintopsail sunnet; 2 32-pounders, quarter boat; 1, spanker; 1 round shot forward abroad mizzen ingoing; 1 round shot mizzen topmast backstay; 1 mizzen peak signal halyard, which broke short per to our battle-flag after the battle was won, and for the first time unfurled it to the breeze, a most singular circumstance. I have been this particular because, wherever I serve to the contrary, you may depend upon this as beyond dispute. The officers captured were Surgeon Francis L. Galt, Third Lieutenant Joseph D. Wilson, Chief Engineer Miles J. Freeman, Third Assistant Engineer J. Pembleton Smith. P. McCreery. Tonnage of *Alabama*, 1,040 tons; tonnage of *Kearsarge*, 1,031 tons. Equipment of *Alabama* a little more powerful than ours, but theoretically we

were the fastest ship, owing to the angle of the screw. The *Alabama*'s crew were composed principally of stout athletic Englishmen."

REPORT OF THE CAPTAIN OF THE ALABAMA.

To the Editor of the Times:

SIR—I send herewith a copy of the official report of Captain Semmes of his late engagement with the United States ship *Kearsarge*, which you may, perhaps, think worthy a place in your columns. I avail myself of the occasion to note one or two inaccuracies in the letter of your correspondent, dated at Southampton on Monday, and published in the *Times* of Tuesday. Instead of 1,000 tons, the *Alabama* is there stated at 150 men; she had, in fact, but 120, all told. Again, as to her armament; that of the *Kearsarge* may be correctly given by your correspondent. I do not know what it was. The *Alabama* had one 7-inch Blakeley rifled gun, and seven smooth-bore pivot guns, and six 32-pounders, smooth-bore, in broadside. I am, sir, very respectfully, your obedient servant,

24 UPPER STANHOPE STREET, June 22. J. M. MASON.

SOUTHAMPTON, June 21, 1864.

SIR:—I have the honor to inform you that, in accordance with my intention, as previously announced to you, I steamed out of the harbor of Cherbourg between the hours of 9 and 10 o'clock on the morning of the 19th of June, for the purpose of engaging the enemy's steamer *Kearsarge*, which had been lying off and on the port for several days previously. After clearing the harbor, we described the enemy with his head off shore, steaming in a circle around and around, as if were three-quarters of an hour in coming up with him. I had previously ordered my guns to starboard, and made all my preparations for engaging the enemy on that side. When within about a mile and a quarter of the enemy, he suddenly wheeled and presented his starboard battery, presenting at his starboard battery to me. By this time we were distant about one mile from each other, when I opened on him with solid shell from my rifle gun, which commenced the engagement become active on both sides. The enemy now pressed his ship under a full head of steam, and to prevent our passing each other he turned his ship in both our respective broadsides bearing, it became necessary to fight it in that way, the ships running around a common centre, and preserving a distance from each other of about a quarter to half a mile. When we got within good shell range we opened upon him with shell. Some 10 or 15 minutes after the commencement of the action our spanker gaff was shot away, and our ensign came down by the run. It was immediately hoisted at the mizzen peak, and never mast-head. The firing now became very hot, and the enemy's shot and shell soon began to tell upon our hull, knocking down, killing, and disabling our men at their posts in different parts of the ship. Perceiving that our shell, though apparently lodging in the enemy's sides, were doing him but little damage, I returned to solid shot firing, and from this time onward attended (alternately) to shell and solid shot.

After the lapse of about one hour and ten minutes our ship was ascertained to be in a sinking condition, the enemy's shell having exploded in our sides and between wind and sinking large apertures, through which the water rushed with great rapidity. Within a few minutes I had hopes of being able to reach the French coast, the nearest point to have the ship all steam, and set each of the fore and aft sails in server available. But she filled more rapidly, however, that before we had made much progress the fires were extinguished in the furnaces, and we were evidently on the point of sinking. At this time the enemy ceased his fire, and sent the further destruction of the ship, and dispatched a boat to inform the enemy of our condition. Although we were now but 150 yards from the enemy, the action had not been 20 five times after my colors had been struck. It is characteristic of vessels that a ship of war of a Christian nation could not have done this intentionally. We made use of all our exertions towards saving the wounded and such of the boys of the crew as could not swim. Two of my boats were dispatched in my quarter-boats, the only boats remaining to me—the waist-boats having been torn to pieces. Some 20 minutes after the *Alabama* had gone down, I perceived the ship being on the point of settling, every man, in obedience to a previous order which had been given the crew, providing himself with a plank or grating for himself. There was no appearance of any boat coming to me from the enemy's ship, and I was forced to conclude that, however, the steam yacht *Deerhound*, owned by a gentleman of Lancashire, England, Mr. John Lancaster, who was himself on board, had come out with the intent of witnessing men, and rescued a number of both officers and men from the water. I was fortunate enough myself this to escape to the harbor of Cherbourg in the steam yacht, in about forty others, all told. About this time, the *Kearsarge* went out, as I was hardly sensible boat.

Accompanying you will find a list of the killed and wounded, and of those who were picked up by the *Deerhound*. The remainder, with myself, were picked up and taken by the enemy, and by a couple of French pilot boats, which were also fortunately near the scene of action. At the end of the engagement I was informed by one of our officers who was alongside the enemy's ship with the wounded, that he no dilly action on both sides was thoroughly ineffectual, having been done with chain cuse directed for the purpose, placed perpendicularly from the deck to the sides of the ship, so as to protect the joints of the outer planking, which gave no indication of the armor behind it. This planking had been ripped off in every direction by our shot and shell, which had exposed to view in many places, and forced partly into the ship's side. She was most efficiently guarded, however, in this section from penetration. I was much damaged in other parts of the hull, but to what extent it is now impossible to tell; it is believed she was badly crippled.

My officers and men behaved steadily and gallantly, and though they have lost their ship, they have not lost honor. They all behaved as well it would be invidious to particularize, but I cannot deny myself the pleasure of saying that Mr. Kell, my first lieutenant, deserves great credit for the fine condition in which the ship was kept, and for the order in battery, magazine, and shell-rooms, and that he rendered me great assistance by his coolness and judgment as the fight proceeded. The enemy was heavier than myself, both in ship, battery, and crew, but I did not know until the action was over that she was also iron-clad. Our hull was in-clad and wounded in 30,—to wit, 9 killed, 21 wounded.

I have the honor to be, very respectfully,

your obedient servant,

RAPHAEL SEMMES, Captain.

[From the British Army and Navy Gazette of June 25th.]

THE KEARSARGE AND THE ALABAMA.

The recent fight between the *Kearsarge* and the *Alabama*, which has ended in the destruction of the latter, has as a vessel as valuable as an army, should be, as Sir John Hay remarked, a warning to us, not to be too confident with untried vessels. Here was a sloop, manned by a picked crew of as brave hearts as ever were borne upon the ocean, commanded by a vessel of similar size, and sunk with comparative impunity. The armament of the *Alabama* consisted of two 11-inch Dahlgren guns and six 32-pounders, with a small rifled piece in the gun deck. The *Kearsarge*, also built of the same number of 32-pounders, a rifled 100-pounder, and a solid 8-inch shot gun (68-pounder). It seems to us that Captain Semmes had too high an opinion of his so-called 100-pounder, because it was a rifled gun—ignorant probably that it was the size of bore and the largeness of the powder charge which constituted the power of the gun. Measured by this standard, the rifled pivot 100-pounder was not half as powerful as the 68-pounder, or the pivot gun, which, in its turn, was not half so powerful as either of the *Kearsarge*'s two 11-inch pivot guns, and probably not onetenth as destructive as the 11-inch Dahlgren guns which were unprotected by armor. The 32-pounders on each side were about equal and of comparatively small account as to influencing the fate of the action, which was mainly decided by the pivot guns. In addition to his vessel's carrying a heavier rifled armament, the captain of the *Kearsarge* had taken the very precaution to make a fight of temporary armor, consisting of chain cables fastened along her bulwarks to coal-bunkers, and of wooden bulwarks and bulkers, which were thus so effectually protected that the *Alabama*'s shell broke up against it, and fell back harmlessly into the sea; or, if they exploded, did not damage her much better; and, beyond stripping off a little of the thin wooden sheathing which covered over the cable of the *Kearsarge*, no damage was done to the vessel's hull.

The pains, therefore, of care and skill must be adjudged to Captain Winslow and his officers and crew. We must be a matter of pride to these two officers, confessedly amongst the most practical and best gunnery officers of the northern fleet, that they should have won so decisive a triumph at such a slight cost to their vessel and crew.

This action should remind us of Captain Bronco's victory over the Russian frigate Pallada, and of a few subverses were not with by our naval forces through want of opportunity, but not in any energy of our officers with discretion; or, rather, we would say, through the excessive prudence of our then Admiralty Board in sending vessels of unproved value to sea with their crews powerful ship of America. The *Shannon*'s brilliant exploit in the sight of thousands of lookers-on was mainly, if not entirely due to the superiority of her crew and of her guns. They had thoroughly understood their work and felt confident of the skill of their able commander. Another war will see a new class of ships and new guns of far greater power experience, viz. the side; and we cannot be too careful as to being assured that our ships and guns are fully equal, if possible, to with advantage. The national honor is dearer to us than the good or bad character of weapon, be they those of American or British manufacture. Our responsibility will be upon those who select the naval ordnance for our future contests. We cannot disguise the fact that hitherto rifled guns have not been the success that sanguine hot was at first anticipated. We, therefore, trust that the rifled gun adopted by the Navy will be found to fire advantageously the round ball or round shell, in addition to their special projectiles. True, the elongated shell has a larger powder capacity than the round shell, but what is the penalty, of what great value is this quality? The *Kearsarge*'s 11-inch guns fired round shell containing about 6 lbs. of powder—no rifled gun could carry more than 4 lbs.—and we cannot see to be in favor of simplicity and of shot that will readily roll home, for the exciting period of close quarters.

The fact that the *Kearsarge*'s 11-inch guns' cocket in having accepted—perhaps in a moment of hesitation—the rifled gun, and that the *Alabama* had a very serious effect. The *Alabama* was, it may be recollected, built in the best dock-yard on the Mersey, Laird Brothers', Birkenhead. She was of equal strength and constructed precisely of the same materials and fashioned in the same manner as are all vessels of the royal navy. The *Kearsarge*'s guns were also in every respect equal to those of Her Majesty's ships. It is immaterial to know where the *Kearsarge* was chain-plated. We are told by some that she underwent the operation in America, by others that she went through the same in Downs, and by others that Cadiz had been selected by her officers as the port where an armor casing could be applied. Captain Semmes was ignorant of the fact, and therefore lost the advantage of a shot. Had Captain Winslow been provided with double screws, the advantage would in all probability have rested with the one so fitted. In the next place we have been taught that our wooden frigates, corvettes, and smaller vessels may be no dealt with, and thus partially, if not altogether, to keep them under the protection of steel. At this moment the fight has been most opportune for us. We may be while we are now writing, drifting into a false security. We have been taught that the weak point, the side of which are protected by iron, except Laird's "rams," and they are not ready for sea, although, if diligence were used, one or both might be finished in six weeks or two months. We have two gunboats on the twin-screw principle recently laid down. These are both to be ironplated, and are not to draw more than ten feet six inches, which is a right draught—lower than both with all the tasks that could be brought to bear upon them, they could not be sent to sea under a year. In the meantime, if required, we must make the best of the resources which money can place at our command.

THE DAHLGREN AND THE BLAKELEY GUN.

The superiority of the Dahlgren gun over Blakeley rifled ordnance and artillery has been established by the gunners of the *Alabama* to be as skilful as those of the *Kearsarge*, is proved by the late encounter, which is about to cause such a profound sensation in America. The damage inflicted on the Federal cruiser is insignificant; but if it be the case that the shot have simply smashed over the outside of a wooden ship, can cause solid shot to bop back harmlessly into the water, we think the Admiralty should try the effect of such a shot upon the bottoms of our wooden walls. If the gunners of the *Alabama* were trained on board the *Sentinel*, as Captain Semmes seems to have said—if, in other words, they were trained British subject to the service on board the Confederate, the case of the Dahlgren gun is still stronger. Any way, there is the *Alabama* lying at the bottom of the sea, and there is the *Kearsarge* afloat and fit for work in Cherbourg harbor. At first, it seemed as if the Federal captain was glad of the escape of Captain Semmes, whom his government would have to deal with as a pirate. If he acted in accordance with their professions, but we see Captain Winslow accuses the crew of the *Deerhound* of dishonorable conduct in running away with his prisoners. If Captain Winslow considered Captain Semmes to pick up the drowning men and keep them for him as prisoners, after the men had been saved, it would have been the duty of the pilot-boat to put pressure of steam to surrender them; but we think in the case of Captain Semmes and his men, there are grave considerations, which require full investigation and satisfactory explanation. Captain Semmes did not go down with his flag flying; on the contrary, he struck it, and surrendered. To run away—sink—nay, more, he sent a boat to the *Kearsarge*, to say his ship was sinking; indeed, the correspondent of a daily contemporary tells us he came up a while after with the enemy her colors. If the *Kearsarge* fired several shot after the *Alabama* was flying, Captain Semmes may conceive he was fired into by mistake, and in these acts of courtesy—but it must be remembered, though he charges the Federal captain with dishonorable conduct in running away, that an English yacht was specially requested to proceed to the assistance of the crew of the sinking ship by the Federal officer, and that the surgeon picked up by the yacht, which shows that she was not so very indifferent to the fate of the drowning men. There will be an outcry in America, if Captain Winslow's explanations are not such as the proposal to present a sword to Captain Semmes, emanating from the citizens of Charleston, will be received with bitter feelings which, no doubt, will be excited by the accounts of the way in which the news of the sinking of the *Alabama* has been received in the Federal States. Elsewhere we have had our article on the incidents of the remarkable encounter, which will form such an interesting episode in the history of this great American war.

THE FUTURE OF NAVAL WARFARE.

From the London Times, June 23.

We shall know very shortly whether the chains hung outside the *Kearsarge* saved her men. To all appearance the chief effect of the 68-pounder shell which fell in some of the *Alabama*'s wounded must have gone down with her, the loss would probably have been nearly the same on both sides. Are we, therefore, to come to any conclusion in encounter within our own seas? Such a contest, so brief, so hardfought, and so decisive, is even more terrible than the hand-to-hand fight in which the guns gave place to that one old feats used to indulge in with a thousand pogrums on board. Even there, there was damage done at last, but sometimes very little damage to speak of of the ship might receive many hundred shots only to have the glory of showing the last shot to the population of Portsmouth. It is not so now. At the distance of a mile, never less than a quarter of a mile, a formidable ship, the terror of American waters a few months ago, well manned and handled, is sent to the bottom in an hour. Exactly an hour elapsed between the first shot to the moment when it became obvious that the vessel was sinking—one which, indeed, the rudder was broken, and the fires were put out. That is the pace at which future encounters between ships will be fought for the future. In this instance the pace was all the quicker because the guns had start of the ships, the guns being the new armstrong guns, instead of throwing the shells by the old machinery, if they constitute an exception. The next deal in the British Channel will probably be between two vessels of the *Warrior* class, and the fight is to hold about the same time that it will last as long as Sunday morning service, or be less decisive than the last Sunday's.

On the last day of June, Captain Winslow of the *Kearsarge*, together with two of his officers—Surgeon John M. Browne and Paymaster James S. Thayer—received a ludicrously entertained at dinner by a number of American gentlemen, resident in Paris. Mr. Dayton, the American Minister, was present, and Mr. Logotan, were present. Interesting speeches were made by several gentlemen, and the facts of the action and fight were carefully discussed. Captain Winslow has demanded the surrender of the persons who escaped, in order that, if they do not comply with his request, he may hang them if he ever catches them again in the Rebel service. The Captain declares that the Rebel flag was lowered on the *Alabama*, that he then stopped firing, that the flag was run up again, with a renewal of his firing, that he recommenced firing also, and only stopped this time when they lowered their big guns and lowered a boat to send a notice of surrender. Thus the irregularity and confusion about the flag entirely exonerates Captain Winslow from the charge of firing on the *Alabama* after she had no claims on the contrary that he treated them with great leniency.

CORRESPONDENCE.

THE IRON-CLADS.

A LETTER FROM MR. ERICSSON.

To the Editor of the Army and Navy Journal:

SIR:—In reply to numerous communications received from loyal and distinguished citizens residing in different sections of the Union, on the subject of the Monitor Iron-Clads, permit me to make the following statement through your columns.

It is not true that large sums have been wasted in experiments: on the contrary, no previous trial whatever of new system was instituted. The original *Monitor* went into action under a positive guaranty of success, and the entire fleet of the *Passaic* class of Monitors went directly from the builder's yard under the enemy's batteries—a circumstance without a parallel in the history of naval engineering. It was reserved for the United States to introduce successfully, during a great National crisis, a new system of naval attack and defence, without expending a single dollar on experiments.

It is not true that the National Exchequer has been depleted by the inordinate expenses attending the construction of the Iron-Clads. The contract price for each of the ten Monitors of the present class was $400,000, to which was added $20,000 for improvements and additions, thus the amount expended for the first fleet of ten vessels, was only $4,200,000. The two ocean Monitors *Dictator* and *Puritan*, will cost with improvements and additions $8,000,000. The cost of each of the four vessels of the *Dunderberg* class may reach $570,000, together $6,130,000. The total expenditure for the entire fleet of twenty-one Monitor Iron-Clads ever ranked, will thus amount to very nearly $19,000,000. A certain European naval power has expended on experimental vessels of various descriptions, which are now entirely worthless, a sum considerably exceeding that of the commanders of the Monitors report that the rolling motion is scarcely greater than that produced by gentle breezes. Similar observations at the junction of overhang and body in the smaller vessels has been thoroughly disproved, while in the ocean Monitors this objection has no foundation, as the vessels cannot even be questioned. Commodore JOHN ROGERS reported to the Secretary of the Navy, that in the case of one of the Monitors, that, if the deck openings could be made watertight, nothing can harm this class of vessels at sea. Experience has, in the meantime, shown that they cannot these openings perfectly tight. It may be freely admitted that, if deck hatches are left open in rough water, as was the case with the *Tecumseh*, the sinking of the vessel becomes inevitable, but it may be insisted on that this fact does not impugn the perfect seaworthiness of a Monitor.

It is not true that Monitors cannot fight their guns at sea. They are in reality the only class of Iron-Clads capable of making effective use of their armament at sea, owing to the fact that they can train their entire battery over the bow, and thereby fire with great accuracy at times when the European Iron-Clads are going to their destruction or sailing, cannot use their guns. The assertion that it is not safe to open the ports of Monitors in heavy weather, is applicable only to those who are not aware of the mechanical expedient which has been devised for preventing the gas from entering the vessel when ports are open, and to be observed, which, though readily applied from the deck of a turret vessel, is wholly inapplicable to the sides of a European Iron-Clad.

It is not true that the *Dictator* is incapable of carrying coal for an ocean passage. She has ample room concerning speed of war steamer during cruising, the *Dictator* ran from New York to St. Petersburgh without taking in coal. The ship, which is quite ready for sea, has on board nearly 600 tons of water in her coal-bunkers, the mean height of the gunwale being four feet above water.

It is not true that the ocean Monitors lack proper means of ventilation. This class of ships have large standing pipes fore and aft, through which a column of cold air is constantly drawn into, and through the quarters. It is not to assert that no vessels of any kind are provided with such perfect means of ventilation as the ocean Monitors. Nor have proper means for affording air and recreation to the crew at sea been omitted. A circular grated promenade or one hundred feet in circumference, surrounds the top of the turret, besides which a grated promenade or hurricane deck 16 feet above the main deck and 20 feet wide, extends from the turret to the stern of the ship.

It is not true that the Monitor system is condemned in Europe. Two fleets of iron-clads *presently* like ours, are now being built on the Baltic, one on its eastern and the other on its western shore, by nations who never adopt untried novelties.

Yours, very respectfully,
J. ERICSSON.

NEW YORK, July 13, 1864.

A NONDESCRIPT PROFESSOR ASLEEP.

To the Editor of the Army and Navy Journal:

SIR:—Permit me to correct an error in the heading notice of an article from the New York *Times*, re-printed in the ARMY AND NAVY JOURNAL, July 9. General LEE was never under my instruction. I was in Europe for the two or three years before he graduated at the Military Academy.

Now, as to the authorship of the article in question, which the JOURNAL assigns to me, although I shall run the risk of illustrating the French proverb *qui s' excuse s' accuse*, by saying anything, I cannot in justice allow myself to remark, that I have not the pretension of placing myself, either directly or by implication, in the same category with him who signed himself *The Looker-on*, assuming as my own property the initial M—the one at the bottom of the *Times* article. I desire to have no share in the credit of those signed thrust upon me. The M.'s, as a publisher you must know, are a multitudinous family, of which I am quite contented to remain an obscure member, and remain, Sir, your servant. D. H. MAHAN.

WEST POINT, July 9, 1864.

PAY OF MEDICAL CADETS.

To the Editor of the Army and Navy Journal:

SIR:—Allow me through your columns to call attention to the following facts, for consideration by the Medical Corps, U. S. A., a body of young men, called Medical Cadets, whose rank and pay, according to Par. 1,285, Army Regs. 1863, is the same as that of graduates of West Point. These latter, by a recent provision of Congress, have had their pay increased $60 a month, but we are told by a circular from the Paymaster's Department, that this does not apply to Medical Cadets! Again, Hospital Stewards, Ist class, are allowed *after* three years' service, have, in common with enlisted men, had their pay increased, viz., to $30 a month. They are besides allowed money for clothing, according to the scale of $3 per month to the old order which is the only one I have heard of, quarters and rations, but no allowance for clothing, and the old pay of Cadets is $30 per month, with the same as a nurse to those of Assistant Surgeon; we are assistants in Medical wards, Chief Nurses, Wards Masters, &c., employed in running trains of sick and wounded. Please, Mr. Editor, give me some information, not for me alone, but for all of us, as we cannot understand it, nor can we understand what our real duties are, or what we are entitled to.

ONE OF THE CORPS.

CHATTANOOGA, TENN., July 3, 1864.

A SEVERE HAILSTORM OFF FLORIDA.

To the Editor of the Army and Navy Journal:

SIR:—Acting Ensign GEORGE WM. WOOD, commanding U. S. schooner *Bermuda*, reports having a heavy hailstorm off Mosquito Inlet, Florida, lat. 29 deg. north, long. 80 deg. 30 m. west, on the 29th of May, 1864. He informs me that the heaviest hailstorm he has ever experienced in the twenty years he has followed the vocation of a seaman. Some of the hailstones which fell measured from one and a half to inch in diameter, they were accompanied by a heavy gale from the northeast, which lasted about one hour and a half. The oldest people in Florida pronounce this the latest and severest winter they can remember.

ORDNANCE.

WE take from the London *Mechanic's Journal* of June 17, an interesting article under the above title:

It is pretty well understood to what the action of gunpowder is due; of the effects produced thereby, the world is not without experience, and we may say that every one really know next to nothing with certainty. Every artillerist has, however, a pet theory, and advocates his views with a pertinacity productive of nothing but vituperation. Guns are, in one sense, machines; but they differ from all others in being constructed for a great momentary exists as to the nature of the strains to which they are exposed. Had it been otherwise, the vast amount of ingenuity expended in their construction would have sufficed to solve nearly every important problem connected with them years ago. The fact is, that we fight with an unseen foe, and it is not easy to hit the bull's eye or even hazard conclusions to stay the progress of an enemy whose point and method of attack are unknown. It is not for us to take fully to assert, as is but too often done, that the teachings of the last decade have made us as familiar with the action of explosives, as with the laws of light, heat, electricity, gravity, of chemical affinity, or a thousand and one other subjects, reduced to mere matters of rules and formulæ by the labors of the past. Such reasoning is entirely inadequate, only because they are contrived to combat by sheer force of numbers the difficulties which anything known absolutely to the contrary, he better studied and grappled with. It is not easy to see how tubes and cylinders can be made strong enough to withstand the forces guns are put to use. The constructive arts place at our disposal means by which pipes, or hollow chambers, or, in other words, guns and rockets, may be made strong enough to sustain a pressure of 50 tons on the square inch; and having sustained that strain for a single hour, there is no reason on earth why they should not sustain it another hour. As it is, in modern guns, properly constructed on any recognized system, there is no difficulty in the gunpowder gases retain the initial pressure within a Blakely, Whitworth, or Armstrong cannon, possessing a certain margin of resistance at the same time. Within the limits of this unsurpassed place, where it would be exempt from the evil influences of corrosion and vibration, it would remain intact for a century. There is no reason, at least, to believe that under such conditions the iron would tire, and ultimately give way. Guns fail because they are exposed to a progressive process of destruction. They wear out. The entire history of the question is a record of gradual failures. The number of discharges which any piece of a given metal and material will sustain, is now all but reduced to a matter of calculation; and thus, before our guns leave the proof-house, it may almost be foretold without any remarkable effort of prescience, exactly how many pounds of powder consumed in service charges will suffice to render them worthless and unsafe. This is enough to prove that something more than mere theory is at work, and that the issue of the defects, and the manner of their manifestation, prove conclusively that they are not alone the result of mechanical or chemical injury inflicted by the projectile in coming, but simply of the pressing and yet unexplained action of the forces developed in the explosion of the charge, which, in the face of these things, we are told over and over again, until we sicken of the repetition, that guns are destroyed by over-pressure. It is impossible to construct with any good gun, used legitimately, ever failed from such a cause, simply because it could not. Powder can exert a force may be to complete the work of deterioration, it never accomplishes it. The metal of a chase crumbles away, a flaw arises, a minute crack near or at the breech is developed. This crack spreads with each discharge, until the tube fairly gives way, and flies into fragments. But who can assert positively, with a strict regard for the truth, that any gun ever broke before its—a real which no man has yet passed, and which no man professes to know.

The operation of punching a hole in an armor plate by the passage through it of a projectile, occupies, in all probability, about 1-1000th part of a second. If it strike a second velocity of the shot at 1,200 ft. per second, we know that it traverses each foot in 1-1200th of a second, and as the armor plate is, say, 12 inches thick, a foot thick of metal must pass through the space represented by this thickness in 1-1200th of a second, or about one-twelfth of the entire period. It is arrested, however, and we imagine that the 500th of a second is about a fair allowance of time for completing the work of penetration. Now, if it re-quired a fraction of the flight of the shot it acquires no increase to that store of power called—property or impropriety—momentum, subsequently expended in the tearing up of the plate. If the entire energy expended on the plate is called pressure; its expenditure during the lapse of the 500th part of a second. It is absolutely true that every particle of the energy, and a good deal in addition, wasted on friction and the atmosphere, was developed during the flight. The shot having, from the moment the powder is ignited, until the shot is fairly out of the muzzle, occupies little more than the same fraction of a second that the shot occupies in traversing the plate. In other words, the power expended is in each case very nearly the same in amount, and is expended in nearly the same time. Yet the velocity of the shot is quite inadequate, and the action of the powder is attributed to pressure! Why should the powers so nearly identical, so much resembling one another in all that can be measured by mechanical resemblance of energies, be called by different names, treated as if diametrically distinct from each other? It is impossible to develope power or its effects without the lapse of a certain space of time; and, as a rule, equal exertion of power in equal times will produce equal effects. The resistances opposed may vary, but as in any case a certain amount of work is sure to be converted into heat; this amount may vary, but as in all evolutions, the sum of the work so converted, and the mechanical work done, will be equal. If therefore, we take the velocity of the shot in each gun is in excess of that expended on the plate, by so much as the shot loses in momentum on its flight. And it also follows that the momentum of the shot is exactly equal to each square inch of the chase, will bear precisely the same proportion to the force expended on each square inch of plate that the shot will pierce. The shot is acted upon per area of gun exposed to the force of the powder: but the effect must also be regarded as though it were wholly confined to ejection; it is really resisted by the entire resisting fracturing section of the plate, and through the entire resisting section of the plate.

The shot traverses the plate with a rapidly diminishing velocity. But the first effect of its impact while yet at full speed is obtained by the momentum of the entire projectile of any material in existence. We have no reason to doubt that the force of exploding gunpowder also diminishes with the moment the effect is produced. That is to say, we make every possible allowance, it still seems likely enough that, during any moment of time, the pressure of the powder on the gun must be in excess of the force exerted on the plate during a similar space of time. From this it may be deduced that the strain to which the material of a gun is exposed —the destructive influence in fact—is only less than that which destroys the armor plate, in the ratio of the resistance; and so far from the destructive effect of the powder is nearly or quite at a maximum, while the work of emitting the shot is very moderate. It is not easy to remarkable that our guns should fail, than it is that plates should be perforated. We have purposely omitted many matters of mathematical detail which would be to some extent out of place in pages read by all classes; but we have, we think, indicated the nature of the strain to which a gun is exposed from a point of view which has been scarcely dwelt on hitherto, and the absence of mathematics in no way affects the value of the conclusion.

Certain experiments conducted in America, which we have detailed before now, go far to make us believe that it may yet be found possible, so to so modify the action of explo-

tion, and its effect on the gun, by the interposition of an air cushion through which the wave of force transmission would pass but slowly, or otherwise; that the use of very heavy charges indeed, was perfectly compatible with the duration of a gun. The folly of straining guns intended to be used against armor, by the use of tight-fitting rifled projectiles, is unimportant. It would be beneath contempt, were it not for the existing rage for long ranges, which will die a natural death in time. Then it will be discovered that the first or the one hundredth time that all the rifling required in such guns is just that which will keep the shot and on for a short number of yards, and that beyond that point rifling has only wastes precious power which we destroy on ordnance to obtain in the first instance.

ARMY AND NAVY PERSONAL.

BRIGADIER-General E. Hatch has reported to General Washburne for duty.

Major-General Alex. McCook is assigned to the northern defences of Washington.

Brigadier-General W. W. Hinks is in Washington suffering from his old wounds.

Brigadier-General John McNeil has been assigned to the command of the Federal forces at Fort Hudson.

Percy Wyndham has been mustered out of the United States service as colonel of the First New Jersey Cavalry.

Major-General Joseph Jones Reynolds has been assigned to the command of the Nineteenth Army corps, as reorganized.

Colonel J. A. M. Dudley has been ordered by Major-General Curtis to the command of the First Cavalry brigade at Baton Rouge, La.

Colonel Albert G. Brackett, of the 9th Illinois Cavalry has been appointed Inspector of Cavalry for the Department of the Cumberland.

Major-General Butterfield, commanding Third division, Twentieth corps, has obtained a short leave of absence, on account of impaired health.

Brigadier-General Getty, commanding Second division, Sixth corps, wounded at the Wilderness battle, returned to command on the 10th inst.

Medical Director Wood, of the Navy Department respecting Third Assistant Engineer R. B. Hine, as nothing had been heard of him since last October.

The sentence of Captain G. Tilford, 3d United States Cavalry, to be cashiered, h has been remitted by the Secretary of War, and he has been restored to duty.

Brigadier-General William Dwight, late Chief-of-Staff to General Banks, has been relieved of his position, and ordered to report to Major-General Augur.

Colonel J. C. Tidball, long connected with the Second corps, Army of the Potomac, has been ordered to West Point to assume the position of commander of cadets.

Brigadier-General Thomas Ewing has been relieved of his command in the West. General Rousseau is at present in command of the Department of the Tennessee.

The confirmation of Major-General Joseph Hooker-General having been omitted by the Senate, the President has re-appointed him Brigadier-General, to date from May, 1863.

Major-General Sigel has been relieved of his command, by Brigadier-General A. P. Howe, Chief of Artillery of the Department of Washington, and ordered to report to Major-General Hunter.

Colonel John B. Weber, Eighty-ninth U. S. Colored Infantry, has received the thanks of the Legislature by concurrent resolutions of resolutions on the occasion of his leaving that command.

President Lincoln has sent to Mrs. Harker a Major-General's commission for the late Brigadier-General Harker, who lost his life while gallantly leading his men against the enemy's works at Kenesaw mountain.

Brigadier-General Lee, late Chief of Cavalry in the Department of the Gulf, has been assigned to the command of the brigade of the Second division of the Nineteenth army corps. This division was taken from the late Thirteenth corps.

Major-General W. F. Smith, accompanied by several of his staff, arrived in New York on Wednesday from Fort Monroe. General Smith comes North to recruit his health, which the arduous labors of the campaign have much impaired.

General Orders No. 228, War Department, July 11, 1864, assigns Major-General D. C. Gel to the command of the Eighth Army corps and all the troops in the Middle Department. General Gel accordingly assumed command on the 14th.

Major-General John J. Peck, United States Volunteers, having reported, in obedience to order from the War Department, is assigned to the command of the Eastern District of the East. His headquarters will be in New York city.

Captain Charles T. Stanton, Jr., of the 21st Connecticut regiment, has been promoted to be lieutenant-colonel of that regiment. In one of the recent battles under General Butler he was badly wounded, and his promotion is for gallant services.

Brigadier-General R. M. Patrick, United States Volunteers, Provost-Marshal-General of the Army of the Potomac, is announced as Provost-Marshal-General of the armies operating against Richmond, including their lines of communication.

Brevet-Major-General Barnard has been relieved as chief engineer of the Armies in the Field, in which capacity he was a member of general Grant's Staff, and ordered to report to Washington. Colonel Comstock, of General Grant's Staff, assumes his duties.

Lieutenant-Colonel M. T. McMahon, A. A. G., has been ordered to duty on the Staff of Major-General Dix; Lieutenant-Colonel B. T. Morgan, 64th New York, and acting Assistant Inspector-General of the Department of the South, has been relieved, and Captain Gourand, A. D. C., appointed his successor.

The total number of officers for colored regiments examined by the proper boards up to the date of the week ending July 9th, is 2,471. Of these, 985 have been rejected and 1,486 recommended. The large portion of those received have been from the Philadelphia Military School, under the charge of Colonel Taggart.

Brigadier-General James Barnes has been relieved as President of the general court-martial in session at Washington, and ordered to command at Point Lookout, which has recently become an important depot of prisoners and supplies. Brigadier-General E. S. Briggs is detailed as President in General Barnes' place.

The troops of the Department of North Carolina and Virginia, reviewed by the General of the Potomac, are field under Major-General Smith, will hereafter constitute the Eighteenth Army Corps, and Major-General W. F. Smith, assigned to its command. Major-General R. F. Butler will command the remainder of the troops in that department, having his headquarters at Fort Monroe.

List of wounded and missing officers of the 1st N. Y. Dragoons since May 4, 1864. Wounded—Major Rufus Ayres; Captain A. W. Thom, head; Captain A. J. Leach, arm; Captain J. P. Robinson, head; Captain James Lomen, hand; Captain G. W. Wells, arm; Lieutenant Henry Fox, shoulder; Lieutenant J. J. Carr, throat; Lieutenant J. F. Coy, arm; Lieutenant G. F. Hamilton, arm. Total, 10. Missing—Lieutenant-Colonel T. J. Thorp; Lieutenant Russell A. Britton; Lieutenant W. Coyle; Lieutenant Charles E. Lewis; Lieutenant A. O. Abbott; Assistant Surgeon Robert Rae. Total, 6.

Brigadier-General Rufus Ingalls, William W. McKean, William M. Gundy, and A. A. Hare, are in session in Washington to determine upon the fitness for promotion of officers of eight different corps. They are restored by Executive authority from the "retired list" to the "active service." The Board will also examine all officers recommended before a medical board at Philadelphia, as to their physical ability to duty in advanced grades, and then the board in session here will determine as to their professional abilities to serve in like manner. It is understood that the latter tribunal incities against going into the consideration of merits or demerits which caused many of the officers to be "retiring" of said officers, but it is believed that the Navy Department does not take this view.

By the President of June 11th, 1st Lieutenant Joseph W. Paine, 13th New York cavalry, was ordered to appear before the board in Washington, of which Brigadier-General Ingalls is President, and to make satisfactory defence to the charge of desertion or stand dismissed the service. The order did not reach the lieutenant until the 30th of June, when he was able to send to the War Department an order from Adjutant-General Thomas, dated November 8, 1863, granting him a leave of absence for thirty days to the 10th New York cavalry. His obedience of this order seems to have produced some confusion, and led to the publication of his name as a deserter, but he undoubtedly will soon be able to convince the Department that he is not a deserter, and to inform them of his elevation in rank.

THE FLORIDA.

To add to the excitement occasioned by the rebel raid into Maryland, the privateer *Florida* has made her appearance along our coast during the past week, making havoc among the coasting craft running to and from the southern ports. The first capture made by the *Florida* was on Friday last, the 8th, near the mouth of Chesapeake Bay and the Maryland shore, where she, up to Sunday morning last, captured two schooners, six barks, a whaleship and a brig laden with lumber, all of which she burned, and the vessels and cargoes valued at one million dollars captured the steamer *Electric Spark*, bound to New Orleans. No personal property was destroyed or taken, but the steamer, with all the mails, contained in sixty-five bags, mostly for the Government dispatches, was released by the *Electric Spark* was built in Philadelphia, and owned by W. J. Taylor & Co of that city. Among the passengers taken on board the *Spark* was Acting Master W. F. Gross, U. S. N., who was released on parole, and has reported to Admiral Paulding at the Brooklyn Navy Yard. The steamer *Spark* carries the following armament:—Four rifled sixty-eight pounders—8 inch—in broadside abaft the mainmast, one hundred and twenty muskets and one dozen new small rifles in pivot broadside forward. In addition to this formidable battery she has one gun not mounted, lying on the starboard side of the after house bulk. Mr. Gross could not ascertain its calibre, as it was covered with a tarpaulin. She has a crew of about two hundred men. Admiral Paulding has telegraphed the Navy Department have dispatched a number of vessels in pursuit of the *Florida*.

The *Kearsarge* was built at Portsmouth, N. H., and not at Philadelphia, as was incorrectly stated last week. Kearsarge Mountain, from which Captain Winslow's vessel receives its immortal name, is in the county of Merrimac, N. H., situated between the towns of Sutton and Salisbury, according into both towns. The line between Wilmot and Warner passes over the summit. Kearsarge is elevated 2461 feet above the level of the sea, and is the highest mountain in Merrimac county. Its summit is a bare mass of granite, presenting an irregular and broken surface. Its sides are covered with a thrifty growth of wood. The prospect from this mountain in a clear sky is very wide and beautiful.

Captain Thomas Dunlap, Jr., Twenty-ninth Regiment Conn. Colored Volunteers, having been ordered to be tried by the War Department for alleged drunkenness at camp, near New Haven, Connecticut, and against whom charges had previously been preferred for a like offence in the Department of the South, being too Deaf to attend the Court ordered for his trial on the 21st of June, has been dishonorably dismissed the service of the United States from June 23d, by command of Major-General J. G. Foster, subject to the approval of the President.

PARTICULARS OF GENERAL FRANKLIN'S ESCAPE.

Major-General Franklin has had a narrow escape from an enforced trip to Richmond, having escaped from the rebel lines after a brief captivity. He reminds one of the stories of adventure among the Indians on the border, in the early days of our history. After being taken from the train on the Philadelphia and Baltimore Railroad on Monday, General Franklin was put into a carriage with others and driven across Maryland to Bristertown, where the Rebels arrived about one o'clock Tuesday morning, and immediately hivouacked for the night. The General was put in charge of a captain and two men, who unfortunately for them fell sound asleep, while their captive confined himself to going about.

As soon as he saw evidence that his guards were insensible, General Franklin moved cautiously off, hesitating at first lest his guards might only be watching for an excuse for shooting him. Satisfied on this point he shot across the fields, jumping the fences and making for a thick wood, which he supposed led to Baltimore. After travelling for about three-quarters of an hour his strength, owing to his weak state, gave out, and he concealed himself in a thick wood where he lay for the remainder of the night and all the next day, frequently seeing the Rebel scouts beating the bushes and the woods in search of him. Before it seemed quite safe he was driven from his hiding place by hunger and thirst. He was then fortunate enough to fall into the hands of some citizens who were friendly to the cause, and concealed him in their house until they had an opportunity to send him to Baltimore. The General left on Thursday for York, Penn., where he will spend a few weeks with his family to recuperate his shattered health.

The case of Major-General Dix, to which we made a brief reference last week, was fully and ably argued before Judge Russell on the 9th inst. It was contended by the defence that, as the Grand Jury had declined to investigate the case the majesty of the law had been vindicated; that in a time of great civil commotion the power to pardon is a power of the United States had to exercise a discretionary power, which could reside in no other person, and which was essential, in certain emergencies, to the security of the Nation, and that it was a mere fiction of law that would impute to General Dix the illegal acts of others, who had acted under the authority of the President, the alleged crimes of kidnapping and inciting to a riot. On the side of the prosecution it was argued that even if Congress passed a Constitutional power, by express statutory terms, to order the defendants to suppress the papers and arrest the proprietors, it could not delegate that power to the President; but it was contended that the act of March 3d, 1863, under which the President assumed to act, was not Constitutional, and that if this act was not relied upon, in the absence of military necessity, or martial law, was set up, then that plea could only apply to a state or territory where war was actually raging.

At the conclusion of the argument, which occupied several hours, Judge Russell said that he thought the writ should be quashed and the charges of kidnapping could not be sustained, and reserved his decision on the other points until the 1st of August. His decision will be looked for with great interest.

PRIZE CASES IN THE DISTRICT OF MASSACHUSETTS.

The following cases have been cited within the last four weeks, and the net proceeds sent to Washington for distribution:

Prize.	Date of capture.	Vessels entitled to share.	Gross value of vessel and cargo.	Costs and expenses deducted.
Ram Atlanta	June 17, '63	Wehawken, Nahant, Patapsco.	$350,629.28	$756.39
Str Ying Amazon	Apr. 21, '63	Cumberland	$13,508.60	$240.72
Str Young Republic	March 14, '64	Connecticut	$70,646.52	$5,004.62
Str Mary Anne	March 6, '64	Grand Gulf	$116,546.74	$4,158.42
Str Alliance	April 12, '64	F. A. Ward	$20,681.44	$1,000.00

In the following cases there have been decree of condemnation, and the distribution awaits further action of the Court on the conflicting claims to participate:—

Prize.	Captors.	Vessels claiming to participate
Steamer Pet	Montgomery	Ariel and Wyandotte.
Steamer Ella & Annie	Nipton	5 Hessendeah Tenwarns, Dayligh, Hoquia.
Steamer Corralbus	Nyhon and Dayligh	5 Hessendeah Tenwarns, Dayligh, Hoquia.
Steamer Ella	Hoquia	5 Hessendeah, Dayligh, Tenwarns, Nyhon.
Steamer R. E. Lee	James Adger	Iron Age, Newtown.
Schooner Hermione	Kanawha	Kanawha.

In the following cases there have been decrees of condemnation, and the distribution awaits only the auditing and closing of the accounts of payment to be made by the Navy Department for property taken for Government use:—

Prize.	Captors.	Date of capture.	Date of Condemnation.
Str Dee	Pequot	March 1, 1864	April 23, 1864.
Str Minna	Connecticut	May 5, 1864	June 14, 1864.
Str Springbuck	Connecticut	May 5, 1864	June 14, 1864.
Str Young Republic	Grand Gulf	May 6, 1864	June 14, 1864.
Str Victoria Beauty	Mercedita	May 6, 1864	June 14, 1864.
Str Thistle	Ft. Jackson	June 4, 1864	July 2, 1864.

NOTICES TO CORRESPONDENTS.

The Editor of this JOURNAL will always be glad to receive from officers in the two services communications and private communications of a character suited to its columns. It is necessary that the name of the writer should, in all cases, accompany his communications, not for publication, but as a guarantee of good faith.

Officers are especially requested to give us early notification of all personal matters of general interest; of the movements of vessels or marshaling among officers; and military and naval events.

The Editor will, at all times, be pleased to respond, in these columns, to enquiries in regard to tactical and other matters.

The subscription price of THE ARMY AND NAVY JOURNAL is FIVE DOLLARS a year, or TWO DOLLARS for six months, invariably in advance. Remittances may be made in United States funds, or Quartermaster's, Paymaster's or other drafts, which should be in the payable to the order of the Proprietor, W. C. Church.

Subscribers who fail to receive their paper promptly, will please give immediate notice of the fact.

Subscribers ordering the address of their paper to be changed, should be careful to give their previous address.

The Editor does not hold himself responsible for individual expressions of opinion, in communications addressed to the JOURNAL.

The postage on the JOURNAL is merely cents a year, payable quarterly in advance, at the office of delivery.

All communications should be addressed to the ARMY AND NAVY JOURNAL, New York.

PUBLICATION OFFICE 52 PARK ROW, TIMES BUILDING.

THE editorial and business offices of the ARMY AND NAVY JOURNAL have been removed to No. 52 PARK ROW, (Daily Times Building), directly opposite the City Hall Park, second floor front.

U. S. ARMY AND NAVY JOURNAL.

NEW YORK, SATURDAY, JULY 16, 1864.

THE CAMPAIGN IN MARYLAND.

THE annual expedition of the Confederate forces into Maryland and Pennsylvania has been inaugurated this year at about the usual time, and with rather more than the usual success. This series of demonstrations has been hitherto maintained with as much regularity as the series of annual counter-movements of our Army against Richmond; but, as he thankful, it has never yet accomplished anything equal to popular fears. The uniformity of the enemy's appearance around Harper's Ferry should now be nearly sufficient

establish one of BUCKLE'S "averages," or at least to furnish the July almanac makers with another "About this time may be expected." It is only paralleled by the uniformity with which Maryland and Pennsylvania are left unguarded and exposed until the Rebel cavalry can leap their barn-yard fences, and begin untethering horses and wringing the necks of fowls. After that is done, the stable-door is vigorously shut. Heated proclamations from various Governors call out troops to spur the invader, and there is an annual "uprising of the North." It should seem as if it must raise a blush on our cheeks to ask once more, with trembling knee-joints, for local militias, to check that "invader" who has been often officially announced as "thoroughly demoralized." Let us hope still that, in the future defence of the Eastern Border States, we may grow wise by experience.

In order to understand the raid, it will be necessary to look beyond the recent telegrams, so many of which are only the stories of a stammering pack of cowardly and selfish fugitive farmers. One of the facts established by the Maryland raid is, that "reliable gentlemen" may be reliable, but certainly are not trustworthy. "Reliable," like the adjective of Liberal, is getting to be "a vile phrase" in every sense, as it always has been in the sense etymological. After his recent extravagances, the reliable gentleman ought, as a narrator of facts, to make way again for the intelligent contraband, whom he improperly supplanted in public esteem.

The natural line of military approach to Washington from Richmond is that of the Shenandoah Valley. This fact had been so clearly demonstrated by experience that it needed no prescience to determine long ago that, in the summer campaign of 1864, a force must be posted in the Valley, to hold it at all hazards. The particular reasons why, together with the proper disposition of the required force, have been so often set forth in this journal that we need not now revert to them. This task, in effect, was assigned to General SIGEL, with instructions to press slowly down the Valley. He did so, but, on encountering the enemy, was defeated, and immediately displaced by General HUNTER. The latter is an excellent officer, to whom peculiar talents, however, justice was not done by putting him in command of the Valley. It was another instance of what can be noticed here and there during the war—the failure to assign "the right men to the right places." General HUNTER soon moved down the Valley and occupied Staunton, after handsomely defeating the enemy. So obviously did he menace Lynchburgh, also, that LEE, although in great straits just then, dispatched a large force to its relief. Had General HUNTER been able to move with the rapidity which distinguishes some of the more dashing officers, the affair at Lynchburgh would have been different. But, not to speculate on what might have been, as fact, HUNTER was repulsed and retired from the lines of Lynchburgh, which, in fact, had been thrown into Lynchburgh. Instead of retreating up the Shenandoah, the retention of which was the prime object of HUNTER'S column, it was thought most practicable to strike northwesterly through the mountains into the Kanawha Valley, by way of Gauley Bridge; and, on the 10th, the days of Gen. HUNTER appeared at Charleston, which lies at the junction of the Elk with the Kanawha, thirty-five miles from the Ohio line.

Meanwhile, EARLY, finding that he had no enemy in his front, and that new, in view of affairs at Petersburgh, there was less need than ever of returning to LEE, became a small force could hold the Petersburgh entrenchments, very naturally moved up the Shenandoah Valley, now for the first time left open during the campaign. Whether this manœuvre was a previously prepared scheme of Northern invasion, such as has constantly been promised, is an undecided question. But it is true that EARLY, when he had seized the occasion of the attack on Lynchburgh to put forth a new combination, in which he would save the latter city, divert troops from Petersburgh, and gain plunder and prestige by a Northern raid. Thus the several campaigns against Richmond present curious analogies, and this year has by no means diverged from its predecessors, gains more resemblance to them as it unfolds. The two armies sway back and forth like a huge pendulum, swung midway between Washington and Richmond. Just now the enemy moves through the northern arc.

In the hasten movement down the Valley two years ago, a part of our force which held Winchester, was sent across the mountains to Franklin, with the idea of cutting off "Stonewall" JACKSON, who was then retreating. A more unfelicitous manœuvre could hardly have been made. JACKSON quickly met this flanking force on his left and routed it, and then, finding the Shenandoah Valley free indeed, except by BANKS, drove that General at great speed to Harper's Ferry, and entered Maryland. The force at Franklin then marched back on its old track, and crossed into the Shenandoah again. In the present campaign, the guarding force of the Valley moves off to Gauley Bridge, the enemy having slipped by, again marches toward Martinsburgh and the Valley. So military history repeats itself. The Shenandoah Valley is our great stable door, which must be left open in the summer for the convenience of Rebel cavalry. That they have been hitherto badly mounted, and that their horses were worn down with hard service and the want of forage, is also to be noted. Accordingly, they did not delay a month or a week, but, on the very day when the door was thrown open, they marched into the stable. The news of HUNTER'S arrival at Charleston was immediately followed by the statement that the enemy was moving on Harper's Ferry. Of course, was the better course from the fact that our own cavalry had just returned from the raids, thoroughly jaded. TORBERT'S and GREGG'S divisions on the one hand had suffered on the north of the James, and WILSON and KAUTZ had been roughly handled on the south. Both men and horses were in hardly better condition for active service than the "ragged chivalry" of whom the reporters make so much good sport.

Our own belief is that no serious attack on either Baltimore or Washington was intended by the leaders of the present expedition. Had such an assault been intended, its only chance of success would have been in the immediate dressing of all columns against the city to be assaulted. But the enemy is found to be occupying ten days in marching a distance which could have been traversed in five, and to be dividing up into battalions and squads, plundering villages, exacting money from shopmen, and collecting great droves of cattle and horses, and trains of forage and provisions. The object of the demonstration was manifold. First, it saved Lynchburgh, and put it out of danger for a month. Next, it relieved Petersburgh for a time as effectually as by an attack on our lines at that point. It drew off a part of the investing forces, and made the city temporarily safer. General LEE perceived that he must not suffer his opponent to have his own way in establishing his siege guns and making his lines and communications impregnable. Finally, the main object of the raid was, as has been said, to procure supplies. The Shenandoah Valley is now in fine condition. The magnificence of the waving crops can hardly be realized except by one who looks upon them. The enemy hides his time. He does not reap until he has to. Then he gathers a large force in advance everywhere, and even the demonstration in front of Fort Stevens was probably only the cover for the working parties gleaning behind from farms and stores. It seems to us that the ease with which the enemy were driven from their positions, shows not only the paucity of their numbers but their lack of sincerity in the demonstration.

At this writing, Washington and Baltimore are pronounced free from danger. Accordingly, from all quarters the cry comes for "bagging" the Rebels. It is certainly to be hoped that the raiders may be bagged soiree. But there are so many difficulties attendant upon cutting off a force which has lately had all the fords of the Potomac under its control, and even new can move back at leisure, that we shall be pleasantly disappointed at learning of such a success. One thing let us keep in mind: So far as at present developed, the Maryland raid, while it has been in the main successful, need not have any decisive influence on the result of the great campaign.

THE MOUNTAIN ZONE.

We have, in previous articles, defined the Mountain Zone as being made up of the Alleghanies, with their spurs and included valleys, south of the Potomac. As in nature mountain regions seldom run parallel exactly, but sink into the plain by gradual undulations, so it is difficult to define with accuracy, or by fixed lines, the limits in respect to military operations of such a Mountain Zone as that which we now seek to describe. Looked at as a whole, on the general map of the country, it appears like a huge bastion, or bastion-like, thrust forward from the line of the Potomac and the Ohio into the alluvial plain of the Southern States. Such, indeed, it is, and as such it should be secured and held for the national cause.

Experience has shown that, as a general rule, the natural defenders of a mountain region are its own hardy inhabitants, who are peculiarly attached to their homes, and who are well acquainted with the tortuous paths and rugged passes that play so important a part in mountain warfare.

It happened that the inhabitants of the region we now have under consideration were so situated, and had been so impressed by the accidents of soil and climate, and the comparative influence of slavery among them, that at the commencement of the war they were, as a general rule, decidedly biassed in our favor, and even now it is more than probable that a large majority of the mountaineers decidedly incline to our side. Common prudence would then seem to dictate a very gentle and conciliatory policy towards them, and that every proper exertion should be made to unite them closely to us through their interests and affections. Were this mountain region fully in our possession, with the inhabitants heartily on our side, the very prompt result would be the reduction of the area of the Rebellion to a portion only of the cotton-growing States. Nor, with such a policy and such a state of feeling among the inhabitants, would a large force be required to gain possession of, and to hold, the region in question. But we have not the leisure, nor is this the proper connection for it, to discuss all the military and political advantages that would result from the permanent occupation of the Mountain Zone; we do not doubt that they will suggest themselves to every reader, and we will pass on to a brief outline of the topography of this interesting part of our country. The eastern portion of this Zone consists of parallel valleys running very nearly northeast and southwest above the James River, while below that stream the central valleys take a direction more nearly east and west, until reaching about the latitude of Knoxville, when the original direction is resumed.

Not far to the west of the main chain the valleys lose their character of parallelism, and the country is broken by spurs assuming very divergent and irregular directions. Approaching this Zone from the east, after passing the minor spurs and ridges, the first great obstacle is the formidable Blue Ridge, which extends,

almost unbroken, nearly northeast and southwest, from Pennsylvania to Georgia. South of the Potomac, this chain always presents a difficult obstacle, across which the roads practicable for armies and their trains are not numerous. Behind this chain, and between it and the main ridge of the Alleghanies proper, lies the beautiful Valley of Virginia—a continuation in fact of the Cumberland Valley of Maryland and Pennsylvania. The northern portion of this valley is drained by the Shenandoah and the Opequan. A few miles south of Staunton, the valley is somewhat interrupted by the ridge which divides the head waters of the Shenandoah from those of the James; again, by the ridge separating the waters of the James from those of the Roanoke; and again by the elevated range which divides the waters of the Roanoke from those of the New River, which flows into the Kanawha and the Ohio. From this point the valley may, with sufficient accuracy for our present purposes, be regarded as dividing into two, one of which extends into Tennessee and forms the valley of the upper Tennessee River, the other running into North Carolina. This extensive valley is not absolutely continuous, nor is it uniform in character or width, for it is often broken by lateral and longitudinal ranges. It is of exceeding fertility; it varies in width from ninety miles at some points to a mere nothing at others;—but it is always the heart, or more correctly speaking, the main artery of this Mountain Zone, and should be under our control. West of this great valley are many others, inferior to it in fertility, extent and importance: it would be too tedious, and quite unnecessary, to attempt a description or enumeration of them; for the possession of the Valley of Virginia would give us that of all the others. The mountain region disappears in Northern Georgia and Alabama, where it gradually sinks into the low ground.

We now propose to invite attention to the military importance of some of the principal sections of this extensive valley. The northern portion controls the avenues by which the Confederates have thus far penetrated into Maryland and Pennsylvania, covers the most exposed portions of the Baltimore and Ohio Railroad, as well as the important and most practicable approach from Western Virginia to West Virginia, Wheeling and Pittsburgh. So long as we hold firmly the section in question, it is most improbable that a Confederate invasion of Maryland and Pennsylvania would be attempted, because the left flank and the communications of the invading army would thus be constantly menaced by a force whose own communications with Western and the West would be secure. The same invading army would also be exposed to similar dangers on its right flank and rear from the garrison of Washington. Under these circumstances, it is not probable that a crossing of the Potomac would be attempted by the Confederates between the mouth of the Monocacy and the Shenandoah. In these objects it would suffice to hold the valley as far south as the vicinity of Woodstock—holding, of course, Moorefield, Chester Gap, Strasburgh, and other important points by strong entrenchments. A necessary part of the system of defence would be the complete repairing of the Harper's Ferry and Winchester Railroad, and its extension to Strasburgh, to connect with the Manassas Gap Railroad. In our attempts at holding this valley heretofore, our troops have been too weak for the positions they held, and the positions have generally been badly selected, and the troops not well handled. The permanent occupation of the valley as far as Staunton, Lexington and Lovingston, would secure both it the control to Knoxville, and would soon result in the fall of Lynchburgh and Charlottesville, the consequences of which would be the permanent abandonment by the Confederates of all the country north of Richmond, and upon the change of the capital from Richmond to a point further south, since the Danville Railroad would be constantly liable to interruption by parties moving from the vicinity of Buford's Gap, Salem, etc. These operations are, of course, alluded to as in connection with others from the seaboard.

To render our tenure of the Knoxville Valley secure, it is necessary that the long-talked of railroad from Danville, Ky., to the neighborhood of Knoxville, should be constructed without delay. With this line securely held, a comparatively small number of good troops thrown into the mountains of North Carolina, would soon free them from the Confederate control, so that the latter would lose while we would gain all the resources of t region with which to operate upon the adjacent communications and supplies of the Rebel armies.

In concluding the little it has seemed necessary to state in regard to this Mountain Zone, it may be remarked that, although it generally presents great obstacles to the movements of large bodies of troops, it is always possible to act with advantage, and without much difficulty, in this region, with small bodies of good troops, lightly equipped, and possessing the good will of the inhabitants.

SEMMES ON PRIVATEERING.

It is within the knowledge of our readers that "Lieutenant Raphael Semmes, U. S. N., late Flag-"Lieutenant of the Home Squadron, and Aide-de-"Camp of Major-General Worth in the battles of "the Valley of Mexico"—more lately and better known as Captain Raphael Semmes, of the privateer *Alabama*—is the author of a work entitled "Service "Afloat and Ashore during the Mexican War." It is a very creditable work—more creditable indeed than the more recent works by the same author in a different line. We have found it very entertaining reading, but we fear that the author himself would hardly take equal pleasure in recurring to it at this time. The worst wish of the afflicted Job for his enemy was that he might write a book. Doubtless his sharp experience of the changes and inconsistencies of life had taught him that it is dangerous to put on record moral sentiments and intellectual convictions, to the test of which one's own life may some day be brought: and so Semmes is finding it. In the course of the narrative of his experiences during the Mexican war he comes, naturally enough, to the attempt of the Mexican Government to organize a system of privateering for preying upon our commerce; and with no prescience of his future career, he proceeds to discuss the morality of this action, on the part of the Mexican authorities, from the high ground of a professional honor and pride which he seems to have long since left behind him.

"If Mexico had been a maritime people," he tells us, "this would have been her true policy. This "system of predatory warfare, more than any other, "equalizes the strength of nations on the water. Feeble states, from the want of a navy, are exposed against the "lighter heels and more erratic wanderings of this "description of force. But Mexico had no material "whence to operate. To render privateering avail-"able to her under the law of nations, it was necessary that at least a majority of the officers and crew of each vessel, or a majority of the citizens made *ad hoc* in fraud of the law, but *bona fide* citizens; "*and any vessel which might have attempted to cruise* "*under a letter of marque and reprisal, without this* "*essential requisite, would have become from that* "*moment a pirate.*"

A most excellent decision, and one so applicable to the much discussed case of the Rebel privateers, that we need no better law for their condemnation than that laid down by the man who has done more than all others to make their name a terror to our commerce. It cannot be disputed that a majority of their crews are not "*bona fide* and *ad hoc*" citizens; not even pretending to claim allegiance to the Power under whose flag they wage war on defenceless merchantmen. In the case of the *Alabama*, we have the published statement of one of her crew, that out of sixty-six men, whose names he gives, among her crew and petty officers, forty-nine were English, and eight were Scotch or Irish, making fifty-seven British subjects or nearly four-fifths of the number mentioned. Of these, eighteen belong to the Royal Naval Reserve, and two have pensions in England. And though the testimony in the case of the other privateers is not so direct, there is abundant reason for believing that the same is true of them. The process of moral obliquity has Semmes come to justify in action the conduct he thus pointedly condemns in principle?

Nor does he stop with this. Coming finally to the discussion of the general subject of privateering he thus puts himself on the record:—

"There is a growing disposition," he says, "among civilized nations to put an end to this disreputable mode of warfare, under any circumstances. It had its origin in remote and comparatively barbarous ages, and has for its object rather the plunder of the bandit, than honorable warfare. The cruisers being private vessels, fitted out on speculation, and officered and manned, generally, by unscrupulous and unprincipled men, it is impossible for the government which commissions them, to have them under proper control. From the nature of the materials of which the crews of these vessels are composed—the adventurous and desperate of all nations—the shortness of their cruises, and the demoralizing pursuit in which they are engaged, it is next to impossible that any discipline can be established or maintained among them. *In short, they are little better than licensed pirates; and as fearless and civilized nations, and especially nations who, like ourselves, are extensively engaged in foreign commerce, to suppress the practice altogether.*"

So thought Captain Winslow when he poured his shot and shell into the *Alabama*, with a precision and effect which must have brought home to Semmes his early teaching on the subject of the duty of civilized nations toward such as he. Though all else may have gone to the bottom, we hope he was able at least to save a copy of his book from the wreck. It will furnish him with instructive reading while he is waiting for another ship. Perhaps he may find the leaf already turned down at chapter V., from which we quote.

Every reader of our Army Circular must be familiar with the standing head "Notice to Delinquents." Under this warning title are weekly published the names of officers who are ordered to appear within fifteen days before a board sitting in Washington, to make satisfactory defence to variously assigned offences, in default of which they will stand dismissed the service. The list is made up to go, perhaps, less regard than it ought to this weekly call; and it is not at all ready to accept the publication as evidence against the officers named. Experience shows that the names of some of the best officers in the service have appeared amongst these delinquents, charged with the most disgraceful offences known to military law. Some of them have seen their names in this pleasant connection, and have had time within the fifteen days to make full and satisfactory defence, and to secure the happy privilege of appearing under the more honorable head of "Exempt from Dismissal." Others are not so fortunate. We know of one case in which every officer but one on the staff of a prominent general officer enjoyed the privilege of passing through this series of official gazettings. We know also of many cases where officers who had been severely wounded and had gone home on leave, have had their convalescence gratified by reading in the public prints their dismissal for desertion. We hear of such instances almost weekly; and it is not impossible to find in these orders the names of officers who have been killed in battle or died of wounds, their inability to resurrect themselves preventing them from appearing before the Washington military board. We say this with much regret of a case which some may regard as quite unfortunate. In the JOURNAL of the 11th of June, under this "Notice to Delin-"quents" there appeared the name of a lieutenant who was ordered within the usual fifteen days to make his excuses or stand dismissed for the crime of desertion. The gentleman in question never saw the notice until the 30th of June, when he had the pleasure of reading it in New Orleans, having been ordered on the 4th of November, 1863, by the Adjutant-General of the United States, to report at that place as Major of his regiment. He will doubtless be able to satisfy the Department of this, for he had the original order from General Thomas, and in time he will be able to clear himself of the odious charge preferred against him. It is easy to understand that these unfortunate errors occur through some negligence or some lack of system; but it would be well if innocent parties could be spared from bearing all the disagreeable consequences. It is an even worse result of these frequent mistakes that the tone of the service is lowered, and real offenders fail of enduring the ban of public opinion. We suppose we must bear up under these disadvantages, which are due to the want of system in our military organization, but we pray that the evil may be remedied as speedily as possible.

There are reports amongst military men that the Army of the Potomac is again to pass through changes in its organization. General Meade would, of course, retain the position which he has so long and so ably filled, but it is said that one or two of the former corps commanders will be reassigned to duty in the Army. The severity of the campaign, and its exhausting effect upon so many general officers, is believed to necessitate important changes in commands.

To render our tenure of the Knoxville Valley secure, it is necessary that the long-talked of railroad from Danville, Ky., to the neighborhood of Knoxville, should be constructed without delay. With this line securely held, a comparatively small number of good troops thrown into the mountains of North Carolina, would soon free them from the Confederate control, so that the latter would lose while we would gain all the resources of t region with which to operate upon the adjacent communications and supplies of the Rebel armies.

In concluding the little it has seemed necessary to state in regard to this Mountain Zone, it may be remarked that, although it generally presents great obstacles to the movements of large bodies of troops, it is always possible to act with advantage, and without much difficulty, in this region, with small bodies of good troops, lightly equipped, and possessing the good will of the inhabitants.

SEMMES ON PRIVATEERING.

It is within the knowledge of our readers that "Lieutenant Raphael Semmes, U. S. * Service Afloat and Ashore during the Mexican War. By Lieutenant Raphael Semmes, U. S. N., late Flag-Lieutenant of the Home Squadron, and Aide-de-Camp of Major-General Worth in the Battles of the Valley of Mexico. Cincinnati: Wm. H. Moore & Co., Publishers. 1851.

FOREIGN MILITARY AND NAVAL MATTERS.

THE WHITWORTH and ARMSTRONG contest will probably not be closed for some months to come.

THE *Flandre*, a plated frigate of the *Gloire* class, and with engines of 1,000 nominal horse-power, has just been successfully launched.

THE Viceroy of Egypt is sending 16 officers to visit the different military establishments in France, and be present at the manœuvres at the Camp of Châlons.

AFTER a lapse of 49 years, there were still 137 British veteran officers above the rank of lieutenant alive to celebrate the anniversary of Waterloo, on the 18th ult.

GUDIN, the eminent French marine painter, has gone to Cherbourg to make studies for a painting of the great battle between the *Kearsarge* and the *Alabama*.

THE Mexicno officers captured in the late campaign round Puebla, and who were sent to France as prisoners of war, had been informed that after the 1st July they will be set free.

ACCORDING to official documents, the total Swiss army in the list of January, 1864, numbered 200,000 men, of which 45,525 were in the reserve, and 63,620 in the landwehr.

THE iron-clad constructed for the Danish government by the Messrs. THOMPSON was 200 feet in length, 3,500 tons burthen, and of 600 horse power. It is covered with plates about 4½ inches thick.

Royal Sovereign, turret-ship, has been moored out of Portsmouth Harbor, for trial of her speed at the measured mile in Stokes Bay. The engines are said to have worked well, and the vessel realized a speed of 11 knots, with the force of the wind at 6.

A COMMITTEE, of which Major-General RUSSELL, C.B., is President, has been appointed in England to inquire and report on the advantages which the present cability of arming the Line with breech-loaders.

LA GLOIRE class of iron-clads are changing their armament, instead of carrying eighty-four 50-pounder rifled guns, are to be armed with some 30-pounders and four rifled howitzers—two as bow, and two as stern, chasers.

BRIGADIER-GENERAL TOSCOW DE TERRAIL, commander of the Legion of Honor, and of the pontifical order of ST. GREGORY the Great, member of the general council of the Hôtel Alps, died on the 29th of April in his patrimonial domain of Montmaur, near Vergues. The *Moniteur de l'Armé* contains an extended memorial notice of him.

THE *Minotaur*, recently launched by the Thames Ship Building Company, and fitting with a poop and topgallant forecastle in the Victoria Docks, is intended to be the future flag-ship of the Commander-in-Chief of the Channel Squadron. The *Minotaur* will mount 38 guns, is armor-plated, 6621 tons, and has a mean power of 1,250 horses.

"As railways," says the Paris *Constitutionel*, "will play a considerable part in the wars of the future, there is said to be an engineer officer in the engineer corps in the armies of the different states sections of working mechanicians, for disabling the railways and locomotives of the enemy, and for repairing those which the opposing army has disabled."

ACCORDING to *Il Bulletino*, the 1072 persons who landed on the 11th May, 1860, with GARIBALDI at Marsala included 1,087 from Lombardy, 151 Italian provinces subjected to Austria, 176 to the ancient provinces, 68 to Tuscany, 33 to the Neapolitan provinces, 35 to Sicily, 30 to Rome, 11 to Istria and adjacent regions, 4 to foreign countries, and 140 to countries not known.

THE Richmond correspondent of the London *Index*, the Rebel organ in England, gives a list of 125 vessels engaged in running the blockade, from which it appears that during the year running six are in England, nine are in Nassau and Bermuda, and the rest are in port, "one is in the U.S.A. service, one is worn out, one is in Charleston, and one I got out, all the others having the words "captured," "burnt," or "lost," after their names.

CAPTAIN PALLISER, of the 18th Hussars, is said, in the London *Times*, to have made a most valuable discovery in artillery. This is the use of "chilled shot," i. e., shot cast in cold sand moulds instead of hot iron ones. The harder enough for 68-pounders, pass through the target solid, and then split into "minute fragments" of four or eight ounces. They cost, moreover, one-third of 56s. Upon this PALLISER's mode of rifling iron guns by introducing a coil of wrought iron is well known.

IN Austria the following composition has been proposed for the bronze of bronze ordnance, and for the manufacture of cannon:—Copper, 60; zinc, 34 to 44; iron, 2 to 4; tin, 1 to 2. The iron is placed at the bottom of the crucible, the copper covers it, and both are raised to a high temperature. Then the tin is added, and finally the zinc. After the whole is thoroughly mingled, it is suffered to cool. A trial made upon a cannon manufactured of this metal, proved that the chamber of the piece had experienced no deterioration from firing.

THIS year the force placed under the command of Marshal DE MACMAHON at Châlons includes three divisions of infantry and one of cavalry; the heads of divisions are Generals D'AUTEMARRE, D'ERVILLE, BOURBAKI, and DUMONT; and of brigades, Generals DE LA CHARRIÈRE, GUIONARD, MONTAUDON, BARON SCHMITZ, SAURIN, TROCHU DE LADMIRAULT, ABRIL, and Count DUHESME. General JARRAS is chief of the staff, and General LAURY commands the artillery. The cavalry consists of regiments of Lancers, three battalions of foot chasseurs, four regiments of cavalry, nine batteries of artillery, four companies of engineers, one of the wagon train, detachments of infirmary assistants, of gendarmes, and workmen in the pay of the administration, the whole numbering 25,000 men. The cavalry has not arrived since the 15th June.

THE trial-trip of the iron-clad *Castelfidardo*, which has been built at Leghorn by Messrs. ORLANDO, was attended with very satisfactory results. Her speed was all that was expected. She was built at Nantes by Messrs. ERNEST SCHNEIDER & Co., and launched in place in the presence of a commission sent out by the Italian Government, composed of Admiral VACCA, Captains RICCHIUTI, CACACE and BALDICCHI, and the engineer CARLI. The French engineers DU CHALARD and GAUDON and Lieutenant TOUBOULIC were sent by the French minister of marine, to observe and report as to the result of the hospitality and speed. The constructor of the machinery was MAZELINE, who, with the builders, were also present. The *Castelfidardo* left Leghorn on the 14th of May, in excellent weather, with the sea, however, somewhat rough, as it always is between Belle-Isle and Gorgona, but little wind, and that little dead ahead. Her speed was then ascertained by the official engineers in the Champ de Mars. The object of these exercises is to reach the drivers how to turn short in the smallest possible space in a sea-way, and how to avoid impediments, and to pass through narrow and ever difficult roads. These manœuvres are performed with baggage and artillery wagons drawn by four horses, and driven by two men. The wagons formed into platoons take up position as if in line of battle, march in column, and wheel to right and left. When it is intended to halt, the wagons form in a defile a number of wagons are ranged in two parallel lines with just sufficient space for another wagon to pass between them. This space is traversed by wagons and mules backwards, the horses sometimes trotting and even going at a gallop. The drivers have made great progress in this part of the exercise since the wagons were installed. The man who mounts the leaders is instructed not to keep the traces too tight, so that the other driver may have the means of directing the wagon. There is to be a general inspection soon, and three wooden posts will be substituted for the parallel lines of wagons, and the drivers will not be fixed in the ground, and the drivers who knock down the fewest will receive some prize. Perhaps categories will be established of 1st, 2d, and 3d charioteer.

A NEW IRON-CLAD.

We take the paragraph below from the American Naval correspondence of the London *Army and Navy Gazette*:

"Public attention is being directed to a style of sea-going iron-clads invented by Captain AUGUSTUS WALKER, an old navy officer, which promises to be of great value in fitting vessels used to build vessels on these plans for mercantile purposes. The proposed hull will combine qualities to give greater buoyancy, better speed, and greater capacity than hitherto has been found combined in naval architecture. The plans and models have been submitted to the most eminent shipbuilders and naval officers in this country, who unhesitatingly pronounce in its favor. In fact, it is my opinion that this craft will revolutionize the iron-clad navy use. Vessels built on these plans will certainly be better able to carry heavy armor and batteries than any vessels we now have, and our naval officers—at least the majority—favor any change for good, and especially any that will rid the navy of such a helpless encumbrance as the Monitors for sea service. It is proposed to call this new style of armored vessel Ecrebus, as a set-off to the Monitors. Some of the best of our naval officers have seen this scheme, and are determined to push it ahead, and I should not be surprised if in a few months the frame of an Ecrebus was being put up in the yard of some builder of this city. These vessels will look like a ship instead of a great cumbersome raft."

THE DUKE OF RICHMOND'S ADVICE TO YOUNG SOLDIERS.—One of the present generation of officers has expostulated with the following fine letter of advice, written nearly a century ago by the then Duke of Richmond, but most applicable to the present day:

WHITEHALL, Friday night, February 25, 1780.

I am glad to hear, my dearest Henry, if I thought you was going to the West Indies. I suspect you are only looking for a trip to Jersey or Guernsey, about which I hear there is an alarm. However, it may be farther, and if it should, I beseech you to take care of yourself. You will, of course, avoid drinking; but what I wish to recommend to you is to be very careful to avoid being wet by damp or rain, or even dew, and not changing immediately; and indeed to avoid hard exercise, especially in the sun, as much as possible. Your health depends a great deal on it, but do not depend too much on the former, or let the latter carry you too far, for it is chiefly being over-heated by work that is so fatal in a West India climate; and remember, that by saving yourself a little, or rather a great deal, in the beginning, you will be able to serve your duty the longer. A little experience in service will show you, that the want of good sense in most of our commanders produces generally a great deal of unnecessary fatigue and labor for no purpose. You will have orders to be on your arms all night, to march here and there, and to keep out hours doing what might be done in two; in short, harassed and fatigued without reason, which kills too times as many as the climate and the enemy. On all occasions avoid as much as you can. When the enemy is before you, then you must exert. Above all, do not be uneasy or make up your mind to see things go very wrong, and don't knock yourself up runningly about after your men when you can do no good. It is by previous good disposition and regularity that they must be taught order and obedience; for when once they break loose to plunder or not, it is then too late to stop them, and you only kill your self running after them, one by one, and fretting is as bad as anything in hot climate.

Whenever you are ordered on any attack, be very careful to obtain distinct and clear orders, and not to have any misunderstanding with the person who gives you it. If you are left to yourself, or to the manner of carrying on an attack, I would always advise you to do it briskly. The circumstances of climate, and many other particulars, must be considered, and will direct you as to the most advantageous manner; but in general it is best to run on as briskly as you can with regularity, and reserve your fire till you get close. The impetuosity of such an attack generally intimidates and confounds the enemy, and it is a bad fight in woods he sure to keep your files open. Let it be the particular business of your subaltens and sergeants to see that your men do not fire too much in a hurry, or have got any advantage, be very vigilant to keep it. On all occasions, guard against surprises; and as many disorders arise in the rear to have timely notice; by frequent rounds see that they are alert, and use your men to be ready to turn out and be in their places at a call. In an attack, as soon as ever be surprised, get as many of your people together as you can; endeavor to force your way through the enemy by your front, and do not be persuaded to retreat, as I never fire at night in the dark. If you are surprised at night and cannot do your road or your enemy, form your men into a close column, and wait quietly for the light of day; by this you may be able to do something; but in the night you are almost sure to be cut to pieces if you can do no good. Let your enemy fire away in the dark, he will do himself more harm than you. You had no such occasion for general rules in the Low Countries as you can in America, where the nature of the country and the manner of the enemy do not let your men lead. The bayonet is the only weapon in the night. Always observe the roads and avenues to your camp, that you may be right enough to know what to do on all occasions. Adieu, my dearest HENRY. Remember that I expect to hear that you return safe and happy. I have not said a word to you of your duty both to your own people and the enemy, because I know it is so thoroughly impressed on your mind. If you should get wounded, be very careful to live low, and not go out till you are perfectly well. Once more adieu, and believe me ever your most affectionate Uncle, RICHMOND, &c.

GUN-COTTON.—At a recent meeting of the Polytechnic Association in New York the subject of gun-cotton was discussed.

MR. SCOTT RUSSELL has repeated before the Royal Institution, London, the opinions expressed by him at the last meeting of the British Association for the Advancement of Science, respecting the explosive compounds, and comparative safety of Baron LENK's gun-cotton. He spoke also of the uncertainty, at a chemical composition, of gunpowder, and expressed the opinion that the best way to secure the proper ingredients were useless, and encumbered the action of the remaining thirty-two gaseous parts.

Mr. RUSSELL and Mr. FARADAY remarked that the experiments with gun-cotton in this country had not very closely resembled those made by Baron LENK's compound is woven into ropes or fine threads, in order that the whole product will be inchroad in its explosion, but the experiments at the time of discharge of the cannon to have been accomplished. If gun-cotton is rammed down into a gun it may at first work well, but if, again, it is rammed down upon the first charge, it becomes hard and burns. If the difficulty is, that in getting the ball down it may often be necessary to give the ball an extra ram, and this will cause a premature explosion. Gun-cotton possesses very good qualities: one of the best is that it does not absorb moisture as also very light. Perhaps the danger of premature explosions might be avoided by making it into cartridges. For blasting purposes it is valuable, but for guns it is not to be recommended. In the opinion of the party, we the first to make two charges of gunpowder into one, and have them burn the same length of time as one charge.

Mr. RUSSELL said that the experiments of Baron LENK's gun-cotton was that it contained more oxygen than the ordinary cotton. He inquired whether DR. BOBINUS' gunpowder was still used in the Army.

Mr. MAYNARD knew it had been very largely used in the six-pounder guns. Experiments connected with them have expressed a preference for it, as it leaves nothing in the gun that requires swabbing out. Therefore it is not necessary to cover the ball with a wad before the gun is loading. This pressed or caked powder, invented by DOBEREINER, is highly prized in the Austrian Army. Mr. LENK said that the 68 per cent of gunpowder, the solid part capable of an useless, was a large amount to be transported, but is not the solid matter really essential to hold the gases resulting from the explosion in a solid form before they are used. Mr. MAYNARD stated that interesting experiments are now being made regarding the feasibility of dispensing with some of the solid constituents by parties in this country. Mr. ROSE SEWELL desired to correct an impression made regarding the value of gun-cotton in blasting. Its action is violent, and it crumbles the stone in its immediate vicinity. Where it is desired to separate rock in regular blocks it is better to use gunpowder in the series of holes drilled in the same right line.

THE NAVAL PRISONERS IN TEXAS.

THE following correspondence in relation to the officers and men of the Navy held as prisoners by the Rebels in Texas, has passed between the Mayor of Boston and Secretary WELLES. It will be seen that the Navy Department has made unavailing efforts to procure the release of the prisoners:—

BOSTON, June 25, 1864.

To the HONORABLE SECRETARY OF THE NAVY:

SIR:—Permit me to call your attention to the condition of the officers and seamen of the Navy who are now prisoners of war in Texas. While those who had the misfortune to be captured at Galveston have been for a short confinement have been exchanged, those in Texas have apparently been left to their fate and have become almost hopeless of any aid from the Government which they have faithfully served. The climate where they are now in bondage, so unlike that of their Northern homes, is severely affecting their constitutions, and justice demands that more than usual immediate measures shall be taken for their release. Our community has been moved to its depths, and a public meeting has recently been held in Boston to call the attention of the Secretary of War to the soldiers in this Southern country. May I not hope that the same interest will be taken in our naval force, and that you will use your best endeavors to have them exchanged also. We have the testimony of some two or three who have escaped, that there is a desire on the part of the Confederate authorities to confer with our own Government on the subject. It might well form your attention to particular citizens of Boston, who have special claims on our sympathies, but if a system is adopted, all will be released without special application. Hoping for a favorable answer. Trusting to your favorable action in the matter, I have the honor to remain, very truly your obedient servant,

F. W. LINCOLN, Mayor of Boston.

REPLY OF SECRETARY WELLES.

NAVY DEPARTMENT, WASHINGTON, July 2, 1864.

SIR:—I have received your letter of the 25th ultimo, calling attention to the condition of the officers and seamen of the Navy who are prisoners in TEXAS. This Department has done all it could to secure the release of the officers and seamen of the Navy who are now in durance imprisoned in TEXAS. The War Department is entrusted with the matter of exchanges, and it was only when this Department to keep before the Commissioner of Exchange the claims of our naval prisoners, and to ask him to use his exertions on their behalf. The officers and men of the Navy have not been unfaithfully drawn to the prolonged imprisonment of those who were so unfortunate as to be captured on the coast of TEXAS. We are not aware that any difficulties equivalent for any of them that the authorities at Richmond would consent to release, but for some reason or other, such propositions have not been made. Very respectfully, &c.,

GIDEON WELLES, Secretary of the Navy.

His Honor F. W. LINCOLN, Esq., Mayor of Boston.

MILITARY INSTRUCTIONS FOR GEORGIA AND TENNESSEE.

IMPORTANT LETTER FROM GENERAL SHERMAN.

THE following letter is published to the people of Tennessee and Georgia, living within the limits of the Department of the Cumberland, for their information, as expressing the sentiments of the military authorities:

HEADQUARTERS MILITARY DIVISION OF THE }
MISSISSIPPI, IN THE FIELD, BIG SMARTY, }
June 24, 1864.

GEN. BURBRIDGE, COMMANDING DIVISION OF KENTUCKY-GENERAL:—The recent raid of MORGAN, and the concentrated side of varying forces of Confederate soldiers or guerrillas, calls for determined action on our part.

Even on the Southern "State Rights" theory, Kentucky has not acted. Her people, as a State, or through any of her actions, have adhered to their allegiance to the national Government, and the South would now cover her out of the Union and with fire and sword. Her people are the victims upon which so much stress was laid at the outset of the war, and which caused the rebellion the people of the Middle or Border Slave States.

But politic aside, these acts of the so-called partizans or guerrillas are not to be tolerated by civilized nations, and no sad and other well-defined cases, which do not sound as well under their true name as more agreeable ones of warlike meaning.

Now, before entering on this campaign, I foresaw it, and you remember that in every case would arise, and I charged Gov. BRAMLETTE to at once organize in each county a small, trustworthy band, under the sheriff, and at once dash arrest every man found in arms against the authority of the law, and who every fellow hanging about the towns, villages, and cross-roads who had no honest calling, the material out of which guerrillas are made. In this way the whole military power of the Government to the Governor rather arbitrary.

The fact is, in our country *personal liberty* has been so well secured that *safety* is the only thing left us, and in our law and institutions, and the last, in we are thrown back one hundred years in civilization, law, and government. Each man has the right straight to anarchy and the devil, if somebody don't arrest our downward progress.

We, the military, must do it, and we have right and law on our side. All Governments and communities have a right to guard against real and even supposed danger. The whole people of Kentucky, as a State, have by their acts of suspense and real danger, lost a few innocent men should be wrongly accused.

You may order all your Post and District Commanders that guerrillas are not soldiers, but wild beasts, unknown to the usages of war. To be recognized as soldiers, they must be enlisted, enrolled, officered, uniformed, armed and equipped, by recognized belligerent power, and must, if detached from a main army, be of sufficient strength with written orders from some army commander to some military thing. Of course no Confederate soldier can claim Government as belligerent power, but deny their right to our lands, territories, rivers, coasts, and nationality—abolishing the right to rebel and move to some other country, where laws and customs are more in accordance with their own ideas and principles.

2. The civil power being insufficient to protect life and property, we are compelled to provide martial law, "which satisfies others," the military step in, and is rightful, constitutional and lawful. Under this law everybody can be made to obey at home and abroad, and her own business, and if they wont do that can be sent away where they must keep their honest neighbors in fear of danger, robbery and insult.

Your military commanders, provost-marshals, and other agents, may arrest all persons who have been known encouraged or harbored guerrillas and robbers, and you may send them to be collected in Louisville, and when you have enough—say fifty or a hundred—they will be close them to be sent down the Mississippi through their guerrilla gauntlet, and by a sailing-ship send them to a land where they may take their property and their money, with laws and a future of their own. If they won't live in peace in such a country as Kentucky, we will send them to another if not a better land, and surely this would be a kindness to them, and a God's blessing to Kentucky.

I will go further, and declare that personalities are mixed up in this, nor does a full and generous "vote by ballot," of the South," of their State or country, form a cause of punishment, and in such cases the guilt will not be satisfied, and that makes my pretext of murder, arson, theft in all its grades, perjury and all the crimes of human nature.

My own preference was, and is, that the civil authorities in Kentucky would and could do this in that State; but, if they will not, or cannot, then we must, for it must be done. There must be an "end to strife," and the honest, industrious people of Kentucky, and the whole world, will be benefited and rejoiced at the conclusion, however arrived at.

I use no concealment in saying that I do not object to men or women because "they pull "Southern feeling," if confined to love of country, and of peace, honor, and security and a little family pride, but where become "crimes" when enlarged to mean love of murder, of war, desolation, famine, and all the horrid attendants of anarchy and civil war, with respect, your friend,

W. T. SHERMAN, Major-General.

SECRETARY WELLES TO CAPTAIN WINSLOW

NAVY DEPARTMENT, July 6, 1864.

SIR:—Your very brief dispatches of the 19th and 20th ultimo, informing me that the gallant and efficient *Alabama*, or 290, had been sunk on the 19th of June, meridian, by the *Kearsarge*, under your command, were on this day received.

I congratulate you on your good fortune in meeting this vessel, which, in her short career evaded the fastest ships and some of the most vigilant and intelligent officers of the service, and for the ability displayed in the combat you have the thanks of the Department.

You will please express to the officers and crew of the *Kearsarge* the satisfaction of the Government at this victory over a vessel superior in the number of guns, and superior in the number of her crew. The battle was so brief, the victory so decisive, and the comparative remain or striking that the conduct and conduct of the gallant actions of our infant Navy, which have been repeated and illustrated in this engagement.

The *Alabama* represented the best maritime effort of the most skilled English workshops. Her battery was composed of the most approved pattern of 7-inch, of the famous 68-pounder of the British Navy, and of the only successful rifled 100-pounder yet produced in England. The crew were generally recruited from the British Navy, and many of them received superior training on board her Majesty's gunnery ship, the *Excellent*.

The *Kearsarge* was one of the first gunboats built at our navy yards at the commencement of the Rebellion, and lacks the experience which the *Alabama* had obtained. Her principal guns composing her battery had never been previously tried in an exclusively naval engagement; yet, to one hour, your victory over this powerful antagonist, thereby ending her predatory career, and killed many of her crew, without injury to the *Kearsarge*, or the loss of a single life on your vessel.

Our countrymen have reason to be satisfied that in this, as in every other naval conflict with the enemy, neither his ships, the guns, nor the crews have deteriorated, but that they maintain the ability and continue the renown which have ever adorned our naval annals.

The PRESIDENT has signified his intention to recommend that you receive a vote of thanks, in order that you may be advanced to the grade of Commodore. Lieutenant Commander JAMES S. THORNTON, the executive officer of the *Kearsarge*, is also recommended to the President for advancement ten numbers in his grade; and you will report to the Department the names of any others of the officers or crew whose good conduct in the engagement may claim to especial mention. Very respectfully, &c.

GIDEON WELLES,
Secretary of the Navy.

CAPTAIN JOHN A. WINSLOW, U.S.N.,
Com'g U. S. steamer *Kearsarge*, Cherbourg, France.

An absurd story has found some circulation, though very little credence, to the effect that after the battle of the Wilderness, GRANT was drunk during a critical period of the Rapidan. In order to give the slander authoritative correction, a gentleman of Washington has written to Gen. Meade on the subject. General Grant, and received a reply from Lieutenant-Colonel Theodore Lyman, Vol. A. D. C., who states that "the statement is entirely false, and that the facts of the calumnious report" was duly received, and has been forwarded to General Meade, with an endorsement of which the following copy is published in the Boston *Journal*:—"General Meade on no occasion advised or counselled falling back toward, much less across, the Rapidan. There has been no word or act of his from the beginning of this campaign which indicated even a belief on his part that such a step would ever become necessary. Such rumors as you speak of are entirely idle and without the shadow of foundation.

"U. S. GRANT, Lieutenant-General.

"CITY POINT, VA., June 25, 1864."

ARMY GAZETTE.

APPOINTMENTS BY THE PRESIDENT,

BY AND WITH THE ADVICE AND CONSENT OF THE SENATE.

ARMY OF THE UNITED STATES.

TO BE MAJOR-GENERALS BY BREVET.

Brigadier-General Alvin P. Hovey and Brigadier-General John C. Bernard, of the United States Volunteers, to be major-generals, by brevet.

DEATH OF BRIGADIER-GENERAL TAYLOR.

ADJUTANT-GENERAL'S OFFICE,
WASHINGTON, June 29, 1864.

General Orders No. 219.

The painful duty devolves on the Department of announcing to the army the death of Brigadier-General Taylor, all to date from the 21st inst., at the military General of Subsistence, who expired this morning, at his residence in this city.

General Taylor entered the service in May, 1813, as Third Lieutenant of Infantry, and by successive steps he rose to the highly honorable and responsible position which he held at the time of his death.

For more than half a century he has given the path of just and equal duty with a devotion and singleness of purpose that won the respect and love of his fellow-men, and the example of his life will be an equally estimable. No man's integrity was more spotless. He was a soldier, faithful, brave, accomplished, and eminent friend, who deserved for his good qualities and admired for his virtues.

In honor of the memory of the deceased, the funeral of the officers of the Subsistence Department will wear the prescribed badge of mourning for thirty days. A salute of thirteen guns will be fired from the Washington Arsenal, commencing at 4½ o'clock P.M. on Friday, July 1.

By order of the Secretary of War.

E. D. TOWNSEND, A. A. G.

CORRESPONDENTS ORDERED TO LEAVE THE LINES.

HEADQUARTERS ARMY OF THE POTOMAC, July 6, 1864.

Mr. William Swinton, a duly registered correspondent with this army, has been ordered by the War Department, a correspondent for the New York Tribune, here, by direction of the Lieutenant-General commanding the armies of the United States, ordered to leave the lines and to forfeit the privileges conferred upon them, by forwarding for publication by the press information prejudicial to the operations of the army. This order has been warned not to return. The information is published in the New York Tribune of this morning, and the correspondent will hereafter found within the limits of the Army they will be sent under guard to the Provost-Marshal-General at Washington. By command of

S. WILLIAMS, Assistant Adjutant-General.
EDWARD M. NEILL, Assistant Adjutant-General.

AN ACT to provide for the repair and preservation of certain public works of the United States.

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That there be, and hereby is, appropriated, out of any money in the Treasury not otherwise appropriated, the sum of two hundred and fifty thousand dollars, to be expended under the direction of the Secretary of War, in protecting the commerce of the lakes by causing the public works connected with the harbors at Chicago, Illinois, Erie, Pa., Sandusky City, Ohio, Michigan and Superior, to be repaired and made secure for navigation, and for the construction of such new works as the public interest may be necessary.

SEC. 2. And be it further enacted, That there be, and hereby is, appropriated, out of any money in the Treasury not otherwise appropriated, the sum of one hundred thousand dollars, to be expended under the direction of the Secretary of War, in repairing and widening useful portions of the military roads in Minnesota and on the public works connected with the harbors on the seaboard of the United States, or for the judgments, and such expenditures.

Approved, June 28, 1864.

DISMISSALS

For the week ending July 2, 1864.

Captain James Wilson, Company A, 14th N. Y. Artillery, to date June 24, 1864, for drawing pay as Lieutenant-Colonel of the 65th N. Y. Vols., after he had tendered his resignation as Lieutenant-Colonel of that regiment and been mustered out of service as Lieutenant-Colonel of that regiment, to date June 15, 1864.

Captain Gilbert B. Perkins, 160th Pennsylvania Vols., to date June 24, 1864, for having tendered his resignation for ineffectiveness from wounds received in battle, which was accepted.

Captain Thomas H. Elwood, 24th New York Vols., to date June 30, 1864, for violating General Orders No. 126, current series, from the War Department, conduct prejudicial to good order and military discipline, and desertion of his command while it was on the march to meet the enemy.

Captain Sheldon A. Hall, 11th New York Vols., to date June 30, 1864, for misconduct unbecoming an officer and a gentleman, in retaining money entrusted to him by his men, and refusing to pay the same when demanded by them, and said soldiers' Assistant Surgeon J. S. Greene, 2d New York Mounted Rifles, to date June 4, 1864, for absence from his regiment without leave, having been publicly and officially and failed to appear before the Board ordered.

First Lieutenant Joseph W. Paine, 13th New York cavalry, to date February 14, 1864, for desertion, having been published officially as a deserter before his resignation was tendered.

First Lieutenant Henry S. Colton, 84th N. Y. Vols., to date June 3, 1864, for drunkenness on duty and conduct unbecoming an officer and gentleman; published in the dismissals for the week ending June 4, 1864, as Lieutenant Henry S. Colton, 9th New York Vols.

First Lieutenant John G. Rapp, 19th Pennsylvania Vols., to date July 1, 1864, with loss of all pay and allowances, for disobedience of orders, neglect of duty, and desertion of his command when it was engaged with the enemy.

First Lieutenant L. H. Hamlin, 123d Illinois Vols., to date July 1, 1864, with loss of all pay and allowances, for drunkenness and profane language to be enlisted by the enemy.

First Lieutenant Wm. Hall, 5th New York Vols., to date June 25, 1864, with loss of all pay and allowances, for deserting from his command while it was before the enemy.

Second Lieutenant William H. La Rue, 34th New York artillery, to date June 30, 1864, for violating General Orders No. 126, current series, from the War Department, conduct prejudicial to good order and military discipline, and disobedience of orders while in the face of the enemy.

Captain John Lester, 160th Pennsylvania Vols., to date March 29, 1864, for absence without leave.

Assistant Surgeon S. Compton Smith, 1st Alabama cavalry, to date June 30, 1864, for absence from his regiment, for habitual drunkenness while on duty, and for leaving his command and going home when the enemy was in front of his regiment while on an active campaign and to face of the enemy.

DROPPED FROM THE ROLLS.

By direction of the President of the United States, Second Lieutenant George Anderson, 8th United States infantry, has been dropped from the rolls of the army, to date September 14, 1863, for having deserted the service of the United States at that date.

SENTENCE REVOKED.

So much of general order No. 126, dated June 19, 1864, May 31, 1864, as relates to the sentence of Captain Henry Warren, 7th Maine infantry, to be dismissed the service, and the order for its suspension, is having appeared that he did, previous to the action of the President, resign his commission and receive an honorable discharge from the army from arrest for the purpose of leaving his company in battle, and that he was killed while temporarily absent from Petersburg, Sixth Corps.

REINSTATED.

First Lieutenant and Adjutant Roswell Weston, 1st regiment U. S. Sharpshooters, dismissed the service by order of the President, is honorably reinstated and recommissioned in the same regiment. Lieutenant Weston was dismissed for alleged disobedience of orders in refusing Holt, who in his review of the proceedings of the court-martial which tried Lieutenant Weston for disobedience of orders in Special Orders in the testimony, and that Lieutenant Weston has always maintained a high character as a gallant, industrious, faithful and efficient in the performance of his duties.

NAVY GAZETTE.

The interruption of mail communication with Washington, prevents us from giving, this week, our usual gazette of Naval Orders. We shall, undoubtedly, be able to resume them next week.

APPOINTMENTS IN THE REVENUE SERVICE.

TO BE CAPTAINS.

William G. Pease, Benjamin F. Kellam,
James D. Dove, James H. Merryman,
Richard J. Mascall, Joseph Amazeen,
John W. Young, Jr., Thomas Hall,
Alonzo A. Teague, Timothy Treadway,
Charles M. Scammon.

TO BE FIRST LIEUTENANTS.

Daniel D. Tompkins, Theodore N. Spooner,
Samuel C. Comstock, Daniel S. Wright,
John S. Hall, Edward A. Freeman,
James M. Selden, John G. Hall,
Daniel B. Rodgers, Henry D. Reid,
Isaac Rue, Morton Phillips,
John A. Hardgrove, Henry J. Reason,
David Jones.

TO BE SECOND LIEUTENANTS.

William H. Hawley, Thomas W. Lay,
William C. Pigott, William C. De Hart,
Joseph Bryan, Joseph Hall,
Edward C. Gardner, Wentworth S. Simmons.

TO BE THIRD LIEUTENANTS.

Henry F. Hamlin,
James H. Wyke,
F. W. Sewall,
Charles H. Dixon,
Theodore W. Hooper,
Samuel S. Wright,
Edward A. Freeman,
John G. Hall,
Henry D. Reid,
Morton Phillips,
Henry J. Reason,
David Jones.

TO BE SECOND ENGINEERS.

A. M. Cummings, Walter Scott,
Thomas Hall, J. R. Coppy,
A. D. Douglass, Frank Pulsifer,
Thomas Hall, Jr., Thomas Simmons,
J. J. Roberts, James Coy,
Henry Smith, Joseph Valiete.

THE CASE OF THE CHENANGO.

NAVY DEPARTMENT, June 27, 1864.

General Order No. 23.

The court-martial recently assembled in New York to inquire into the causes of the destruction of bunnen life on board the United States steamer Chenango, and the conduct of the officers on a trying occasion, having come to a conclusion,

The court, interrogated Jones, forming a majority, impannelled by Henry C. Harris, Esq., one of the coroners of Kings county, State of New York, and after the introduction of evidence on the part of the United States, Acting Third Assistant Engineer; Albert Murphy, Second Assistant Engineer; Charles Hall, First Assistant Engineer; Albert Murphy, Second Assistant Engineer; Thomas Hall, Acting Third Assistant Engineer; Franklin Silver, John Ryan, Wm. H. Kennedy, Joseph Lyons, Charles Hall, Jr., Benjamin Hall, Stephen Hall, Wm. H. Hall, Charles Hall, Jr., Benjamin

ballor was not connected in conformity with the drawings and specifications, and that there "was great fault in the staying."

There is, therefore, no evidence before the Board of officers in this case, nor can there be in any, where defective work, or work not in conformity with the drawings and specifications, is to be reported to the proper officer or to this Department.

The disinterestedness of such negligence of duty, as shown in the case of the *Chenango*—the possible consequences, in a national point of view, of such culpable defective or unreliable vessels to be produced by fraud or negligence in the naval service—will render it unnecessary upon the Department to comment upon the utmost rigor of the law any neglect of duty or faithlessness on the part of other inspecting officers or builders.

GIDEON WELLES,
Secretary of the Navy.

MEDICAL DEPARTMENT.

ASSIGNMENTS.

Surgeon A. M. Clark, U. S. V., as surgeon-in-chief, 3d Division, 18th Army Corps.

Hospital Steward Thomas Palmer, A. T. Poole and E. S. Mc-Donald, U. S. A., on duty at Camp Parapet, La., as attendants.

Assistant Surgeon Charles Carroll, U. S. V., to the Hospital of the 8th Army Corps, City Point, Va.

Acting Assistant Surgeon H. Wells, U. S. A., as Surgeon in charge, Jos Holt Hospital, Jeffersonville, Indiana.

Surgeon A. McParlin, U. S. V., as Surgeon in charge, General Hospital, Carrollton, Ky.

Assistant Surgeon Theodore Lyle, U. S. V., to 1st Division, General Hospital, Alexandria, Va.

Surgeon A. G. Hendrick, U. S. V., to Hospital Transport Thomas Morgan.

Surgeon A. M. Wilder, O. S. V., as Medical Inspector, Army of the Ohio.

Assistant Surgeon A. S. Chapin, U. S. V., to the Hospital, 10th Army Corps.

Surgeon Charles O'Leary, U. S. V., to inspect the operations of the different Boards of Enrollment in Pennsylvania.

RESIGNATIONS.

Medical Storekeeper Robert T. Crossen, U. S. Army, is hereby relieved from duty, as Acting Medical Purveyor, at St Louis, Missouri, and will report to Surgeon J. J. Woodward, U. S. Army, Medical Purveyor, U. S. Army, Chief Medical Purveyor of the West, at Louisville, Ky., for assignment to duty. Medical Storekeeper Crossen's resignation of the Missouri, will designate a competent medical officer to act as Medical Purveyor in his stead, pending the action of Medical Storekeeper R. T. Crossen

VARIOUS NAVAL MATTERS.

SCREW steamer *Wyoming*, 7, sailed from Table Bay, Cape of Good Hope, May 17, for New York.

THE U. S. gunboat *Bienville*, with the monitor *Manhattan* in tow, was spoken on the 4th inst., 35 miles west of Sand Key.

THE U. S. gunboat *Ida*, cruising, was spoken on the 8th inst., Cape Hatteras bearing W. N. W., 15 miles distant.

LIEUT.-COL TRACEY, jr, left Philadelphia for Washington on the afternoon of the 11th. She draws only seven feet of water.

SCREW steamer *Penobscot*, sailed from Portland, Me., on Saturday night, in search of the pirate *Florida*.

FRIGATE *Sabine*, 52, went into commission at the Charleston Yard on Saturday, and is at anchor in the stream. She was to sail this week.

THE British pilot steamer *Rosen* arrived Ft New York on the 6th, having been captured on the 21 inst. by the *Keystone State*. She was from Bremen, bound to Liverpool, with 1,000 tons cargo of wheat, &c, &c.

CAPTAIN Eugene Slimmer has been ordered to report to Admiral Gregory for such duty as that gentleman may see fit to assign him to. The Admiral has already given him a position in connection with his department.

THE ships of the Naval Academy are cruising along the coast of Long Island. Persons desirous of failing in with any of them can do so by going to Greenport, or can communicate by addressing letters to that place.

THE U. S. steamer *Circassian*, which arrived at Boston on the 11th, left Pensacola about the 3d instant, and is without any special news. She brings none of the Rebel officers recently captured in the case of T. W. Bogden and two others of the gunboat *Wave*, captured by the rebels at Calabaza Pass.

A CORRESPONDENT of the *Independence Bulletin* says that two days after the defeat of the *Alabama*, an iron-plated vessel built by M. ARMAN, at Bordeaux, left that port with the view, it is supposed, of succeeding to the command, and of revenging the naval disaster which has befallen the South.

THE Secretary of the Navy was empowered, by law of the late session, as follows: "That the Secretary of the Navy may appoint, for the classes, and, in the judgment of the head of the department, any one or more articles appear to be bid for at excessive and unreasonable prices, excessive in that case where the fair market value, he shall be authorized to reject each bid.

LETTERS have been received from the *Jamestown*, dated at Mazos, Cuba, April 26. Officers and crew were enjoying good health. The first and only death occurred on the passage, having left the United States up to the date of the letters, was that of Frederick Sipes, of Philadelphia, a boy, who died from consumption, and was buried at Curracoa Island. He was seized with Asiatic cholera, on the morning of the 26th of March, and died the same evening.

ADVICES from Bermuda state that the *Black Hawk*, a new steamer of 1,200 tons, built at Wilmington, Del., by Jackson & Sharp, from London. Her chief engineer, who had declined going in her to Wilmington, states that she was going for a cruiser, and was to be armed and manned. On account of her great draft of water she can carry no inward cargo. She is destined for the same trade as the *Florida*.

ONE of the best and most costly improvements that have been made in the Brooklyn Navy Yard for some time is the construction of a new foundry building, now rapidly reaching completion. It is a fine and imposing edifice, two stories in height, 100 feet wide, and 350 feet in length. The cost, when completed, will be $75,000. It is to be completed and in use by the first of October next.

THE old frigate *Susquehanna*, having remained for years idle, is being fitted out for service at the New York Navy Yard. She will ready for sea in a few months. She is a first rate, notwithstanding the lightness of our navy in size and numbers. Her tonnage is 2,600, and she will carry on her next cruise sixteen guns of heavy calibre. The *Susquehanna* assisted in laying the telegraph cable in 1858, and was subsequently under command of the revered Hoffins.

THE prize steamer *Rosen* arrived was sold at auction on Saturday at Clifton Wharf, East Boston. She is a three-masted schooner rigged, iron propeller, length 201 feet, breadth of beam 26 feet 6 in., and 171 tons English measurement. She was sold to William P. Weld for $9,000.

Her cargo of cotton, tobacco and spirits of turpentine was sold at auction a few days ago for $50,000, and the total amount of money realized by the capture of the *Greyhound* will be upwards of $250,000.

ACTING Rear-Admiral S. P. Lee, of the North Atlantic Blockading Squadron, under date of the 1st inst., writes to the Navy Department as follows:—"Since July 24, 1863, forty-two steamers have been captured or destroyed by the blockaders of this squadron. Taking the average tonnage of these vessels at three hundred tons, and assuming the capacity of an army wagon at one ton, there has been a loss inflicted on the rebel supply system equivalent to the capture or destruction of a train of twelve thousand six hundred wagons."

THE U. S. Storeship *Currier*, Acting Master S. C. Gray commanding, sailed from Boston for New Orleans on the 27th May inst, with paymasters' stores. On the morning of the 14th June before flight she observed Liverpool Light Vessel, off the Mersey, and passed it distinctly bibed. The steer wore safely landed on the Key, where they remained for ten days, when they were taken off by the schooner *Sweet J. Keen*, of Boston, and conveyed to this port, where they arrived on Sunday, July 3. The ship is a total loss. The guns were thrown overboard, portions of the cargo was saved by the wreckers in a damaged condition.

BARK-wheel steamer *Mohongo* was launched on Saturday at Jersey City, with complete success. She is a double-ender, and clad with heavy thickness of iron. The following are her dimensions:—Length, 225 feet; breadth, 36 feet; depth, 14 feet. She will have an inclined engine of Baker on diameter of cylinder, and 6 feet 7 inches stroke. Her paddles will be of wrought iron, 30 feet 6 inches in diameter, with buckets 8 feet in length and 16 inches in diameter. She will be provided with two mills each, one of which is superheated—the latter to insure a supply of "dry steam." The *Mohongo* will have four ports on each side for carriage guns, and two "large ports," one on each side, for pivot guns, making in all eight guns. A part of the machinery is already on board, and no time will be lost in putting to the remainder.

THE *Tempo*, as reported by the Paris *Temps*, that Captain Sommes is in Paris, but it is said that he has sent for most of his officers to give them instructions for the armament of new *Alabama*, of which he is to take the command. The *Temps*, which seems to have received special information about this new ship, says that she is a small, beautifully formed corvette, iron-plated inside, and provided with powerful engines. Captain Sommes has ordered three pivot guns capable of throwing hollow projectiles of 170, and solid projectiles of 220 English pounds. Her crew, which in the old *Alabama* consisted of 120, is to be augmented to 172. The *France* says that "these details are positive." It does not know in what part the new ship will be armed, but it believes that no surveillance can prevent her getting to sea.

THE Boston *Advertiser* says:—There are in the naval service stayfour paymasters, thirty assistant paymasters, and about three hundred and fifty acting assistant paymasters. A bill passed the Department to employ the officers of the first class as fleet paymasters at Navy Yards and on board ships of the first and second rates. The assistant paymasters are to be employed as those of the third rate, while the acting assistants are mostly on board fourth rates. The exigencies of the service, however, require deviations from these rules. The old rule was that after a period of examination of 20 years, but a late act allows such acting assistants as have performed their duties in an efficient manner, and who have been examined and passed before the board of paymasters and engineers, to receive, upon the recommendation of the President, a commission as a regular assistant in the Navy, with the rank of lieutenant, after 2d, "provided he be not over 36 years of age." Several appointments in the regular service have recently been made in this manner, and there are still a few vacancies.

SCREW-steamer Ossawa, 8, has arrived at Pensacola for repairs, after a cruise of nearly eight months, during which time she has been off the principal ports of the enemy, frequently offered for the officers and men to step foot on terra firma except those who took charge of the prizes she captured. She is now undergoing such repairs as can be made at Pensacola, and will then proceed eventually, each ship as she can obtain at one of the Northern ports. The following is a list of the officers of the Ossawa:—Lieutenant-Commander E. W. Henry; Lieutenant-Commander Wm. Gibbons; Acting Volunteer Lieutenant W. E. Coleman; Acting Masters T. S. Sears (Executive Officer); T. D. Babb; Acting Ensigns T. H. Baker, W. L. Titcomb, A. P. Hall, C. Hamilton, and W. H. Cushing; Acting Third Assistants T. B. Curtes and James Eccles; Acting Master's Mate R. H. Eldridge. The following vessels are also at Pensacola for coal and repairs, viz: *Brooklyn*, *Richmond*, *Hartford*, *Richmond*, *Iroquois*, *Modern Sanking*; *Sachusetts*, Captain Marchand; *Celtes*, Lieutenant-Commander Wyman; *Kanawha*, Lieutenant-Commander Jouet; *Conamus*, Lieutenant-Commander DeWitt; *Kennebec*, Lieutenant-Commander McCann. The health of the squadron is remarkably good.

THE Brooklyn Navy Yard has presented a rather more lively appearance this week, as far as the movements of men, naval stores and vessels are concerned, than for some time past. The steamer *Iroquois* is now undergoing repairs at the Navy Yard, and is to be ready for service in a few days. The *Tahoma*, recently returned for repairs, sailed on the 11th for Washington. The supply steamer *Relief* arrived on the same day from Key West with 600 rebel prisoners on board, sailed on the afternoon of the same day with a draft of 400 men for Baltimore. The *Iroquois* left the dock on the 12th, and is now undergoing repairs at the Navy Yard, to the privateer *Florida*. The *Iosco* arrived July 5, and is now undergoing repairs at the foot of Delancy street. The *Gemsbok* arrived on the 12th. The following is a list of vessels now in the Navy Yard:—Two large steam-frigates in process of building, the *Madawaska* and *Kalamazoo*; the monitor iron-clad *Wompanoag*, in charge of Chief Engineer Isherwood; the iron-clad steamer *Tuscumbia*, steamer *Susquehanna*, *Tallapoosa*, *Massaco*, *Pontoosuc*, *Penobscot*, *Alabama*, *Iosco*, *Gemsbok*, *Sangamon*, *Canonicus*, *Seneca*, recently brought from the foot of 7th street, where she has been undergoing repairs. Other vessels belonging to the U. S. Navy are, preparing in the vicinity. The *Chenango* at the Morgan Iron Works, 9th street; the *Kensington* at the Fulton Iron Works; the *Vixen* and *Shawnee* at the Atlantic Dock; *Tallahoma* at 23d street; *Fanderbilt* at foot of Jackson street; *Winnecka*, *Peoria* and *Iosco* at the foot of Delancy street; the *Neptune* at 16th street.

THERE is an unusual accident, the manuscript of a report of the Brooklyn Navy Yard which was published a month since, passed a second time into the hands of our printers, and was inserted in a portion of the edition for the 4th of July. The only account for the singular circumstances discovered in the second of movements at the Brooklyn Navy Yard, which appeared under the head in a portion of our edition for July 9th.

PRISONERS IN LIBBY.

ASSISTANT Surgeon FRANCIS W. POND, 57th N. Y. V., sends a list of prisoners captured near Petersburgh, Va., June 29, and sent to Libby Prison:

Colonel John Fraser, 114th Pennsylvania.
Lieutenant-Colonel H. R. Stonghton, 2d U. S. Sharpshooters.
Major Thomas J. Hyde, 11th New Jersey.
Major Charles M. Lynch, 48th Pennsylvania.
Major M. Dunn, 39th Massachusetts.
Captain J. G. Derrickson, 69th New York, (on General Barlow's staff.)
Lieutenant R. S. Ludwig, 53d Pennsylvania.
Lieutenant J. S. Bell, 1st Mass. Heavy Artillery.
Lieutenant A. W. Morse, 1st Mass. Heavy Artillery.
Lieutenant John Wilson, 1st Mass. Heavy Artillery.
Lieutenant Joseph Hall, 1st Mass. Heavy Artillery.
Captain M. W. Wall, 6th New York.
Lieutenant A. Hayes, 2d Pennsylvania, 2d N. Y. Heavy Artillery.
Captain S. Dexter Lodden, 8th N. Y. Heavy Artillery.
Lieutenant Charles Hall, 2d Delaware.
Captain McHugh, 69th Pennsylvania.
Lieutenant M. Cunningham, 63d New York.
Lieutenant Charles A. Price, 53 Michigan.
Lieutenant Charles Hamilton, 11th New Jersey.
Lieutenant J. A. Standifort, 63d New York.
Lieutenant James Cleary, 5th New York.
Lieutenant J. G. B. Adams, 19th Massachusetts.
Captain L. A. Dudley, 19th Massachusetts.
Lieutenant Eli P. Alexander, 20th Michigan.
Lieutenant Charles H. Shipley, 53d New York.
Lieutenant H. M. Hamilton, 6th New York.
Lieutenant Frank Gibbons, 6th New York.
Lieutenant Frank Osborne, 19th Massachusetts.
Captain Wm. Hamilton, 102d Pennsylvania.
Lieutenant H. C. Underwood, 19th Massachusetts.
Adjutant William M. Lamb, 2d Delaware.
Lieutenant Wm. Hamilton, 2d Delaware.
Lieutenant William J. McGinnis, 19th Massachusetts.
Captain R. S. Rice, 19th New York.
Lieutenant Thomas J. Hastings, 19th Massachusetts.
Captain Henry Wm. Hall, 19th Massachusetts.
Lieutenant W. J. Colton, 11th Massachusetts.
Lieutenant Benjamin D. Miller, 11th Massachusetts.
Captain S. P. Murray, 2d U. S. Sharpshooters.
Captain J. W. Cully, 2d U. S. Artillery.
Lieutenant C. S. Stallman, 6th Pennsylvania.
Lieutenant J. A. Wharton, 2d N. Y. Heavy Artillery.
Lieutenant W. H. Cauney, 69th New York.
Lieutenant Edward Hughes, 69th New York.
Captain H. B. Huff, 184th Pennsylvania.
Lieutenant J. H. Byrne, 184th Pennsylvania.
Captain John McKeage, 184th Pennsylvania.
Captain D. A. Sullivan, 184th Pennsylvania.
Lieutenant M. H. Shuster, 184th Pennsylvania.
Captain R. S. Rogers, 184th Pennsylvania.
Lieutenant Oscar Hudson, 184th Pennsylvania.
Captain Wm. Wilson, 184th Pennsylvania.
Lieutenant Wm. Bell, 184th Pennsylvania.
Lieutenant W. H. Brady, 9th Delaware.
Lieutenant Samuel Jones, 9th New York.
Lieutenant N. K. Riley, 20th New York.
Lieutenant Joseph Hughes, 20th New York.
Lieutenant Andrew Lee, 1st Mass. Heavy Artillery.
Lieutenant Andrew Lee, 1st Mass. Heavy Artillery.
Captain E. Gilbert, 53d New York.
Lieutenant L. A. Campbell, 53d New York.
Captain L. Bell, 53d New York.
Lieutenant Charles Corbett, 19th Pennsylvania.
Captain G. A. Regan, 184th Pennsylvania.
Captain L. D. C. Tyler, 203d Pennsylvania.
Lieutenant W. H. Grove, 53d Pennsylvania.
Captain W. B. Farr, 203d Pennsylvania.
Lieutenant A. Hall, 203d Pennsylvania.
Lieutenant A. V. Miller, 184th Pennsylvania, wounded and prisoner of war.
Captain R. H. Davis, 66th New York, leg fractured by bullet, prisoner of war.
Lieutenant McCluy, 7th New York Artillery, wounded badly in four places, in the leg, prisoner of war.

The following officers of the 164th New York are wounded and in hospital at Libby, viz.:

Captain Beatty, Captain Monahan, Lieutenant Burns, and Lieutenant Boyle.

The following officers have died recently in Libby Prison Hospital, viz.:

Captain McCarty, 170th New York.
Captain Lyle, 164th New York.
Lieutenant Campbell, 8th New York Heavy Artillery.

BY THE PRESIDENT OF THE UNITED STATES.

A PROCLAMATION.

WHEREAS, the Senate and House of Representatives, at their last session, passed a joint resolution, which was approved on the second day of July instant, and which was in the words following, to wit:

"That the President of the United States be requested to appoint a day for humiliation, fasting and prayer, and that he request all the ministers of the Gospel in their assemblies on that day to implore the Almighty to repent of their sinful ways; to implore the compassion and forgiveness of the Father of Mercies for our national sins; that the effusion of blood may be speedily suppressed, and the supremacy of the Constitution and the laws of the United States be established throughout all the States; that the hearts of the people may be softened and made tender, so that no more appeals to arms may be necessary to secure the liberty or conscience of other nations, or by the sacrifice of our own to secure the liberty of the people of the United States; that the Almighty may be pleased to remove from our country the scourge of war, and to restore to the nation the blessings of peace; and to implore Him to enlighten the mind of the nation to know and do His will, to turn the counsels of our enemies to confusion, and to bring them to unconditional submission to the national authority; and to implore Him to grant to our armed defenders and the means of their support His powerful protection and early deliverance from danger; to succor that result; to inspire Him in His infinite goodness to relieve the heavy hearts of the widows and orphans, and mourners, and to heal the wounded and afflicted soldiers and sailors of the United States, that they may be quickly restored, that he efforts of blood may be stayed, and that order, peace, harmony and concord may be established throughout all our borders."

NOW, THEREFORE, I, ABRAHAM LINCOLN, President of the United States, cordially concurring with the Congress of the United States in the propriety of the penitential humiliation and prayer of the aforesaid resolution, and heartily approving of the devotional design and purpose thereof, do appoint the first day of September next as a day to be observed by the people of the United States as a day of National Humiliation and Prayer.

I do hereby further invite and request the heads of the executive departments of the Government, and all other civil officers, all judges and magistrates, and all other persons exercising authority in the United States, all ministers of the Gospel, and all other persons who may be disposed to unite in the devout observance of the day, and all soldiers and marines in the naval and military service of the United States, to assemble in their accustomed places of worship on that day, and thereby to render to the Almighty and Merciful Ruler of the Universe such homages and such confessions, and to offer to Him such supplications as the Congress of the United States have, in their aforesaid resolution, so solemnly, so reverently, and so reverently recommended.

In testimony whereof, I have hereunto set my hand and caused the seal of the United States to be affixed.

Done at the City of Washington this seventh day of July, in the [L. S.] year of our Lord one thousand eight hundred and sixty-four, and of the Independence of the United States the eighty-eighth.

ABRAHAM LINCOLN.

By the President:
WILLIAM H. SEWARD, Secretary of State.

(BUSINESS NOTICE.)

A CARD.—Owing to the enormous advance in the prices not only of the precious metals, but of every other commodity, I find it impossible to continue longer the sale of my PENS at old rates. This I regret exceedingly, as I had hoped to continue without change; but, having to buy gold at the present fabulous prices, this is no longer possible.

My friends and the public will give me credit, however, for having struggled long and hard against this universal pressure to depreciate the Government credit and currency. The advance now made is not enough to cover me, with the old rates of profit, should it remain where it is, or go still higher, a further rise in prices must be made. In any case, however, I shall, as heretofore, be sold at a better article for less money than it can be bought for elsewhere.

A circular, with engravings of all the sizes, styles, and present prices will be sent on receipt of letter postage. Address

A. MORTON,
No. 25 Maiden Lane, New York.

July 11, 1864.

THE NATIONAL MILITARY JOURNAL.
THE UNITED STATES
ARMY AND NAVY JOURNAL
AND
GAZETTE OF THE REGULAR AND VOLUNTEER FORCES

Officers of the Army and Navy will find in the JOURNAL the only paper in the United States exclusively devoted to Military and Naval affairs; and the only one in their interest which has ever received sufficient encouragement to induce in the country to enable it to meet its want so long felt, of an organ which should adequately represent them in the Press. Starting under the most favorable auspices, and with the co-operation and support of the best professional talent in the country, receiving politics and partisanship of all kinds, and devoting itself with singleness of purpose to the important interests of military questions, and to the dissemination of correct information, it has, in less than six months, established a position as the authoritative organ of military discussion and criticism in the United States. The regular Army and Navy subscription list is principally of the JOURNAL. It obtains the utmost pleasure in add my contribution to the number.

From Major-General W. H. French.

"To say that I like the ARMY AND NAVY JOURNAL is to express with what should be a surprising degree of moderation my appreciation of its merits."

From Major-General Orlando Bolivar.

"The ARMY JOURNAL meets with great favor in the army. I constantly receive letters from officers in the field speaking in the highest terms of it. Its success is deserved. I see the young subscription."

From Commodore J. C. Long, U.S.N.

"Your JOURNAL is the only paper I have seen that only paper I could find that never been published that sensible to the service."

From Major-General O. B. Thomas.

"It will obtain a wide circulation among the commissioned ARMY AND NAVY JOURNAL to officers in my portion of the Army. I have received numerous letters from officers speaking in the highest terms of the JOURNAL. . . . Its very superior articles on military and naval subjects, its correct views on science, its fearless and independent criticisms, and high-toned principles—are all that could be desired. The form, paper, and typography unobjectionable. I can cordially recommend it to all your journals in sympathy with both officers and men in the service."

From Rear-Admiral Charles Stewart.

The ARMY AND NAVY JOURNAL is an honor itself and to the service, to the nation and civilization. It is destined to enhance the appreciation of some of our most distinguished army and navy officers, and to illustrate the high character of many of the character and standing of those who lead the military and naval forces of the country. It is a work of great value to the country, and I hope it will be sustained by all those officers and our more intelligent private soldiers also, to whom it is especially dear. I hope that the ARMY JOURNAL will in all military matters, will lead the discussions of the British and Continental Services.

From the Boston Post.

The NEW ARMY AND NAVY JOURNAL has proved a success from the start. Handsomely printed, full of variety, well edited, and ably conducted, it has already won a place and secured in its special line of journalism. In a comparatively short time it has become the recognized organ of the army and navy, and has attained a circulation among officers of all ranks and degrees of prosperity equal in its great degree. Among the subscribers of many of our leading officers of the highest repute—men whose names at the bottom of official documents have given them a world-wide celebrity. The same press are prompt to aid the more establishment of a journal so much needed in this country.

Patriots Of A Daily Press.

"It is rare now-a-days to find a paper with attributes of merit and resources so well combined in the daily papers that it is a pleasure to find one that is worthy of commendation. The ARMY AND NAVY JOURNAL, which has just entered upon its first year, is a publication of this character, and from its conduct this country may well be proud."

From the Albany Argus (Democratic).

"We can honestly and heartily recommend it to all who desire a reliable journal, devoted to the interests of our army in full and accurate, and its editorial discussions intelligent and temperate. We hope the ability and purity of its columns will secure for it the large patronage it deserves."

From the Chicago Tribune.

"The best authority in military matters."—Sew Haven Palladium.

"There is nothing partisan or political about it, and its articles are written with ability and candor. It is a valuable military work."—Philadelphia Journal.

"The JOURNAL is conducted with the ability, shrewd criticisms of military achievements and movements, and an intimate knowledge of the requirements of the service."—Cincinnati Western Christian Advocate.

"The ARMY AND NAVY JOURNAL is a very able journal, and is ably conducted."—Chicago Tribune.

TERMS.

The terms of the paper are FIVE DOLLARS A YEAR, PAYABLE IN ADVANCE; THREE DOLLARS FOR SIX MONTHS. SINGLE COPIES TEN CENTS. For sale by all newsdealers. It is published weekly in a large sized quarto sheet of 16 pages, handsomely printed, and will be mailed to any subscriber on the following terms:

PROPOSALS FOR TIMBER AND MATERIALS FOR THE NAVY.

NAVY DEPARTMENT,
BUREAU OF CONSTRUCTION AND REPAIR,
June 30, 1864.

Sealed proposals to furnish Timber and Materials for the Navy, for the fiscal year ending June 30, 1865, will be received at the Bureau of Construction and Repair, until 12 o'clock of the 1st day of August next, at which time they will be opened in presence of bidders.

Proposals must be endorsed "Proposals for Timber and Materials for the Navy," that they may be distinguished from other business letters, and directed to the Chief of the Bureau of Construction and Repair.

The materials and articles embraced in the classes will be very minutely described in the schedules annexed, any of which will be furnished to such as may so apply, on application at the Navy Agencies in the respective yards or to the Navy Agent nearest them, and those of all the Yards will be furnished by the Bureau.

Each division into classes being for the convenience of bidders in such, each classes only will be furnished, or can actually supply, will be. The Commandants of the Navy Agent for each station will, in addition to the schedule of classes for their yards, furnish a copy of the schedules of the other Yards for examination only, from which such bidders as may desire will be desirable to make application for any of the classes of those Yards. All the articles required in each classes will be given in strictly of American manufacture.

Offers must be made for the whole of the class advertised, each one of the printed schedules must be strict conformity therewith, or they will not be considered.

Upon application to the Navy Agent, commandant of the yard, or to any Navy Agent, the form of a contract, giving a full knowledge of all conditions governing the proposals, will be furnished.

The contract will be awarded to the lowest bidder on the given proper guaranties, as required by the law of August 31d, 1852, which guaranties are reserved the right to reject the lowest bid, or any which may be deemed unreasonable.

The contracts will bear date the day the notification of the same and offerers can be obtained from the Bureau.

Sureties in the full amount will be required to sign the contract, and their responsibility certified to by a United States district judge, United States district attorney, collector, or Navy Agent. As additional security, twenty per centum will be withheld from payments until the whole of the articles contracted for shall be completed; and eighty per centum of each bill, approved by the Navy Agent at the station where the respective yards, will be paid by the Navy Agents at their stations, after the receipt of the certificate of the inspection of the Government, within ten days after the receipt of the same at the Navy Department from the Secretary of the Treasury.

The following are the classes required at the respective Navy Yards:

BOSTON.

AMERICAN METALLIC COLLARS

METALLIC COLLARS.
METALLIC COLLARS.
METALLIC COLLARS

The only Collars made in metal furnishing a substitute for them are manufactured by the American Enameled Metallic Collar Company.

In whiteness, lightness, durability, pliability and freedom of finish, nothing approaches them.

Instantly cleaned with a cloth and water, they become as indispensable necessity to the traveller and economist, and are continually meeting the approval of military and naval gentlemen. Sample sent by trade solicited.

Any size Collar sent by mail, prepaid, upon receiving, with measure of neck, one dollar for a "Turn Over," or seventy-five cents for a "Shorty."

GENERAL BUTTERFIELD'S CAMP AND OUTPOST DUTY. Camp and Outpost Duty for Infantry, Standing Orders, Extracts from the Revised Regulations for the Army, Rules for Health, Marches for Soldiers, and Duties of Officers. By Daniel Butterfield, Major-Gen. Vols., U.S.A.

An invaluable pocket companion for every officer and soldier.

It is in compact, portable shape, easily carried in the pocket.

It has been highly recommended by Major-Generals McClellan, Sherman, Hooker, Rosecrans, Hunter, Kearney, Meikles, Banks, Whipple, Brigadier-Generals Casey, Robinson, Ward, A. B. Meredith, and West Point Military Academy, and many other distinguished officers; and has been approved and ordered by the War Department. It gives valuable information for Dudes of Officers of the line and staff, for non-commissioned officers, and for the heads of soldiers. No officer or soldier should be without it.

Forwarded by mail to any address, post-paid, on receipt of 60 cents in currency.

To clubs of regimental Officers or Soldiers, Sutlers, &c.

NATHAN RANDALL, President.
SILAS C. H. SMITH, Secretary.

NEW MUSIC. — "THE DYING DRUMMER," one of the sweetest songs ever composed.

ONCE—Have you come to see your darling
Who upon the battle field,
Far from home so sad and lonely,
Gave his young life for his country?

"The Band Never Stops," "Mother, I'm very tired," "Mother, I'm coming home," by sending a little girl to the hand of her dead brother, and took her to her mother's side, "Mother I have kept it, I never struck me, mother!"

"Mother, I'm coming home" the pen of the popular composer, Mr. Carlton, has written no ordinary song. Price 30 cents. Mailed free. HORACE WATERS, Publisher, No. 333 Broadway, New York.

DIARRHŒA, DYSENTERY, CHOLERA, CHOLERA INFANTUM, &c.—Certain and immediate CURE. HEGEMAN'S CORDIAL CHOLERA MIXTURE, prepared by actual experience since the Cholera season of 1832. A single dose will relieve in nearly all cases. Sold by druggists throughout the country.

THE CAMPAIGN IN VIRGINIA.

THE great Maryland raid is over, and the raiders out of the State; but the papers in the Central States are still full of narratives and telegrams of its details. Many corrections and amplifications of the original conflicting accounts have since been given. But perhaps it will not be best to review the humiliating story. The speculations about the numbers of the enemy and their various commanders, still cause hot discussion, the estimates, however, being now somewhat more assimilated, and being included between 8,000 and 40,000. Formerly the extremes were a "small gang of horse-thieves" and 125,000 men, and the commander was sometimes said to be General LEE, sometimes HARRY GILMORE. The deficiency is our cavalry probably caused some of the lack of information. It is consoling to know that Richmond has had as absurd stories afloat as we, repeating our *canards* of the capture of Baltimore and Washington.

Before the battle of Monocacy, the enemy had had free course to gather up large stores of forage, grains, bacon, horses, cattle, hogs, groceries, clothing, shoes, and supplies of many sorts, including many forced contributions of money, of which the $200,000 extorted from the town of Frederick was the chief. The affair at Monocacy was the first and only persistent attempt to oppose the raid, and that proving a bad defeat, it settled the question that the raiders might go on to the environs of the capital. They did so almost unmolested. But at length the spectacle of so long a raid through so many miles of our lines, and to the very gates of Washington, while we had been claiming to enclose the enemy as by an anaconda coil,—undertaken, too, by a force whose size had never been thoroughly tested and found out—aroused our men. That sharp attack from FORT STEVENS was attempted, which at once ended the raid. The Rebels made their way back to Virginia in quiet, in the region of Edward's Ferry and farther up the Potomac, carrying their booty with them. Our people began to repair their broken railroads again, and on the 19th of July, the first trains passed over the Northern Central and the Philadelphia and Baltimore. The Baltimore and Ohio will be equally repaired in less than a week. A great many conflicting telegrams, including four in one day each flatly contradicting the other, came from Philadelphia, regarding the *status* of the Gunpowder Bridge, after the Rebels assailed it. It was finally settled that the bridge was partially burned, and stated in our record. The raiders have pursued their homeward journey with the leisure which characterized their advance. But a report has come that last Monday General CROOK overtook a party of the enemy at Snicker's Gap, which lies south of Harper's Ferry and west of Leesburgh, and recaptured some wagons and took some prisoners, after a sharp fight. The wagons were said to be over three hundred in number, laden with grain. It is to be hoped this news will be confirmed.

ON Wednesday, the 20th, General AVERILL met the enemy under EARLY, in front of Winchester, and defeated him, inflicting a loss of over 300 killed and wounded, and capturing four cannon, several hundred small arms, and about 200 prisoners. The enemy's loss in officers was heavy, and included General DILLEY and Colonel BOARD. EARLY's force was reported to be over five thousand, and BRECKINRIDGE, with the remainder was supposed to be at Millwood, having separated from EARLY the preceding night. The captives were sent to Martinsburg.

AT PETERSBURGH.

Another week of quiet is the record of the Army at Petersburgh. The demonstrations of musketry and artillery have been less frequent than before, though by no means entirely suspended. The chief firing has continued to be on the right and right centre, where our lines are still pushed forward, and whence the enemy's town and batteries are persistently and monotonously shelled. The line has not been materially changed, except by the departure of a portion of the Sixth corps from the left to Maryland. On the 7th, about daylight, a party of our men set fire to the wheat shocks on the Turkey Island and Curl's Neck plantations, on the James. The fire rapidly spread beyond the fields, and caused considerable destruction in the neighboring region. The demonstration on Friday, the 8th, has been already recorded. On Sunday, thirteen railroad trains were reported to have passed between Petersburgh and Weldon, which shows that the Weldon road has been fully repaired, since WILSON's raid, and is possessed by the enemy. Trains have run unmolested since. Indeed, it is clear that our forces have been withdrawn from the entrenchments which the Sixth corps threw up so vigorously on their march to Reams' station, to relieve WILSON, and that our lines have been considerably contracted on the left. On Monday, the 11th, there was considerable cannonading in various parts of the line. A Rebel shell entering the tent of Colonel DAVIS, of the Thirty-ninth Massachusetts, in rear of the Fifth corps line, exploded and killed him. A number of other officers and men fell in the evening, and cooled the air. The same day, 50 men of the Tenth Connecticut, and 70 of the Third Pennsylvania Artillery, under Lieutenant CHAMBERS, crossed the James below Dutch Gap, and proceeded to Cox's farm, where they destroyed the signal station, two mills, two barns, a blacksmith shop, and some hay, grain, and agricultural implements, and captured a torpedo, with two hundred pounds of powder belonging to it. At daylight on Tuesday, the entrenched outpost of the enemy was attacked by a charge, the force defending it routed, and fourteen men, including a lieutenant, captured. The enemy's forces was probably equal to our own.

On Tuesday evening, the 12th, some detachments from FITZ LEE's cavalry met a part of GREGG's command near Lee's Mills, fourteen miles southeast of Petersburgh. The affair was insignificant, but we lost about thirty prisoners. Forces had been recently hovering towards Reams' station, but were withdrawn, on finding the enemy alert. During the day the enemy, also, had been manœuvring a little along the Jerusalem road, and at night the Second corps was temporarily massed near the Williams House. But nothing important occurred except the cavalry brush. The rest of the line was unusually quiet. On Wednesday, the same suspicious movements on our left were noticed, but nothing resulted. There was desultory skirmishing and shelling on the right of the line, and, on the James River our transports were fired into from a light battery, moved about for that purpose by the enemy. Our gunboats silenced it. A force of four or five detached squadrons of cavalry, recently dispatched towards Suffolk, returned, without meeting any of the enemy. On Thursday and Friday, the 14th, the enemy's firing on our transports was continued, two or three propellers being slightly damaged thereby. On Saturday, at an early hour, a light battery of Whitworth guns opened from near Harall's Landing on the *Mendota*. The gunboat suffered a loss of sight killed and badly wounded, and was then withdrawn, after a brisk fight. The battery then opened on FOSTER's pontoon bridge, but did not hit it. General FOSTER's headquarters were shelled. Later, Generals GRANT and BUTLER made an inspecting tour in a small gunboat, and became exposed for a short time to the fire of the battery. This battery continued to blockade the river all day, and became engaged with our gunboats. The same day, Captain FITCH landed with about thirty men, near Malvern Hill, and had a skirmish with some of the enemy's scouts. The next morning he again landed, and discovered and captured twelve torpedoes. On Monday and Tuesday, the mortar and cannon practice continued in about the ordinary manner. In spite of the heat, rendered more severe by the unparalleled drouth, work on the entrenchments went on.

SHERMAN'S OPERATIONS.

WE have official advices this week that General SHERMAN has crossed the Chattahoochee, and that the inhabitants of Atlanta are coming to the conclusion that JOHNSTON has carried the "drawing on" business beyond the point which they consider prudent. The enemy succeeded in carrying their trains with them in their retreat from Kenesaw Mountain and Marietta, and we have no captures to record in the way of munitions and supplies. Many prisoners are reported to be taken—straggling, most of them, no doubt.

Our forces occupied Marietta early on the morning of July 30, the enemy having withdrawn from Kenesaw Mountain during the previous night, uncovering the city to our advance. The defences about Marietta were discovered to be too strong for assault, but the flanking movement by the Twenty-second corps on the left, gave them to us without further bloodshed. In the pursuit of the enemy, HOWARD's corps, the Fourth, advanced along the railroad, the Fourteenth corps, PALMER's, to the right, on a road parallel to the railroad. Still further to the right beyond PALMER, HOOKER's corps pushed on to within three miles of the river. After some reconnoitering, the main body of JOHNSTON's army was found to have crossed the Chattahoochee, HARDEE's corps remaining on the north side at the railroad, to dispute our advance. HARDEE occupied a strong entrenched position in a bend of the river, called the Peninsula, his left and left centre covered by the unfordable Nickajack Creek. The occupation of this point held our troops in check for a time, and enabled the Rebels to withdraw their *materiel*. Preparations were soon made, however, for flanking them from it.

Holding the position in front of HARDEE, with a force sufficient to ensure concentration there, a portion of the Army was sent further up the river, to effect a crossing and turn the right flank of the enemy. The movement was made so rapidly that the Rebels appear to have been taken by surprise, and but feeble resistance was made by their cavalry. Taking advantage of the position thus acquired, our cavalry

were sent out to operate on the railroad east of Atlanta and beyond Decatur, thus cutting off the retreat of JOHNSTON and the withdrawal of his stores in that direction. The main body of our Army was reported at last advices to be within ten or twelve miles of Atlanta. Now, that he has passed beyond the mountains and in the open country, SHERMAN will be able to manœuvre with more freedom. The Rebels seem to fix their main hope for circumventing him upon interfering with his attenuated line of communications, and there is danger of this, as no fear they have disturbed the passage of trains too much already to enable him to accumulate any amount of stores. It is in this connection that the defeat of FORREST, reported this week, assumes its chief importance. If our cavalry are able to hold the Rebel horsemen in check, and maintain even partial railroad communication with Georgia, the fall of Atlanta is assured.

The War Department are reported to have received dispatches from General SHERMAN on the morning of the 21st, announcing that our lines were assaulted by the enemy on Wednesday, the 20th. Each assault was repulsed with small loss to us, our men fighting behind entrenchments. The loss to the more exposed enemy was heavy. It would thus seem that JOHNSTON had been brought to bay at Atlanta, though he may be only anxious to gain time for another movement South.

MINOR OPERATIONS.

OFF CHARLESTON.

On the night of Friday, the 1st of July, an expedition, comprising all three arms of the service, and under the personal superintendence of Major-General FOSTER, quietly and secretly left Hilton Head in transports, and proceeded to Seabrook's Island, in the North Edisto River, which it reached the next morning. The propeller *Collins* and steamer *Wyoming* were damaged on the breakers in Port Royal Harbor, the former being compelled to put back to the shipyard. On Saturday afternoon, about 5 o'clock, General HATCH landed the commands of General BAXTER and Colonel DAVIS, and marched about six miles to a place called Haulover Cut. A dozen Rebel pickets were seen, and a few shots sent after them. Having halted till Sunday afternoon, General HATCH then crossed the cut to John's Island, and travelled by easy stages to a point a few miles south of Legareville, and there bivouacked on Monday. There was some skirmishing during these advances, in which our loss in killed and wounded was small.

Meanwhile, on Saturday evening, a column, under General BURNEY, moved up the North Edisto in transports, and disembarked at White Point, his landing being covered by the gunboats. According to General FOSTER's plan, BIRNEY was to penetrate the country at once as far as practicable. He marched, however, only about two miles, and then bivouacked. Next morning he started inland again, on the road to Adam's Run, and, after marching about five miles, was fired on by a field battery. There was some little firing between the battery and gunboats, the Rebel troops were soon drawn off and returned to Stono River. On Saturday morning, General SCHEMMELPENNIG crossed from Folly Island to James Island with his command, and advanced, with some skirmishing, towards Rebel battery. Here the enemy opened on him with canister from two brass pieces, and created some confusion. But Lieutenant-Colonel HARTWELL's Fifty-fifth Massachusetts (colored), gallantly charged through our retreating forces, rushed over the parapet, and captured the two cannon with the loss of only four thirty or forty men. The total loss was perhaps not more than sixty or eighty men. Our troops were subsequently withdrawn from the position they had carried.

On Saturday night also a bold attempt was made to seize Fort Johnson, on the northern end of James Island, by crossing Morris Island. The advance, a part of the Fifty-second Pennsylvania, landed, but the boats with the remainder of the troops grounded on the shoals. The advance gallantly dashed at an entrenched one-gun battery, defended by a part of the Second South Carolina Artillery, and took it in a brilliant charge, capturing the Brooke gun, and dispersing the enemy. The gallant Colonel HOYT then pushed his men against Johnson, but, according to the Charleston *Mercury*, was "received with a terrific fire by the light and heavy batteries on the line." Of course our handful of men could do nothing against this fire, and moved to the boats. The enemy, however, succeeded, by pushing out a considerable force, in cutting off Colonel HOYT, five officers, and 132 men, and recapturing their gun. The remainder of our force was withdrawn, the daring assault having failed. On Monday and Tuesday the *Pawnee* and *McDonough*, with the monitors *Lehigh* and *Montauk*, vigorously engaged Battery Pringle from the Stono River, and the shelling of the City and its defences has since been vigorous. On the 9th, the enemy attacked us on John's Island, but suffered a loss, according to his own official report of "over one hundred killed and wounded." At evening, however, our forces were moved again to James and Morris Islands. On the 11th, our forces unsuccessfully assaulted Battery Simpkins. It is clear that a demonstration of importance is making by General FOSTER.

THE WEST AND SOUTHWEST.

On the third of July, General DENNIS moved out from Vicksburgh, with a force of about 3,000 men, towards Jackson. General STOCUM took charge of the expedition at Champion Hills. Jackson was easily occupied on the 5th, after a brief skirmish, the enemy being flanked and driven beyond it. On the evening of the 6th, the troops were withdrawn from the city again. A telegram to the Richmond *Examiner* says: "No private property was destroyed. The object of the expedition was to destroy the railway between Jackson and Canton." On the withdrawal, the enemy attacked our column in front, but were pressed back sufficiently to give our men the road to Vicksburgh. Near Clinton, the next day, our rear was twice vigorously assailed, but the enemy was repulsed by a Chicago battery and the Eleventh Illinois. Our loss during the entire audacious expedition was somethiag over 150. The enemy's loss was about 200; among whom was General GHOLSON, severely wounded. A telegram to Mobile also states that "six captains were killed." Their whole loss was more severe than our own, but the expedition does not appear to have accomplished much. It was conducted with unusual order and soldierly skill, and without any disaster. Another force cooperated from Rodney, Miss., consisting of two negro regiments. This force was checked by a superior body of Rebel cavalry, and after a hard fight on the 5th, and a loss of about 150, returned to its boats, and abandoned the attempt to march on. Several days after, General STOCUM, reorganising his command, again penetrated Mississippi in greater force.

WILSON'S Second brigade of GRIERSON's cavalry has been skirmishing continually with RODDY's cavalry, between La Grange and Corinth. RODDY's headquarters were reported at Corinth, FORREST's at Tupelo, S. D. LEE's at Okolona, and BEFORD's at Ripley. On Saturday the 2d, there was a skirmish near Sansbury, and our picket line was driven in, but subsequently reëstablished, the enemy suffering some loss. A large force is said to have captured the Federal stockade at Brownsboro', on the Memphis and Charleston Railroad, with a part of its garrison of 100 men. Our pickets were also driven in at Huntsville, a few miles distant. This, however, is a strong place, and cannot be taken, unless the enemy should number six or eight thousand men at least. For some time travelling has been dangerous on parts of the Memphis and Charleston Railroad. A train was fired into near Collierville on the 23d of June, and two soldiers killed, eight wounded, and five captured. A few guerrillas were operating about five or six miles south of Nashville, on the road and railroad, on Friday, July 15th. The great news from this region, however, is the exploit of General A. J. SMITH, who left La Grange, with the cavalry of Generals MOWER and GRIERSON, on the 5th of July, to find and engage FORREST. The enemy, reported to be under Generals FORREST, LEE, and WALKER, was encountered just beyond Pontotoc on the 13th, badly whipped on that day and the two following, and driven beyond Tupelo. General SMITH says, "Our "loss is small, compared to that of the Rebels. I "bring back everything in good order." General FAULKNER and Colonel FORREST of the enemy are reported killed, as was Colonel WALKER of our side.

At daylight of the 24th of June, the steamer *Queen City*, while off Clarendon, Ark., in the White River, was attacked by a large force of the enemy, under General SHELBY, with four pieces of artillery, and, after a sharp fight of half an hour, in which she was entirely disabled, she surrendered. Our loss was about forty men. Twenty-three escaped by swimming. The steamer was blown up by her captors, after hastily removing her stores and arms, as a reinforcement of three gunboats, the *Tyler*, *Fawn*, and *Naumkeag*, were observed bearing down on the *Queen City*. A rapid engagement followed, during which our gunboats ran by the battery, and, turning, raked it badly, driving off the enemy, and recapturing one of the *Queen City*'s guns and a part of her ordnance stores. The gunboats then returned to Duvall's Bluff, and communicated with General STEELE, at Little Rock. The latter at once sent out General CARR, with four cavalry regiments, to Clarendon, by transports. On the 27th, General CARR, having proceeded to the interior, encountered the enemy under SHELBY in a severe battle, between Cherokee and St. Charles, and totally defeated him, capturing 200 prisoners, including 18 officers, and several guns. Our loss was about 200, while that of the enemy was reported twice as great. The command then returned to Clarendon, from which it had marched thirty miles. The design of the enemy is to cut STEELE's communications by blockading White River. This victory will much to diminish the fear of a siege at Duval's Bluff and Little Rock. SHELBY had not yet returned to Clarendon, at latest advices, and MARMADUKE, with 6,000 men, was ten miles below Napoleon. On the 22d of June the garrison at White River Station was sadly reduced by sickness, there being only one company left. It was beaten off by the help of the gunboat *Lexington*. Our loss was only six men. The enemy's was rather greater. The day previous, a cavalry regiment of the enemy was repulsed from Pine Bluff with some loss. Considerable skirmishing had also taken place at Brownsville, on the railroad.

In Missouri, matters have become exceedingly troublesome. THORNTON's men, 150 strong, captured Platte City, garrisoned by 70 "Pawpaw" militia, who surrendered without resistance, and some of whom joined the enemy. Parkesville and Huntsville were also captured, and these and several other towns plundered. The Missouri River has been blockaded above Jefferson and below Fort Kansas City. Colonel FORD has been pursuing the guerrillas in every direction, but they are still strong.

BUCKNER was reported to be moving into Kentucky, by way of Pound Gap, with a force estimated at from five to fifteen thousand men. But the report has been contradicted since, after creating some alarm. During the latter part of June there was a much brigadage by guerrilla parties in many counties in the State. But of late Kentucky has been more quiet.

MR. LANCASTER'S POSITION.

We have already noticed the question whether any claim on the part against neutral governments can arise out of the action of private vessels, in rescuing the crew of the sunken *Alabama*. Of the various inquiries suggested by the circumstances of the case, this is of the most immediate and practical importance. It is not, however, one which calls for the judgment and action of any official of the naval service, whatever the decision of the Government and its diplomatic agents. For the purposes of the present case, it may be idle now to inquire what rights Captain WINSLOW had at the time of the escape of SEMMES, and some of his officers and crew, by means of the *Deerhound* and French pilot-boats, or to what extent he might have vindicated those rights by using force against those vessels. But the circumstances of this case may be paralleled in some future engagement, and every naval officer may naturally inquire not only what was done by the parties, lawfully or otherwise, but what might have been done lawfully which was not done.

As we have said before, we think the victorious belligerent might have chosen that the whole ship's company of the *Alabama* should undergo the alternative of death by drowning, or of becoming prisoners of war on board his own ship. We think this very important proposition cannot be successfully controverted. The danger of perishing by drowning, in case the victorious adversary, in pursuing his success, should not have time—we may go further and say, should not have the fullest disposition—to rescue his enemies is such circumstances was, it seems to us, a legitimate peril of battle, as much as the risk of death while the combat was in progress. The continued presence of the successful belligerent, with apparently power and

will to follow up the destruction of the vessel by securing the persons of his adversaries, as one of the legitimate fruits of the victory, sustained the relation of belligerent enemies between the victor and vanquished, and debarred the spontaneous exercise of humanity in a third party.

In his justification of his action, in his note addressed to the London *News*, June 27, Mr. LANCASTER gives it as "his own opinion that a man drowning in the open sea cannot be regarded as an enemy, "at the time, to any body, and is therefore entitled "to the assistance of any passer-by." A proposition so general, which leaves out of view the probable alternative of capture, and the fact that the destruction of capture was the legitimate consequence of the battle, has no force in the argument. The pursuit of the persons engaged may be equally important with the destruction of the vessel, and is a right of the belligerent. A neutral vessel, voluntarily present within what we have called the temporary belligerent jurisdiction of the scene of battle, which should on mere impulse of humanity remove the persons of the vanquished from the water to her own deck, would there by, it seems to us, make her deck as much the place of legitimate pursuit and capture as the water had been. We do not think that a previous surrender of the sunken ship would affect the decision as regards the neutral party; nor do we adopt the idea, which Captain WINSLOW advances, that the *Alabama*'s mere floating on water were his prisoners, or in his custody in virtue of the surrender. The act of the neutral, in the case supposed, should not be regarded as a rescue of prisoners, but rather as an interference in the battle, as much as if aid had been given to a combatant during the fight.

We do not mean to assert, as a universal principle, that in no case may a neutral vessel become the means of securing the life and liberty of persons thus forced to abandon a sinking combatant. The course of a battle between steamers might bring them into the immediate vicinity of beaten and sailing vessels, and if some of the engaged ship's crews, who should, by the adverse fortune of the battle be thrown out upon the waves, should succeed in reaching the side of such vessels, and be assisted on board, it would, we may concede, be a legitimate escape from capture. But we hardly think that the mere presence of such a vessel could, with its occupants, receive shelter from the enemy's pursuit on board such neutral vessel. Again, if the victorious party should be so crippled as to be unable to follow up the pursuit of men thus floating between life and death upon the fragments or in the boats of the sunken ship, they would have the recognized right to demand the neutral vessel, be any less secure from belligerent action than the proper crew or passengers on board such neutral. A neutral who should under such circumstances deliver up the rescued to the victorious party, would, as we view it, make himself a belligerent ally of such party, and, to a certain extent, be guilty of want of faith towards the vanquished, and barring all right to assign conditions to the rescue, nor any power to dispose of their liberty by reason of any indebtedness to him for their lives.

The English and French accounts endeavor to make it appear that the *Kearsarge* was unable to get out her boats in time to secure alive the majority of those left on the water when the *Alabama* sank. But according to Mr. LANCASTER's own letter, of June 19, to the London *Times*,* he rescued only forty persons in all, many or most of them perhaps, taken out of the whale-boat and dingy of the *Alabama*, and then made off, while the *Kearsarge* secured in all seventy persons, most of whom it must be supposed from this had been picked up after the *Deerhound* had got out of the way.

But the peculiarity of this case arises out of Mr. LANCASTER having been requested by Captain WINSLOW to assist in saving the lives of his enemies. Captain WINSLOW has not, we believe, made any statement as to the precise terms of the request to Mr. LANCASTER, in his letter of June 27th, to the London *News*, says, that Captain WINSLOW called out, "For "God's sake do what you can to save them." Now, as we have said, we do not think the persons referred to could, as between their antagonist and a third party, be considered as prisoners by reason either of their defeat or of any surrender, and Captain WINSLOW could not expect Mr. LANCASTER to regard them as prisoners because they might become such through his own instrumentality. The question is, Did the neutral interfere with the belligerent right of pursuit and capture? We think the permission given by Captain WINSLOW's request compels us to answer the question in the negative; that, consequently, the neutral jurisdiction on board the yacht and its boats, though on the scene of battle, was preserved as against the belligerent jurisdiction, and that the persons rescued from drowning must be taken to have been secure on board the *Deerhound*, as to any lawful action on the part of our own ship, and we do not see how the owner of the neutral vessel could honorably have exercised any control over their persons himself, or could have been expected to sanction the use of force against them by any one else.

As Captain WINSLOW in his correspondence with M. BONFILS admits that he "allowed, through hu"manity," certain French pilot-boats to save some of the *Alabama*'s crew, the same reasoning may apply to them. It might be a question, however, in a similar case, whether ordinary fishing and small coasting-boats, skiffs and sail-boats, which might be supposed to have been present in view of some chance of profit, could in like manner claim to represent neutral soil, and whether such boats should not be considered as making themselves the agents of the successful party.

There is also a distinction among the persons carried away by the *Deerhound* which we have not seen noticed in my communication on the subject. It seems to have been an oversight on the part of Captain WINSLOW to have allowed the crew of the *Alabama*'s boats which came over to the *Kearsarge*, either by his own or by hostile assistance, to go off again. He might have ordered them all on board his own vessel, and sent the boat out manned by his own crew. As it was, the officers in command and probably the whole boats' crews got off to the *Deerhound*.* It appears that there were at least two of the *Alabama*'s boats in the water when she sank. The men on these boats were not in danger of drowning. The request made of Mr. LANCASTER to save life did not apply to them. All those in these boats would have been prisoners to the *Kearsarge*, but for their being taken on board neutral vessels. It was the duty of Mr. LANCASTER to have refused to receive them on the *Alabama*'s boats, and, as far as he may have received them, it seems that he interfered with the belligerent jurisdiction. It does not appear how far this occurred. It seems probable that some of the *Alabama*'s officers abandoned their own boats on the water, getting into those of the *Deerhound*, and leaving the sailors for the most part to their fate; and those thus rescued from pursuit might not afterwards have been distinguishable from those saved from drowning. Mr. LANCASTER, according to his own account, hurried off with SEMMES, thirteen officers and twenty-four of the crew, leaving the far greater number, consisting almost entirely of seamen and firemen, to what he represents as the tardy and feeble mercies of Captain WINSLOW.

It would not be wise to regret that Mr. LANCASTER thus got out of the way, without relying for peace and quiet upon that "reflection," which he supposes Captain WINSLOW would have had whether Count COURSEULLES WINSLOW's action in the case of the *Trent* "would bear repetition." The question whether he should or should not use force against the *Deerhound* would have been a very embarrassing one for Captain WINSLOW, in view of the heavy responsibility which would have been charged upon either course. We think Mr. LANCASTER as Captain WINSLOW and most of our public seem to have supposed; though the Captain could hardly have been blamed if under the excitement of such an action he had failed on a moment's notice to distinguish the nice limits of belligerent rights and neutral obligations.

JOMINI'S LIFE OF NAPOLEON.*

In a former notice, we took occasion to praise the very handsome style in which Mr. VAN NOSTRAND has published this valuable treatise. The clear, white paper and generous margins will be appreciated by all our readers. The type and binding and other details are equally creditable. Besides the four stout octavo volumes, a fifth contains a handsome and accurate Atlas of 60 maps and plans of battles, it being a republication of A. H. JOHNSTON's maps, mostly compiled from the original of JOMINI. These major illustrate the regions occupied by the troops in all the most important battles which the main work criticises, and not only are the lines of the contending parties precisely set forth in different colors, but the three arms are also carefully distinguished. These maps give the various great Napoleonic battlegrounds, and sometimes two views of a single battle, with the changes of position, from the affairs at Lonato and Castiglione in the summer of 1796 to the four battles at Ligny, Quatre Bras, Waterloo and Wavre, which, in as many days, from the 15th to the 18th of June, 1815, forever set at rest the greatest military genius of our Christian Era.

General HALLECK's translation was the leisure military study of a seven months' voyage round Cape Horn in 1846, at which time he was ordered to California on duty in the Engineer corps. The great value of military works at the present time has brought this early labor to the press. The translation is almost literal, a few paragraphs only being slightly condensed, as wanting interest to the American reader at the present time. How grateful a contribution to military literature this is, may be estimated from the fact that it is the first rendition into English of the work. "No English translation of his Life of NAPOLEON has ever been published," says the Preface, "and it is very difficult to procure a copy in French." Probably, however, our readers will remember that the author retired to the campaign of Waterloo, and which is called by General JOMINI the 22d chapter of his Vie Politique et Militaire de NAPOLEON has already been given to this country by the same publisher.†

The notes of JOMINI, in this edition, are nearly all included in the text, while those which appear not at the foot of the pages, are appended by General HALLECK. The translator has manifested a disposition to refrain from prefuse annotation of his author. All the notes are required, and, indeed, some others might have been added to illustrate the text by means of his own observations. The leaning, at all events, is to the proper extreme, since nothing can be more disagreeable than a thin volume of text, overlayed with a heavy mass of commentary. The notes of General HALLECK may be stated as generally historical, biographical, and explanatory, seldom critical. They will prove of important assistance in the useful perusal of the work. It may be added that this work is carefully laid out under subheads. While this method in a book simply for consecutive reading is objectionable, in a work of reference, like the present, it is of great convenience.

The mode in which this great military treatise is written, is sufficiently Frenchy. First comes a prologue, in which the Elysian Fields are supposed to be resounding with the events of the nineteenth century. The different statesmen and chief heroes had carried different versions of NAPOLEON's battles to Elysium, and all the inhabitants were waiting with impatience a corrector account from NAPOLEON himself. At length, "already homicidal Fate seizes her "scissors," "a mournful knell announces that he made a "victim to escape." ALEXANDER, CESAR, FREDERICK, followed by a great concourse, press forward, and to their questions NAPOLEON replies. Accordingly the book is written in the first person, JOMINI assuming to relate the events of the EMPEROR's career as an eyewitness. There is one unique circumstance connected with the form of narrative. The manuscript of the Waterloo campaign, which forms the last, and, to our mind, the most interesting chapter of the work, had unfortunately been mislaid, and JOMINI was "compelled to supply its place hastily and somewhat "incompletely." Afterwards recovering the original, he brought it out, presenting it, however, in his own name, instead of causing the recital to be made by NAPOLEON. The curious reason or "powerful motive" assigned for this course, is thus stated in the words of JOMINI's translator:—

"It is that the rapidity of the EMPEROR's fall, and his "exile, preventing him from procuring accurate information "of what had occurred, not only in his Army, but also in

* In this letter Mr. L. says, "At half-past twelve observed the Alabama finished and in a sinking state. We immediately made toward her, and on passing the *Kearsarge* were requested to assist in saving the Alabama's crew. At ten minutes to one, when within a distance of 200 yards, the Alabama sank. We then lowered our two boats, and with the assistance of the Alabama's whale-boat and dingy, succeeded in picking up about forty men, including Captain Semmes and first lieutenant Mr. Kell. As we approached the vessel, I may state that before leaving the *Kearsarge* she was apparently full of men. The Alabama had a crew of 150 men when she left Cherbourg, &c., was on fire, and in a few minutes after she sank, exploded, six shells fell, and one officer and seven men were wounded. The *Kearsarge*'s boats were after some days returned, and with the exception of a French pilot-boat, succeeded in picking up the remaining survivors."

* An officer of the *Kearsarge* in a communication to the London *Star*, says:—"The Alabama veered round, showing her port side, heading with the *Kearsarge*, and a boat was seen approaching from her. An officer of the Alabama who declared himself to be an Englishman, boarded us, and requested we would not fire into her boat, as the vessel was rapidly filling with water. We lowered our boats, as stated in the log, and picked up about forty men, including the officer alluded to. Seeing in other boats to return to the rescue of the drowning crew of the Alabama, we observed one boat, containing Semmes, Kell, and others, pull away from the side of the sinking vessel, and directly on board the yacht and steer on board the yacht's boats."

† LIFE of NAPOLEON. By Baron JOMINI, General-in-Chief and Aid-de-Camp to the EMPEROR of RUSSIA. Translated from the French with notes, by H. W. HALLECK, LL.D., Major General United States Army. Illustrated with an atlas—in all four volumes. D. VAN NOSTRAND. 1864.

‡ THE POLITICAL AND MILITARY HISTORY OF THE CAMPAIGN OF WATERLOO. Translated from the French of General Baron de JOMINI. With an Atlas. By Captain S. V. BENET, Ordnance Dept. U. S. Army. 1853. D. VAN NOSTRAND. This was the second edition, published in 1853. The first had been brought out nine years earlier.

"that of his adversaries, he had, at St. Helena, composed a" narrative, with which a disinterested historian could not "entirely concur, as that it would have been necessary to "make him utter things of which he had judged altogether "differently." General HALLECK retains the autobiographical form of the whole work, accepting the brief narrative of the campaign of 1815, which first appeared, but incorporating the substance of the more elaborate last manuscript, subsequently published, while preserving the spirit and character of the previous one.

Hastily reviewing the early history of NAPOLEON, JOMINI then proceeds with a full, clear, and careful political and military account of the EMPEROR's career. The literary style of the work is lucid and straightforward, even when treating of abstruse points. It is indeed singularly clear and perspicuous; though, perhaps, a part of the secret of this general fact that the work is not so much a technical book for professional instruction as a historical work for more universal perusal. It is less scientific, in one sense, than the Treatise on Grand Military Operations, and the Wars of the Revolution, which preceded it, or than the several works on tactics and strategy which have followed it. But its marked superiority in critical commentary, as well as elegant narrative, will always make it a standard military authority. Its tone and vigorous, and sometimes almost epigrammatic style, make it pleasant, as well as profitable, to read. The faithless of the criticism and the mastery of the art of war which it denotes, at once charm and instruct the reader. The anecdote of JOMINI, which General HALLECK repeats, gives some idea of his intuitive knowledge of strategy:

During the appointment to the Imperial staff, JOMINI was at Erfurt, at the beginning of the campaign of Jena. NAPOLEON said to him,

"I am delighted that the Army should have the benefit of your high tree principles of war, has appeared in my rear. No more like queue is thought to be necessary. We are all powdered and frizzled Parisians. I have called you near me, because you have written on the campaigns of FREDERICK THE GREAT. You know how he managed, and have studied the theatre of the war."

JOMINI asked for three days to get his horses and equipages from the headquarters of Marshal NEY, and added that he would join his Majesty at Bamberg.

"Why at Wurzburg?" said the Emperor. "Who told you that I am going to Bamberg?"

"The map of Germany, sire."

"The map of Germany is on that map" said NAPOLEON.

"Yes, sire; but it is probable that your majesty will make against the left of the enemy because the most natural line of operation of the eastern frontiers of public liberty, and establishes his power with regularity and order. Your genius knows how to combine with the spirit of order and economy, and was part entirely pleased at seeing that I was not to be your servant, but your companion in your enjoyments.

From this moment the fear became become inseparable, and their conversation forgot its accustomed source of political and military information, and constituted the principal charm and delight of the illustrious student who inhabited the fields of Elysium.

JOMINI is still living, and in the service of Russia. An account of his life and writings is prefixed to the work of General HALLECK, and is of great interest. Having fought through a considerable part of the campaigns of NAPOLEON, and enjoyed the EMPEROR's friendship, it has been his lot to write the finest military history of his career. It is now thirty-seven years since the life of NAPOLEON was published, and since then a vast number of military writers and critics have appeared on the field of literature. JOMINI's various works, however, have stood the test of time, and are at this moment more widely studied, probably, than those of any of his now numerous military contemporaries.

THE FATE OF THE ALABAMA.

WHAT IS SAID OF IT AT LIVERPOOL.

[From the Peterborough Express, July 12.]

EVERY Southern heart must glow with pride over the accounts given of the late battle by the Liverpool Federal papers, and at the attentions paid to Captain SEMMES upon his arrival at Southampton. He was received with a cordial welcome, and every thing done on the most liberal scale that could contribute to his comfort and enjoyment. Ever since he has been in command of the *Alabama* he has been a great favorite with the English people, who have never failed whenever they had the opportunity to testify their admiration of him. If they could have their way he would have a fleet of *Alabamas* in sixty days, and they would speedily maintain his supremacy over the Yankees on the ocean. We see it stated that Captain SEMMES has entered into treaty to provide for him another and superior war steamer, but whether he will be gratified with this new command is extremely doubtful.

Thus has ended one of the most famous naval fights between single vessels that has occurred this century. The Yankee gets a glorious victory, but it is not one that he is boasting about, except that they have got rid of the *Alabama*, which played such havoc with their commerce. She will trouble them no more, for she reposes quietly in the dark depths of the ocean, from which she can never rise. But other *Alabamas* may succeed her, and, under the auspices of this renowned and intrepid SEMMES, reunite, with a more destructive energy, the career of their great predecessor.

There is one circumstance about this engagement in the British Channel that is worthy of a passing notice. It is the first, we believe, which has happened between two men-of-war in which the power of steam was to be tested. Not that we know of since the application of this element to naval craft has there been a mutual trial of its efficacy. The case of the *Merrimac* and the *Monitor* was a sim lar one, but not exactly the same, both of the latter having heavy iron-clads and different structures entirely from the *Alabama* and *Kearsarge*.

From the Richmond Dispatch, July 15.

Captain SEMMES says that WINSLOW had covered his ship with chain armor. Whether he has done so or not, by the by, it is the appearance of a wooden ship, while, in fact, it was an iron-clad. After learning this, we no longer wondered at the terrific concussion produced by the shot. It was sweeping proper, and altogether in keeping, that an infamous Government should reward such an infamous renegade for perpetrating the most infamous fraud that was ever practiced upon the high seas. A reward from LINCOLN would be a disgrace in any man who could be guilty of such disgrace. But in such a foul advantage been taken over one knight by another in the days of chivalry, the perpetrator would have had his spurs hacked off by the executioner's hatchet, his arms reversed, his name stricken from the roll of honor, and his carcase stretched by the neck between sun and earth, until the birds of the air had picked his eyes from their sockets. What must be the sense of honor of that Government which can encourage such damning infamy in its officers!

CORRESPONDENCE.

THE MONITOR IRON-CLADS.

To the Editor of the Army and Navy Journal:

SIR:—The opinion generally held by some journals relative to the turreted iron-clads prove that the subject is not so well understood as might be supposed. It is asked, "Are the Monitors impregnable?" The answer is simply, that the guns of these vessels operate within iron cylinders at least eleven inches thick, while their sides are protected by six inch thick iron plating, backed by three feet of oak timber, into which heavy slabs of iron are inserted under the planking. Only eighteen inches of the vessel's sides are above the water, the power of resistance being greatly increased by the deck, which is so thick that it extends below the exposed sides of the vessel. The deck of the *Warrior* is protected by only 4½ inch plating with a thin wood backing; but this armor does not extend to the ends of the ship, which are unprotected. The *Warrior* could not under the stern of the British vessel will destroy her means of propulsion. In the Monitors the side armor extends from end to end, and the vessel is driven by a screw propeller which effectually protects both. The Monitors on the Southern waters have been under fire frequently, and ten or twelve thousands of shot have been directed at the fleet off Charleston, and yet not the slightest injury has been done to rudders, spars, or machinery. Only occasional reports of broken bolts and indented plates become insignificant before this grand result—this great practical triumph!

It is asked, do the Monitors possess any qualities which enable them to meet and overcome such vessels as an enemy can bring against them? The *Warrior* and other first-class iron-clads, however, are not invulnerable to the fire of water; they cannot therefore enter our harbors without encountering the Monitors. The Monitors, moreover, owing to their light draught, will manœuvre in the contiguous shoal water, and with their 15-inch guns crush the armor of the enemy's vessels at short range. The great power of the ordnance employed in the Monitors has been set at rest by recent trials, proving that the 15-inch gun crushes into pieces the 4½ inch plating of the *Warrior* plate. The *Warrior* battery consists principally of 68-pounders. True, we have much experience of projectiles at Charleston, but as yet not a single bolt or shot has been applied to *Ironsides*! Professional men all agree that twenty-ton guns can only be handled in a Monitor turret. At any rate, no attempt has yet been made to employ such guns in casemate ships. The speed of the Monitors is all-sufficient for harbor defense. They do not require the arrangements of the system assert, for with *steam* bottoms they make 7 miles an hour. Admiral DAHLGREN has practically settled this point by hoisting his flag on board the *Passaic*, drawing only nine feet. The apprehension that the European iron-clads will run down the Monitors is quite groundless, as they are for protecting our harbors, and only have one of the deep channels to have the privilege of hammering their opponents unmolested.

The coast defence vessels, viz., the *Kalamazoo* class and *Dictator* class, the European iron-clads will scarcely attempt to run down. The *Kalamazoo* class are similar to the European iron-clads in two with her ram, backed, as it is, with a weight of one thousand tons of armor. The speed of this ship is to be accomplished with but 5,000 horse power engine and fine lines, the *Dictator* will be unquestionably the fastest vessel afloat, and a most powerful assistance effective against intruders on the coast. The *Dictator* turret is fifteen inches thick, composed of wrought slabs and plates, her side armor is twelve inches thick, composed and backed with four feet of oak timber. The *Warrior* armor is a mere pasteboard protection, compared with his. Besides, the *Dictator* carries her armor from end to end, protecting rudder and propeller effectually.

It is said that the original *Monitor* was not strong enough to follow the *Merrimac* into Norfolk. Whoever makes this assertion takes from the naval records a glorious and unparalleled victory, and the most important event of the war. The *Monitor* was strong enough not only to fight the *Merrimac* muzzle to muzzle, without the slightest injury, but to withstand the thrust of the ram without harm, but her *guns* had not sufficient power. The turret of this pioneer vessel was specially made to operate twenty-ton ordnance, but it could not be obtained in time. There is no doubt, whatever, that with 15-inch guns WORDEN would have sunk the *Merrimac* in a few minutes.

The asserted vulnerability of the Monitors, because they do not take possession of the Southern rivers and harbors, is unwarranted and absurd. Had the Monitors been present in the harbor of Charleston, it would not prevent Admiral DAHLGREN from steaming up to the city, but the entangling obstructions placed in the channel present insuperable difficulties. It is an inherent defect in the screw system that the disabled obstructions will block or entangle the propeller, and thus render the vessel helpless. It was in view of this fact that the PRESIDENT peremptorily ordered the Admiral commanding at Fortress Monroe not to permit the attempt to run the original *Monitor* up to Norfolk.

It has recently been stated by certain journals that the Monitor iron-clads are absolutely useless. The *Merrimac* will hardly endorse this statement. The *Merrimac* and *Monitor*, not to mention the *Galena*, met prevented by the Monitors from carrying out the Confederate programme, would have given our opponents advantages of serious description to the United States. Were they of any less effect? Did it shut out the "doomed city" as intended? No, but Dahlgren when he took his half dozen Monitors into Charleston harbor silenced for the time the city of from the outer world, and thereby inflicted incalculable injury on the Rebellion. The persevering sailor is yet at work with his Monitor iron-clads in an unceasing duel picket duty in the focus of a number of Confederate forts at Charleston, and the Monitors are the only vessels that can intrude, power and shot being too valuable to be wasted. The security of our coast and harbors dur ands that the Monitor system should be adopted and seacoast ships substituted. The *New Ironsides* has proved very effective in shelling the Confederate gunners from their guns, but this vessel is not adapted for the war waged to secure European iron-clads. Vessels of her class would not afford adequate protection to our harbors against first-class armor-clad ships. Patent investigations by competent naval officers from Europe, who have carefully examined the various projects submitted to the Navy Office at Atlanta, have resulted in their recommending to their governments the adoption of the Monitor plan for harbor defences, as that alone is their opinion, which will enable them to fight and handle guns of sufficient calibre and weight to crush the strongest European armor. Also because on that plan alone can the guns be mounted with corresponding one foot in thickness, and the propellers, rudder, and machinery effectually protected. Accordingly, fourteen vessels of the *Passaic* class are now being built for the Navy. With a small fleet of these vessels carrying, 15-inch guns in our harbor, New York has nothing to fear from the iron-clads of Europe. A fleet of the *Dictator* class on the coast will, from reasons already stated, prove an overmatch for any fleet of iron-clads that Europe can send against.

Yours, very respectfully,
NEW YORK, July 18, 1864. J. ERICSSON.

DOUBLING FILES.

To the Editor of the Army and Navy Journal:

SIR:—The great difficulty of teaching infantry to double and undouble files with facility, in all directions of facing by the flank, or to the front or rear, is a common trial of the patience of officers and non-commissioned officers alike. My own failure in squad drill led me to believe that this difficulty arose rather from a faulty method of instruction, than any inherent defect in the minds of recruits themselves, which are of the simplest character. In the following system, applicable to these elemental manœuvres, by telling the front or rear rank to stand fast, or side step to the right or left, and numbers 1 or 2 to stand fast or step forward or to the left, recruits' different manœuvres are necessarily taught, varying slightly from each other in perplexing combinations of the movements detailed in instruction, rendering each of these movements tending too to a hopeless confusion of ideas in the minds of the men. The different facings, as taught in this manner, are:

1st. Front to right face.
2d. Front to left face.
3d. Right face to front.
4th. Left face to front.
5th. Right face to face the rear.
6th. Left face to face the rear.
7th. Face the rear to right face.
8th. Face the rear to left face.
9th. Right face from face the rear to face the rear.
10th. Left face from face the rear to face the rear.
11th. Right face from face the rear to front.
12th. Left face from face the rear to front.

Each of these twelve positions from which these movements are required—namely: After a right face and about face to face the front; after a left face and about face to face the front; after a right face and about face from line faced to the rear to face the rear; after a left face and about face from line faced to face the rear; the movements of the front and rear rank, as indicated in numbers 12, 11, 5 and 6. This system of instruction, requiring the men to be informed as to their movements in each of these "elementals," is generally abandoned in despair before the instructor has encountered or even comprehended the difficulties he carries before them. The drill in single rank is of little effect in simplifying the matter. The men will be less confused by instructing them to countermarch by file, by the flank, in any manner or when faced to the front,—the company being numbered in the usual manner from right to left, viz.: 2, 1, 4, 3. Now I shall contrast the movements recorded for numbers 2, and *vice versa*.

The result of all these movements, as executed in each group, disregarding the distinctions between front and rear ranks, and numbers 1 and 2, will show that the doubling and undoubling of files in all directions comprises but two movements, with one or the other of which all are identical; and when the men are properly instructed in these two movements, they can be executed by the flank in any direction, doubling and undoubling their files with facility. The following is a method of instruction that I adopted as a company officer with gratifying success:

The squad or company being formed in two ranks, they are ordered to number two in each rank, and instructed that the object of this is to arrange them in groups of four,—No. 1 being in the same group with the men on their right and left, and No. 2 with the men on their right; the four men of each group being comrades, who are always together, either in a square faced to the front or rear, equip

a rank of four abreast, when the squad or company is faced by a flank. In the first lessons in facing, the group faced to the front is separated by intervals of one or two paces. The instruction is then given in the following manner:

To face by a flank and double files.

At the command right (or left) *face*, the men will face to the right or left, the rank which was in rear will take a side step away from the other rank, and the men who are behind others of the same group will place themselves beside their comrades by a step forward, and towards the rear of their first positions.

To face to front or rear and undouble files.

At the command *front*, or *right face* (or front), the men will face to the right or left; the men who are behind others of the same rank will step forward into their *original* places beside them, and the rank in rear will take the rank in front in its proper distance.

It is unnecessary to say that instruction that can be memorized, faced either by the front or rear rank, is nearly twice as manageable as one that can perform but one series of manœuvres. The practice of undoubling files, and the formation of lines by inversion, are equally valuable with the other instructions prescribed in the infantry tactics.

COLONEL.

BEAUFORT, S. C., June 25, 1864.

REMOVAL OF WASHINGTON'S STATUE

To the Editor of the Army and Navy Journal:

SIR:—I wish to call attention to the removal by General Hunter of the statue of Washington from Lexington, Va. Shall this be continued? The old Romans, in wars of pure conquest, filled their galleries with statues plundered from the temples and cities of Greece; but that war is not a war of conquest we all know. We have, at this time, I trust, that war is only justifiable when ennobled by some principle; and it is certainly below the dignity of a nation engaged in war to descend to the insulting of public monuments and memorials—a thing which neither weakens the enemy, nor strengthens ourselves. And the present case is very much stronger. We are not waging war with Virginia, but we are seeking to bring back revolted States to their allegiance, which we do not expect to govern long as conquered provinces, but to which we shall restore their rights when they submit to law. In such a position, consideration must be taken not for the acts of arms, and the greatest care must be taken not to increase the number of our enemies by wantonly outraging their feelings. We hope to bring Virginia back speedily to her old position, but if there is one way to neutralize the power of our arms, it is to give the Virginians such gratuitous insults as this. When Virginia ratifies the act of secession of the State, we shall be done with this statue? Shall it remain in some Northern city, a constant reminder of our former feud, and a constant cause of bitterness? I am not writing on the subject, for it seems to me that our generals are too much in the habit of writing on subjects requiring statesmanship during this Rebellion. We have not only to conquer rebels, but we propose to restore the Union; and the only way in which we can do it is by the strictest economy and discipline in putting down armed opposition, to refrain most carefully from all needless and useless insults and injuries. W.

[The statue was removed to Wheeling, the capital of Western Virginia, by order of the Governor of that State, on petition.—ED. JOURNAL.]

REPORTS OF CAPTAIN WINSLOW TO THE SECRETARY OF THE NAVY.

U. S. STEAMER KEARSARGE,
CHERBOURG (France), June 21, 1864.

SIR:—I have the honor to report that, toward the close of the action between the *Alabama* and this vessel, all available sail was made on the former, for the purpose of reaching the port of Cherbourg. When the object was apparent, the *Kearsarge* was steered across the bows of the *Alabama*, in a raking fire; but before reaching this point, the *Alabama* struck. Uncertain whether Captain SEMMES was not using some ruse, the *Kearsarge* was stopped, and it was not until a shell exploded in the *Alabama* was lowering her boats; and an officer came alongside in one of them to say that they had surrendered, and were fast sinking. Every effort was then made to get the unfinished immediately for saving of life.

The two boats not destroyed were at once lowered, and as it was apparent the *Alabama* was sinking, this officer was permitted to leave in his boat to afford assistance. An English yacht (the *Deerhound*) steamed rapidly up to the *Kearsarge* at this time, when I hailed, and begged the commander to run down to the *Alabama*, as she was fast sinking, and we had no boats left in which to pick up the men. He answered affirmatively, and steamed toward the *Alabama*—but the latter sunk almost immediately. The *Deerhound*, however, succeeded in saving many who were engaged, aided by several others, which had come from the shore.

These boats were busy in bringing the wounded and others to the *Kearsarge*, when we were trying to make as comfortable as possible, when I was reported to me that the *Deerhound* was moving off. I could not believe that the commander of that vessel could be guilty of so disgraceful an act as taking our prisoners off, and thereby using the means to prevent it, but continued to keep our boats at work rescuing the men in the water. I am sorry to say that I was mistaken. The vessel made off with Captain SEMMES and others, and also the very officer who had come on board to receive my sword. Subsequently I met the *Deerhound* was a consort of the *Alabama*, and that she received on board all the valuable personal effects of Captain SEMMES the night before the engagement.

I have the honor to be, very respectfully, your obedient servant, JOHN A. WINSLOW, Captain.

Hon. GIDEON WELLES,
Secretary of the Navy, Washington.

U. S. S. KEARSARGE, CHERBOURG, June 21, 1864.

SIR:—I have the honor to report that the number of prisoners brought on board the *Kearsarge* belonging to the *Alabama* was 70—6 officers and 64 men. 1 officer (carpenter) and 2 men dying, and 17 wounded are included in this number. As we have very contracted accommodations for our own crew, without increase, it became indispensable to send the prisoners on shore, and their parole was taken. With the exception of the doctor (non-combatant), who was put on parole that he might attend to his wounded, the officers were held as prisoners of war. I learn that 4 officers with 6 men were carried on shore at Cherbourg by pilot boats; but of the number who reached England in the *Deerhound* I have no information.

I have the honor to be, very respectfully, your obedient servant, JOHN A. WINSLOW, Captain.

Hon. GIDEON WELLES, Secretary of the Navy.

U. S. S. KEARSARGE, CHERBOURG, June 21.

SIR:—I have the honor to submit to you the reports of the damage sustained in the different departments of this vessel, during the recent action with the *Alabama*.

In connection with this report, I take great pleasure in informing you officially that the conduct of both officers and men differed equaled, in every respect, my most sanguine expectations.

In the gun division, the utmost coolness prevailed throughout the action, and the fine practice and control of exercise being as carefully attended to as if in ordinary exercise; and to this cause may be attributed the excellent condition of the guns and gear, after a rapid firing of an hour's duration.

The powder division received my particular attention, and its important service was promptly and efficiently rendered.

The circumstances under which the battle was fought afforded no opportunity of displaying special acts of individual heroism; but, while every man and boy in the ship displayed the utmost coolness and bravery, there were some who, by their position and peculiar duties, attracted special attention, and deserve special mention.

The executive officer, who was stationed on the top-gallant forecastle, under the charge of Acting Master's Mate CHARLES H. DANFORTH.

The action in this part was commenced by this gun, and its fire was rapid and effective throughout.

The after pivot gun on the poop was nobly sustained by the marine guard of this ship. The Boatswain, JAMES C. WALTON, was observably active. Gunner F. A. GRAHAM during the whole engagement was cool, and merit commendation. The carpenter's mate, MARK G. HAND, is well known to you, as a faithful and competent man. His conduct in the battle was distinguished for cool and intelligent performance of his duties. It is unnecessary for me to call your attention to the officers commanding the gun on the starboard gangway, as their names are known to your own eye.

In the surgeon's department, every arrangement that experience or humanity could suggest was made for the comfort of the wounded. Fortunately, we have but three of our crew even slightly wounded during the action, the wounded of the enemy, numbering fifteen persons, were consigned to the charge of Surgeon J. M. HOWARD, who was entirely without professional assistance. The duties of this department were thereby rendered extremely arduous, but were cooly and efficiently performed.

Mr. GOWEN (U. S.) was severely wounded by the explosion of a shell. He dragged himself to the forward hatch, and refused to be carried below, in order that the purpose of assisting him. His cheerful willingness to sacrifice his life for victory's sake was expressed in terms that animated and encouraged others.

JOHN W. DENNETT (pr. gunner), wounded at the same time, behaved with equal fortitude and bravery.

ALBERT MCBURN (U. S.), another of the wounded men, displayed both courage and patience.

All the men on the deck first went to their quarters and rendered such service as they were able to perform.

The engineer's division was admirably and efficiently conducted by the senior engineer, Chief Engineer W. H. CUSHMAN.

STANLY L. SHIPP and HENRY MCCONNELL (third assistant engineers) were stationed on deck, and their conduct came immediately under my observation. It was distinguished for coolness and intelligence. Second Assistant Mr. W. H. BADHAM and Mr. F. L. MILLER, were on duty in the engine and fire-room, and, judging from the prompt manner in which the engine and deck were executed, I know that their duties were creditably performed.

The ship is indebted to Paymaster J. A. SMITH for efficient services during the action. His clerk, Mr. D. B. SAGONE, performed his duty on deck in the third division. The Ordnance Officer, Mr. C. W. MAFFITT, and Assistant Mr. ARMS R. WATSON, deserve special mention for admirable performance of their duty. I will hand to you the names of those not already mentioned by the divisional officer as soon as I receive them.

In conclusion, sir, let me congratulate you on the success of your plan of battle, and compliment you on the skill and judgment displayed in its execution.

I am, sir, very respectfully, your obedient servant,
JAMES S. THORNTON,
Lieutenant-Commander and Executive Officer.

To JOHN A. WINSLOW, Captain commanding U. S. steamer *Kearsarge*.

Approved and forwarded,
JOHN A. WINSLOW Captain.

U. S. S. KEARSARGE, CHERBOURG, June 21.

SIR:—I respectfully report that the only injury received in the engine department during our engagement with the *Alabama*, on the 19th inst., was to the smoke-pipe, which was perforated through both sections by a 100-pound rifle shell, which exploded as it was coming through, tearing out a large piece of about three feet in diameter, carrying away three of the chain guys; and to the top of the engineer-room hatch, which was cut completely through and across by a shell.

I would further report that all the assistant engineers and firemen and coal-heavers behaved with perfect coolness, and were attentive to their duty at their stations; and that, by the self-possession and attention of Second Assistant Engineer W. H. BADHAM, in the management of the engines, Third Assistant Engineer FRED. L. MILLER, in charge of the boilers, Third Assistant Engineer STANLY L. SHIPP, on deck with the second and hot water hose, and Third Assistant Engineer HENRY MCCONNELL, at the engine signal bell, the efficiency of the engine department is to be attributed. I would also mention first-class firemen JAMES DUGAN, for his coolness and competency in assisting Mr. MILLER in the fire-room; first-class firemen HENRY YOUNG, WILLIAM SMITH, BENJAMIN H. BLANDELL, WM. H. DONESHAM, in assisting Mr. BADHAM in charge of the engines, and first-class firemen, JOHN MCGUIRE, for prompt action and attention in charge of the after-fire hose during the alarm of fire in the action.

Very respectfully,
WILLIAM H. CUSHMAN,
Chief Engineer U. S. N.

Captain JOHN A. WINSLOW, U. S. N., commanding.
Forwarded, JOHN A. WINSLOW, Captain.

U. S. S. KEARSARGE, CHERBOURG, June 20.

SIR:—I report the following as the injury I was subjected sustained by the U. S. steamer *Kearsarge*, in her hull, sails, rigging, &c., during our late engagement with the pirate steamer *Alabama*, on the 19th inst., off this port:

In hull—One shot in starboard gangway, cut chain and bruised plank; one shell under waist gun, cut chain and bruised plank; one shell through the side, one under starboard main chancels, cut off chain plate, going through and bursting on the berth deck; one shell shot through forward of forward pivot port—shot lodged in side, crushing waterway; one 100-pound rifle shell lodged in starboard; one shell through the side, below berth deck, and one setting abreast of main rigging; one shot and two shells through port setting forward of mizzen rigging; one shell through starboard side—shot through lodged; one shot through netting forward of mizzen rigging, on starboard side.

In sails—Spanker badly torn by shell.

In rigging—Mizzen rigging cut away; one screw in port main rigging; starboard maintopmast backstay cut away; mizzen rigging, starboard side, and starboard rigging; starboard swifter of mizzen rigging; one screw in port main rigging; one plate in starboard main chancels.

In boats—Starboard quarter boat destroyed; starboard gunwale shot away; gig badly shattered. The spars all in good order.

Respectfully, C. WALTON, Boatswain.

J. S. THORNTON, Lieutenant-Commander and Ex-Officer.

Number of shot and shells struck the ship in various places, 28.

Forwarded, JOHN A. WINSLOW, Captain.

U. S. S. KEARSARGE, CHERBOURG, June 20.

SIR:—I respectfully submit the following report of the expenditure of ordnance stores on board this ship, during the engagement with the rebel steamer *Alabama*, on the 19th inst:

Fifty-five 15 pounds service charges, 55 11-inch 5-seconds shell, 13 11-inch percussion shell, 13 32-pounders 4 seconds shell, 42 32 pound solid shot, 48 24 pound service charges rifle, 48 rifle percussion shell, 100 friction primers, 240 percussion primers.

Fixed ammunition for boat howitzer—9 shrapnel, Boatmans fused; 1 canister.

RECAPITULATION.

Duration of action 65 minutes.	
Number of rounds, 11-inch	55
Number of rounds, 32 pounder	55
Number of rounds, 30 pound rifle	48
Number of rounds, 12 pound howitzer	10
Total rounds	173

Very respectfully, FRANKLIN A. GRAHAM,
Gunner United States Navy.

To JAS. THORNTON, Lieutenant-Commander and Executive Officer.

EXTRACT FROM LOG-BOOK.

Moderate breeze from the windward, weather b. c. At 10 inspected crew at quarters. At 10:20 discovered the steamer *Alabama* coming out from port of Cherbourg, accompanied by a French iron-clad steamer, and a fore-and-aft rigged steamer showing the white English ensign and a pilot flag. Beat to quarters and cleared ship for action; steamed ahead, standing off shore at 10:50, being distant from the land about two leagues; altered our course and sounded in 7 fathoms. At 10:57 the *Alabama* commenced the action with her starboard broadside at 1,000 yards range. At 11 we returned her fire and came fairly to action with her; we continued until meridian, when, observing signs of distress in the enemy, together with a cessation of her fire, we ceased firing. At 11:20 a boat with an officer from the *Alabama* came alongside and surrendered his vessel, with the information that she was sinking, and in a few minutes afterwards she sank. Second and second cutter, the other boats being disabled by the fire of the enemy.

The English yacht, before-mentioned, coming within hail, was requested by the captain to render assistance in saving the lives of the officers and crew of the surrendered vessel.

At 12:24 the *Alabama* went down in forty fathoms water, leaving many of her crew struggling in the water. Seventy persons were rescued by the boats. Two pilot boats and the yacht also assisted. One pilot boat came alongside of us, but the other returned to the port. The English yacht

steamed rapidly away to the Northward without reporting the number of prisoners she had picked up.

Heading to the westward by the enemy's cutters, Repaired the rigging temporarily. Took a French pilot, and steamed away for Charleston.

At 3.10 let go the port anchor in seven fathoms water, and moored to thirty fathoms chain.

Forwarded, JOHN A. WINSLOW, Captain.

[From Colburn's United Service Magazine for June.]

NAVAL TACTICS

The attention of the members of the military and naval profession have, of late years, been so fully occupied with the rapid changes which have followed each other in such endless succession in the mode of building, arming, and equipping ships of war, that very few of them have been enabled to devote to other questions, as important although not so urgent, that time and thought which, under other circumstances, they would have given to these. Those who can speak of twenty or thirty years' service in the Navy had, soon after the commencement of their career, to go to school again, and "learn their business" over again—and were being pressed upon their conclusion. Gunnery was becoming a science, method of a mere matter of chance, and those who had superintended the discharge of cannon whether on shore or on board ship, had also to understand the principles upon which missiles were driven certain distances and in certain directions. Steam, too, as an agent in propelling vessels against "wind and wave" had hardly commenced to show its power sufficiently to those who had been content to study the weather, the "force of the wind," the "deviation of the compass," and the "direction of the ocean currents," which appertain to those into the depths of the lave connected with the expansion and contraction of fluids, and all the other multifarious questions which were brought prominently under notice in consequence of the invention of the steam engine.

The chief consolation however is for those who then chose the Navy as a profession was, consequently, far in advance of that given to the preceding generation of naval officers the unanxious which they had to undergo were far more severe, or, to speak more correctly, were less easy, than they had hitherto been. The responsibility was also increased, and the rate of promotion became more difficult. The result is, that more time is now devoted to the theoretical than to the practical knowledge required by those who constitute the naval profession; we have more science but less seamanship. The good old days, as they are sometimes called, in which so much was displayed by the naval officer in endeavoring to overcome the elements, have passed away, and the greatness of England is no longer dependent on the ability of our commanders-in-chief to take advantage of a change of wind, or a turn of the tide, to place their fleets in the best position to fall unions upon the enemy's line of squadron; steam has reduced them all to the same level, in one respect at least; for all have now the same means of holding, distinct from the wind, and the tide, and as all nations have not, however, the same advantages in constructing their ships of war, or of obtaining seamen to guide and fight them, as England, in this respect, has a decided eminent; for the possessions mines which contain the iron requisite for construction, and the coals necessary to generate the steam for propulsion. She also has a seafaring population which supplies the "officers, seamen and marines" necessary for her fleets, and which is in sufficient ships composing our immense mercantile marine.

There never was a period in the naval history of this country in which greater ability and profound study were peculiarly necessary qualifications for all who are entrusted with the command of the monsters which now bear the pendant. Even the most experienced officers who have for the most practically the ideas he may have formed as to the best system of tactics which should be adopted, because of and his being in presence of an enemy. A few years ago we were told that the days of large ships were numbered, and that naval improvements behind which the navies possessing the line-of-battle ships would never occur again. Then came the era of the monsters of the *Warrior*, and *Northumberland*, and *Minotaur*, and we have now reached the era of what may be termed the middle age. At one time the authorities seem to have been possessed with the idea that gunboats, corvettes and frigates would have to do all the work; then they appeared to the conclusion that it was necessary to have larger and more powerful vessels to support the smaller ones, both in size or rate of speed; afterwards, they entertained the theory that all desired advantages might be secured by having smaller and more powerful.

Whether, however, the principal ships of which the Navy is in future to be composed, are to be very large, of moderate size, or small, it behoves all who are to be put in command, or who may have a reasonable prospect of obtaining command, to study the principles and points connected with the efficient and successful management of the skilful manœuvring of vessels of all classes, especially when brought to bear on squadron with each other. The system which will be pursued in future naval engagements is vastly different from that which was followed so successfully by the naval heroes of the last generation, and much valuable information to be obtained from the recorded actions of those who had our fleets to victory during the long war. The same dashing spirit which was displayed frequently during the period that the stately "liners" had to do all the work, will have to be exercised to a considerable extent by those of the present school, if the prestige of the Navy is to be maintained; and the abilities of all who occupy prominent positions in the service must be tested on all occasions, and as often as possible, if the British Ensign is to continue to float supreme on the ocean.

It has often been a matter of surprise to us, as we doubt not it has been to others, that with so many captains, commanders and lieutenants employed afloat, endowed with more than ordinary talents, more works relating to the management and manœuvring of steam vessels while under weigh should not have been published in England. Other nations are apparently much in advance of us in this respect. Works are continually issuing from the French press bearing on all the various subjects connected with the Imperial Navy; and in the United States of America, the naval officers have been exceedingly active in giving their views to the world. One publication in New York has produced, during the last few years, more books of a professional character than all the English publishers put together. Under his auspices, Lieutenant-Commander Barnett, of the United States Navy, Instructor in Gunnery at the Navy Yard, Brooklyn, has presented a set of gunnery instructions, compiled for the volunteer officers of the Federal Navy, with hints to executive and other officers. General Barnard, of the Corps of Engineers, one of the most accomplished officers in the United States service, has edited a valuable collection of Notes on Sea-coast Defences. Lieutenant Luce, of the United States Navy, has published, in a handsome form, with a large number of lithographic plates, on Naval Light Artillery. A popular treatise on steam and its application to the naval service, by Lieutenant Wm. Dana Porter, son of Commander Wm. Captain Walker, of the Federal Navy, has written some interesting papers on Steam Propulsion; and a valuable work on the same subject has been published for Mr. King. A manual of internal rules and regulations for the management of ships of war, has been written by Commodore Lewis, who lately commanded the United States naval force in the Mediterranean. A Treatise on Ordnance and Naval Projectiles, by Lieutenant Wm. Sawyer, has also been produced; as well as a book of Elementary Instruction in Naval Ordnance and Gunnery, by Commander Ammen.

Another officer of the United States Navy, Commander Parker, has published a valuable work on the subject of the Navy Department, at Washington, a work on "Squadron" "Tactics Under Steam," in which he contends that the winds, and waves of the ocean are no longer elements in the movements and manœuvres of a steam fleet than the inequalities of the surface of the earth present to the movements of a railway train. Each ship is to be equipped with a fleet as an army, whose divisions, brigades, regiments and companies, have their appropriate commanders attached. Commander Parker, in this respect, confirms the opinions expressed by Sir Howard Douglas, in the work published a few years ago, on "Naval Warfare with Vessels of "Steam." Sailing ships were, at that time, not quite excluded from the list of sea-going vessels of the Royal Navy, and the idea had not yet become general to be employed as such had not then become a reality; much of Sir Howard Douglas' work was therefore devoted to tactics suitable for sailing ships, and the publication of his "Tactics on or "Steam" in a town almost apologetical. "Naval officers of "the present day," he says, "are accustomed to the power of the wind, may at first sight be disposed to repudiate, perhaps to ridicule, the adoption in their profession of the "principles of mechanics, as a science." Nevertheless, as recommended and expounded by the author. But moved "as fleets will hereafter be by the obedient agency of steam, "to the will of the commander, and not by the force of the "capied in performing any evolution, can be determined "with as much exactness as the post of a regiment or brigade in an army, and with much greater facility. It is "must follow that the evolutions of ships-of-war will be "performed with greater precision with a precision hitherto unknown in the naval service."

There can be no doubt but that the numerous instances of the great skill displayed by seamen will be required to form sailing ships into line of battle which may be met with in naval history, need not occur with fleets and squadrons in steam. English officers are much indebted to the various works which many of their predecessors of the last century experienced in the manœuvring of fleets. Those of Sir Charles Hudges in the action between the English and French squadrons in the East Indies, in 1782, when, on seeing that Admiral Suffren was preparing to attack his rear, made the signal at daylight to form line abeast, but in consequence of the variable state of the wind, the line could not be formed before noon, and then "the ships were so much out of order "on the contrary, be conducted on tactical principles "best adapted to the great end of all preliminary manœuvring, namely, that of bringing the enemy to battle, speedily "and precise manner. Even so far back as 1846, Admiral Sir Charles Napier, G.C.B., observed that steam and steam would enable naval commanders to conduct their operations and manœuvre on military and scientific principles; that fleets, no longer under the influence of wind and weather, would have it in their power to attack or repulse an enemy in a manner hitherto unknown in naval warfare; and that, as in the case of an army, the force would be handled in such a way as to bring the fleet into battle, and enable it to exert its powers with the most decisive advantage.

Commander Parker has endeavored, and, as we think, has successfully done so, to follow up these views and elucidately illustrated volume on "Squadron Tactics," to establish a fixed system of manœuvre, by which the combinations for attack and defence may be made to follow the example set him in the "Tactique Navale" of the French, although in a much clearer, plainer, and more seaman-like manner than that adopted and taken as a text by Edward Douglas. He fully coincides with that distinguished baronet that "the principle of the line of battle, or line of bearing "is, perhaps, by the reciprocal defence which the ships "afford each other, that alone which can properly be considered as applicable to sailing vessels, and which should "be generally used, not only in orders of movement, but "in anchoring the ships of a fleet, in line of bearing abreast "the wind or the sea, so that each may be given on the "bawse of another," and he strongly advocates the "double "column" formation.

At first sight the formation of the line of battle *en échelon* may appear to be exceedingly difficult of execution; Commander Parker, however, considers that the manœuvre is as easy with a fleet of steamships, and that it has great advantages over the formation in line ahead. It allows a reciprocal defence from the stern and broadside guns, it is advantageous from an attack at either extremity of fleet in line ahead, and in respect of the crossing fire of ships. On turning to the able work of Sir Howard Douglas on this point, we find that, in his opinion, "a number of ships disposed *en échelon* are not to be considered as constituted in a line "of chain of radiators, on a line of entrenchment *en crenaillée*, "or to bodies of infantry in squares, with diagonal parallel "lines," but as "a series of forts, with their flanks, or sides, "and their broadside batteries, defend each other recipro-cally—the stronger points of one ship defending the weaker points of another."

Ranged in this order, a powerful defence is obtained by the broadside fire from the bows of all ships in line abreast. While, however, very much will depend in large naval engagements in future on the way in which fleets are arranged, more will perhaps depend on the celerity with which the movements are effected. On the part of the enemy, Commander Parker's plans are decidedly preferable to those in the French "Tactique Navale."

The more we examine this question of naval attack and defence, the more are we convinced that every opportunity should be taken of constantly exercising the seamen and fleets in all the movements and manœuvres which may have to be executed in the presence of an enemy, and on the successful carrying out of which, even the safety of the empire, or, at any rate, our prestige on the ocean, may depend. It is only recently that we have been enabled to practise anything practically acquainted with that which many of them are know only in theory, but they would have the means of seeing how the theories of the one or other of the great writers on another; and, further, they would be induced to devise plans which might prove to be improvements on those hitherto brought forward by the authorities previous to, both the officers and the service would be benefited. It was probably from a study of the battle with the Dutch on the 13th of August, 1652, as described in Lediard's Naval History, "when the English Admiral with nine of his headmost ships, charged through the Dutch fleet, and got the "weather gauge," if not from reading the Treatise of Mr. Clerk, that the captain of the fleet commanded by Lord Rodney, gained the glorious victory which was the result of the enemy's line, in April, 1782. But unless both Lord Rodney and Sir Charles Douglas, as well as the captains of the broadside ships under their orders, had been thoroughly well practiced in the manœuvring and management of their fleets, the victory would have failed to have carried out that daring and bold plan so successfully.

In fact, it will almost always be found that the actions at sea attended with the most decisive results are those which greater damage has been done to the enemy's ships, and least injury has been sustained by English men-of-war, have been brought about by manœuvres which the possessors of every chance which occurred of practicing during peace, or when not in the presence of an enemy, those tactics which would be required to be put in force in the time of warfare.

Thus it was that the most brilliant and skillful battle fought by Sir Horatio Nelson, that of the Nile, was brought to such a successful issue. By doubling upon the van of the French in such a manner that seven French ships were attacked on both sides by eleven, while those with the rear of the French fleet, anchored head to wind, and therefore to leeward, could render the van no succor, the immortal Nelson was enabled to secure a victory the skill which practically exemplified that maxim in military tactics which teaches the importance of so conducting a battle as to bring your force to attack a portion of the enemy's force in such a way that the enemy might be unable to succor that part on which the attack was made. The manœuvre by which the First Napoleon owed mainly his triumphs. And, while on this subject of the efficiency of ships comprising squadrons, the opinion of Admiral Sir Thomas Hastings, chief in the day of the battle, we cannot refrain from quoting the ever-memorable words of Lord Nelson in his plan of attack previous to the battle of the Nile, against the fleet in the West Indies, in 1805. "The business of an *English* com-"mander-in-chief is, or should be, his leading, "being first to bring "an enemy's fleet to battle, on the most advantageous terms "to himself (I mean, that of laying his ships close on board "those of the enemy, in preference to firing at a distance), and, se-"ondly, to continue them there without separation until the "business is decided; I am sensible, beyond this object, it is "next necessary that I should keep my fleet entire, and secure "that the admirals and captains of the fleet I have the hon-"or to command will, knowing my precise object, that of a "battle, supply any deficiency of conduct they may see in "making signals. If the two fleets are both willing to fight, "the mode of manœuvring is necessary. The less the better: "a day is once lost in the attempt."

We are inclined to the belief that the principles which Lord Nelson acted upon, which were crowned with success in their glory, are equally applicable in 1864, when iron-clad and armor-plated monsters take the lead, and that victory will favor those who are enabled to lay their ships most advantageously alongside those of the enemy. These officers who are desirous of gaining some of the laurels which the Nelsons reaped in the days of their glory, will do better than follow the example of their brothers in the American Navy, and well-skilled and constantly practice those movements and manœuvres which will enable them to be brought into use whenever they are again expected by England "to do their duty."

ARMY AND NAVY PERSONAL.

Major-General W. F. Smith has returned to the Army from a visit to New York.

Lieutenant-Colonel Sanno arrived in New York on the 21st, on board the *Fulton*, from Port Royal.

We learn from Southern papers that the Rebel General Pettus was killed in recent operations in Georgia.

Major-General Gillmore is on a visit to New York during his sick leave, accompanied by Major Brooks of his staff.

Lieutenant-Colonel Chamberlin, commanding the Twenty-third Massachusetts, has died of wounds received in action.

Brigadier-General A. S. Winn has been detailed to superintend the recruiting for the Second corps in New York.

General W. F. Bartlett, late of the 57th Massachusetts Volunteers, has been assigned to a command in the 9th corps.

Lieutenant C. H. Cundell, Co. C, 5th New York Heavy Artillery, has been discharged the service for physical disability.

Brigadier-General George Crook has been invested Major-General of Volunteers by the President on the recommendation of Major-General Hunter, for gallant and

JULY 23, 1864. ARMY AND NAVY JOURNAL.

meritorious conduct in the recent expedition towards Lynchburgh.

GOVERNOR Andrew of Massachusetts has appointed Colonel Lyman of Northampton an agent to recruit for that State in the Hilton Head (S. C.) district.

COLONEL M. N. Wiswell, Military Governor District of Washington, is announced as Provost-Marshal-General of the defences north of the Potomac.

BRIGADIER-GENERAL Charles Devens, still suffering from a severe attack of rheumatism, has returned to Massachusetts from the hospital at Fortress Monroe.

MAJOR-GENERAL Orn has been assigned to the command of the Department. Major-General WALLACE is to command of the Middle Department.

A COURT-MARTIAL ordered by General Dix for the trial of Brigadier-General Spinola, is now in session in New York. The charges relate to the illegal practices in enlisting men.

MAJOR-GENERAL Franklin passed through Boston last week *en route* for Portland. He was greeted with an ovation by the citizens of Portland on his arrival there.

LIEUTENANT-COLONEL H. B. Clitz, of the Sixth U. S. Infantry, has been ordered from the U. S. Military Academy to the position of an Inspector of the Cavalry Service.

Colonel Frank T. SHERMAN, of Boston, chief of staff for Major-General Howard, was surprised and taken prisoner, with his staff, while on a scouting expedition in Georgia, a few days since.

LIEUTENANT-COLONEL George P. Hawkes, commanding the 21st Massachusetts Infantry, now at Petersburgh, having tendered his resignation, has received an honorable discharge.

GENERAL Sherman protests against the entrance of re-cruiting agents into his department, claiming that they will swell the number of idle non-combatants without rendering any commensurate service.

LIEUTENANT-COLONEL W. L. Duff, Inspector-General of Lieutenant-General U. S. Grant's staff, has returned to Petersburgh, having completed the inspection of General Pope's department.

LIEUTENANT-COLONEL Adam Badeau, of General Grant's staff, has been obliged temporarily to leave the field. Colonel Badeau is laboring under a severe attack of fever. He is stopping in New York.

A CORRESPONDENT writes from Johnson's Army to the Atlanta *Daily Intelligencer*, under date of June 30, says another enemy's dead left in our possession after the fight of yesterday is Captain Kilpatrick, of the Illinois, a brother of General Kilpatrick, the famous raider.

REAR-ADMIRAL R. W. Simpson, of the Chilean Navy, and his son, Lieutenant H. H. Simpson, and Secretary Rencoret, have arrived in New York, and are now at Delmonico's, in New York or England, for the construction of a number of war vessels for the Chilean Government.

GENERAL McCook, General Pope and General Doubleday have been relieved from duty in the Department of Washington. General McCook will report to the Adjutant-General for instructions, and General Pope and Major Hagner will resume their positions on General Court-Martial. General Harden has been ordered to report to General Augur for his division, garrisoning the defences of Washington north of the Potomac.

THE Portsmouth (N. H.) *Journal* refers with pride to the fact that there is now at Fort McClary, Portsmouth, a soldier who performs all the duties of a private in the ranks, and a grand, big, fine-looking soldier he is, every inch of a fourth corporal, who, in the event of the death of President Lincoln would at once become the Commander-in-Chief of the Army and Navy of the United States. He is, with all this consciousness he is willing to place himself in the position of a common soldier, share with them in their messes, bear about his share of the fatigue and duty of the service. This is the position of the Hon. Hannibal Hamlin, Vice-President of the United States, and private of Co. A, of the State Guard of Bangor.

A PRIVATE letter from Marietta, Ga., June 23, to a gentleman in Cincinnati, gives the following characteristic incident of General Howard: "On the 23d of June, while the battle, or the move forward, was going on, a young man, recently married, was being brought to the rear. General Howard, who was riding by, stopped, inquired to what regiment he belonged; then dismounting, he took the boy by the arm, led him to a log, and, having conversed with him, there in the road, kneeling down by the litter, the others around doing the same, uncovering their heads, the General implored God's protection for the boy, after which he pressed his hand and kissed him."

A SOUTHERN VIEW OF CAVALRY RAIDS.

[From the Richmond Examiner, July 1.]

Cavalry raids, destructive as they are, never conquer a country. Raiding has been attempted in Kentucky, Missouri, and this in several ways. In the first place, they greatly weaken the military resources of the enemy. They quite exhaust in some regions of our country, which it will ing to take the oath "to save its property." Creatures of the cravening sort must be driven from the Yankee ranks; his business is to rob and devastate, to carry away what is portable and destroy what he cannot carry, in order to starve out the "Rebellious." He is not to be moved to peace either by these "Union" poor devils with their fine and easy oaths.

When they protest that they have always been "Union men," that they will take the oath, and all that, raiders are apt indignantly to be horrified by a "Secession" accusation;

NOTICES TO CORRESPONDENTS.

The Editor of this JOURNAL will always be glad to receive from officers at the re. services, correspondence and general communications of a character suited to its columns. It is necessary that the name of the writer should, in all cases, accompany his communications, not for publication, but as a guarantee of good faith.

Officers are especially requested to give us early notification of all personal matters of general interest; of the movements of vessels of naval stations among officers; and military and naval events.

The Editor will, at all times, be pleased to respond, in these columns, to enquiries in regard to tactical and other matters.

The subscription price of THE ARMY AND NAVY JOURNAL is FIVE DOLLARS a year, IN ADVANCE, for all persons, invariably in advance. Remittances may be made in United States funds, or Quartermaster's, Paymaster's or other drafts, which shall be at the option of the order of the Proprietor, W. O. Church.

Subscribers who fail to receive their paper promptly, will please give immediate notice of the fact.

Subscribers ordering the address of their paper to be changed, should be careful to give their previous address.

The Editor will hold himself responsible for individual expressions of opinion, in communications addressed to the JOURNAL.

The postage on the JOURNAL is twenty cents a year, payable quarterly in advance, at the office where received.

All communications should be addressed to the ARMY AND NAVY JOURNAL, New York.

PUBLISHED UPSTAIRS 39 PARK ROW, TIMES BUILDING.

THE editorial and business offices of the ARMY AND NAVY JOURNAL have been removed to No. 39 PARK ROW, (Daily Times Building), directly opposite the City Hall Park, second floor front.

U. S. ARMY AND NAVY JOURNAL.

NEW YORK, SATURDAY, JULY 23, 1864.

THE INTERVAL OF REST.

ELEVEN weeks since the telegraphic wires announced that the Army of the Potomac, rising from its long inertia at Culpepper, had passed the historic Rapidan, in a final attempt to throw itself on Richmond. With what unparalleled events the first eight weeks were fraught, are now the wonder and the household story of the nation. At length, after a campaign whose only vicissitudes were wearisome marches and desperate battles, the much-enduring army halted in from of Petersburg, to enjoy the first interval of comparative rest worthy of that name, which has fallen to its lot since the bivouac at Chancellorsville. That is now priced as *rest* by this Army, which means to lie in stiffened attitudes in dangerous trenches, within four score or eight score rods of the enemy's lines, employed with details of working parties at night, and picket duty by night and by day,—under a southern sun, in choking dust, and during a forty days' drouth; with skirmishing, deadly and constant until the last few days, the crack or rattle of the rifle alternating with the roar of field batteries, the dull booming of siege guns, and the blast of mortars. Yet this is rest.

It is an old aphorism that there never was a campaign without a mistake. No mere fervency of patriotic emotion calls upon the judicious observer to say that in this Virginia campaign of ours, the rule has been for the first time avoided, by the conduct of the offensive party. Nor every project has succeeded, not every regimental, or brigade, or division commander has played the soldier as skillfully as his comrade. And even of the excellent general who commands all the Armies of the Union, a great peculiarity and a merit is, not that he always finds out the best plan or the best means at the first experiment, but that he has the good sense and tenacity to seek out and use a second or a third, if the first or the second miscarry.

There should be no question, however, that the recent pause in the campaign, or, at least, the present more silent and deliberate method of conducting it, is justified by the exigencies of the work itself, and also by military principles. That the supreme head in its object not only the possession of the enemy's capital, but the disconfiture of his chief army, became evident at the outset, first from the choice of the overland route, and next from the successive manœuvres to obstruct the enemy's line of retreat, so as to dislodge him from his prepared strongholds, and force him out upon an impartial field. This series of efforts had no little analogy to those which are witnessed in the attack of a permanent fortification. The first requisite in the latter case is to move with the greatest vigor, to make the onset as far as possible a surprise, in order that the garrison, when once the assailant's real strength is discovered, may have no time to call for help. A repetition of brisk assaults is often commendable, even at the hazard of much of the assaulting party's resources. But the moment it is evident that storming will not succeed, a pause for reflection and rest, for a change in plans and devices, and perhaps for the deliberate work of regular approaches, is next to be looked for. In some previous Virginia campaign, the error has undoubtedly been to try a siege, before testing the virtues of a rapid and desperate assault. In this campaign, there has certainly been no error of that species. A succession of what may almost be called obstinate attempts to carry the line of the Rapidan, preceded the long journey from the Rapidan to the Appomattax. Should any just criticism thereon be put forth, it would not be that the effort to sweep off the enemy by bloody charges, in the face of odds, was abandoned too soon. The whole history of the campaign shows its unshaken faith in the tenacity with which the Union commander hung to his original project of destroying his opponent, if possible, by heavy blows. After the failure of the *coup de main*, comes, as has been said, the slower process of the parallel and the siege. This, then, will account for the interval of rest at Petersburgh.

There are other reasons for the present lull in battle. The Army not being a machine, it would have become unmerciful to have hurled it longer against the enemy. In its leaders there never has been seen such nonchalance as that of the famous general who sacrificed some hundreds of men, that his guests might see what sort of a thing a skirmish was. Set apart from considerations of humanity, there was a necessity for delay in the very condition of the troops. The medical and commissary department had been well conducted, but it is not too much to say that the troops were thoroughly worn out. While their spirit and enthusiasm were, and always have been, beyond all praise, the fatigues of the campaign for a time had been overpowering. Officers experienced its effects as well as men. Their conspicuous bravery had stretched out, dead or wounded, commissioned officers of all grades, not by hundreds, but by thousands, before the James was crossed. The effect was apparent in some want of skill and prudence in succeeding battles. Captains were sometimes commanding regiments, and majors, brigades. The men, missing the familiar forms and voices that had led them to the charge, would complain that they had not their old officers to follow. On the other hand, more than one leader of a storming party was forced to say, as he came back from the successful storming against the outworks of Petersburgh, "My men do not charge as they did thirty days ago." A few commanders, too, showed the fatiguing effects of the campaign by a lack of health, by a lack of unity and harmony, or of alertness and skill. The last attacks on Petersburg show clearly how the campaign was telling on men and officers, and the two achievements on the Jerusalem road of the 22d and 23d of June, put the matter beyond all doubt. On the former occasion, the gallant Second corps, whose reputation is unexcelled, fell back, division after division, from the enemy's onset, and not a single whole brigade in the whole army was captured, with hardly a shot fired. In our account at that time, the probable cause of the disaster was intimated. But when, in addition to this, the Vermont brigade of the Sixth corps was badly cut up on the following, it day became clear that the rapidity of the fighting must be checked awhile. The pace was not too great. There was need of rest, recruitment, and some reorganization. It may be added, that the influx of raw troops and of AUGUR'S troops from Washington, with new officers, had temporarily changed the character of brigades, of divisions, and almost of corps. These affairs of the 22d and 23d of June were the last offensive movements of infantry in force.

But the new aspect which the campaign assumed at Petersburgh, led us to look for new measures. The enemy had reached his capital, and what might almost be called a two-fold objective had been reduced to simplicity, as, also, the co-operative attacking column under BUTLER was united with the main Army under MEADE. The problem was, and still is, to cut the communication of the city and its great outlying camp. It is a great task, but one already progressing, though hitherto with but partial success. Hence the two cavalry raids, the one north of the James, and the other on the Danville railroad. Hence also the unhappy movement on Lynchburgh. Mounted men were in the main to be relied on, from the necessity of celerity; and accordingly the main Army is found at ease in the its trenches, making its position impregnable, and daily pushing forward heavier armaments with which to bombard the city. The enemy would naturally attempt diversions like the Maryland raid, which latter, however, neither made nor marred essentially the present position of forces and plan of campaign. Some counter-attacks on our lines at Petersburgh would also naturally be attempted, and will be looked for. In this case, the excellent watchfulness and facile communications of the besieging army will be of service. Lastly, it is difficult to see why the repossession of the Shenandoah Valley should not become one of the very first efforts of the campaign. Moreover, if the movement on Lynchburg was, as it appeared, an essential element in the main plan, it would appear that a new movement is more formidable and more successful, would be directed against that point at the earliest day practicable.

THE DRAFT.

THE President's call for more men to swell the Armies of the Republic has been received in the main with favorable acquiescence. Undeniably there are some signs of disapproval, but these have taken no definite shape; while the numerous opposite manifestations are creditable to the nation. When the campaign opened, no further draft during this year was generally anticipated, as all our preparations had been thought complete. But as soon as its incipient movements disclosed its vast, and probably decisive, character, the question of reserves and reserves immediately came up. When, in addition, the comparative strength of the enemy was found greater than had been reckoned, it was arithmetically clear, that, if GRANT proceeded on his original plan, another draft at the North was not far distaft. While the campaign in this regard may be said to have exhausted its preliminary resources, when securing its object, it may also claim to have exposed to the people how great this task is which they have undertaken to perform. The new call, then, is justifiable on the simple ground of necessity.

But the *morale* of calling out a fresh draft is equally to its justification. Every soldier knows how inspiring the knowledge of reinforcements is in the crisis of battle, and how dispiriting that knowledge is to his opponent. The discouragement which will ensue to the Confederacy, and the cheering effect on our men, will be obvious. The new draft also shows our determination and sincerity. It will try our people more severely than any of its predecessors, for the volunteers are vast, and there is to be no commutation. We shall deserve to win back the integrity of the Republic.

The term of enlistment on drafts is one year. Short terms have always been mistakes. The first call for three months troops was a great error, but an expedient in a crisis. The nine-months troops were useful, but their time had better have been made longer, an that the work of two campaigns might have been done by them, instead of one. Besides, they were discharged soon after being trained to usefulness as soldiers. The majority, probably, would have volunteered for 12 or 15 months as quickly as for 9. So now, 15 months even would have been a better term of service than 12. The first part of a recruit's term is wasted in learning his duty—in learning how to be a soldier. This draft, however, looking both at the time and the numbers, is better than the previous organization that the war will be ended in 52 weeks, if at all. For its numbers are are so vast as to cause no little complaint at a future day, should 500,000 troops be so badly economized as not to substantially break an opponent whose armies we outnumber now. But it is usually unsafe to speculate on time in such matters, as sad experience has taught. Our belief is that the Army of the Potomac was as large at the outset as its commander required. But every army is certain of some diminution, even if it loll in garrison the year round; and obviously of far greater in a campaign like the present. What is wanted is to keep the ranks constantly full. The great an army is unwieldy. With good generalship, reinforcement up to the point of easy and skillful handling, is all that is needed.

Our future reinforcements should be applied steadily, and in such numbers as may be called for—not in a sudden rush of a new and raw levy of immense numbers. It is not the vulgar error of a million six months men, or of "every able-bodied man in the "country" that is going to crush the Rebellion by

dead weight. It is rather reluctantly filling up the Army to that level of utility which its commander has discovered. For such a purpose, men may be wanted, not perhaps all within a few months, but at all times until the Rebellion is over.

It is fortunately true, however, that, under the operation of the draft, many volunteers for three years will be secured. It is beginning also to be evident that the "summer campaign" will be made a wiater campaign as well, if necessary, that it will have no close without a decisive result. There may be intervals of rest, and diversions here and there, but the Army has gone to Richmond for no purpose, and with no dream, but to take the city, be it next month or next year.

THE MONITOR QUESTION.

CAPTAIN ERICSSON has introduced, at a proper time, the important question of the real merits of the class of Iron-clads known as Monitors. These ships have now had abundant time to prove their qualities in actual service; the public has waited with creditable patience for the results, and we are glad that Captain ERICSSON, to whose ingenuity and genius we are indebted for these vessels, has seen it proper to open the question of their merits himself, by his letters to different journals, in reply, as he says, to a number of correspondents.

Whether the Monitors combine in greatest perfection the qualities needed in an iron-clad ship of war, is rendered not only a proper but a very important question, by the fact that they are the only kind of iron-clad ships built by us, with the exception of the *New Ironsides*, and the armored steamers constructed for a peculiar service on the Western rivers. If the Monitors are the best, then we are very comfortably off, for we have a numerous fleet of them; if, on the other hand, they lack some of the qualities which are required to make such ships efficient and trustworthy, then we ought to know it, in order to remedy their defects, if that is possible, or to build no more of their kind, if the defects are inherent and unavoidable. A question of such gravity ought to be treated carefully, and with knowledge.

The present state of the dispute between CAPTAIN ERICSSON and those who believe that the Monitors are inefficient ships, is as follows:—Captain ERICSSON asserts that his ships are seaworthy; his opponents say that two of them have sunk. He replies that the *Dictator* class will not sink; they answer that these have not been tried. They charge that the Monitors lack speed; he replies that when their bottoms are clean they will steam eight statute miles per hour, for which they rejoin that their bottom cannot be kept clean without very great trouble, and that the actual speed attained on service does not exceed, on the average, four knots. He asserts that they are well ventilated; they reply that in action and in heavy weather they are so close that the men and officers suffer. Captain ERICSSON calls them an impregnable fleet; but his opponents reply, if so, why do they not prove it by going into Charleston or Mobile? He says the obstructions prevent; but one of the daily papers, the *Evening Post*, asserts that the land forces near Charleston effected to remove the obstructions, but were forbidden by the commander of the Monitors. Finally, Captain ERICSSON says they are excellent for harbor defence; to which his opponents reply that forts are as effective and cheaper, and that the Monitors were not built to defend but to attack harbors.

It appears to us that the disputants disagree, because one, Captain ERICSSON, is describing a theoretical Monitor, the others are considering its practical use and availability. But however sound the theory may be, if the ships built in accordance with it do not perform the task or answer the purpose for which they are made, they must be held to have failed. Now, what are the facts? The first Monitor, in a battle with the very rudely contrived *Merrimac*, drove her back into Norfolk; but one did not follow her into that harbor, and thus the fruits of her success were lost. The *Weehawken* captured the *Atlanta*, but the prize was so little injured that she was towed into Port Royal and sent North with very little repair. We believe her machinery got out of order at the beginning of the action and she became unmanageable, and was thus forced to surrender. In the trial on the Ogeechee the guns of a land battery were able to do considerable damage to the Monitor engaged. The attack on the fortifications of Charleston, was, however, the first complete trial to which these ships were exposed. There they failed. If that trial was not conclusive, as to their powers, why have fifteen months passed without another trial either there, or against some other of the Rebel ports? This is the question which practical men, anxious only to see the work done, and ready to praise whatever kind of ship does it, ask.

In discussing the merits of the Monitors, however, the most important witnesses are those who have handled them under fire. It has, we are aware, been hinted, that many officers are prejudiced against these ships; but they officers are patriotic gentlemen; they are ambitious to win victories; and such a charge is not to be lightly brought against such men. What do they say in their official reports? Commander JEFFERS wrote, officially, in regard to the turret system, "protecting the guns and gunners does not, except in special cases compensate for the greatly diminished quantity of artillery, slow speed, and inferior accuracy of fire." Admiral DU PONT reports that though not one of his fleet was under fire over forty minutes, yet "five of the iron-clads were "wholly or partially disabled, and that too in that "which was most essential to our success, I mean "their armament in point of individual injury by "their guns." Captains DRAYTON and JOHN ROGERS and Commanders AMMEN, GEORGE W. RODGERS, FAIRFAX, and DOWNES, unite in a report that "it had "been proved"—in the attack on Charleston, "that "any very heavy blow on the turret was very apt to "disorder and stop it;" and that "the very slow fire "possible from the guns, and the fact that to "be effective against stone walls, it must be brought "so near as to take away from the impenetrable character of the iron-clads," constituted important points of weakness. Admiral DUPONT reports, again, that "with even their diminished surface, they are not in "vulnerable, and their various mechanical contrivances for working their turrets and guns are so liable "to immediate derangement that to the brief, though "fierce engagement at Charleston, five out of eight "were disabled."

Now, the gist of the whole matter appears to us to be this: The Monitors have, of necessity, few guns, and therefore, as compared with the land batteries, which they are to engage, slight offensive power. Their guns, however, are of extraordinary power, and if they could be applied for a sufficient time, would no doubt be effective. The problem, therefore, was, to make these ships so entirely shot-proof, that they could take their time in attacking; that they could receive any reasonable amount of pummelling unhurt, and meantime make their tremendous shot tell. Into such a problem, the question of speed did not enter; and Captain ERICSSON rightly, as we think, paid little attention to it. Everything depended upon their invulnerability; the vital point was that they should be able to sustain an enemy's fire uninjured, and this was clearly Captain ERICSSON's own thought; and therefore he placed the battery in a turret made immensely strong, and depressed the hull of the ship to near the water's edge.

If the monitors had proven themselves shot-proof they could not have mattered but little. It would have been of no consequence whether they steamed four or eight knots. They would have done their work thoroughly, and no artillery now used could have withstood their slow, ponderous hammering. But unluckily, it is on this vital point that their success is questioned.

The *Military Gazette*, of Darmstadt, gives details of the organization of the Swedish Army. This army is composed of enrolled men, licentiates, and conscripts, and also of the militia of the island of Gothland. The enrolled men are held for six years in service, and are composed of the following sections: Two regiments of infantry guards, each consisting of two battalions or eight companies; a regiment of chasseurs, of six companies; a regiment of horse guards, of four squadrons; the regiment of the hussars of Charles XV., of six squadrons; three regiments of artillery, including the artillery of Swea, with 6 horse batteries and one foot battery, and the artillery of Gothe, with 6 horse batteries, and the artillery of Wend, with 4 horse batteries. The licentiate troops are composed of citizens obliged to serve, and to whom is given a piece of ground of a certain size, with other pay in money, &c. The officers have a similar compensation, greater in value. These troops are called out for drill once a year, and afterwards return to their land, and work there if they please, or if want compels them. But otherwise they do not, for the proprietary or the State is compelled to bear the burden of the work done for them. There is no permanent *cadre* for these troops, as it would be superfluous, since they are obliged to serve for life. The service commences at youth and continues to old age. The militia of Gothland is composed of twenty-one companies, held only to the defence of the island. All Swedes from twenty to twenty-five belong to the class of conscripts. The whole Swedish force is reckoned as follows: The infantry guard at 1,800 men; the cavalry guard, 450; the artillery, the regiment of chasseurs and the licentiate at 24,000 infantry and 4,450 cavalry, the artillery at 3,350 men and 176 pieces, the engineers 1,180, and the train, 4,667. The militia of Gothland ought to number 8,500 men, as this would be only about a sixth part of the population, reckoning the latter at about 50,000. The conscription should furnish the government with 70,950 infantry, 3,700 cavalry, and 1,700 artillery. The *Spectateur Militaire* says that if you add to the sum total of 76,410 men between twenty and twenty-five years, the figure of 10,000 marines of the same age and 16,686 men of the first reserve, you will find something more or less in arithmetic, for it is evident that a population of 3,856,886 Swedes, men, women, children and old men, is not in condition to put under arms 86,410 men from twenty to twenty-five years. Accordingly, if the Swedish army can be armed, in case of effort, to 120,000 men, it will be very remarkable, since, besides the army, Sweden has always outside the country 15,000 men upon its merchant ships. Hence a greater effort would be ruinous to the country and exhaust its men and money.

At No. 161 Broadway, New York, may be seen the models of a novel style of ocean iron-clad, the invention of Captain WALKER, formerly of the merchant marine, and an experienced naval architect. Captain WALKER's plans combine the essential elements of speed, buoyancy and seaworthiness, to so unusual a degree that, though slow to commit ourselves to untried ideas, we cannot hesitate to commend his projects to the careful consideration of all who are interested in the improvement of the navy. The inventions claimed by Captain WALKER, are: *First*, a double concave bottom which, displacing water near the surface insures straight lines and consequently greater speed and buoyancy. *Second*, a direct and inverted arch, under which trans-ocean steamers, through the centre of the vessel, thereby securing immense strength without occupying more room than in the usual plan of ship-building. Other advantages are claimed by Captain WALKER, such as an oval deck, exhibiting no tangible point of resistance, a turret, so arranged as to revolve on itself, and at the same time admitting of the rotation within it, of a turntable supporting the guns. The arrangement of pilot-houses, so as to be raised or lowered at will, the system of ventilation, are matters, too, worthy of attention. Our own impression of the excellence of Captain WALKER's plans coincides with those of such of our naval officers as have investigated them.

FROM information lately received, in regard to the manner of General WADSWORTH's death, it appears that when wounded he remained after the battle within the Rebel line. He was taken to the house of Mrs. KRAMER, in Parker's Store, at the Oak Grove or Oak Run Church, where his wound was dressed. He had been struck by a rifle-ball in the top and back of the head, the ball breaking the superior part of the occipital bone. The Rebel surgeons treated him with marked attention and ministered to him as faithfully as if he had been one of their own officers. He never spoke after being wounded. In his hands he held a crumpled piece of paper bearing his name and rank; when any one asked for it he gave it willingly, but when it was returned he closed his fingers tightly upon it. Food was given him, but he could not swallow even milk. When he died, a patriotic Irishman, named PATRICK MCCRACKEN, procured a coffin at his personal expense, and buried the General in his uniform.

COLONEL DANIEL MCCOOK (Actiog Brigadier), of the fighting McCook family of Ohio, has died at Cincinnati, of wounds received at the battle of Kenesaw Mountain while charging the earthworks. He is the fourth of the McCook family who have been killed since the Rebellion—the father and three sons—all of whom have been killed or died in the month of July!

MAJOR THOMAS L. CASEY, son of Major-General CASEY, and Lieutenant SMITH, who have been employed upon the fortifications of Baltimore, have been ordered to report for duty in the field at Washington.

FOREIGN MILITARY AND NAVAL MATTERS.

ONE-half of the official income of the late Duke of Malakoff is to be continued, by order of the Emperor, to his only child, a girl of five years old.

A SILVER trumpet was recently sent by the King of Prussia to the regiment which displayed the greatest bravery in the assault on Duppel. It was awarded to the 25th Regiment of the line.

THE British Navy and then get a taste of prize money from the "tonnage bounty" allowed for the capture of slavers. The crew of H. M. S. *Zebra* have recently shared in the proceeds of a single capture.

IT would seem that the proposition to furnish SEMMES with a new sword "has not met with any encouragement from those intelligent naval leaders whose names would have gilded the present with standard value."

THE Fourth Annual Military Rifle Match, open to all officers and men of the British Army, took place at Aldershot, June 27–29, the entertainment being varied with a sham fight in which the mock enemy were, of course, badly worsted.

THERE has been a subscription opened in Denmark for the widows, orphans and wounded of the war, which produced in a single day, at Copenhagen alone, over 30,000 rix dollars. The king put down his name for 12,000 francs a year through a term of ten years.

Two boarding-house keepers—one in Liverpool and the other in London—have been committed for trial on charges of having violated the foreign enlistment act, by engaging men for service on board the Rebel steamers *Georgia* and *Rappahannock*. Both prisoners have been admitted to bail.

GENERAL SIR ROBERT WILLIAM GARDINER, G.C.B., K.C.H., Colonel-Commandant of the 8 Brigade, Royal Horse Artillery, died at Bath on the June in his 84th year. He served as an artillery officer under WELLINGTON and SIR JOHN MOORE in the Peninsula War. He was also present at the battle of Waterloo.

THE Chilean newspapers give full accounts of the repulse of the Arabo-Saxon contingent under Colonel GORDON in Peru, on the 2d of May. The fighting was severe. In the assault no fewer than six European officers were killed and twenty-one wounded. The officers did all of the fighting when the storming was to be carried out.

THE British "Good-Service Pension" of £300 per annum, vacant by the demise of Admiral Sir THOMAS FARNHAM, K.C.B., has been conferred on Sir PROVO WALLIS, who assisted as Second Lieutenant on board the *Shannon* in the capture of the American frigate *Chesapeake* during the assault of the latter in the engagement falling upon him after the disabling of both of his superior officers.

A WAR Office return shows that there are in British North America, New Zealand, and the Cape (not reckoning men ordered home and not to be replaced), 16,000 men, and two of the finest corps, brave as the strength of the Imperial army.

THE increasing difficulties experienced in working heavy guns upon the old carriages and slides, have introduced the British Admiralty to have a wrought-iron carriage and slide constructed in the Arsenal upon the principle of Commander SCORR, R.N., who in 1862 proposed the mounting and working of guns from 12 to 20 tons weight upon the broadside, and designed a frigate to carry them in a central battery.

THE great iron company of Marseilles has just completed, at their yard at La Seyne, on the Mediterranean, an iron-plated steam gunboat on a new model. It has already been tried, and the result was most satisfactory. It may be easily separated into three distinct parts, and each of these forms a small boat, which may travel over land or navigate the sea with great facility. The combined, when done, accomplish the same in time. When taken to pieces a whole fleet of gunboats may be moved from one place to another by railway at the rate of thirty miles an hour.

THE *Triester Zeitung* gives a statement as to the performances of the Austrian fleet on its way from the Adriatic to the Baltic. The fleet consisted of the steam line-of-battle ship *Kaiser*, the steam frigate *Elizabeth* and the iron-clad frigate *Don John*, all of them noble ships of their respective classes, well appointed, well officered and well manned. They were hardly got out to sea before a strange and appalling calamity fell upon them. The crew of the *Kaiser*, with the exception of about a hundred men, were suddenly taken *sea sick*—and continued in this state for many days. The engineers were unable to work their engines, the men could not be kept on deck. The

were required to be "thoroughly scoured," it was meant that every part of the bracing should have a straight equivalent to that here given. The bracing on the arm was not intended to extend to the ring of only the same cross section as the brace. The committee are therefore of the opinion that the latter was not braced according to the specification, and that this difference was the cause of the disaster.

In conclusion, the committee would respectfully call attention to the fact, that in the system of bracing required by the specifications, by far the weakest point is the attachment of the brace to the T bars. When the bolt hole for the upper end of the brace is made in the vertical rib of the T bar, there is left only a small amount of metal on the strain for which the brace is calculated. There should be at least 2 inches of it, both above and below the bolt hole, and this will be found entirely unobjectionable in practice. In the letter of the Chevalier, the dimensions were 2¼ by 2¾, in place of 2 by 3 inches, as required by the specification.

All of which is respectfully submitted.

JOHN F. FRAZER,
LEWIS M. HASKINS,
FARNHAM RODGERS.

ARMY GAZETTE

[OFFICIAL.]

BY THE PRESIDENT OF THE UNITED STATES OF AMERICA
A PROCLAMATION.

WHEREAS, By the act approved July 4, 1864, entitled "An act further to regulate and provide for the enrolling and calling out the national forces and for other purposes," it is provided that the President of the United States may, "at his discretion, assign to any brevet officer, not for a number of men, as volunteers, for the respective term of one, two, and three years in the military service, and may in like manner assign to any part thereof, of any town, township, or ward of a city, precinct, or election district of a subdivision of a county authorized by this act, from within the space of sixty days after such call, then the President shall quantity or deficiency of the quota of such town, or any part thereof, which may be unfilled:"

And whereas it is the excellent heretofore ordered it as for completion as that the aforementioned act of Congress may now be put in operation, for effecting the said call, and for securing the object of the same; and, for garrison, and such military operations as may be required for the purpose of suppressing the existing rebellion against the authority of the United States, and of enforcing the due execution of the laws:

Now, therefore, I, ABRAHAM LINCOLN, President of the United States, do hereby call upon the several States for the quotas respectively due from them under the said call, hereinbefore specified, and which may correct, provided, nevertheless, that the same shall be reduced by all credits which may be established under section 8 of the said act, on account of persons who have entered the naval service during the present rebellion, and credits for men who have been accepted for service in excess of calls heretofore made.

Volunteers will be received under this call for one, two, or three years, as they may elect, and will be entitled to the bounty provided by the law for the period of service for which they enlist.

And I hereby proclaim, order, and direct that immediately after the 5th day of September, 1864, being the day next after the time of the said draft, for troops to serve for one year shall be had in every town, township, ward of a city, precinct, or election district, or county not a subdivision, as the quota which shall be assigned to it under this call, or any part thereof, by then remaining unfilled by volunteers on the said 5th day of September, 1864.

In testimony whereof, I have hereunto set my hand and caused the seal of the United States to be affixed.

Done at the city of Washington, this fifteenth day of July, in the [L. S.] year of our Lord one thousand eight hundred and sixty-four, and of the Independence of the United States the eighty-ninth.

ABRAHAM LINCOLN.

By the President:
WILLIAM H. SEWARD, Secretary of State.

DISMISSALS

For the week ending July 9, 1864.

Major D. C. Howard, 33d Ohio Volts., to date July 5, 1864, for absence without leave. Major Howard is willing to report for duty at once, so as to keep the commanding officer thereof advised of his whereabouts.

Captain William Gerlaugh, 42nd Missouri Volts., to date July 2, 1864, for disobedience of orders, conduct to the prejudice of good order, unbecoming an officer and gentleman.

Captain D. B. Hall, 1st Tennessee cavalry, to date July 5, 1864, for treachery and cowardice.

Captain Thomas Sparrow, 7th Iowa veteran Volts., to date July 7, 1864, for habitual drunkenness.

Captain Alfred Parmeter, 12th Kansas Volts., to date July 7, 1864, for habitual drunkenness.

Captain M. Wigle, 2d Pennsylvania cavalry, to date July 5, 1864, for having tendered his resignation based on surgeon's certificate, especially as he is a confirmed invalid.

First Lieutenant C. J. Ball, 11th United States infantry, to date January 16, 1864, for habitual drunkenness.

First Lieutenant C. J. Chenfield, 32th New York battery, to date July 7, 1864, for conduct unbecoming an officer and gentleman, as set forth in the charges and specifications, on file in the War Department.

First Lieutenant J. Hank, 20th Indiana Vols., to date June 30, 1864, for absence without leave.

Second Lieutenant Charles McLean, 39th New York Vols., to date July 7, 1864, for absence without leave, and failing to file the necessary papers required by the regulations of the War Department.

Second Lieutenant Wm. Hall, 2d Iowa Vols., to date May 30, 1864, for misbehavior while his command was in front of the enemy, in failing both to encourage his men and to set them a proper example, and without orders.

The following officers of the 2d Pennsylvania Vols., to date July 14, 1864, for making application, after having availed themselves of the veteran furlough granted their regiment, their commands at the time being in the presence of the enemy:

Colonel William Sinclair, Lieutenant-Colonel Hall, Captain William J. Byers, and First Lieutenant Joseph Magruder.

DISMISSALS CONFIRMED.

The orders heretofore issued dismissing the following officers have been confirmed:—

Captain Thomas Dunlap, Jr., 29th Connecticut (colored) Vols., to date June 23, 1864, for being too drunk to attend the court ordered for his trial on the charges preferred.

First Lieutenant John George Hiller, 4th United States colored cavalry, and First Lieutenant Charles Hall, 4th United States colored cavalry, for having tendered their resignations while under charges, and trial by court-martial pending.

First Lieutenant Thomas L. Boon, 7th Ohio veteran Vols., for deserting his command while on detached service near Round Mountain, June 10, 1864, for drunkenness, and conduct unbecoming an officer and gentleman.

DISMISSALS REVOKED.

The orders of dismissal heretofore issued in the following cases have been revoked:—

Colonel Lewis M. Peck, 2d New York Vols., and he is restored to the army and to his command.

The order of dismissal of Captain A. M. Pollard, 2th Ohio Vols., is revoked, nevertheless, that he is to be honorably discharged the service in excess of calls heretofore made.

Volunteers will be received under this call for one, two, or three years, as they may elect, and will be entitled to the bounty provided by the law for the period of service for which they enlist.

And I hereby proclaim, order, and direct that immediately after the 5th day of September, 1864, being the day next after the time of the said draft, for troops to serve for one year shall be had in every town, township, ward of a city, precinct, or election district, or county not a subdivision, as the quota which shall be assigned to it under this call, or any part thereof, then remaining unfilled by volunteers on the said 5th day of September, 1864.

In testimony whereof, I have hereunto set my hand and caused the seal of the United States to be affixed.

Done at the city of Washington, this fifteenth day of July, in the [L. S.] year of our Lord one thousand eight hundred and sixty-four, and of the Independence of the United States the eighty-ninth.

ABRAHAM LINCOLN.

By the President:
WILLIAM H. SEWARD, Secretary of State.

DISMISSALS

For the week ending July 9, 1864.

Major D. C. Howard, 33d Ohio Volts., to date July 5, 1864, for absence without leave. Major Howard is willing to report for duty at once, so as to keep the commanding officer thereof advised of his whereabouts.

Captain William Gerlaugh, 42nd Missouri Volts., to date July 2, 1864, for disobedience of orders, conduct to the prejudice of good order, unbecoming an officer and gentleman.

Captain D. B. Hall, 1st Tennessee cavalry, to date July 5, 1864, for treachery and cowardice.

Captain Thomas Sparrow, 7th Iowa veteran Vols., to date July 7, 1864, for habitual drunkenness.

Captain Alfred Parmeter, 12th Kansas Vols

battery, for embarking Government property, enlisting, enlisting men in the United States service belonging to other commands, making false returns, and making false muster rolls; refused to the United States the sum of $20 00, and he resigned.

2d Lieut. Lambert Boeman, 1st New York Volunteers, for receiving stolen goods, and conduct unbecoming an officer and a gentleman, with the loss of all pay and emoluments now due and to forever hereafter disqualified from holding any office of trust or profit under the Government of the United States.

First Lieutenant Allen A. Bishop, 115th Ohio Volunteers, for misbehavior before the enemy, and for being disqualified from holding any office of trust or profit under the Government of the United States, and he is hereby dismissed the service. Appointment of 2d Lieut. Lieutenant Allen A. Bishop, to publish the order and charges against him in the Army Gazette, and in the Cincinnati Commercial, for the information of the Ohio, and also in the Cincinnati Gazette, for the information of the Ohio.

Second Lieutenant Joseph Hall, 1st Florida Cavalry, Commissary of Musters of the Department of the South, for drunkenness on duty.

Second Lieutenant John O. Dawes, 2d Louisiana Mounted Infantry, for conduct unbecoming an officer and a gentleman.

Captain Joshua F. Reynolds, 9th Regiment, Pennsylvania Reserve Volunteers, for drunkenness on duty and conduct prejudicial to good order and military discipline.

Captain John Hoffman, 1st Pennsylvania Volunteers, for drunkenness on duty and conduct prejudicial to good order and military discipline.

First Lieutenant Andrew B. Smith, 45th Pennsylvania Volunteers, for misbehavior before the enemy.

Second Lieutenant Bartholomew Cronin, 82d New York Volunteers, for drunkenness on duty.

Assistant Surgeon John H. McCullough, 63d New York Volunteers, for drunkenness on duty.

First Lieutenant Thomas S. Pickens, 1st Tennessee Cavalry, for drunkenness on duty.

Captain John McMillan, 2d Regiment, Pennsylvania Reserve Volunteers, and Provost Marshal Seventh Army Corps, for drunkenness, and conduct unbecoming an officer and a gentleman, and conduct prejudicial to good order and military discipline, and conduct unbecoming an officer and a gentleman.

Captain Charles Ashton, 1st Kentucky Cavalry, United States Volunteers, for neglect and violation of duty, to the prejudice of good order and military discipline in front of a court-martial, and for drunkenness on duty.

Second Lieutenant Peter Ickler, 32 United States Cavalry, for being drunk on guard.

Second Lieutenant James Sweeney, 46th New York volunteers, for drunkenness on duty, and conduct prejudicial to good order and military discipline during his incarceration.

TO BE DISHONORABLY REMISSED.

The following officers to be dishonorably dismissed the military service of the United States:

First Lieutenant Thomas Barber, 39th Kentucky cavalry, for absenting himself from his company without leave, and remaining in gross and sinful disobedience of orders, encouraging desertion and disobedience of orders, and conduct unbecoming an officer and gentleman.

Captain Clinton Jeffers, 14th Virginia volunteers, for neglect of duty and misbehavior in front of a court-martial, and for violation of the article of war; sentenced to be dishonorably dismissed the service, forfeiture, pay and allowances now due, and ordered that the sentence be published in the newspapers in and about the camp and of the State of West Virginia, and that he be severely reprimanded for his breach of arrest. In violation of the 77th article of war: found guilty, and sentenced as follows, viz:

Second Lieutenant Francis Wallenus, independent battalion, New York volunteers, for conduct unbecoming an officer and a gentleman; dismissed the service.

Captain Edward H. Stevens, 2d Wisconsin cavalry, for violation of the 9th section of an act "to suppress insurrection and for other purposes," approved July 17, 1862, in a manner toward the President of the United States, and sentenced that he be dismissed from the service, and forfeiture of pay and allowances now due, but upon the recommendation of his commanding general the President has remitted the aforesaid punishment.

First Lieutenant Edmund T. Hyatt, 42d and 38th Missouri volunteers, for violation of the 9th section of an act "to suppress insurrection, and disobeying the orders of the President of the United States," and conduct prejudicial to good order and military discipline.

First Lieutenant Charles Hoffman, 11th Indiana cavalry, for infantry, drunkenness, and conduct unbecoming an officer and a gentleman; with the loss of all pay and allowances now due, and to serve without the department under guard, and be not allowed to enter upon duty during the war.

First Lieutenant William S. Spriggs, 116th Ohio volunteer infantry, for absence without leave, drunkenness and disobedience of orders of his commanding officer, and conduct unbecoming an officer and a gentleman; to forfeit all pay and allowances.

Captain Edward P. Hall, 4th Kentucky cavalry, for disobedience of orders, misbehavior before the enemy, and conduct to the great prejudice of good order and military discipline; to forfeit all pay and allowances, and to be forever disqualified from holding any office in the military service of the United States.

Second Lieutenant George J. Geiser, 1st Pennsylvania reserve volunteers, for drunkenness and insubordinate conduct in the commanding officer, and conduct unbecoming an officer and a gentleman; with the loss of all pay and allowances.

OTHER SENTENCES.

Joseph A. Kerrigan, Evansburg company, U. S. volunteers, for violation of recruiting regulations, to be forever disqualified from holding any office of emolument under the United States Government.

Captain J. C. Hall, 1st Regiment Kentucky United States volunteers, for appropriation of public property and neglect of duty; to be suspended from rank and pay for one month, and to be reduced for the term of one year.

Major Andrew J. Hill, 16th regiment Corps d'Afrique, for conduct unbecoming an officer and a gentleman, and conduct prejudicial to good order and military discipline, and disobedience of orders; to forfeit all pay and allowances now due or that may become due him, to be publicly reprimanded in front of each regiment of the brigade of colored troops at Port Hudson, La., or such portion of them as can be assembled conveniently for the purpose, and to be dismissed as a consolidated battalion on the 1st January, or such other place as the commanding general of the department may direct, for the term of one year.

Second Lieutenant Joseph A. Brawner, 4th Missouri Infantry, for misbehavior before the enemy and absence without leave, to forfeit all pay and emoluments now due or that may become due him, to be dismissed the service, and to forever be disqualified from holding any office of trust or profit under the United States.

Captain William Shelesby, 5th Ohio Volunteers, for absence without leave and disobedience of orders, conduct to the great military discipline, and to forfeit one month's pay and allowances.

Captain Hiram Hall, 116th Ohio volunteer infantry, for conduct prejudicial to good order and military discipline; to be suspended from rank and pay for one month, and to be reduced for the term of one year.

Captain Isaac Potts, 2d Infantry, California Volunteers, for conduct to the great prejudice of good order and military discipline; to be suspended from rank and pay proper, viz., $60 per month, for the period of three months.

First Lieutenant Cyrus D. Clark, 2d Cavalry, Colorado Volunteers, for drunkenness on duty, to the great prejudice of good military discipline, and to be reprimanded in General Orders by the Department Commander.

Captain W. T. Davis, 6th Ohio volunteers, for conduct prejudicial to good order and military discipline; to be suspended from rank and pay for two months, with loss of all pay and allowances during that period of time.

Captain Joseph H. Burnum, 16th Connecticut volunteers, for conduct prejudicial to good order and military discipline; to be suspended from rank and pay proper, viz., $60 per month, for the period of three months.

First Lieutenant Cyrus D. Clark, 2d Cavalry, Colorado Volunteers, for drunkenness on duty, to the great prejudice of good military discipline, and to be reprimanded in General Orders by the Department Commander.

Captain W. T. Davis, 6th Ohio volunteers, for conduct prejudicial to good order and military discipline; to be suspended from rank and pay for two months, with loss of all pay and allowances during that period of time.

Captain Joseph H. Burnum, 16th Connecticut volunteers, for absence without leave; to forfeit to the United States his pay and emoluments for ten days.

Second Lieutenant Edward G. Tuttle, 1st Massachusetts volunteers, for absence without leave; to forfeit all pay and allowances during the time he was absent without leave, and to be publicly reprimanded by the commanding officer of the regiment.

First Lieutenant Simon P. Currier, 5th company unattached heavy artillery, Massachusetts volunteers, for absence without leave; to be reprimanded by the commanding officer of the post, and to forfeit one month's pay.

NAVY GAZETTE.

FLAGSHIP NORTH ATLANTIC BLOCKADING SQUADRON, }
OFF NEW YORK, July 16, 1864. }

To the Hon. GIDEON WELLES, Secretary of the Navy:

SIR:—Captain M. Smith reports, under date of the 12th instant, that he sent in the *Stepping Stone* on the 10th instant a detachment of 30 men, under Acting Master's Mate Charles Hall, to assist the 10th Connecticut volunteers, in charge of First Lieutenant M. Chesebrough, Jr., Fenwick's battery, to go inland to the James River, below Dutch Gap, silence the guns erected there, and then burned the signal station, the mills, two forts, a blockhouse, a shop and outbuildings, and a large quantity of grain and agricultural implements, capturing one lieutenant and 15 men, and bringing off the arms with ammunition and accoutrements complete. Also, a large torpedo with clock work attachment, the latter being destroyed, and the former containing 200 pounds of powder. The whole was accomplished without loss on our side. Also, a large quantity of cotton, tobacco, turpentine, &c., which are received, I will forward to the Bureau of Ordnance, with an explanation of the same.

I have the honor to be, &c.,
S. P. LEE,
Acting Rear-Admiral, North Atlantic Blockading Squadron.

Medical Cadet Henry Hall, U. S. A., is hereby honorably discharged the service of the United States, to enable him to enter into a contract with the United States Government as Acting Assistant Surgeon U. S. Army.

By an order of Special Orders No 219, June 23, 1864, from the War Department, Surgeon Reuben Ayer, Assistant Surgeon J. C. Shaw, 5th Missouri Cavalry, Artillery, is hereby revoked, he having been previously acquitted relieved from a Military Commission, of the charge of desertion and leave.

One attention has of this late day been called to the fact, that in the list of casualties among general officers, published in our Army Gazette of May 18th, the name of Brigadier General Berry Bobles was not accompanied by a sheriff have been, with the asterisk indicating that he was killed in action.

(Business Notice.)

A Card.—Owing to the enormous advance in the prices not only of the precious metals, but of every other commodity, I find it impossible to continue longer the sale of my PENS at old rates. This I regret exceedingly, as I had hoped to continue without change; but, having to buy gold at the present fabulous prices, this is no longer possible.

My friends and the public will give me credit, however, for having struggled long and hard against the universal pressure to depreciate the Government credit and currency. The advance now made is not enough to cover me, but only at present rates; I should in justice where it is, or go still higher. A further rise in prices must be made. In any case, however, I intend, as heretofore, to sell a better article for less money than is to be found in any other house.

A circular, with engravings of all the sizes, styles, and present prices will be sent on receipt of letter postage. Address

A. Morton,
No. 25 Maiden Lane, New York.

July 11, 1864.

Business Notice.

We notice that G. E. Herrand, of New Haven, Conn., is Agent for "Parker Gunpowder" paper, at $2.00 per year in advance—cheap enough. Try it a year.

PROPOSALS FOR

BUILDING AND EQUIPPING TWO FIRST CLASS AND TWO SECOND CLASS LIGHT-VESSELS.

Treasury Department, Office Light-House Board, Washington City, July 11, 1864.

Separate sealed proposals will be received at this office until 12 o'clock, on Saturday, the 13th of August, 1864, for building and equipping two first class lighting vessels of the following dimensions:

Length from after side of stem post to the fore side of main post, 100 feet; beam, 25 feet; moulded, 12 feet 6 inches; depth of hold from top of limber strake to top of beam, 10 feet 6 inches.

Also for building and equipping two second class lighting vessels of the following dimensions:

Length between perpendiculars, 91 feet 6 inches; beam, 24 feet; moulded, 11 feet 6 inches; depth of hold, from limber strake to top of beam, 10 feet 6 inches; tonnage about 350.

The vessels are to be of white oak planking and the yellow pine of the finest grain unexceptionable timber. The form of the vessels, upon which the vessels are to be constructed, and which will be furnished to the party to whom the contract is given for a part of the contracts, can be had on application to the Light-house Board, or to the Light-House Inspector at Portland, Boston, New York, or Philadelphia, at which places also, the plans and drawings may be seen and examined.

The Board reserves the right to reject any proposal, or to refuse to receive any vessel not built in accordance with the terms of the contract; and no contract will be considered binding until it shall have been approved by the Secretary of the Treasury. No proposal will be received or considered unless delivered from personal knowledge in said building, and each offer must be accompanied by the signatures of two responsible persons as guarantors for the faithful fulfilment of the contract.

The vessels are to be completed as specified, with the sum for which the bidder proposes to build and equip the same, according to the plans and specifications, and a copy of the printed specifications which he intends to offer, and to which he declares that there is no mistake as to the object of his proposal.

Persons making the above offer to which will be annexed to the contractor, to which he will be required to conform in the letter of the contract; and no contract will be considered binding until it shall have been approved by the Secretary of the Treasury. No proposal will be received or considered unless delivered from personal knowledge in said building, and each offer must be accompanied by the signatures of two responsible persons as guarantors for the faithful fulfilment of the contract.

The vessels are to be completed as specified, with the sum for which the bidder proposes to build and equip the same, according to the plans and specifications, and a copy of the printed specifications which he intends to offer, and to which he declares that there is no mistake as to the object of his proposal.

Persons making the above offer to which will be annexed to the contractor, to which he will be required to conform in the letter of the contract; and no contract will be considered binding until it shall have been approved by the Secretary of the Treasury.

The vessels are to be completed in the time specified by this Board, with the approval of the Secretary of the Treasury, and will be subject to the inspection of the work executed and the materials used are in strict conformity to the terms and specifications of the contract, and who must certify to the same in writing, before the vessels will be accepted and paid, authorized to be made.

Persons making proposals to build any of these light-vessels may suggest any change or alterations in the plans which they may deem advantageous in regard to materials, and in making such suggestions the proposer will state the additional cost, if any, to be incurred, with the amount saved thereby. The proposal herein invited will specify the time required to complete the vessel and deliver it to the agent of the Board, and the sum for which the bidder engages to do the same is named in the bid. All proposals must be sealed and indorsed "Proposals for building Lighthouses," and then enclosed in another envelope, and addressed to the undersigned, Light-house Board, Washington, D. C.

The Board is not considered that does not conform to the requirements of this advertisement.

Any person so desiring may have a copy be present and witness the opening of the bids at the time and place hereinbefore specified.

By order of the Light-house Board.

S. HIS LIVE OAK, Chairman.

PROPOSALS FOR TIMBER AND MATERIALS FOR THE NAVY.

NAVY DEPARTMENT,
BUREAU OF CONSTRUCTION AND REPAIR,
JUNE 30, 1864.

Sealed proposals for furnish Timber and Materials for the Navy, for the fiscal year ending June 30, 1865, will be received at the Bureau of Construction and Repair, until 10 o'clock of the 1st day of August next, at which time they will be opened in presence of bidders.

Proposals must be endorsed "Proposals for Timber and Materials for the Navy," that they may be distinguished from other business letters, and directed to the Chief of the Bureau of Construction and Repair.

The materials and articles embraced in the classes named in the printed schedule, and any of which will be required to be delivered at the Navy Yards under the respective yards, or to the Navy Agent nearest thereto, are as follows, viz.:

This division also embraces boring for the convenience of bidders in each, each classes only will be furnished at the Navy Yards under the respective yards, or to the Navy Agent nearest thereto, as may be required by the Bureau.

This division into classes being for the convenience of bidders in each, each classes only will be furnished at the Navy Yards under the respective yards, or to the Navy Agent nearest thereto, as may be required by the Bureau. In addition to the schedule of classes of their specialties, a copy of the schedules of the other yards will be furnished upon application to the Bureau, to the Commandant of any yard, or to any Navy Agent, the form of the specimens of timber and other materials required by the Bureau.

Offers must be made for the whole of the class of any yard, upon one of the printed schedules, or they will not be considered.

Upon application to the Bureau, to the Commandant of any yard, or to any Navy Agent, the form of the specimens of timber and other materials required by the Bureau.

The contractor will bear date the day the notification is given and whether he be deemed from the day of date.

Proposals in the full amounts will be required to sign the contract, and their responsibility certified to by a United States District Judge, United States District Attorney, Collector, or Navy Agent. As additional security, twenty per cent. will be withheld from the amount of the bills until the contracts shall have been completed, and eighty per cent. of such bills approved in triplicate by the Commandants of the respective yards to which they may be forwarded by the parties of delivery, in duplicate certificates, at the hands of the Government, within ten days after the shipment for the same shall have been passed by the Secretary of the Navy.

The following are the classes required at the respective Navy Yards, viz.:

Silas O. Hale, Secretary.

NEW MUSIC.—"THE DYING SOLDIER," and other excellent songs ever published:

Cheap.—Have you come to see your duding
Die upon the battle field.
"The Dying Soldier" is sad and lonely,
Have you come your boy to shield?

"The Black Horse Troop Mr. Motley," a very touching and beautiful song, suggested by seeing a little girl take the place of her father, who was dying as he rode another through the town, said, "This band of mine struck me, father."

The above songs are from the pen of the popular composer, Mr. Septimus Winner, of Philadelphia, author of "Where the Bee Sucks," "Whittier Polka," &c. Price 30 cents. Mailed free. HORACE WATERS, 333 Broadway, New York, Publisher.

DIARRHŒA DYSENTERY.
CHOLERA, CHOLERA MORBUS, &c.—
Certain and immediate relief. The well-established Diarrhœa Remedy has been used with unfailing success in the Chinese season of 1861, and its use does will usually check the Diarrhœa in a few hours, if struck in time.

THE CAMPAIGN IN VIRGINIA.

THE pursuit of the Maryland raiders was commenced on the 13th of July, rather cautiously, by the movement of a column from Washington under General WRIGHT, consisting of his Sixth corps and EMORY's division of the Nineteenth corps. General WRIGHT moved first to Poolesville, then crossed the Potomac just below Edward's Ferry and marched to Leesburgh, when, after a hard journey, General RICKETTS, who had moved later with a part of the force, joined him. Meanwhile, General CROOK, who had assumed SULLIVAN's former command, in addition to his own, at Hillsboro', sent DUFFIE's cavalry to Purcellville, near Leesburgh, not far from Snicker's Gap. DUFFIE came upon the enemy's trains and easily captured a part of one them, on the 17th, with some of the teamsters and the guard. The enemy had set fire to the train and partially destroyed it. CROOK coming up soon after, the enemy were driven through the Gap after a sharp fight; but they held the Ferry on the other side, across the Shenandoah, with two guns, and completely checked our pursuit. Next day, Monday, the 18th, WRIGHT's and CROOK's forces were all brought through the Gap, except DUFFIE's cavalry, which went farther north to Ashby's Gap, to guard it and prevent our being flanked on the right. The infantry crossed soon after noon, at Island Ford, two miles and a half below Snicker's Ferry, the 34th Massachusetts of Colonel WELLS's brigade leading, and driving the enemy before them. CROOK's men were soon all across and in line, with WELLS's brigade on the left and THORBURN's on the right, both engaging the enemy. General WRIGHT began soon crossing the Sixth corps, with the intention of massing on the right to meet the enemy's concentration in the same direction. The enemy, however, under BRECKINRIDGE, were already charging our line with violence, in face of a heavy fire from the batteries, and at length turned the right and drove it in some confusion across the Ford. Colonel WELLS, finding the right giving way, withdrew the left in good order. The troops were all recrossed again, and thus the day's work ended in misfortune. Meanwhile, DUFFIE, at Ashby's Gap, had a similar experience, driving the enemy under IMBODEN through the Gap and across the river, but then being in turn forced to retreat by the enemy, who, as at Island Ford, had turned back in force, on finding their rear attacked. Our loss at the latter point was about 300, including three Colonels. At Ashby's Gap, the loss was reported at about 200. Some of our wounded were left in the hands of the enemy at each point, on the retreat.

The enemy, having checked us on our first attempt to harass him, now leisurely pursued his journey in the Valley towards Winchester and Strasburgh. News being brought of his march, our forces crossed the Shenandoah. They soon halted, however, recrossed the river, and the pursuit was ended. At Leesburgh, the column was divided, General CRAGIE marching to his old quarters at Harper's Ferry, and General WRIGHT towards Washington.

Meanwhile, on the 19th, the day of the affair at Island Ford, AVERILL, having moved down the Valley from Martinsburgh, on the Winchester pike, encountered a cavalry force at Darksville, and drove it down towards Winchester. The next morning AVERILL pressed on against EARLY at Winchester. The latter sallied out of the old entrenchments still there, and a brisk battle of three hours ensued, until towards night. The Rebels retired again to their entrenchments, leaving us masters of the field. AVERILL captured four cannon, several hundred small arms, and about 200 prisoners. The enemy's loss was about 300; ours about 250. Of the enemy, General LILLEY was seriously wounded and captured, and Colonel BOARD killed. This engagement was a decided success for us, but the enemy shewed himself too strong for us, and a halt was made outside of Winchester. The force opposed to AVERILL was about 5,000 strong, including IMBODEN's and JACKSON's brigades of RANSON's division of cavalry.

The entire force of the enemy in the late raid seems to have been about 20,000. It included two infantry corps, that of BRECKENRIDGE, embracing the divisions of ECHOL and RAMSEUR, and that of RHODES, with his own division and that of GORDON. In addition, there was RANSON's division of cavalry, including the brigades of MCCAUSLAND, IMBODEN, JACKSON, and JOHNSON, and three batteries of artillery. The infantry was about 15,000 strong, the cavalry about 5,000. The whole was under the command of Major-General JUBAL EARLY. Leaving a considerable force to guard his rear, EARLY carried about 15,000 men across the Potomac, and with the greater part of this strength, defeated WALLACE at Monocacy. Detachments were then sent off in various directions, while about 10,000 men threatened Washington. A special newspaper dispatch on the 20th, stated that "the Rebel loss in their demonstration on Washington, will average two thousand." Their loss may "average" two thousand, but it will probably fall short of five hundred. The entire loss of the enemy in his raid probably does not exceed fifteen hundred. It is not known how much spoil he gathered up, but one of its most welcome items was about 5,000 horses. The movement after the Rebels was hardly to be called a pursuit, as the equality in strength between the pursuers and the pursued prevented much alacrity on our part, and both General WRIGHT's orders and the composition of his forces seem to have barred such hot work as that to which his corps had previously been accustomed. Our troops delivered two sharp attacks on the enemy's rear, the one under CROOK, and the other under AVERILL. The former was unsuccessful, the latter successful. But the pursuit was intermitted for a time.

RETURN OF THE ENEMY.

On Saturday, July 23, the people of Montgomery County, Md., and other adjoining districts, were panic-stricken at the report that the enemy who had seen the enemy recrossing the Potomac at Muddy Branch, below Edward's Ferry, and another pilgrimage by the people towards Washington began. It was soon ascertained that our own troops, returning, had been mistaken for the enemy, and the excitement subsided. But, a few days later, there was more reason for alarm in Maryland; for EARLY, like the irrepressible Frenchman in the play, had certainly "come again." With the present excitement and confusion in telegrams, and the paucity of facts, it is impossible to speak except in general terms of the affair. It seems probable, however, that, on the departure of WRIGHT for Washington, and the return of CROOK to Harper's Ferry, AVERILL, flushed with his late success, again pressed the enemy at Winchester. The latter, however, having now only one hostile force to engage his attention, turned, and easily defeated it, stampeding our cavalry with considerable loss, and driving the whole command down the valley. Our forces fell back from Martinsburgh and Williamsport, and concentrated again at Harper's Ferry. The fighting at Winchester took place on Saturday and Sunday, and General AVERILL was reported killed, and Colonel MULLIGAN wounded and a prisoner. Heavy skirmishing at Martinsburgh on Monday has also been reported, but from the wise possession of the wires by military authorities, no more sensation dispatches can come from the scene of action. At latest advices the enemy were at Martinsburgh, but had not crossed the Potomac.

AROUND PETERSBURGH.

DURING the first part of last week a night attack by the enemy was constantly expected. Sunday and Monday nights were especially watchful, and the troops were kept under arms along the line; but no demonstration occurred. On Monday, the 18th, a 13-inch mortar, which had been got into position in front of the Eighteenth corps after some difficulty, was opened with effect on the enemy's works, and threw huge shells into them. The next day there was pretty constant artillery firing in front of the Ninth and Eighteenth corps, joined for a time by the batteries of the Fifth. There was also some musketry firing, especially at night. But the great event of the day, and of the week, as to that matter, was a heavy rain, which, beginning to fall early in the morning, continued without intermission into the night. The unexampled drouth had put much of the vegetation beyond the effects of this tardy moisture. But its influence on the Army was inestimable. The dust, also, which had come to be reckoned in *feet*, rather than inches, was penetrated and layed. This was the first thorough rain since the encampment at Spottsylvania. The day following was again warm and sultry.

On Tuesday, also, it was evident that General BURNSIDE's star was again in the ascendant. The War Department order relieving him of his command, was rescinded by General GRANT, the Eighteenth and Tenth corps retained under him, and, in addition, the Nineteenth corps, which had arrived at Fortress Monroe, and EMORY's division of which had gone to Washington, was assigned to the same officer. Afterwards, General SMITH was relieved from the Eighteenth corps, was succeeded temporarily by General MARTINDALE, and then permanently by General ORD, lately of the Eighth corps. General GILLMORE of the Tenth corps has been succeeded temporarily by Generals W. H. H. BROOKS and TERRY, and new permanently by General BIRNEY, of the third division, Second corps.

About this time, the enemy were amusing themselves with a report of General GRANT's death, the circumstances thereof being repeated with as much particularity as our people employed earlier in the war, in their regular reports of the death of LEE, BEAUREGARD and MCCULLOUGH. Deserters have come into our lines now and then, and with considerable frequency. There has been constant effort on the advance lines to procure exchanges of papers. These amicable, but obviously dangerous interchanges, have

now been stopped by peremptory orders. On Tuesday there were a few casualties amongst officers and men from the enemy's sharpshooters. A scouting expedition of cavalry, supported by an infantry force from General GRAHAM'S Army gunboats, returned Tuesday night from an expedition near Charles City Court-House, without meeting any enemy.

Wednesday, the 20th, was a day of some excitement. Soon after 4 o'clock, the 13-inch mortar began throwing its enormous shells across the river. The enemy responded by a concentrated artillery fire, and in turn our heavy 30-pounders and 8-inch mortars took up the duel, and the light batteries joined in. The engagement lasted four hours. Our shells were said to have exploded a caisson, and to have burned a dépôt on the Weldon Railroad, in the city. There were several casualties on our side amongst officers and men, particularly in the Ninth corps. The evening before, General WILCOX, of that corps, was slightly wounded. On Thursday, the 21st, there was very little firing. There was an exchange of shots in the morning between our cohorn mortars and the enemy's batteries, and, about eight o'clock at night, there was an hour's brisk engagement, attended with discharges of musketry, which seemed likely at a time to become serious. The enemy having several times, as already recorded, established a Whitworth battery at Strawberry Plains, about a mile and a-half above the pontoon bridge across the James, from which they delivered an enfilading fire on our gunboats, and had disabled the *Mendota*, a Maine regiment was moved out to occupy the ground. On Thursday, the point was taken without opposition, but at night the regiment was forced back again, and, returning on Friday morning, under cover of fire from the gunboats, retook it.¶ On Friday afternoon, there was lively musketry firing for an hour in front of the Ninth corps, arising from the rebel of a brigade on picket. There is usually firing here or in front of the Eighteenth corps, if anywhere. Saturday and Sunday were remarkably quiet. But on Saturday evening there was a very heavy artillery duel on ORD'S front, opened by the enemy, and serving at least to celebrate the arrival of the new corps commander.

GENERAL SHERMAN'S OPERATIONS.

WE have no very clear view of the situation in front of Atlanta this week, official reports being more than ordinarily reticent, and private advices giving nothing later than the 22d, on which day closes an engagement, the full results of which have not yet developed themselves. With MCPHERSON dead, we have no heart to be exultingly of the Rebel repulse reported, though glad to find a man with the courage of Rebel commanders from JOHNSTON to HOOD, we are able to get a fight out of the Rebels. The Richmond authorities have tired at last of the "Great Retreater's" strategy, and with our troops past their strong line on the Chattahoochee, have thought it time to put a fighting man in his place.

The Rebel works on the south bank of the Chattahoochee were found to be exceedingly strong, the deep current of that broad stream flowing swiftly among hills and bluffs, along which had been erected five miles of earthworks, protected by impenetrable abatis. But these defences proved fatal traps to the Rebels, for as already reported, while they were concentrating to prevent their left being turned by our right, our left had already crossed on the right at Isham's Ferry, near the mouth of Soap Creek, and further up the stream, near Roswell, thirteen miles northeast of Marietta and twenty miles southeast of Atlanta proper. The crossing was effected without loss, no troops being found to oppose our passage except the Georgia militia, who concluded it to be their first duty to run away and report our progress. The Rebels were evidently taken by surprise by the rapidity of our movements, their attention being occupied with our forces on their left, where THOMAS and MCPHERSON were demonstrating in force sufficient to occupy the main body of the enemy. The crossing at Isham's Ferry was effected on the 6th inst. by the Twenty-third Corps, a high ridge on the south bank of the stream being seized and held by Generals COX and HASCALL, who were the first to cross. On the 10th inst., General SCHOFIELD'S forces (Twenty-third Corps) were joined by General HOWARD with STANLEY and WOOD'S divisions, General NEWTON meanwhile making a rapid movement to Roswell, where he destroyed two large cotton factories and a woolen mill belonging to the Rebel government. Some four or five hundred girls at work in the mills were sent North. From Roswell, NEWTON'S division returned down the river and crossed just below Isham's Ferry on to the right of SCHOFIELD'S corps. The Sixteenth corps, General DODGE, crossed at Rossvill, taking position on SCHOFIELD'S left. A substantial bridge was thrown across the stream at Rossvell by the pioneer corps of General DODGE'S command, and this bridge, after the army was completed on the 16th, crossing the stream at a point six hundred feet wide, with a current running five miles an hour.

Meanwhile, another retreat had been ordered by JOHNSTON, on discovering our forces across the river and on his flank. His heavy guns were removed on the night of the 9th inst., and the bridges and pontoons crossing the stream in front of his lines destroyed. On the 11th our entire Army was across and occupying the works abandoned by the Rebels.

Taking advantage of his position, MCPHERSON immediately ordered his left occupying Decatur, and on the remainder of our forces holding a line forming the arc of a circle to the northeast of Atlanta, SCHOFIELD on the left centre, joining MCPHERSON, HOWARD on the centre, HOOKER on the right centre, and PALMER on the right. But slight opposition was made to this advance, our skirmish line being sufficient to open the way. On Tuesday, the 19th, a reconnaissance was pushed forward as far as Peachtree Creek, an insignificant stream rising five or six miles northwest of Atlanta, and flowing southwesterly to the Chattahoochee near the railroad bridge northwest of Atlanta. Behind this stream the Rebels lay sheltered behind a swollen current. They had at last reached the determination to fight and sought by stratagem to take General SHERMAN at a disadvantage. But a show of opposition was made to the passage of Peachtree Creek, and our whole Army were soon across and in line of battle, the Fourteenth corps, PALMER'S, and the Twentieth, HOOKER'S, on the right, NEWTON'S division of the Fourth corps, HOWARD'S, on the right centre, the Twenty-third, SCHOFIELD'S, on the centre, the Sixteenth, DODGE'S, the left centre, and in reserve, the Fifteenth, LOGAN'S, and the Seventeenth, BLAIR'S on the right. Our right was covered by a large force of cavalry, which had been crossing over the Chattahoochee by General EDWARD MCCOOK. A serious gap occurred in our lines to the left of NEWTON'S division, which, with inadequate force, sought to hold a most important position in our lines.

Our weakness here had been discovered by the enemy, who promptly took advantage of it, and at one blow retrieve the disasters of a campaign. On the 20th, the enemy being discovered massed on our left, orders were issued to NEWTON, HOOKER and PALMER to advance as far as possible to close this dangerous gap by shortening our lines; NEWTON on the north bank, PALMER'S and HOOKER'S, protected by the creek, and HOOKER and PALMER fighting over the ground his skirmishers at one o'clock, by three NEWTON had advanced three-quarters of a mile, the enemy easily giving way before him. Here he had seized a prominent ridge, upon which his division proceeded to establish themselves, unslinging knapsacks and throwing up rails, thus forming a hasty breastwork of rails. NEWTON having taken position, HOOKER pressed forward with his corps, WARD on the left, GEARY in the centre, and WILLIAMS on the right. During this advance movement, PRICE'S men, who were sent out for the purpose of being captured, reported that no force of the Rebels was within a mile and a half. It was soon discovered, however, that their main body lay concealed in the woods in front, prepared to assail our columns while changing position, and unprepared. They hoped by massing against our weakened centre to break through there, dividing our army in twain, and leaving both wings open to attack. It was a well-laid scheme, and one that seems to have failed as much from fortuitous circumstances as from preparation on our part. At their favorite hour for attack, shortly before four o'clock, the Rebel columns emerged from the concealment of the woods, advancing without skirmishers against our lines. But sudden and unsuspected as was the assault, NEWTON'S division, which first received the blow, was not taken unawares. Springing to their arms, at the word of command, the men were soon in line of battle, and though wavering for a moment before the sudden shock, almost instantly rallied and held the enemy in check, with the assistance of twelve guns which they were fortunately able to get into position on the hill where the Rebels were pressing to cut off their retreat. Four guns were also sent in position on NEWTON'S right, where they rendered important service.

Almost at the instant of the attack on NEWTON, the advance division of General HOOKER, under GEARY, was struck by the advancing columns of the enemy and hurled back in confusion. But they, too, ultimately rallied and recovered their first position, driving the Rebels back, and closing up the gap through which they had entered. On General NEWTON'S right, General WARD was advancing with his division, when the Rebels were discovered charging upon him. With promptitude the order was given to meet the charge with counter charge, the two columns mingling in battle, the Rebels being finally driven back. Further to the right, next to GEARY, WILLIAMS' division was engaged and met the shock without flinching.

Nowhere did the enemy gain more than a temporary advantage, and by 5 o'clock the fight running had fallen back to his entrenchments, leaving many of his dead and wounded and many prisoners, a thousand, it is reported. The loss in the three corps engaged is as follows:—WILLIAMS' division, 627; GEARY'S, 451; WARD'S, 527—total, 1,605. NEWTON'S division (Fourth corps), 102; Fourteenth corps, 200—total loss, 1,007. The Rebel loss it is not so easy to estimate though it is put at 6,000, they having lost more than twice as the assaulted Rebel Lieutenant Generals are reported killed. During the fight our corps on the left advanced a mile and halted at a distance of between a half and four miles from Atlanta, MCPHERSON leading the advance establishing his line east and south of Atlanta, on the extreme left, being within two miles of the main railroad south of Atlanta, and the right on the railroad from Decatur. Our cavalry were guarding our line of supplies towards Roswell. On the morning of the 21st our skirmishers and artillery were engaged in reconnoitering. On Friday, the 22d, another attack was made upon our lines by the enemy who were reported to have been reinforced, though the leaders of the engagement are not yet received. It was during this engagement that we suffered such heavy loss in the death of General MCPHERSON, who was shot through the body by a party in the action while reconnoitering. He became separated from his staff for a moment and a Rebel sharpshooter chose his time. The main attack upon floor of the attack was received by the Fifteenth corps under LOGAN, which held its ground until reinforced by General DODGE with the Sixteenth corps, when the Rebels were driven back with great slaughter.

A truce was declared on Saturday, the 23d, for burying the dead, which was accepted, the burying upon the city meanwhile from another direction. We must await further advices before we are able to pronounce upon the results of the engagement. These two engagements the most obstinate and sanguinary our Army has yet experienced in Georgia. The enemy are evidently being hunted to bay quickly to the investment of Atlanta, especially as their communications are cut with Augusta, and, by ROUSSEAU'S raid, with MONTGOMERY, leaving them but the single line to Macon.

ROUSSEAU'S RAID.

On the 10th of July, General ROUSSEAU left Decatur, Alabama, with five regiments of cavalry, numbering 2,700, and crossed the Coosa River at Rome on the 13th. Capturing a ferry boat, he crossed his command, and, immediately on its lodgment, he was attacked by a force of infantry and artillery at CLAYTON. These he routed after some skirmishing, with a known loss of two captains killed, and two field officers and twenty privates captured. At Talladega, a camp of conscripts was broken up and dispersed, and nearly a hundred captured. At Tylecoup, two locomotives, with supplies, were burned, depot destroyed, and some iron-works fired. The Tallapoosa was crossed at Stone's Ferry, when a skirmish ensued, in which the enemy lost four officers, through the Montgomery and West Point railroad was struck at Loachapoka, and a sharp fight took place near by, with General CLANTON'S force, resulting in a rout of the enemy, drove him off with loss. There the command, having torn up some of the railroad, moved easterly by Notasulga, destroying a large cotton factory on the way, and completely destroyed the railroad at the latter point. A train was also captured there, and 1,000 barrels of flour, with other supplies, flour, and cotton were burned. The command then returned to Marietta, skirmishing on the way. The raid was successful, the total loss being reported at only 30 or 50. It is claimed that 2,000 (?) of the enemy were captured and paroled, besides the killed and wounded. Eight hundred horses and mules were also said to be brought off, and about as many contrabands. Thirty-nine miles of track and thirteen depôts were destroyed on the railroads, the effect of the raid was to sever telegraphic and railroad communication between Atlanta and the Southwest.

NORTHERN PRISONS FOR REBELS.

AT Elmira, N. Y., there is a large and well conducted place of confinement for Rebel prisoners, which recently contained about two thousand, but it is stated that this number is to be increased to ten thousand by the transfer thither of prisoners from the camp at Lookout Point, on the Chesapeake. The management of the prison at Elmira is of a character that reflects the highest credit upon Northern humanity. So far from any measures of retaliation being adopted, for the sufferings which our men are obliged to endure at Belle Isle, every arrangement for the comfort and health of the captives, possible under the circumstances, is devised and applied. It is proper that the public at home, and especially foreign exponents of opinion, should be informed of the difference between the lenient kindness with which Rebel captives at the North are treated, and the brutality, the oppression, and the deprivation which are the lot of Northern soldiers unfortunate enough to experience the miseries inflicted by the chivalry of the South on those who fall within their power, by the fortunes of war.

The place of confinement at Elmira is an enclosure of several acres, surrounded by a simple board fence some twelve feet in height, guards being stationed on platforms at the top of the fence every twenty or thirty feet. The business of guarding the prisoners, however, is rather a *sinecure*. The officers on duty state that the captives evince no disposition to escape. They have no desire to return to the felicities of Southern soil. Unfortunately, should any desperate individuals attempt to burrow under the fence, or should a large one falter make a rush against it, their chances for escape would be very good; but apparently the captives would not leave if the fence and guards were entirely removed.

The place constituting the prison is finely situated on an excellent piece of ground about a mile from Elmira, and though entirely enclosed, as stated, the prisoners are not deprived of a view of external nature; for on one side rice pine-clad hills, high up into the air, visible from all parts of the prison. The prisoners are all provided with banks in the same kind of rough barracks as are used for sheltering our own men at the various places of rendezvous, before going into the field. A very large building is appropriated to the culinary department, and is fitted up like the kitchen of a great hotel, with a dozen ranges, containing boilers, ovens, &c., and there is also a large oven, where sufficient bread, from good flour, is baked daily. The cooks and bakers are, of course, prisoners.

Clothing is furnished to the prisoners by the Government when their own becomes too much worn to be serviceable.

The whole appearance of the prison is that of a working place from among the prisoners being constantly employed in policing the grounds.

The daily ration is as follows:

Pork or beef, 12 oz.; in lieu of fresh beef; or fresh beef 14 oz.; flour or soft bread, 16 oz.; or hard bread, 14 oz.; or corn meal, 16 oz. To the 100 rations:—beans or peas, 12½ lbs.; or, rice or hominy, 8 lbs.; soap, 4 lbs.; vinegar, 3 qts.; salt, 3½ lbs.; potatoes, 15 lbs.

Sugar, coffee and tea are found to the sick and wounded on the recommendation of the surgeon, at the rate of 12 lbs. of sugar, 5 of ground coffee, or 7 of green, or 1 lb. of tea to every 100 rations, every other day. To working parties of the prisoners nearly the same ration is given in all respects as to our soldiers in the field.

Notwithstanding the ration for the prisoners is somewhat less than that issued to our own soldiers—and very appropriately so, since they do no hard work—yet, in reality, they get the benefit of the entire ration. For the difference between the prison ration and that of our soldiers in the field is credited on the books of the commissary to the prison, and expended for the benefit of the prisoners in such ways as the commanding officer may direct. This fund, it will be seen, grows rapidly to a large sum.

These arrangements for the comfort in the prison at Elmira but to all others. The Elmira prison is for private soldiers, and if they live so comfortably, it can be imagined that the officers on Johnson's Island and at other places who have money of their own for the purchase of little luxuries, must pass their time very tolerably as the condition of their existence will permit. How utterly false, therefore, are the statements made from time to time by JEFF. DAVIS to the world, that Southern prisoners are badly treated!

Enough has been published, founded on the statement of returned prisoners, to show the condition of affairs in Southern prisons; but last these reports should be considered exaggerated, we refer to a very readable book by Colonel CAVADA, giving an account of his life in the Libby prison This place, it will be recollected, is used for confining officers only, and consequently the brutalities experienced by private soldiers at their particular prisons, are not here practiced. But notice the petty annoyances, the absence of provisions for cleanliness and comfort, the pillaging of boxes sent from the North, the heartless insults of the guards, which are detailed by the writer of the book! How does the management of a Southern prison contrast with that of a Northern? In the one the unhappy inmates are treated as brutes—in the other as men.

The peculiarly distinguishing characteristic between Northern and Southern feeling, manifested not only in prison arrangements, but in every other manner, is the presence in the hearts of Southerners of an intense animosity, while in those of Northerners there is an entire absence of all bitterness, all desire to insult and oppress. The Northerner feels kindly toward his erring Southern brother, and after the battle is done, all desire to do him injury vanishes. But instead of the fierceness and cruelty, on the part of the Southerners, unappeasable under all circumstances. To this distinguishing characteristic of the chivalry are to be ascribed the petty oppressions and cowardly brutalities exhibited toward our prisoners. Northern officers, in charge of prisoners, who should attempt to imitate the Richmond examples, would be scorned as unfit to associate with gentlemen.

NEW PUBLICATIONS.

SAVAGE AFRICA. By W. WINWOOD READE, Fellow of the Geographical and Anthropological Societies of London, and Correspoading Member of the Geographical Society of Paris. New York: HARPER & BROTHERS.

The African traveller has come to add his story to those of BRUCE, and MUNGO PARK, of OWEN, BARTH, BURTON, WILSON, LANDER, LIVINGSTONE, ANDERSON, BALDWIN, DU CHAILLU, and, finally, SPEKE. A few months ago, only, we noticed Captain SPEKE's valuable Discovery of the Source of the NILE. Mr. READE's Investigations have been turned to the other side of the continent, and are illustrative of a tour in Equatorial, Southwestern, and Northwestern Africa. It is written in a lively style, sometimes perhaps a little familiar, but always interesting. The writer, indeed, very naively and handsomely bars adverse criticism on some points by his own personal interest. He is, he says, of course, "no pretensions to the title of Explorer. If I have any "merit, it is that of having been the first young man about "town to make a *bona fide* tour in Western Africa; to travel "in the geographical and fabulous country with no special object and at his own expense: to see the Negro in his virgin forest; "to flirt with pretty savages, and to smoke his cigar among "cannibals." The book, however, is something hotter than this member of the "Conservative Club" claims. It contains a very full and interesting description of the country, its towns and its peoples, but observations are also valuable on the origin, the nature, the possibilities, and probable destiny of the African, and the extent to which civilization may be carried in Western Africa. It has also comments on the Gorilla, and the Chimpanzee, and monkeys and "black-men," and on the Slave Trade. Like SPEKE's Africa, the book is accompanied with illustrations and with a map.

We have had the missionary account of Africa from LIVINGSTONE and WILSON, the scientific account of many natives from DU CHAILLU, and now we have the man-about-town's account from MR. READE. For, however long they may take for conjunction, "extremes meet." MR. READE set out to Africa by steamer from Madeira He has something pleasant to say of Laguna, of Sierra Leone, of Liberia, Cape Palmas, and Gaboon, where he arrived at the Gaboon, and commenced his main investigation. His descriptions of the habits of the people, and his talks with them, are very good. Indeed, can anything be more entertaining than a correct report of the conversations of a cockney with a native? Or of a Yankee with a veteran cannibal, who owned up to eating men. "As he volunteered this "statement, he burst into a roar of laughter, which we all "joined very heartily. I asked him if men was good? He "replied, with a rapturous gesture, that it was 'like monkey, all white inside.' Like DU CHAILLU, our author has given the Western Africans the notion that white men also eat men. "My veteran now asked me why we took "the trouble to send such a long way for people to eat? Were "the black men nicer than white men to eat? My answer "was dictated by a sense of justice; I said that the flesh "of the white man was a deadly poison, and so, not being "liable to eat one another, we were obliged to send to the "country."

MR. READE went upon a gorilla hunt, but his game ran off without waiting to get killed. In lack of seeing a specimen living, he has collected much evidence upon the gorilla controversy, and concludes that DU CHAILLU's statements are wildly extravagant. There is no "cry which can "be heard farther than that of the gorilla," and the breast like a drum. Repeating the eleven trades, he endeavors to show:

1. That the slave-trade is ruinous to Africa, perilous to America, and profitable only to a certain class in Cuba. 2. That the evils caused by the slave-trade have been much exaggerated; and that, were the suppression of it withdrawn, there would be no certain ultimate evil resulting from it. 3. That the evils conferred on the African by the indirect influence upon the native slave-trade. 4. That the severe laws against slavers are calculated to increase the evil to an extreme, and very dangerous degree. 5. That the remedy is free trade. 6. That sanctions to African kings are utterly useless. 7. That were the Spanish Government in Cuba to adopt the most energetic measures in their British to prevent the importation of negroes, the average would be about as now. 8. That the suppression of the African slave-trade can only be prevented by the great being united with civilization; that the trade of every nation is a benefit to Africa, and that the English settlements in that country would drive it entirely from the Western Coast.

MR. READE is firmly convinced of the impossibility of converting the Africans to our religion. Indeed, he says it is difficult even to explain it to them. "There is not a virtue," said a missionary whom he met, "for which they have an "equivalent term, not a vice for which they have not one." His statements on this matter are singularly fair and candid, though their purport is painful. He says that of all missions the Jesuits of the Congo have been the most powerful and the most successful, and the American Missions in Equatorial Africa "the most earnest and the most able, and "were success possible, the most likely to succeed." Again he says:

The American missionaries are perfectly fitted for their work. They are good classical and Hebrew scholars, and their attainments have given them an opportunity to systematize the dialects of their savage people. They are also practical men; build their own houses, sail their own boats, and are generally expert with the gun. Moreover, they have great wives to advise. Not only do we owe them the only written account of the Fan people, but Mrs. WILSON's work upon Abeokuta is one of the most valuable books that have appeared on the social manners and customs of the uncivilized race, and the best description of the people.

But in spite of their lives, pure and laborious as those of the angels, and their genius, and their sacrifices, their success is almost an palpable progress toward converting the Africans. It is true that some cannot measure the amount of moral good which they have done. I fully believe that they may have saved one soul from hell, but I cannot see that another man being a drunkard. But polygamy is the great stumbling-block.

The talk of a good club-man is often amusing, but the incessant illustrations generally prevent us from getting it in book-form. The talk of this club-man on Africa is sufficiently entertaining to repay perusing his volume. He calls the ocean, in one place, a "monotonous and overrated element," and "the most intellectual travellers must confess that they have seen the great event of the nautical day." In Africa he was much pleased with a dish of monkey and yabbo, and "monkey à l' *edible*," the odika being a vegetable gravy obtained from the kernel of the wild mango. At Ngumbi he was quite a lion at the king's palace. And the king's daughter, "a beautiful girl," with and finely modeled, her hands and "feet exquisitely small, her complexion of a deep, warm "bronze color," devoted herself to him. "We spent hours "every day in each other's company. It is impossible to "imagine a more delicious study than this pretty savage afforded me."

The result of all our traveller's studies, delicious and otherwise, was that Africa would be civilized, in process of time. The continent will be divided almost equally between France and England.

All Africa will be redeemed. Her children shall perform this mighty work. Her morasses shall be drained, her deserts shall be watered by canals. Her forests shall be reduced to fuel. Her children shall do all this. They shall pour an *éclat* into the veins of their brothers, and they shall be redeemed. They shall return to her youth and to immortal beauty.

Such is the hope that may possibly become extraordinary. We must learn to look on this result with composure. Is illustrates the beneficent law of nature, that the weak shall be ruled by the strong.

But a fruitful posterity will cherish their memories. When the Duchesses of Tombuctoo have their tea-parties in the names of the Duchess of Abeokuta and the Princess of Dahomey, and establish societies of the Nile; when it becomes fashionable to go yachting on the coast of the Gold Coast, and the cockneys, in riding seats in Central Africa, will have their elephant parks and their Hippopotami trotters, and the Zoological Gardens of Regent's Park will vie with the Jardin des Plantes of Paris, and the Niger will become as romantic a river as the Seine!

With this generous confession of the *divinum imperium* which the two rival thrones are going to wield over poor Africa, and with the cheerful sight to see the Black Age which approaches, we will leave the chatty, interesting and instructive Londoner, hoping that he will travel elsewhere and record his new adventures.

REVUE MARITIME ET COLONIALE. June, 1864. The contents of this number are:—The Roadstead of Dunkirk, by Col. JOSEPH DE PUYDT; Report on Colonel Paris's Hydrographic references to REID and SYMONDS, and the mechanical manœuvring of Submarine Ordnance, by Rear-Admiral PARIS—continued; The Danubian Principalities and the Commerce of the Lower Danube, by Captain LEBRUN—continued and concluded; The French Peoples—continued; Martinique; Admiral FITZ-ROY'S "Weather-Book," or Practical Manual of Meteorology, translated by M. MACLEOD; The Coastwise Fishery in the Mediterranean, by M. RUBADY; Report on Submarine Ordnance, by Rear-Admiral Admiral Record; Bibliographical Bulletin. A map of the Dunkirk roadsteads accompanies the first article, one of Martinique, the third, and five plates illustrate the article by Admiral PARIS. PARIS: CHALLAMEL *aîné*, 30 rue des Boulanges.

LE SPECTATEUR MILITAIRE, 15th June, 1864. The table of contents is as follows: Progress in Tactics, or preliminary considerations of a single method for the three arms, by Marquis DE DURFORT—translated from the Spanish; Studies upon the Recruiting and the Moral Hygiene of the Army, by Doctor ARTHAUD—the present condition in Austria; Studies upon the Equipment of the Soldier in the Campaign, and Proposed Improvements, by A. DEL; Budget of the English Royal Navy for 1864-1865, by F. DE LA FRESTON; Studies upon some Military Writers of Antiquity, by Captain MACQUIRET, librarian at the Imperial Military School of Saint-Cyr; Semi-monthly Review of Legislation and of Military Administration; Bibliography, by F. P. DE LARIBOLLE; Review of the Foreign Military Press, and Foreign Military News, by JEAN DUVERT; Military and Political Record, by ANTONIO LUNDA. Paris: *à la direction du Spectateur, 3 rue Christine.*

HARPER'S NEW MONTHLY MAGAZINE, August, 1864. This number is unusually interesting, and is crowded with fine illustrative cuts. The fragment of "Denis Duval" is concluded, and "Our Mutual Friend" continued. The former of these promised to be one of the best of THACKERAY'S great novels, and the latter has opened admirably. The Magazine also contains a good illustrated account of the mode of Rescuing the Apparently Drowned, after the treatment of Dr. MARSHAL HALL and Dr. SILVESTER.

THE ATLANTIC MONTHLY for August contains:—Charles Reade; How Rose is governed; Concord; What will Become of Them; Headquarters of Beer-drinking; Friar Jerome's Beautiful Book; Literary Life in Paris; The Little Country Girl; Sweet Brier; House and Home Papers; The Heart of the War; Our Recent Foreign Relations; Reviews and Literary Notices. TICKNOR & FIELDS, Boston.

CORRESPONDENCE.

AN ENGLISH PRECEDENT.

To the Editor of the Army and Navy Journal:

SIR:—In your paper of July 21 I have noticed the article headed "Mr. Lothrop," which was called to my mind an *English precedent* that I think would have fully justified Captain WINSLOW, of the U. S. S. *Kearsarge*, had he captured the *Deerhound*.

During the war between England, France, and Turkey on one side, against Russia, in 1855, a large Russian frigate was destroyed by an earthquake in the harbor of the *united* bore of Japan. When the intelligence of the loss of this frigate was received in China, one of our barges of New York shipper ship sailed immediately for Japan, for the purpose of bringing away the Russian officers and crew, and when nearly off the harbor port she met a boat with a flag of truce from one of Her Majesty's ship, who, on learning the object of the ship's sail at the port, notified the captain of the shipper that if he was caught by one of Her Majesty's ships with the Russian officers and crew on *board*, his ship would be *captured*. The clipper ship being a valuable one, her captain declined to run the risk, and returned with the ice to China.

A short time after, a Bremen vessel arrived at the Japanese port, and was chartered by the Russian commander to take as many of his officers and crew as possible to the Amoor River, and while on the passage to that river was captured by one of Her Majesty's vessels and was taken into the port of Hong Kong where she was *condemned* as a lawful prize; the Russian officers and crew were held as prisoners of war.

The application of this *English precedent* I leave in your hands. NEPTUNE.

The precedent cited by our correspondent, though interesting and valuable, does not apply strictly to the case between the *Kearsarge* and the *Deerhound*. As was stated in our article last week, "the peculiarity of this case arises out of" Mr. RAPALLO'S having been requested by Captain WINSLOW "to assist in saving the lives of his enemies." The case would have been parallel had the American clipper referred to above, been requested by the English vessel to take off the Russians, and then have run away with them. This would have placed the Englishman in the same relation to the American clipper that Captain WINSLOW now sustains to the *Deerhound*.—EDITOR.

TO DETERMINE THE POSITION OF COMPANIES.

To the Editor of the Army and Navy Journal:

SIR:—I have the honor to forward you a copy of "Forms" for determining the position of captains in a regiment according to their rank, which was formulated by order of Major-General CASEY, President of Examining Board, Washington, D. C.

Respectfully, &c.,
JOHN H. TAGGART, C. P.

[COPY.]

BOARD OF EXAMINERS, 212 F. St., WASHINGTON, D. C.

COLONEL:—Major-General CASEY directs me to furnish you the following "Forms" for determining the position of companies in line of battle according to the rank of captains:

1st. Place the chiefs of divisions pursuant to the rule in U. S. Tactics.

2d. Divide the number of companies present by *two*, and the augment thus obtained, added to the number designating a chief of division, will give the number of the junior captain to be associated with such a chief in his division.

This applies to an even number of companies. If an odd number of companies be present, it is necessary to account for the first division that one more company is present, and for the remaining divisions, one less.

I have the honor to be, very respectfully,

[Signed] J. B. YOUNG, First Lieut. and Recorder.
Col. J. H. TAGGART, Chief Preceptor, F. M. S.

SUMMARY DISMISSALS.

To the Editor of the Army and Navy Journal:

SIR:—Is it not time that public opinion should put a stop to the present system of summary dismissals in the Army? It is painful to see the War Department one day dishonorably discharging an officer for some offence, assumed to be so gross and palpable as to render it unnecessary for the accusing claiming him to the world as an unfit associate for an officer and a gentleman, and then, a few days later, acknowledging that in the case of such an officer "it has been satisfactorily shown" that he "was killed in battle," "died of wounds received in battle," was "absent on account of wounds received in action," or was "honorably discharged," and therefore "to be restored to his former rank and position as the Army." No illustration is needed of the above, as such cases have been but too common during the last two years.

The system of summary dismissals is all wrong, and contrary to the first principles of justice. It places the honor and fair fame of every officer at the mercy and caprice of a few persons in the War Department, it denies an officer the right of trial, before a jury of his peers, of what is most dear by every freeman. No better proof is needed of the utter folly and wickedness of the system than the frequent cases of summary dismissals than the constant reinstatement of many of the officers thus dismissed. If an officer is guilty of any crime, let him be court-martial; it is a judge-given and inexorable enough. Then, to be dismissed the service will be regarded as really a disgrace, and the flippant remark, "Oh, he has been dismissed," will no longer do, but he will be restored to-morrow"—will be no more heard.

ARMY OFFICER.

IN FRONT OF ATLANTA, GA., July 13, 1864.

THE ESCAPE OF SEMMES.

To the Editor of the Army and Navy Journal:

SIR:—Your article in the issue of July 16, on the escape of SEMMES, has these faults: You say, "had a British "public vessel saved SEMMES from capture," &c., by a "ruse." No ruse whatever was practised. The vessel could not have been held at the moment responsible, but that Captain WINSLOW would have to wait for the process of national negotiation. Now this is not only wrong, but ruinous to fair play and to our equally among nations. Under the above mentioned circumstances any other Power would have been bound to demand, and being refused, to forcibly take his prisoners rescued, as you suppose. As it was, Captain WINSLOW, in fact, simply joined the *Deerhound* and taken the prisoners, sending the *Deerhound* home for adjudication. But failing to do so, he ought now to capture her whenever he shall be in neutral waters, should he not receive other instructions from the Navy Department in the meantime.

I only write the above, because the ideas expressed on the subject in your journal of the 16th instant, are likely to be injurious as coming from such a source.

F. S., U. S. N.

PHILADELPHIA, July 19, 1864.

To the Editor of the Army and Navy Journal:

SIR:—An item in your paper of Saturday last states that apprehension is felt by the Navy Department in regard to Third Assistant Engineer R. E. BIRD, who has not been heard from since last October." On the 19th of February last, his examination for advancement to Second Assistant Engineer was concluded, before the Board of Examining Engineers for the South Atlantic Squadron, at Port Royal, and he has been ordered to the Navy Yard, Philadelphia, for the *Ottawa*, on the Florida blockade. A communication from him of May 29, gives no intimation of his having received orders transferring him. He will be expected immediately upon the conclusion of his examination. Possibly a "suspension of communication" has been the origin of the report of his "absence."

V. B.

NEW YORK, Monday, July 18, 1864.

To the Editor of the Army and Navy Journal:

SIR:—I have the honor to inform you, and (through the columns of your valuable paper) the officers and soldiers of the Army of the Cumberland, that the undermentioned officers constitute a military board for the examination of applicants for commissions in the regular army, and soldiers of the Army of the Cumberland, that the undermentioned officers constitute a military board for the examination of applicants for commissions in the regular army, and soldiers for commissions. The following named officers compose the board:

G. W. MINDIL, Colonel 33d N. J. Vols., President.
D. W. BUEL, Lieutenant-Colonel 29th Ind. Vols.
NICHOLAS LONGWORTH, Major 10th Ohio Vols.
CHARLES CURTIS, Captain 33d N. J. Vols.
CORN. P. VEDDER, Captain 154th N. Y. Vols., Recorder.

I have the honor to be, very respectfully,
Your most obedient servant,
THOMAS MORROW,
Clerk Military Examining Board.

HEADQUARTERS MILITARY EXAMINING BOARD,
CHATTANOOGA, TENNESSEE, July 12, 1864.

SPEED AND STEERING QUALITIES OF THE MONITORS.

WE are requested to publish the following letter from First Assistant Engineer NEWTON to Captain ERICSON:—

DEAR SIR:—I see by the papers that the *Tycoon* and the *Tycoon* of yesterday repeated the statement that the *Passaic* class of Monitors which have been in active service before Charleston since February, have attained a speed of only four knots an hour. Perhaps I can throw some light on this subject, having had considerable experience with these vessels. I was chief engineer of the original *Monitor* for nearly six months. For nearly two months after we were in commission we were constantly under way, save at night, (not miles) per hour; and I do not think that during the time she was in the James River she speed, notwithstanding a very dirty bottom, was ever less than six knots.

On one occasion I had charge of the engines of the *Montauk* (*Passaic* class) while on the voyage between New York and Hampton Roads, the Russian Admiral LESSOVSKY being a guest on board. This Monitor steamed alone rising *eight and one quarter knots* (not miles) through the water. If the *Tycoon* desires a verification of this statement, it can no doubt obtain it by addressing the Admiral. This speed was attained with an ordinary pressure of steam, before the new engines, but the vessel was in very good trim. Last winter, as you are aware, I accompanied the *Sangamon* (*Passaic* class) to Port Royal, and during the passage encountered very hard to sink alongside the wharf at Washington—from Philadelphia to Port Royal. On the passage down the Delaware River, although we had upwards of 125 tons of coal in bunkers and full complement of ammunition, we made *seven knots* (not miles) through the water. This was officially reported to the Department. The same speed was also easily made after we cast loose from the convoy on entering Port Royal. No inconvenience of any sort either from ventilation or otherwise was experienced on the voyage. I would add in this connection, that all the difficulties experienced with the *Passaic* class from water accumulating in them while at sea, have arisen without exception, so far as I am aware, from the sole cause of "dirty bilge." When it becomes necessary to pump the bilges, but a few strokes have sufficed to clog the pumps. In fact, the same may be said of most steam vessels, except in cases where there has been a positive leakage of the hull, which is an immense hole punched in them by collision or otherwise. Of course the *Weehawken*, with its forward batch left off, is not included in this statement, but even she, so long as she has sank if the centrifugal pump had been placed in the right hold of the vessel, and there had been steam enough—as there should have been under the circumstances—to work it. As to speed, it may not be out of place to remark, that the speed of the *Passaic* class was the object for the pumps for which they were designed, and that any *uniform speed* between the seven knots of the Monitors and the high rates of 13, 14 or 15 knots will not compensate for the increase of size, draught of water and consequent unwieldiness necessary to attain it. The seven knots will not enable us to cope with the heavy European iron-clads as to speed, but 13 or 15 knots certainly will. In short, it appears to me what vhey want is not more speed, but more—but a more easily-managed harbor defence Monitors, just speed enough to take care of themselves, and for the large class, speed sufficient to cope with the *Merrimac*, *Manassas*, *Arkansas* or *Olivier, Selfridge* or *Magenta*. Admiral DAHLGREN, in his official report on the speed of the Monitors is quite respectable, fully equal to that of the Confederate ram of which is not complained of.

It is satisfactory to know any one can make so erroneous a statement as that the Monitors cannot be easily manœuvred, on the contrary, their steering qualities are well known to be unsurpassed. The manœuvres in action of the Monitors plus Charleston during the past fifteen months are a sufficient comment on this head. The steering qualities of the first Monitor astonished every one. If I remember correctly, when tested under Admiral GREGORY'S direction in New York Harbor, a complete circle was made by her over four minutes. In fact, in the James River we used to turn around in about one-third the time occupied by the double-enders, with a radius about one-half. The *Dictator*, when tested, according to official reports, occupy in completing the circle between *twelve and fifteen minutes*. From a drawing of their Recent Review, I should say the *Dictator* has been misstated to me—which vessel, by the way, is a tacit condemnation of all they have built before—I observe that the *Dictator's* rudder and stern post have changed in shape, and that it has been almost exactly copied. But to return to the subject. There are no vessels afloat, of the same length, which can turn a smaller circle than the Monitors. The remark of the *Tribune*, that the *little Passaic* cannot cross the Atlantic, I believe was a deduction from arguments, the reverse for which the vessels of her class were designed is remembered.

In conclusion, permit me to add, that I hope I may never have a more unpleasant duty to perform than to see a respectable order and steam sight knots (not miles). What the motives are which prompt a loyal newspaper to utter such wholesale condemnation on so important a part of our national strength as the turreted iron-clads and their 15-inch guns with steam of only seven knots, I fail to imagine. In this part of the Union, the iron-clads are looked upon as having contributed greatly to our respectable position abroad.

You are at liberty to make what use of this you chose for the benefit of the cause.

Very respectfully, your obedient servant,
ISAAC NEWTON,
First Assistant Engineer U. S. N.

BOSTON, June 21, 1864.

LETTER FROM THE EXECUTIVE OFFICER OF THE KEARSARGE.

THE Boston *Journal* publishes the following extracts from a letter received by a friend from Lieutenant-Commander FRONTON of the *Kearsarge*:

KEARSARGE, CHERBOURG, June 23, 1864.

We have had a great victory, and the whole of Europe is ringing with it. Congratulations are pouring in upon us from all quarters, and bouquets of flowers, with offers of boxes at the opera, and thousands of attentions beside. In the midst of it all, I have been dangerously and even furiously occupied in getting the ship fully re-established in its former good order and condition.

You will have seen in the papers the fight and the destruction of the *Alabama* in the papers. I believe I am awarded all the credit I could claim for this part I bore in the battle; but military pride and promotion have ceased in a great measure to be a motive with me. I have endeavored to do my duty as my conscience and my country bade, both in the ranks, in the long, laborious and careful preparation for it. I have succeeded, and I am satisfied. I felt no excitement in the fight, but I watched its progress with perfect composure, and I felt perfectly satisfied with the result. That is all.

Very different were my feelings in former times when the Mississippi and the Gulf were my field, and I never had been obliged to "board" the *Alabama* the rush of conflict would have revived the old feelings, but I doubt it. However, I must not murm. if I have been enabled to do my duty creditably. My old and honored commander, Admiral HOPKINS, will be pleased, and that is one gratification to me, and perhaps many another friend will be also.

By the way, we have news that the *Nagara* departed for home where she will arrive this month, probably, regarding her daily. Now that the *Alabama* has been destroyed, the *Georgia* run into port and sold, the *Sumpkonnock* paroled, the *Florida* captured, the *Tuscaloosa* disarmed, only the *Florida* left of all the Rebel navy, perhaps the *Kearsarge* may

be relieved by the *Niagara* and be allowed to return home. I can really see no further necessity for her presence in the Channel now, although the "second" crew, with many strong oaths, that they will fit out another *Alabama* in six weeks and sink the *Kearsarge*. But I rather think they have got enough for the present. I long to see the old *Niagara* stick her long nose toward the "breakwater;" but I suppose we must wear out many a weary cruise before she really does come. But I do not think we shall see any more fighting, unless we can pick up the *Florida*. I have a sort of grudge against my full share of prize money that she should be taken by any other fortunate ship.

The shores of the old Channel have rung with the sound of naval artillery for centuries; and for an hour's steady fighting sets the French to jabbering, and John Bull to using worse language. The *Alabama* happened to have a battery of English manufacture, while our own was purely American. Before and mathematical force they were about equals, but the disproportion of skill was considerable. The English will not sacrifice it to superior training and discipline on any other element. Pluck, but persist in trying to find fault with the fairness of the battle as nothing could be fairer. The two ships were alike in size, the *Alabama* mounting one gun in the broadside more than the *Kearsarge*, while the *Kearsarge* had two 11-inch pivot guns where the *Alabama* had one 8-inch and one 120-pounder Blakely rifled gun. There was a difference of only sixty pounds in the weight of iron thrown at a single broadside. They were nearly equal as over two ships were. Profiting by former experience, we had "hugged" our cheap cables over the side for the better protection of our boilers. This had been done a year and a half before the action. Semmes was aware of this, but underrated its importance, and neglected to provide his ship with a similar defence. Our chain was stretched by the Yankee Government, and unquestionably saved us from damage. But the *Alabama*'s men fired hastily, and almost always above our ship, while our men, trained to coolness and deliberation, fired slowly and into the *Alabama*.

THE IRON-CLAD QUESTION.

The following report on the subject of iron-clads has been submitted to the Navy Department by Lieutenant-Commander E. Simpson, formerly in command of the *Passaic*. It is published by the permission of the Department. We regret that its length compels us to defer, until another week, the concluding portion, in which the character of our present Monitors is discussed at length:

124th Street, Harlem, New York,
June 25th, 1864.

Sir.—Believing that the Department is desirous of receiving opinions from officers on the subject of armored vessels, I respectfully submit the following paper. The opinions there given are the same entertained before as those already given for officers who have been called upon to report, but they will, at least, have the merit of being deduced from experience in practice combined with some study of the subject.

CLASSES OF ARMORED VESSELS.

There are several classes of armored vessels now in existence, each class having its own peculiar sphere of action in upholding it, and it necessary to condemn all others, allowing them to possess no merit, and dwelling at length on the special advantages possessed by the class of my favorite plan. These classes may be divided into the following order:

1st. The sea-going class.
2d. The floating-battery class.
3d. The harbor-defence class.

Of the first class, the British *Warrior*, and French *Solferino*, *Gloire*, &c., are types, and the reports on the experimental trials of the French fleet of armored vessels testify to show that the French armored vessels are very successful. In the second class, I will specify the U. S. S. *New Ironsides* as the best type, inasmuch as she is a good model for sea service, but is exalted from her light draft of water to approach the shore, where her heavy battery is able to develope its great power. From her construction, she must roll much at sea, which would make her a bad gunnery ship for fighting service, but it would be difficult to conceive of a better model for a floating battery, if her ends were protected in the same manner as are her sides.

Of the third class, the Monitor of 1862 is, I think, the best type. The means used for harbor defence must be such that will enable the Monitor to become formidable. Ironsides outside may be driven in by the approaching enemy fleets may be surprised, obstructions may be surmounted, but the vessel of the last mentioned class will always be the one sole work of defending the harbor; and it must be impregnable and irresistible. No vessel ever conceived offers such a combination of being able to withstand the heavy blows of turreted vessels, and if the legitimate duty of the turret be kept in view, it has the ability to mount and work a heavier gun than can be carried in any broadside. This gun he made irresistible.

There are three small classes, then, of armored vessels; one for sea purposes, spurred and rigged, and capable of cruising to distant ports; one for floating batteries, capable of being used at sea, but more suited for the service of the enemy's waters to operate against forts; and one for harbor defence, fitted solely for that purpose and with no view to keeping the sea any longer than is necessary to go along the coast from one port to another.

These three classes of duties are essential, and must therefore be performed by armored vessels, and it seems to me that one difficulty attending the conclusion at this time as to what plan of armored vessel to adopt springs from the fact that we are trying to solve a problem requiring these three duties, so different in their character, to be discharged by one and the same vessel. The result can never be successful, for it is evident that the very means taken to fit the vessel for one duty must unfit her for the performance of the others.

Recognizing, then, the necessity for armored vessels to discharge these several duties, we must accept the fact that a great Navy, such as that of the United States must ever be, must consist of three separate and distinct classes of armored vessels, each designed for a special object and fitted alone with view to its accomplishment.

THE SEA-GOING CLASS.

Of this class of armored vessel, I may say that we do not possess one. The *Dunderberg* is the only one that promises usefulness in this class of duty, but her draft renders it impossible that it is useful to predict as to her future. A considerable number of this class of armored vessel will be found necessary, and it is well to profit by the experience of other nations in this, to us, almost untried field.

Although the Government possesses no armored vessels of this class, we can point with pride to noble vessels built in this country and now sailing under the flag of friendly nations. The *Re d'Italia* is probably the finest vessel of this class afloat, and we could not go much wrong by imitating her model and adopting her iron system; but if we will maturely consider what is required of a vessel of this class, able to modify to our advantage the plans already approved.

The engines and boilers must be placed low down in the ship particular. She should be perfectly fitted as a sailing vessel, should be capable of attaining a speed at sea of ten knots under steam, should amply accommodate her crew, the stowage of a large amount of provisions, stores, coal, &c., and should be built on the most perfect proportions. Of this nature is the description of free ventilation by natural means. All this should be considered, at the same time keeping in view the necessity of having her broadside battery well elevated above the surface of making her a vessel of as light a draft as possible consistent with stability.

There would be no difficulty in constructing such a vessel were it not for the weight of armor which is considered necessary to resist upon her sides, and which makes it necessary to construct vessels on extreme proportions. To submit, as my opinion on this subject, that the amount of armor which is considered necessary for the protection of the vessel of the sea-going class is altogether too great, and that by reducing it one half a more efficient cruiser will be secured, at the same time that there will be sufficient defensive power to make her superior to any unarmored vessel, and equal to contend with sea-going armored vessels of much thicker plating.

Our experience goes to show that, in contending with batteries on shore, the thickness of armor is indispensable in order to protect the vessel from harm, and to admit of her continuing her offensive operations; but in the case of contending with a vessel of her own class, this vessel has been forced to anchor before the batteries and have thus made themselves fixed points for the fire of the enemy, with whom, after the first few broadsides, the vessel afloat has assumed the character of target practice. Again, the most desirable position in which to lay the vessels has been that in which their own guns could be used to the best brought into use, viz., with the side presented to the enemy; this position presenting the smallest surface of vessel, and giving a direction at right angles to the flight of the projectile, thus causing the vessel to receive the blow at the worst possible angle. But in a vessel of the class I am urging as attending an action at sea where the vessels, hardly ever for two minutes at a time steer on courses accurately parallel? The slightest deviation from a perfect position of course gives the projectile an opportunity to glance from the side, or, causing it to strike upon a larger surface, makes its affect on any one point so much less severe.

In the case for illustration used above, where the vessel has become a fixed point for the fire of the enemy, we must "*fix*," but how very different is the effect of fire at sea! Distances are hurriedly and somewhat inaccurately determined, and the motion of the vessel is such that we must that the distance of the enemy is determined, and the corresponding elevation given to the battery, the range may be incorrect. Again, the rolling motion of the vessel causes inaccuracy in fire at sea, and the smoke on the covered deck of approaching vessels renders the aiming of guns very hard to be discharged. All these causes, and many others, operate to interfere with the accuracy of fire at sea, so much so as to make it doubtful if a fixed vessel could receive a broadside shot must miss the mark. This should clearly show that for sea-going vessels the same thickness of armor is not required as when a vessel is anchored, or when upon a stationary objects.

If, then, the amount of armor on our sea-going armored vessels be reduced, have we not a right to expect from them increased speed? Here is a power in itself which gives us the opportunity of diminishing the weight of armor, of guns armament, and of withdrawing from action if it be found necessary to repair damage.

All vessels of this class should be constructed of wood, for I am satisfied that the great power of armor to resist impact as found in iron vessels is not a fitting weight to supports the iron. A heavy backing of wood behind a slight thickness of iron is of more value than five times the thickness of iron without wood, and this is to arrange armor in the form of a turret; but this arrangement for mounting guns I would not recommend for an armored vessel of the sea-going class.

The armament for these vessels should be determined with regard to the class of vessels we may expect to contend. On the upper deck two or three rifled guns of large calibre should be mounted to be used for chasing purposes, and for deliberate firing at long ranges, but the guns on the gun deck, constituting the main armament of the vessel, should be smooth-bores capable of projecting a solid shot with great velocity. The experience of the war has shown that the bolts fired from the rifled cannon is formidable only against the armor of the vessel, having little effect on the turrets and side armor is comparatively insignificant, indenting the outer plates, but communicating little or none of the force imparted to the projectile in penetration ceases. Nothing can exceed the crushing effect of a large spherical ball fired with high velocity, and this character of projectile should be the main reliance in contending with the armored vessels of the enemy.

THE FLOATING-BATTERY CLASS.

I do not desire to enter into this class unnecessarily, so under this head I will merely specify the *New Ironsides* as the best type of this class. She is a strongly constructed vessel, with great stowage capacity, and from her unparalleled construction is enabled to carry her weight of armor and guns without requiring a large draft of water. She was designed for a sea-going vessel, and her extremities are unprotected, but if the ends be abandoned of requiring her to keep the sea she could be improved upon so as to be made a floating battery entirely protected by heavy armor, and yet retaining sufficient coaling capacity and motive power to carry her along the coast from port to port, or even to be towed, with convoy, to a distant harbor in order to operate against the batteries of the enemy.

The armament of the floating battery should be arranged with regard to the operations immediately in view. If the fort to be battered down is of great strength, the armament of operations should be carried on with heavy rifled guns, and the vessel towed to keep the floating battery from suffering much from the fire of the fort, but at the same time, her fire dismounts guns and injures the face of the wall. When this has been accomplished, the battery takes up a position nearer to the works, smooth-bores of large calibre should be used throwing solid shot with high velocities, and thus to drive the men from the works and bearing down the honey-combed wall. If farther operations be found, shells containing large charges of powder can be fired from the smooth-bored guns and burst in the debris.

If, however, the works to be assailed are sand batteries, the smooth-bared gun will be found to be the best for use from the commencement, the floating battery taking up her position according to the enemy as he presses him from remaining in his open works.

It would be always desirable to order a floating battery with as many guns as possible, in order that, when ordered in front of the works of the enemy, it may derive protection from the supply of its own guns, which will have the effect of making the aim of the enemy unsteady, and must eventually drive him from his guns.

I consider the *New Ironsides* a distinctive class of armored vessel, and believe that it must be recognized as a formidable element in harbor warfare.

NAVAL SIGNALS.

From the Monitor, Paris, July 1.

A UNIVERSAL CODE OF NAVAL SIGNALS.

REPORT TO THE EMPEROR.

Sire.—The idea of a code, universal languages, offering to all nations a uniform means of communication at sea, has been for a long time,'in England as well as in France, the object of laborious researches.

The realization of this idea, which is possible at this day, thanks to the accord that is established on the subject between your Government and that of Great Britain, would, will be a new sign of the civilization of our epoch. I now have the honor to lay it before you for your sanction.

Already your Majesty, in approving the agreement concluded with Great Britain for establishing a system of regular lights on the coasts of the Channel, has given the initiative by your decree of the 26th October, 1863, to prevent many accidents.

The rules prescribed by this agreement, to which you have invited the other Governments to adhere—now observed by most of the maritime nations—have, in lessening the chances of shipwreck, received universal commend from humanity and humanity from many regrets.

We have the hope that what there will also be obtained the adhesion of other countries to the regulation which has for its object the establishing of a code of signals understood by every merchant vessel, and which the British Board, the approval of the English Admiralty, the Board of Trade and my department. In some time, no doubt, all vessels, to whatever flag they belong, whatever language the officers and their crews may speak, will be able to exchange with each other messages of which the importance and the utility will be measured by the wants and dangers of navigation. They will be able, when in sight of coasts on which lighthouses have been established, to give and receive the news and the orders things which are necessary for their operations, to claim any assistance needed by them—lastly, to ask for the latest meteorological indications.

It is to the works written during nearly the last fifty years, in order to facilitate the selection of signals adopted by the commission named by the two Governments (French and English) should refer for the adoption of the unique code that is to be the object of our proposals.

These works were many. Already in 1813 and 1820 there appeared in England, which was the first to enter into this path, the publications of the code of Taylor, and, in 1853, that of Purser. The best known of these works has been for a long time that of Marryat, which, in the last edition of which (1854) is a contemporary of the French code of Reynold, as well as the American code of Boorse.

All these works, of which we have given the list need of a unique code was only the more manifest. Communications were still next to impossible among the vessels of different nations. The object of the labors of the English and French commission, composed of mercantile men and officers of the Royal Navy, was to remedy this great question. Their labors were the names known to science of Admirals Bissery and Fitzroy, formed, in 1856, a project for a universal code. Issued, after the study of a laborious collation of the fifteen books of signals belonging to different nations, and arranged by Mr. Larkin, of the Board of Trade, secretary of the commission, this project was submitted to the examination of vessels-of-war and commerce of the various nations; lastly, for signals at a great distance, an equally sufficient number of combinations is obtained by the use of three balls and two flags.

Thus, all vessels furnished with the necessary materiels, the price of which is very moderate, will be able, when the code of signals and the list of vessels of the different countries will have been published and translated, to communicate with each other on all the seas of the globe.

It is, therefore, with confidence that I now submit to your Majesty a decree which sanctions the adoption of a unique code of signals between France and England. No doubt the other nations will hasten to adopt it in their turn, as they have done the regulation as to lights; and thus will be attained the object so long sought for, namely, the creation of the universal sea language, which responds so well to the liberal ideas of the EMPEROR.

I am, with the most profound respect, Sire, your very humble and most devoted and faithful subject, the Minister of the Navy and Colonies, &c.,

P. THE CHASSELOUP LAUBAT.

THE DECREE.

NAPOLEON, by the grace of God and the national will, Emperor of the French:

To all present and future, greeting:

On the proposal of our Minister of the Navy and Colonies in respect to the letter dated 17th of May last, by which our Minister of Foreign Affairs has made known to our Minister of the Navy and Colonies that the Government of Her Britannic Majesty has given its definite assent to the proposal made by the Anglo-French Commission, charged to consider the question of universal naval signals:

We have decreed, and we decree as the following:—

ARTICLE 1. The commercial code of signals for the use of the vessels of all nations, such as has been adopted by the Anglo-French Commission, and by the Governments of the French vessels for all communications exchanged at sea, either between themselves or lighthouses, or with foreign vessels.

ART. 2. Every vessel of our imperial navy, and every lighthouse on the coasts of France, will be furnished with a dictionary of the flags and other things necessary for the exchange of communications with French and foreign trading vessels according to the system of signals determined by the said code.

ART. 3. Our vessels of war will continue to communicate with each other on the French lighthouses by means of the signals actually in use in the imperial navy.

ART. 4. There will be sent to the Chambers of Commerce at the ports through the care of our Minister of the Navy and Colonies, copies:

1. Of the dictionary of the commercial code of signals, as well as of the list of French and foreign vessels, and of their official numbers in the commercial code of signals.

2. Of the number of the French lighthouses.

There will also be sent to the Chambers of Commerce models:

1. Of the universal series of flags of the commercial code of signals.

2. And of the black balls used for signals at a great distance.

ART. 5. There will be regulated by subsequent dispositions agreed upon by the Ministers of France, with the Ministers of the Navy, the details of telegraphic transmission of commercial dispatches received from vessels or by lighthouses.

ART. 6. Our Minister of our Marine and of the Navy and Colonies will fix the day from which the commercial code of signals will be exclusively used.

ART. 7. All contrary dispositions to the present decree are, and remain, abrogated.

ART. 8. Our Minister of the Navy and Colonies is charged with the execution of the present decree.

Dated at the Palace of the Tuileries, the 25th of June, 1864. NAPOLEON.

By the EMPEROR.

The Minister of the Navy and Colonies,

CTE P. DE CHASSELOUP LAUBAT.

THE REVERIES OF MARSHAL SAXE.

BARON DE GRIMM in his "Memoirs" (Part first, Vol. I., p. 241), makes the following reference to the Marshal's work:

"The Reveries of Marshal Saxe has experienced the fate of all works of genius. It has been generally admired by the small number of good judges who know the real value of things, and who establish upon a solid foundation the reputations of men and of books; while fools have not known what to make of it, and in proportion to their own self-satisfactory ideas attributed it to the most ridiculous extravagance by below the fame of the author. The work, however, possesses all the characteristics of true genius; it is written with the utmost simplicity; it abounds in ideas, and it dwells absolutely new, and is, it we may thus express ourselves, so much the friend of good sense, that it is not astonishing to have a practical knowledge of the profession of arms to understand and feel its merits. It is true, that pedantry, a quality more common in the military profession than in any other, must be shocked at every page, at the ideas put forth by the illustrious author. Narrow and contracted minds cannot admit a work which, at every moment, overturns commonly-received customs, and demonstrates the danger and futility of them. We are more attached than any other people of Europe to forms and routine. Everything that deviates in the slightest degree from the ordinary custom astonishes, and we are apt to laugh at it, until the small number of enlightened judges have by their decisions fixed our wavering judgments. This attachment to long established usages is not confined to men of the lightness and versatility of character so generally ascribed to the French nation.

The work of Montecuculi began by considering the Reveries as a very moderate work, not by any means worthy of its author; but this opinion is every day changing, and it will soon be ranked by general consent among the works that ought to be handed down to posterity. We are astonished to see this here predict all the misfortunes which happened to the Emperor CHARLES VII. of Bavaria, from having preferred the conquest of Bohemia to that of Austria; and the letter addressed to him by the Marshal de Belle-Isle, successor to Minister of War, upon the different exercises that they wished to introduce into the army, will make every true Frenchman tremble. The Marshal there demonstrates very clearly, that nothing is to be done without discipline, and that there is no occasion to seek elsewhere for the source of all our misfortunes than in the neglect of so essential a point. In fact when we hear of the great things done by the French in the last century, under VENDOME DE TURENNE and the great Prince of Condé, sufficient attention is not not paid, in my opinion, to the spirit of discipline which then existed among our troops, and which they had imbibed in the armies of GUSTAVUS ADOLPHUS through the medium of the celebrated BERNARD, Duke of Weimar. The example of the Prussians ought surely to be convincing as more than ever, that everything great and solid achieved in military operations, has its source in the perfect discipline of the troops; all the rest is false and fleeting, and shines but with a transient lustre.

SHELLING CHARLESTON.

The following description of the effect produced by the shells thrown from our batteries into Charleston, is given by a writer in the *Gerald Magazine*:—On the 21st of August, during the night, I was lying on my bed in the Charleston Hotel, unable to sleep from the excessive heat, and listening to the monotonous sound of the cannonade kept up on the enemy's batteries from the batteries on James Island. Restless and weary of the night, I had lighted a candle in defiance of the mosquitos and the heat, and was reading the then very volume of "Les Miserables." It happened to be the one containing the account of the battle of Waterloo, and while the deeply interesting description of the battle, a single squadron of cuirassiers, I was startled by a noise that, from connection with my reading, resembled the whirr of a shrapnel shell, and instinctively I ducked a bit.

My first feeling was that of utter astonishment; but a crash succeeded by a deafening explosion in the very room on the opposite side of the passage, put me with a bound into the centre of the room. Looking from the window, I saw fire and smoke issuing from a building was about to be the range of the Confederate purveyor. A watchman was running frantically down the street, and when he reached the corner just below the hotel commenced to fire with his rifle against the clam, a signal of alarm practiced among the Charleston police. At first I though a meteor had fallen; but another crash, and another explosion over the hotel, and another explosion beyond, settled any doubts I might have had—the city was being shelled. People were seen to be rushing out of each contiguous house. I will defy any one who witnessed what I witnessed on leaving my room not to have given way to some such impulse. The hall below was crowded with spectators, who had been attracted to the city by the sale of some blockade cargoes, and the corridors were filled with frightened women, screaming about in the most scantiest costumes and the wildest alarm. One perspiring individual, of portly dimensions, was trotting to and fro with one boot on and the other off, while his face was nearly all the dress he had to boast of.

In his excitement and terror he had forgotten the number of his room, from which he had hastened at the first alarm, and his distress was ludicrous to behold. Another, in a semi-state of undress, was rushing about amongst the excited men, hatless, the skins of every one in his way to drag an enormous trunk to the staircase. On reaching the hall I found a number of the servants engaged in the transport of words were carving the Federal commanders. Whirr! came another shell over the roof, and down on their faces went every man in the hall, extinguishing their cigar ends, and clattering among the spittoons. I need not say that this is a class of men from whom, in the ordinary course of nothing; on the contrary, by their extortion, practiced on a suffering people, they have made themselves execrated. If a shell could have fallen in the midst of the unfortunates in the whole race of hucksters, it would have been of great benefit to the South. The population was now aroused, the streets filled with the excited multitude, looking for the upper part of the city, where they would find comparative safety. The volunteer fire brigades brought out their engines, and speedily the fire was got under organized rapidly and quietly, to be in readiness to give assistance where required.

The first engine that reached the house struck by the first shell was one belonging to a negro company, and at it they went with a will, although the fire was a marvellous short time. At every successive whirr above them, the negroes shouted quaint invectives against "cussed bobolitionists," which sentiment, by the bye, no longer was passed. Through the streets I went, and down to the Battery Promenade, meeting on my way shell after shell flying people, carried down to the cellars on mattresses, and mothers with infants in their arms, running they knew not whither. Rising from the Battery, I looked towards the point of Federal position, and presently, beyond James Island, across the marsh that separates it from Morris Island, came a flash, and then a puff of white smoke, and then came upon me a frightful rushing sound above me told the path that the shell had taken; its flight must have been five miles.

THE ENGLISH NATIONAL CHARACTER.

IN a letter to the London *Morning Post*, JOHN RUSKIN makes the following keen analysis of the English character:

"The creation of Savoy was the peaceful present of a few years of quiet and prosperity; the creation of another I will also fair to pay for fair work, and, in the profoundest sense, no business of ours. Whereupon DR. KINGLAKE moves that a message be sent to the trade a monster of for Bombastia. But we saw the noble Circassian action murdered, and our own honor sullied. We see the noble Polish nation sent to pine in ire, and never struck a blow for them. Now the nation of our future Queen calls to us for help in its last agony, and we round sentences and turn our backs. Sir, I have no words for these things, because I have no hope. It is not these speaking puppets who pay before to whom we have to account; it is not by cutting the strings of them that we can redeem our deadly error. We English, as a nation, have lost, alas! now to be known, a single broad or basic principle of human justice. We have only our instincts to guide us. We will hit anywhere that we can, and we will take care to save our own families and our own pockets; and we are characterized in our present phase of enlightenment mainly by rage in ejaculation, harsh expectation or suspicion of others, generosity wherein generosity is useless, anxiety for the scale of revenge, regardless of those of civilized nations, enthusiasm for liberation of blacks, apathy to enslavement of whites, proper horror of regicide, police respect for populicide, sympathy with those whom we can no longer serve, and reverence for the dead whom we have ourselves delivered to death.

IN a letter to the Boston *Advertiser*, denying the report of disagreement between the contractors of the new light-draft Monitors and the Navy Department, MR. DONALD MCKAY, the East Boston ship builder, says:

I am well aware that the public has been quite restless in relation to the movements of the Navy Department, on account of the depredations of the *Alabama*, *Florida*, and *Georgia*; but if the facts were only known, they would show that the power of these vessels has been greatly exaggerated. In a letter to Senator GRIMES, which you published yesterday, I have boldly stated that the *Alabama* was inferior in speed and fighting qualities to our sloops of war, the truth of which was clearly demonstrated in the recent glorious naval combat. The Admiral has not been a want of vessels of the right class to destroy these British rovers, but to obtain sight of them. In a letter of Admiral Farragut published a few days ago, he says that the vessels with the *Florida* in a twelve hours' run, and bring her to action. The same letter of Farragut's argued from the size of the vessel, and her well known motive power, are entirely incorrect. I do not believe she can be driven more than twelve knots per hour, and probably not more than ten or eleven knots at a time. If the public will only exercise a little patience they will find that the Navy Department has not neglected its duty, but that it has been employed in such a way that in the designs of even the light-draft Monitors it has acted with more zeal than many have believed. Fifteen vessels with one exception, an innovation upon all previous notions of iron-clads, and could not be expected to be wholly perfect at first. I am sure that these vessels without charge from the first design, they would be most valuable for home defence. To make them available for action in Southern waters, in all weather, the propeller compartment must be surely.

In addition I would earnestly recommend the construction of a number of sea-going wooden ships, heavily ironclad, with high speed, from 24 to 26 guns—and time secure the respect of all the nations of the world and the best guarantee of *impartial neutrality*.

THE following named officers are announced as the staff of the General Commanding the Department of the District of West Tennessee:—Major WM. H. Morgan, Assistant-Adjutant-General; Major J. O. Pierce, A. A. G., Acting-Assistant-Inspector-General; Major Thomas N. Barb, A. Q. M.; Chief Quartermaster; Colonel J. L. Geddes, 8th Iowa Infantry Vols., Provost-Marshal-General; Major Thomas Hillhouse Cavalry Vols., Medical Director; Captain Geo. A. Williams, 1st Infantry, U. S. A., Commissary of Subsistence; Colonel L. Bevier, 8th Illinois Cavalry Vols., Judge Advocate; Captain Andrew Geddes, 8th Iowa Infantry Vols., Ordnance Officer; Captain John Hillhouse, 8th Illinois Cavalry Vols., Aide-de-Camp; Lieutenant Chas. H. Townsend, 29th Wisconsin Infantry Vols., Aide-de-Camp and Acting-Assistant-Adjutant-General; Captain Wm. Hillhouse, 8th Illinois Cavalry Vols., Aide-de-Camp; Lieutenant A. M. Kinzie, 9th Illinois Cavalry Vols., Aide-de-Camp.

DR. H. O. MACY, Surgeon of the 35th U. S. C. Troops, in a letter to the Boston *Journal* reports having "direct charge of the hospitals containing several parties of prisoners as well as deserters—soldiers in the battle of Olustee and perfectly conversant with the facts—that the statement made by the rebel Gen. Colquitt, regiment and the Second Georgia Regulars took possession of the depot for the wounded, and not as an armed force, is utterly false and deceptive. I have had under others of their officers who with their swords actually set the example—in cold blood murdered with a deliberate aim, two wounded, and—helpless lay there under the charge of an assistant surgeon, left to attend to their wants."

CAPTAIN QUINN of the 2d Mass. regiment describes General Sherman as a man who has a gaunt look about him—as if he had got hungry when a boy and never got over it; a nervous man, always pulling his whiskers, or buttoning his coat, or twisting a string, or rubbing a finger-nail against his teeth. He is a man who has the reminds one of a panther, if he gets angry; fiery, keen, powerful—and a genius. General Thomas, he says, looks more like a General than—tanned, but one wouldn't like to feel his paw, for all that.

THE Portland *Press* records the case of a soldier, who, by economy and good habits, discarding liquor and tobacco, succeeding in twenty months, in saving out of his thirteen dollars a month, the handsome home of one hundred and $25 for a watch and some other things, at another time $21. The State and city bounties for re-enlistment are yet to be paid, which will swell the sum, with interest accrued, to upwards of $750.

THE veterans of the Sixth corps, under General Ricketts, are complimented by the Baltimore papers on the fact that during their encampment in Druid Hill Park, "not a tree was cut down, a road injured, or any part of the grounds disturbed, and it has not unfrequently occurred that a large pic-nic party has left more signs of their presence than these soldiers did after several days occupancy."

FORTY citizens of Dayville, MAINE, spent one Sunday in mowing and husbanding the hay on the fields of a poor soldier with six children, whose soldier husband is dying a far away.

ARMY AND NAVY PERSONAL.

THE NEW YORK *Herald* has collected $800 for a sword for General McClellan.

By order of Lieutenant-General Grant, General Terry has assumed command of the Tenth corps.

MAJOR-GENERAL Couch is making preparations to change his headquarters from Harrisburgh to Carlisle.

THE resignation of Colonel S. D. Bruce, of the Twentieth Kentucky, has been accepted by the War Department.

LIEUTENANT-Colonel J. J. Phillips, 9th Illinois, who was wounded in the first advance on Resaca, has returned to duty.

LIEUTENANT C. W. Lockwood, 31st Ohio, wounded at Rull's Mills on the 4th instant, is in hospital at Marietta, doing well.

CAPTAIN Winslow of the *Kearsarge*, is reported to have lost the use of his left eye, and the ossicles of Paris give him no hope of its restoration.

LIEUTENANT Foot of the 121st New York Vols., who was reported killed in the battle of the Wilderness, is said by an escaped prisoner to be in Libby Prison.

CAPTAIN Faulkner, naturalist, appointed by the Government to accompany General Sully's expedition, against the Sioux, was killed by the Indians a few weeks ago.

GENERAL Dix has ordered the arrest and prosecution of R. H. Fyfe, editor of the *Freeman's Journal*, for the publication of an article advising resistance to the draft.

CAPTAIN H. S. Wetmore, formerly superintendent of Naval Recruiting at Memphis, has been assigned by Admiral Porter to the command of naval rendezvous at Cincinnati.

BRIGADIER-General Ransom, formerly Chief of Staff under General Grant, who was wounded for the fourth time in the Red River campaign, is to take command of a division in the Sixteenth Army corps.

T. F. Wade, Volunteer Lieutenant U. S. N., has not resigned as was reported, but is at present visiting orders and recovering from wounds received in the engagement of the *Commodore Jones*, of which vessel he was in command.

LIEUTENANT-Colonel Charles E. Fuller, Chief Quartermaster of Sherman Butler's Army of the James, has just returned to his home in Boston on sick leave—the first furlough he has had since entering the service three years ago.

MAJOR-General Burbridge, Brigadier-General Manson, and the Hon. Joseph Holt were in Cincinnati a few days since. Major A. A. Hoehmer is performing the duty of Judge-Advocate-General during the absence of General Holt.

LIEUTENANT-Colonel C. B. Baldwin of the Massachusetts 1st regiment, who was taken prisoner on the morning of the 6th of May at daylight, while in command of the picket line. He was taken to Macon, Ga., where he arrived on the 25th of May.

MAJOR George G. Hasting, 1st U. S. Sharpshooters, has been detailed as Acting Judge-Advocate of the Army of the Potomac, vice Major Asa P. Piatt, who has been assigned to duty as Instructor in Spanish at the U. S. Military Academy.

MAJOR-General formerly Paymaster in the United States Army, who was captured by the Rebels on White River, and taken to Tyler, in Texas, made his escape from there, and has arrived safely at Quincy, Ill., after undergoing extraordinary privations.

By order of Lieutenant-General Grant on the 18th, Major-General and acting Lieutenant-General Hallbeck Army corps, relieving General Martindale—the temporarily succeeded General W. F. Smith. General Martindale is on a visit to his residence in Rochester, N. Y.

ARMY casualties recently reported in General Sherman's Army are Colonel Washburne, 116th Ohio, wounded; Colonel Frey, 14th Virginia, wounded; Colonel Piatt, and Lieutenant-Colonel Murray, 5th New York heavy artillery, serving as infantry, missing, and known to be severely wounded.

COLONEL Hoffman, commander of prisoners, has returned from Elmira, where he had been to inspect the new depot for Rebel prisoners, and to make such changes as would fit the reception and proper care of a large number of prisoners, who will be forwarded to that point as rapidly as possible.

CAPTAIN Isaac H. LeFevre, to whom was dedicated the first monument erected in the National Cemetery at Chattanooga, was at once promoted by Secretary Stanton to the 88th Missouri Volunteers as stated. He was detached on the staff of Brigadier-General John Beatty, commanding 1st brigade 2d division 4th Army corps.

COLONEL Chenoweth, Captain Morgan, and other Rebel officers, accompanying General Hobson under a flag of truce have been put in the Libby Prison. Colonel Chenoweth and private Dougherty, of Morgan's force, who were taken prisoners in Kentucky, and had been exchanged, were released, and accompany Colonel Chenoweth's party.

CAPTAIN Aaron S. Bowen, who has for some time commanded the Naval Recruiting Rendezvous at Cincinnati, Ohio, has resigned his position as Acting Master in the Volunteer Navy. Under Captain Bowen's energetic management, the recruiting service has been highly successful, many officers and seamen to the Navy. It is to be regretted that his private affairs should have compelled him to resign.

THE following list of officers who will favor trying Brigadier-General Spinola in New York:—Major-Generals John J. Peck, United States Volunteers, George S. Hartsuff, United States Volunteers; Brigadier-Generals George S. Greene, United States Volunteers, William H. Morris, United States Volunteers; Lieutenant-Colonel J. G. Hughes, Thirty-ninth New York Volunteers, James E. McGee, Sixty-ninth New York Volunteers, Jasper H. Raymond, Sixty-ninth New York Volunteers, and Colonel W. J. Hall, New York Volunteers. The court sits with closed doors.

LIEUTENANT-Colonel Charles G. Sawtelle, A. Q. M., was able to render essential service to the Army of General Banks, on the recent retreat from the Red River County, by extemporizing a bridge over the Atchafalaya River. No pontoons being at hand, Colonel Sawtelle ordered himself of 21 large Mississippi barges, steamers, which were moved up the stream, and anchored side by side. Upon this foundation a substantial bridge was rapidly constructed, over which the troops crossed with their trains, wagons, horses, and artillery. The important service thus rendered by Colonel Sawtelle was promptly recognized by General Canby on his arrival, the Colonel being appointed Chief Quartermaster of the Department.

BRIGADIER-General Wm. H. Emory, who assumed command at Alexandria, La., May 24, in place of General Franklin, wounded, has announced the following as his staff:—Captain Frederick Speck, U. S. V., Assistant-Adjutant-General; Lieutenant-Colonel John G. Chandler, U. S. V., Chief Quartermaster; Lieutenant-Colonel D. B. Woodruff, U. S. V., Chief Commissary; Major W. H. Sentell, 160th New York Vols., Acting-Assistant-Inspector-General; Surgeon A. Dalton, Medical Director; Captain Henry C. Inwood, 165th New York Vols., Provost Marshal; Captain Henry W. Closson, 1st Artillery, Chief of Artillery; Captain R. B. Wilkinson, 128th New York Vols., Judge-Advocate; Captain J. J. Williamson, 128th New York Vols., Ordnance Officer.

OBITUARY.

COLONEL ARTHUR H. BUTTON, 21ST CONN. VOLS.

On the 25th of May last, Colonel DUTTON, commanding the Third brigade, First division, Eighteenth Army corps, proceeded with his regiment, under orders from the corps commander, Major-General W. F. SMITH, to the extreme left of the army's line of battle, near our entrenched line at Bermuda Hundred. The reconnoissance having been conducted throughout the day with complete success and without casualty, Colonel DUTTON encamped with his command in formation. On the following day, the 26th, he received further orders to reconnoitre, and proceeded with his command with his brigade unit stopped by the enemy. The country to be traversed was covered for the most part with heavy timber, interspersed in many places with dense undergrowth, rendering the movement and the enemy's position, it was necessary to proceed with the utmost caution. Colonel DUTTON, having judiciously posted his brigade, so as both to guard against surprise and to protect his flanks, gave the second attention to the skirmish line, the advance of which, although attended with the greatest difficulty and peril, yet afforded the only means of ascertaining the position and intentions of the enemy. The enemy's works. The fifty-eighth Pennsylvania and Twenty-first Connecticut moved in line of battle in support of the skirmishers, and soon the enemy's skirmishers were encountered behind a semi-circular ridge, partially concealed by wood and underbrush. Colonel DUTTON, with the Twenty-first Connecticut, was on the skirmish line, guiding and directing the movements when a brick fire of the enemy, received early in the engagement a severe wound through the left cheek and face, which disabled him for the time. The command then devolved upon Lieutenant-Colonel BUSBEE, of the Twenty-first Connecticut, but as the enemy, at the time, were apparently massing their forces for another attack on their line of works, Major-General SMITH dispatched orders for the return to camp.

It was at first supposed that Colonel DUTTON's injuries would not prove fatal, and he remained in the field for some days, attending to the speedy recovery. But on the 4th of June, while on the steamer from Fortress Monroe to Baltimore, his wound again commenced bleeding, and it was found that the ball had passed from side to side of his head, through the brain and face, without, as they supposed, touching any vital part of his surgeons, Dr. WILSON, that his life was prolonged till the arrival at the hospital in Baltimore, where he died on the 5th, calmly and peacefully he passed away, his last moments being cheered by the most consolations of religion, and, fortunately, also by the presence of a beloved wife, who had hastened to his bedside.

Colonel DUTTON graduated at West Point, in the Engineer Corps, in 1851, CULLUM, ABBOT, O'BRIEN, COMSTOCK, BERNARD and KAEMPFER being his classmates. At the outbreak of his death, he held the rank of Captain of Engineers in the Regular Army. In every respect, Colonel DUTTON was a most thorough and accomplished soldier and gentleman, and his death leaves a most severe bereavement and a chivalric sense of honor. Though possessing abilities of the highest order, yet they were accompanied with that rare but happy combination of gentleness and kindness which endeared to his friends, while they admired without envy his many bright and exemplary traits. At the time of his death he was but 32 years old, he served as chief-of-staff for Major-General PECK, and on the opening of the present campaign, he occupied a similar position upon the staff of Major-General SMITH. His remaining early campaigns saw no gallantry in the severe contests for the possession of the Petersburgh Railroad, and also in the hard fought action at Drury's Bluff. Shortly after that battle he was placed in the command of the Third brigade, which position he had held but a few days before receiving the fatal wound which terminated his brief but brilliant career. Colonel DUTTON was married about two years ago, and being soon in his loss, not only as that of a warm and devoted friend, but as one, who, if his life had been spared, would have reaped renown for himself and glory for his country. C.

LIEUTENANT-COLONEL D. MASON, FIRST U. S. ARTILLERY.

THE gallant Mason died at Washington, June 27th, at an age of twenty-two, of wounds received in the action near Trevilian's Station, June 11th. He was born in Boston; was commissioned early in 1862 a second lieutenant in the 1st artillery, and assigned to Battery H, Captain WEEDON; and at the fiercely contested battle of Williamsburgh, May 5th, 1862, gained his first experience of battle. He was afterwards engaged in the seven days' battles on the Chickahominy, under Lieutenant JOHN E. DIMMICK, R. A., and the subsequent retreat to the James; a period of the fight, and upon the fall of that promising officer the command was transferred to Lieutenant MASON, and by him retained for nearly a year. At Gettysburgh, Lieutenant MASON, posted on Cemetery Hill, fought his guns with coolness and address, and in the subsequent events of the campaign he had an honorable part. During the last Virginia, Bristoe and Mine Run campaigns, Lieutenant MASON commanded, and transferred into a battery of horse artillery, under Captain HASKIN, in which capacity they accompanied SHERIDAN'S cavalry expedition to Richmond, and participated in the action at Trevilian's Station. Lieutenant MASON, who, in two years' hard service had never received a scratch, was struck by a round shot which tore off a large fragment of flesh from his right thigh, beside mutilating his right hand. He was conveyed by ambulance to the White House, a painful journey of eight days, and thence to Washington, where he expired, after patient endurance of much suffering, at the residence of the Hon. SAMUEL HOOPER. He was a young man of singular sweetness and frankness of disposition, modest, self-sacrificing, and of approved courage. Few officers in the Army have been placed at so early an age—he was scarcely twenty-one when he assumed command of his battery—is so responsible a position, and the capacity and soldierly instincts which he showed during his brief career gave his friends many bright hopes of future distinction in his profession.

LIEUTENANT J. U. V. FIELD.

LIEUTENANT Joshua H. V. FIELD, who died at Cumberland, Md., on the 16th inst., of typhoid fever, was born at Tampa Bay, Fla., May 8, 1845, and was appointed at West Point, and on graduating the thirteenth in his class. After his graduation he was ordered to Cumberland Gap, Tennessee, in 1865, where he remained on duty until ordered to the Springfield, Mass., Armory. After remaining on duty six weeks at Springfield, he was ordered to report to Gen. Reynolds Chief of Ordnance in the Department of West Virginia. He was present at the battles of Staunton and near Lynchburgh, where he expressed himself a soldier. On the return march he was taken sick and was brought in by an ambulance to Cumberland, Va., where he died as stated, receiving in his last hours the administrations of his family, who were fortunately able to reach him in season. Lieutenant FIELD was the son of Brigadier-General FIELD, who, on the 24 January, who fell wounded while gallantly leading the company in the storming of Fort Gregg, and was carried off by the Mexican lancers. His maternal grandfather, from whom he received his name, was Colonel JOSIAH H. VOSE, who died very suddenly as he was about embarking for Mexico, during the Mexican war.

COLONEL SACHETT.

COLONEL William Sachett, of the 36th New York Cavalry, who was mortally wounded in the battle of Winchester, under General SHERIDAN, at Fisher's Station, Va., died on the 14th ult.

Colonel SACHETT entered the Army on the 22d of April, 1861, was appointed Major of the 36th New York Cavalry October 1st, 1863, at the same year, was promoted to Lieutenant-Colonelcy in August, 1863, and in March, 1862, became commander of the regiment. He was with General SHERIDAN in the Shenandoah campaign, and in the numerous actions of the campaign which followed, was with the Army in the advance after the battle of Antietam, and in almost constant conflict with the enemy until after the battle of Fredericksburgh. He was engaged in most of the Cavalry engagements under General ROSECRANS command, was in all the principal cavalry actions during Lee's invasion of Maryland and Pennsylvania, including Gettysburgh, where he performed distinguished service.

During the present campaign he was with General SHERIDAN in all his battles and skirmishes, from the time when he left. He was born in Seneca Falls, and was 25 years of age.

THE NEW PAY TABLE.

THE following table of the monthly pay of non-commissioned officers, privates, etc., under the new law, we publish for the information of paymasters and others:—

CAVALRY.			
Sergeant-Major	$21 00	Hospital Steward	$30 00
Quartermaster's Sergeant	22 00	Sergeant	18 00
Chief Bugler or Trumpeter	18 00	Corporal	16 00
First Sergeant	24 00	Farrier and Blacksmith	18 00
Sergeant	18 00	Saddler	18 00
Commissary Sergeant	22 00	Veterinary Surgeon	30 00
ARTILLERY AND INFANTRY.			
Sergeant-Major	$20 00	Corporal	$16 00
Quartermaster's Sergeant	22 00	Private, first class	16 00
Commissary Sergeant	22 00	Private	16 00
First Sergeant	22 00	Principal musician	22 00
Sergeant	20 00	Musician	16 00
Hospital steward	30 00		
ORDNANCE.			
Sergeant	$34 00	Private, first class	$18 00
Corporal	30 00	Private, second class	16 00
SAPPERS, MINERS AND PONTONIERS.			
Sergeant-Major	$21 00	Private, first class	$18 00
Quartermaster's Sergeant	22 00	Private, second class	16 00
Sergeant	20 00	Musician	16 00
Corporal	20 00		
SIGNAL AND SEGMENTAL BAND.			
Leader	$30 00	Musician, first class	$20 00
One-fourth of band	24 00	One-half of band	17 00
Hospital steward, chief of band	30 00	Musician, second class	18 00
" second class	25 00	Female nurses—6 cts. per day	
" third class	22 00	and one ration.	

The following letters for officers of the Army and Navy are advertised in the Post Office at this city:—

ARMY.—Bailey, Samuel, late Captain 72d N. Y. Vols., care of Messrs Bailey & Co., 565 Broadway; Bennett, Augustus, late Lieutenant of 6th N. Y. Vols; Birkenstock, Captain J. P. Co. C, 2d Mich. Vols.; Bliss, Lieutenant Colonel Zenas R., 1st Michigan Cavalry; Brown, Captain O. C., 6th U. S. cavalry; Clark, Captain Thomas, 1st N. Y. Dragoons; Cleveland, Lieutenant Colonel Charles, Co. I, 40th N. Y. V.; Davidson, Lieutenant J. B., Co. C, 15th V. R. C.; Dodge, Lieutenant Colonel Charles, 1st N. Y. Dragoons; Dwight, W. S., Co. B, 74th N. Y. V.; Doyl, Lieutenant George, Co. A, 39th N. Y. V.; Fitzgerald, Lieutenant Colonel, 1st N. Y. Dragoons; Colonel J. Egbert, 52nd N. Y. V.; Garrett, Major John, 6th U. S. Cavalry; Gilbert, Lieutenant Colonel S. M., 1st Delaware Cavalry; Co. G; Hoopes, Colonel Henry, 49th N. Y. V.; McGary, Lieutenant J. B., Co. C, 2d U. S. Sharpshooters; Lamont, Major Wm. Arthur, late Lieutenant James S., 20th Regiment Connecticut Volunteers; Lieutenant Colonel Wm. Arthur, late Captain 2d U. S. Cavalry; Lieutenant Colonel Wm. Rafferty, Colonel Thomas, 1st N. Y. Dragoons; Colonel John O. Tyrrell, 1st N. Y. Dragoons; Colonel John O. Tyrrell, 1st N. Y. Dragoons; Colonel John O. Tyrrell

NOTICES TO CORRESPONDENTS.

The Editor of this JOURNAL will always be glad to receive from officers in the two services, correspondence and general communications of a character suited to the columns. It is necessary that the name of the writer should, in all cases accompany his communications, not for publication, but as a guarantee of good faith.

Officers are especially requested to give us early notification of all personal matters of general interest; of the movements of vessels of casualties among officers; and military and naval events.

The Editor will, at all times, be pleased to respond, in three columns, to enquiries in regard to all matters of interest to officers.

The subscription price of THE ARMY AND NAVY JOURNAL is FIVE DOLLARS a year, or TWENTY DOLLARS for six months, invariably in advance. Remittances may be made in United States funds, or Quartermaster's, Paymaster's or other drafts, which should be so drawn as to be payable to the order of the Proprietor, W. O. Church.

Subscribers who fail to receive their paper promptly, will please give immediate notice of the fact.

Subscribers ordering the address of their paper to be changed, should be careful to give their previous address.

The Editor does not hold himself responsible for individual expressions of opinion, in communications addressed to the JOURNAL.

The postage on the JOURNAL is twenty cents a year, payable quarterly in advance, at the office where received.

All communications should be addressed to the ARMY AND NAVY JOURNAL, New York.

PUBLICATION OFFICE 19 PARK ROW, TIMES BUILDING.

U. S. ARMY AND NAVY JOURNAL.

NEW YORK, SATURDAY, JULY 30, 1864.

WE would remind the subscribers to the ARMY AND NAVY JOURNAL that but three numbers now remain to complete the first volume, which closes with the number for August 20th, No. 52. With the last number, we shall furnish an index and a title page, so that those who wish can bind the volume for preservation. Any numbers desired to complete sets can be furnished. We would add that we shall be under special obligations to those who desire to continue for another year, if they will remit their advance subscriptions during the coming month, so that we can commence the new volume with an edition sufficient to supply all demands. In remitting, subscribers will please be particular to mention the address at which they now receive the paper.

In answer to the question as to what the JOURNAL will be another year, we can best point to what it has been thus far, with the assurance that we shall spare no effort to make it still more worthy of the respect and confidence so generously accorded to it. It is rare that a paper is able at the close of its first year to point to so marked a success as has attended the ARMY AND NAVY JOURNAL; a success so substantial in every way that its permanent establishment is assured.

PROGRESS OF THE CAMPAIGN.

OF late, the public attention has been diverted from the dead-lock in front of Petersburgh to the serious raid of HUNTER up, and the more serious return raid of EARLY down, the Shenandoah Valley; to the irregular cavalry engagements and guerrilla operations in Missouri, Tennessee, and Arkansas; and finally to the grand advance on Atlanta. Of the enemy's Maryland raid it may be said, that, while it was completely successful, and humiliating to us in our own eyes, whatever it may be in those of other observers, still its scope was not such as to have a materially injurious effect upon the campaign. It was of twofold advantage to the Confederacy. First, it transferred to the enemy some of our prestige of offensive operation, and revived his dubious fortunes. Secondly, it furnished stores to his commissariat. The latter loss to us was of no importance. The gain to the enemy would have been very slight, had not recent operations at Petersburgh been resolved into cutting communications and checking supplies. It was all well enough to burn the Dunville Railroad, provided the Valley had been hermetically sealed. But, in effect, we stopped supplies at the spigot and let them run at the bung.

As things lines are written, the return of EARLY to Martinsburgh is announced. It appears that there was no attempt to cut off the former Rebel raiding column. And this perhaps wisely; for what defeats had the enemy sustained to reduce the numbers which were able to pen our troops in Washington—or what considerable reinforcements had we received since the affair at Fort Stevens? There was, indeed, an endeavor to harass the Rebel rear, which met with success under AVERILL at Winchester, and with disaster under CROOK at Snicker's Gap. On a repetition of the attempt to annoy him, the Rebel general has turned, and sent us spinning to Harper's Ferry. That is the explanation of the "return of EARLY" at present. Whether the Potomac will be reforded by him is a matter of conjecture. Possibly he desires only to reap his crops in peace. But if he cross again, there is no probability of Washington being effectually assaulted. Such an undertaking was not in the former programme of the enemy, at all events. Had we just experienced a severe defeat at Petersburgh, or some second Chickahominy "change of base," there would be fear of Washington. The gathering up of horses and forage may be resumed in Western Maryland, "that nothing may be lost" This foray, doubtless, would be borne with less terror and more equanimity than the other.

The guerrilla operations at the West are of trifling importance, even in the political sense which it is sought to attach to them. But history seems trying to repeat itself there as in Virginia. Not very long ago, several positions in Arkansas and Mississippi, like Little Rock, for example, were threatened by the enemy. But events like the repulse of SHELBY by CARR have relieved some of our fortified points, and now, also, the navigation of the Southwestern rivers is, in the main, more facile than a month since. The chief danger from Western cavalry operations has been the possible severance of SHERMAN'S communications, by the concentration of FORREST'S and S. D. LEE'S troopers in his rear. The recent action at Tupelo, by General A. J. SMITH (who, in virtue of his former exploits, as BANKS was called the savior of Louisiana, may be styled, with quite as much propriety, the savior of BANKS), has removed something of that fear. SHERMAN'S skill in preserving his supplies is remarkable.

Coming, then, to Atlanta, we find General SHERMAN, after a brilliant campaign of three months, and a march through hostile, mountainous country of 150 miles, with no gunboat or transport to aid him, in sight of the outworks of Atlanta. He has crossed the Chattahoochee, and sustained a battle far exceeding in severity and importance its predecessors at Resaca and Kenesaw. The battle was brought on by General HOOD, and conducted by him with much skill. He attacked his adversary before the latter's order of battle was entirely completed, and sought to pour his troops through a gap, or a thin surface, in the line, seizing a moment when the army, having just crossed the river, was not yet entrenched. He first spread the delusion that he had abandoned Atlanta, by sending out pretended deserters with plausible stories, and by drawing his outposts back upon his main line. The results of the brilliant action which followed, were divided. The enemy undoubtedly lost much more severely than we, from the obstinacy of their charges and the fine position of our artillery. We lost MCPHERSON, calamity enough to measure against the capture of many men. We seem to have terminated master of the field. But the advance was checked, and our troops went to entrenching, while the Confederate flag still flies over Atlanta. In one word, it remains to be seen whether the enemy are at bay here, as in Virginia, and will yield the possession of Atlanta, as of Petersburgh, only after a long struggle. But the aspect of Georgia is very different from that of ROUSSEAU'S raid and the movement on Decatur, besides annoying the enemy, show that he is not strong enough to prevent cutting his communications with impunity. The loss in his desperate attempt to break SHERMAN'S line, is a very serious disaster to him. And when it may, the campaign against Atlanta hitherto, be best compared with praiseworthy skill.

As we begin to leave midsummer behind, there are tokens of the resumption of hostilities in Southwestern Virginia, now so long in abeyance. The present position of our main forces there may be stated as a rude arc, partially surrounding Petersburgh. The right rests in Bermuda, with the city on the southerly bank. FOSTER'S division of the Tenth corps retains its entrenched position north of the James. The rest of BIRNEY'S corps line the entrenchments in front of Bermuda Hundred. On the south bank of the Appomattox, the Eighteenth corps hold the right of the line, succeeded from right to left, by the Ninth, Fifth and Second. Beyond, and in the rear, cavalry protect the flank. The right lies about 300 yards from the Appomattox, and perhaps 2,000 from Petersburgh. The left was once swung beyond the Jerusalem road. But it never reached in force the Weldon Railroad, except when the Sixth corps went down to Reams's Station, and entrenched there, after WILSON'S defeat. They were withdrawn the next day, and subsequently were detached for service in Maryland. The left was, even before their departure, greatly contracted, and copies have long whistled up and down the Weldon road with impunity. On the right and right centre, the chief skirmishing has occurred, and here the, artillery seems to have been, with arduous and hazardous labor, mounted in force —light batteries and 30-pounders, eight-inch mortars, and one monster 13-inch. Strong defensive works encircle Petersburgh on the hither bank, but works, perhaps, not impregnable in themselves. Across the river, however, the enemy have posted a formidable line of batteries, well protected in earthworks, which contend in daily artillery duels with ours.

Soon after the failure to carry Petersburgh by assault, it seemed probable that it was no longer intended to pursue that policy, but to direct the tactics in future towards intercepting the enemy's communications, so as to cut off his supplies. This plan, if successful, would obviously force LEE to come out and fight. Accordingly, it was important to make the positions of the investing force impregnable, that, against it, sally upon its entrenchments it might hold its own. This work has been faithfully done. Meanwhile, it seemed evident that the Petersburgh entrenchments could not be overrun by storming parties, not only because there was no crevice or loophole along the line into which our soldiers could thrust his sappers to have been done. In the process, our right has been badly enfiladed by the enemy's shells, and any further advance of the line at this extremity would probably subject it in addition to a reverse fire. Accordingly, if any material advance of the line had come into the plan, it would seem to have been to our left, which remains fixed, and to swing the left around to a line of circumvallation, the extremities of the concave resting severally on the Appomattox, above and below the city.

This would, under some circumstance, be a strong order of battle, but, in point of fact, the left, as well as the right, would have been enfiladed. Accordingly the left was not advanced, but refused a little, and no approaches of that nature undertaken. Entrenchments have been thrown up to protect the right, and mortars easily play into the city. Whether, however, the campaign has resolved itself entirely into the investment of two-cities and the great entrenched camp which defends them—its success or failure depending on the permanent severance of their communications—time will speedily determine. It is by no means clear that the last infantry fighting in front of Petersburgh has occurred, nor even that there may not be a near return of such encounters. Doubtless the interval of rest for the main Army has not been idled away.

AMONG the practical difficulties which beset the Government at the opening of the war, none was attended with more cost and perplexities than the provision and maintenance of animals for the cavalry, the artillery and the Quartermaster's Department. Our old military system being entirely unadapted to a condition of war, no arrangements had been provided for the supply of animals, any more than for other necessities of a state of war. The Government easily procured the few horses and mules it needed, and never contemplated an exigency which would require half a million animals a year. So far as the cavalry service is concerned the difficulties have been remedied by a very thorough system, combining economy, honesty and facility as much, probably, as they can be obtained to any arrangement to which the Government is one of the parties. We refer to the Cavalry Bureau at Washington, and its agencies in all sections of the country. At every post where there is a Quartermaster, horses are purchased, after inspection by a military and civil inspector, for whose integrity several precautions are adopted. Being sent to Washington, or to the place ordered, the horses are again inspected, and those unfit for service are retained for such dis-

position as is deemed advisable. Horses from the field, needing rest and treatment, are sent to the depots of the Bureau and fitted for renewal of service. The whole system is very much like that of the French, and its adoption shows how much our ill-arranged military organization needed the introduction of some obvious common-sense features. Probably the Government has, since the commencement of the war, unnecessarily lost in animals alone an amount of money which would have paid for a full equipment of our military organization for the last twenty years.

MAJOR GENERAL McPHERSON.

An inestimable loss has fallen upon the Western Army in the death of the gallant McPHERSON. To his immediate superior, it is a calamity like that which General MEADE must feel at the death of SEDGWICK. Skillful as are the Western Corps commanders, the loss of no one of them would have been more keenly felt in the future of the campaign, than will that of McPHERSON. Like SHERMAN, it was the aim of his life to be a thorough and accomplished soldier. How well he succeeded, up to his early and untimely death, his record will show.

General JAMES B. McPHERSON was born in Sandusky County, Ohio, in November, 1828. He entered West Point from Ohio in 1849, and, at the end of that year, stood second in his class. The three succeeding years he passed at this class, and so graduated in 1853, joining the engineer corps as Brevet Second Lieutenant. Until September, 1854, he was assistant instructor of practical engineering at the Military Academy. From that time till August, 1861, he was engaged, first on the defences of New York Harbor, next in facilitating the navigation of the Hudson, next in constructing Fort Delaware, and finally in fortifying Alcatraz Island, in San Francisco Bay. He become full Second Lieutenant in December, 1854, and First Lieutenant in December, 1858, being the youngest on the list. In August, 1861, he was ordered from California to attend to the defences of Boston Harbor. Soon after he got to Washington, dating from August, 1861. In November, 1861, he became aide-de-camp to General HALLECK, with the rank of lieutenant-colonel, and was Chief Engineer of the Army of the Tennessee, under GRANT, in the reduction of Forts Henry and Donelson, receiving for his services nomination as Brevet Major of Engineers, to date February 16th, 1862. He was at Shiloh, and for services there rendered was nominated for a Brevet Colonelcy of Engineers, to date April 7th, 1862. He had, as Colonel on HALLECK's Staff, the chief engineering charge of the approaches to Corioth, which ended in its evacuation. On the 15th of May, 1862, he became Brigadier-General of Volunteers, and, the same month, superintended with great skill all the military railroads in General GRANT's department. He was at Iuka, and again at Corinth in October, 1862, acting with so much gallantry as to be promoted to a Major-Generalcy, to date from October 3d. From that time till the close of last year, at Chickasaw Bluffs, his engineering powers came into full play, his career was a course of triumph. General GRANT wrote of him:—

"He has been with me in every battle since the commencement of the Tennessee river campaign. At Fort Henry he was acting Engineer, and the siege of Corinth, as a staff officer and engineer, his services were conspicuous. At the battle of Corinth, and the second battle of Corinth his skill as a soldier may be displayed in successfully carrying reinforcements to the point where they were most needed, and thereby saving the day, and the loss of no ammunition. In the advance through North Mississippi General McPherson commanded the right wing of the Army of the Tennessee, and was always the first to take the advance and the rear in retiring. In the campaign and siege terminating with the fall of Vicksburg, General McPherson has filled a conspicuous part. At the battle of Fort Gibson it was under his direction that the enemy was driven, by the construction of a pontoon fly bar succeeded in holding all day against an exhaustive attack. His army, in advance, at Jackson, Mississippi, destroyed all were the gunners in the movement from Fort Gibson to Hawkins's Ferry. From the 30th of April to the 16th of May the Big Black River it was a constant skirmish, the whole skillfully managed. The enemy was so closely pressed as to be unable to destroy their bridge of boats after them. From Hawkinson's Ferry to Jackson, the Seventeenth army corps guarded roads, and traveled by other routes, fighting the entire battle of Raymond alone; and the bulk of Jonathan's army was fought by the corps, entirely under the direction of General McPherson. At Champion's Hill, the Seventeenth corps and General McPherson's command generally. McPherson and his command were fighting battles. He is one of the oldest engineers and most skillful officers. I would respectfully, but earnestly recommend his promotion to the position of Brigadier-General in the Regular Army."

Of course, McPHERSON, with such a letter of recommendation, became Brigadier-General in the Regular Army. His rank dates from August 1, 1863. Two months later he led his command into Mississippi, and repulsed the enemy at Canton. In February of this year, he was second in command to SHERMAN, in the latter's famous moveable column, which marched from Vicksburgh to Meridian. Finally, in the first Atlanta campaign, his command was the Department of the Tennessee, including the entire Fifteenth, Sixteenth and Seventeenth corps. His "grand division," so-called, was the flanking force which, moving rapidly on one or the other wing, has been employed to force the enemy back to Atlanta. In some respects, the burden of the campaign, next under SHERMAN, has been on him. He fought at Resaca. The battle near Dallas was chiefly his. At Allatoona and Culp Farm he was again distinguished, was actively though not hotly engaged, at Kenesaw, and on the 17th he cut the line between LEE and JOHNSTON by occupying Decatur. Three days later he fought a severe battle, from which he came out, only to fall, shot through the lungs, early in the day of Friday, July 22d, at the early age of thirty-six years.

It is pleasant to note how GRANT, SHERMAN, and McPHERSON have successively held, of late, the same commands, the advancement of each being followed by the elevation of the next lower to the vacated place. Such a triumvirate is unequalled in our Army. If, in General GRANT, conspicuous merits have raised him to the loftiest rank, in the other two there has been equal exhibition of soldierly instincts and military genius. McPHERSON, indeed, had a soldierly intuition and a love of his profession which made him a man of rare promise. He spared no pains to become a master in the strategy of his profession, he met his death in the midst of a great campaign. His grand division had already crossed the Chattahoochee, and were struggling on the very borders of the long-sought city. But when the bloody day closed, their leader was no more. NICANOR lay dead in his harness.

"BEWARE OF LEE advancing and of JOHNSTON retreating," was the sapient advice, according to some wiseacre, delivered to our commanders by the veteran SCOTT. By whomsoever given, such was the solemn warning and watchword, under which the duplex campaign was inaugurated. How far General GRANT would have given heed to his share of the mention, we have never had opportunity of learning. From present appearances, he will have to wait some time before he can beware to any purpose. But as to JOHNSTON, his antagonist has been ware of him so long, that our Washington government has also taken the hint, and, at the eleventh hour, following SHERMAN's example, is on its guard against the wily JOSEPH. Having Johnstonized his Army back 120 miles, that General had leave to withdraw personally still further, his movement being officially accounted just so he was meditating one more masterly effort of withdrawal. His government have put him, at any rate, where he will not retreat any more. It is to be hoped that, as the enemy failed to get SHERMAN, they have at least got their own general, "just where they wanted him." SHERMAN was to have been "drawn on" in such style to final destruction as a timely reward. But, having at length concluded that the draw-game was even worse, in his match of strategy, than his favorite game of BRAGG, and accordingly returns to the latter. Meanwhile, now that SHERMAN has no JOHNSTON to beware of retreating, what shall be do about HOOD? Probably beware of his getting out of the rebel soldier began his career as full General with a shrewd, skillful, and deceptive manœuvre. He spread reports that he had evacuated Atlanta, and confirmed the suspicion by withdrawing his skirmishers, and then drove his solid lines upon our advance with sudden and unexpected fury. But he was "beware" of, and his ruse successfully checked SHERMAN for an instant; but, like the strategy of JOHNSTON, failed to relieve Atlanta or its army.

SINCE the capture of the Island of Alsen by the allied Germans, immediately after the dissolution of the London Conference, no fighting of consequence has taken place in Denmark. The Allies, by the mere force of numbers, have occupied the whole of Jutland, the Lyng Head having been crossed by them without difficulty on the 10th inst. The naval cogagement between a Danish frigate and steamer and five Prussian gunboats, off Rugen Island, resulted in the repulse of the gunboats, after a sharp fight of three-quarters of an hour. Prussian journals allege that the gunboats were unable to continue the engagement, as four of their thirteen guns had become disabled.

Finding himself unable to make head against his powerful enemies, forsaken by his natural allies, and in danger of losing his entire possessions, the King of Denmark suddenly changed his policy, and entered into negotiations for peace on a basis which can hardly fail to be as acceptable to the German Powers, as it must be distasteful to France. He has dismissed his ministry; he has announced a reactionary nobleman to take the seals of office, and he has dispatched a brother to Berlin and Carlsbad, to open direct negotiations with Germany. It is understood that he seeks for peace on the basis of the admission of Denmark, in its old territorial integrity, to the Germanic Confederation. Should peace be made on this basis, Denmark would become the German naval power, furnishing not only her whole resources, but giving to Germany, what it has always lacked, good harbors and naval arsenals, and immediate access to the Atlantic Ocean. The result of the negotiations had not been make public at the date of the last advices from Europe.

THE sanguinary defeat of the English forces by an undisciplined rabble of New Zealand savages, at the Gate Pah, on the 29th of May, was, according to the admissions of the correspondent of the London *Times*, a most ignominious and mortifying disaster. The "rebel" position consisted of two pahs, 1000 yards apart, connected by a covered way, and surrounded by rifle pits and an inner line of rail fence, masked by brambles and flax. The attacking force included the Forty-third, Sixty fifth, and portions of the Sixteenth and Seventieth Regiments, the crews of three or four men-of-war, supported by thirteen heavy Armstrong guns. After a bombardment lasting nine hours, the storming party advanced upon the works, in the face of a severe fire, and succeeded in forcing their way into the position. The enemy surrendered, they fired the pale almost deserted. Thrown off their guard, the men dispersed and fell to plundering. In an instant, says the correspondent of the *Times*, "there opened "from beneath and from every side a tremendous fire "of musketry, pointed by unseen hands. The whole "ground was alive with Maories, and the air was rent "with their savage yells." The British "fled in terror" from an equal number of savages; and to complete the story of the disaster, a portion of the force was at the same time twice repulsed in an assault upon another face of the pah. The loss of the British in the first attack was twenty-six killed and seventy-eight wounded, many of whom have since died. The proportion of officers killed was unusually large.

The *Times*' correspondent is forced to admit, in order to efface something of the stigma of this defeat, that the Maories are in all physical and moral qualities the equal of the British soldier; that they have exhibited an extraordinary capacity for the stratagems of war, and that no regular army in the world could have done what these savages did against a disciplined force, provided with an ample supply of heavy guns and all the resources and *materiél* of war.

THE organization of the Quartermaster's Department, under the act of July 4, 1864, authorizes the following increase of rank:—Chiefs of divisions in the Quartermaster's Department (nine) colonels; Inspectors (six) colonels; Chief Quartermaster at depôts (not exceeding ten) colonels; Chief Quartermaster to each Army in the field, of more than one Army corps, colonel; Chief Quartermaster of cavalry department, colonels; Chief Quartermaster to each division, of two or more brigades, majors. Two-thirds of each of the above grades to be taken from among quartermasters of volunteer service.

By previous law the Chief Quartermaster to each Army corp is to have the rank of lieutenant-colonel.

THE following promotions by brevet have been made by the PRESIDENT:—Brigadier-General M. C. MEIGS, Quartermaster-General, to be Major-General U. S. Army.

Brigadier-Generals J. G. BARNARD, S. G. FRENCH, GEORGE STONEMAN, and W. F. SMITH, U. S. Volunteers, to be Major-Generals U. S. Volunteers.

BRIGADIER-General W. T. H. BROOKS has resigned his commission as Brigadier-General of Volunteers, and Major 18th U. S. infantry.

Brigadier-General WM. S. SMITH has resigned.

BRIGADIER-General J. G. BARNARD, who was temporarily relieved from duty on the staff of General GRANT, has returned to his former position with him as Chief Engineer of the Armies in the Field.

FOREIGN MILITARY AND NAVAL MATTERS.

THE Russian Government have removed the obstructions sunk off Helsingfors to prevent the approach of vessels of deep draft.

GARIBALDI's agents are reported to be raising men for a new expedition, their operations extending to England as well as to various parts of Italy.

IN consideration of the increasing decrease of the necessaries of life, the French Government is about to raise the pensions of retired and invalided soldiers.

THE French have obtained from the Chinese Government a grant of land near Shanghai for the purpose of establishing there a park of artillery and an arsenal.

THE EMPEROR of China is said to have instituted a decoration for English and French officers who have taken part in the expedition against the Taepings.

THE English are finding great difficulty in recruiting their army, and are at a loss whether to ascribe the fact to the Irish exodus to this country, or to the demand for labor.

FRENCH has the following motto for SEMMES' presentation sword :—

A PITYING gift to one whose merit by
In being always prompt to Cut Away.

BY an Imperial order the Turkish commercial flag has been altered. In place of the red flag with white crescent as hitherto, the colors are green ground with a red ball in the middle bearing a white crescent in the centre.

DUELS are very frequent of late among the military men, as well as others, in Italy. The abolition of the penalties against the practice has been urged by a number of the Italian officers on the ground that they are inoperative, and that civilization alone can put an end to the practice.

AMONG the amusements organized for the recreation of the French soldiers in their leisure hours in the camp at Châlons, is a flute theatre of marionettes, fitted up with great taste, which, we understand, still puts in motion a considerable number of persons, all military personages, officers or privates, is complete.

THERE is talk in France of reviving a batch of extinct dukedoms. Generalissimo Fail will be Duke de Reître; Count CORDONNENC, Duke de Lorai; Vicount DIGEON, Duke de Sauty Tavannes; Count de MORNY, Duke of Dalmatia; Count BILLAULT, Duke de la Maître-Hondecourt; M. de GOSSUOUY, Duke de Lagoun.

SIR JOHN CLARENCE PAGET announces that hereafter all her Majesty's ships will carry a white ensign; the blue ensign is given to ships commanded and partly manned by men of the Royal Naval Reserve, and the red ensign will be worn by merchant vessels only. The Admiral's list is to be no longer divided into classes indicating the three colors, but into Admirals, Vice-Admirals and Rear-Admirals.

THE following is given as the result of a three days' trial at Shoeburyness of the Armstrong and White work guns, with shot and shell, at 800, 600, 200, and 50 yards distance :—

WHITWORTH.		ARMSTRONG.	
	Inches.		Inches.
Penetrated iron.....	10	Penetrated iron.....	14.1
Penetrated wood.....	24	Penetrated wood.....	28.
Lb.		Lb.	
Powder consumed.....	3	Powder consumed.....	2.75
Inches.		Inches.	
Diameter of tangential shots	6.7	Diameter of cylindrical shot	6.7

With 66 rounds at 3 deg. elevation, the ranges attained have been, for the Whitworth, from 1,700 yds. to 1,790 yds., with a deflection of 0 to 4 yds. to the right, and left; for the Armstrong shunt, from 1,643 to 1,766 yds., with deflection of 0 to 4; the breech-loader from 1,400 to 1,496 yds., deflection, right to left, 1 to 6. At 6 deg. the ranges were, for the Whitworth, in 34 rounds, from 2,990 yds. to 3,090, deflection 0 to 14 yds.; the breech-loader, 2,760 to 2,870, deflection 6 to 14 yds.; the breech-loader, 2,990 yds. to 2,481 yds., deflection 10 to 18 yds.

IN commenting on the *Alabama* fight, COLBURN's *United Service Magazine* says that the effect of that shell guns must in future determine success in naval warfare, and that wooden ships, or even iron-sides, if not clad in armor, are unfitted for any such engagement as they used to do, when only common round shot, of 42 pounds weight at the utmost, used to be fired at each other from ships. Hence the shot, such as these from eight inches upwards, make such a breach in the side of a ship, if she is not shot proof, that the said ocean be disabled, and a few shell exploding in the thickness of her sides, or between decks, will shortly "settle" her. For this opinion, it finds confidence in the late experiments at Shoeburyness last month, and in recent British experiments at Shoeburyness and Portsmouth. In the engagement referred to, one of the first steam ships of the Austrian frigate *Schwarzenberg* was a shell, "which exploded on the gun-deck, and put all the men serving one of the guns *hors du combat*." The vessel was also set on fire by shell, and would have been sunk or taken by her Danish antagonist, had she not run into neutral waters. As the fire of the Austrian ships is reported to have been particularly good and evenly maintained, in spite of the broadsides they had to receive at the outset of the Danes in accident to their shells, as well as to their good firing and manœuvring.

DEFENCE OF CANADA.

[From the Saturday Review.]

IF we may draw any inference from the commercial legislation of the last few years, unlimited liability is very uncongenial to the mass of Englishmen. Perhaps our reluctance in that respect may be symptomatic of the national old age which is creeping upon us, and which is removing us equally from the extravagant recklessness of America and the sentimental motives to action which are recognized in Germany. The lump of caution is rapidly increasing upon the national skull. War is coming to be regarded by the nation with much the same horror with which a nervous old lady regards a fight between a cockchafer and a spider. If the old sixpence, and the old theory of the practical advantages of harbor to be becoming very popular with the people. The essence of such a temper in the public mind is sufficiently to account for the nervousness which is beginning to be felt in this country and elsewhere on the subject of the defence of Canada. The frontier of Canada extends for many hundred miles. Part of it is protected by lake and river, and upon much of the remainder it is difficult to form stationing a single gunboat. The Americans, on the contrary, have been at liberty to open what canals they pleased into those lakes, and can at any moment cover them with a naval force. The other parties of the frontier of Canada in what is called an insurrectionary state. It is marked out by no natural feature of etragetic importance. It follows no river, or mountain, or marsh, at which a general should stand with confidence that he could make a stand. Such a frontier could be held only by an army numbering hundreds of thousands. And certainly it is easy to see from late events how the case of an invaded monarchy be confronted by an American army of that size. The Confederate Army of the West has shown how it can be done. When they first armed, the general impression, not only in the Southern States, but over the whole world, was that the South would be quite helpless. The true character that error has been refuted, and how nobly the Confederates have redeemed their first mistake, there is no need to tell. But the lesson is not to be learnt by those who will not read theirs. We know that we have to deal with a nation whose military passions are carried to the verge of madness, and whose numbers are such that they can be indefinitely multiplied by the reckless prodigality with which the resources of the country are thrown into them. Therefore, to which we have to look forward, in case of any accidental difference with the American Government, is the defence of a country which, with a military power of France would be scarcely equal, against a vast army of veterans, commanded by generals who at least have that skill which the experience of a great war cannot fail to confer. The money we might perhaps furnish for such a task, though we have not the money to spare, but without the hope even of an approximate reimbursement in the shape of national advantage for such a stupendous outlay. But how could we send the money? How could we furnish them? And, if not, will Canada condescend to relieve her of the onerous duty?

The whole question of most Englishmen, if this question were propounded to them, would be to the effect that, if Canada does not choose to fight for her own homesteads, she must take the consequences. We may endure delay in making those preparations for fighting which modern war requires. But to refuse preparations, be the same thing as a refusal to fight. If the Canadians decline to insure their property against American invasion, as they probably will, the liability of property to their defence. The interest in the matter is of a more immediate kind. We have no intention to take place now, they would be snapped up as neatly as a chess-player takes an unprotected pawn. The Canadians appear to think that we hope, but simply in official fashion, to commit themselves hastily to the principle of too much precaution—have, it seems, ordered the troops to abandon the outlying posts, and to concentrate themselves in Montreal and Quebec. But unless the troops themselves, in the mean time, such a measure is only shifting the scene of danger. Possibly it is meant to baffle the enemy more easy. Instead of having to collect the detachments of the battalions of regulars on their defensive frontier, he will find them collected ready to his hand. In the old days of highway robbery, a Quaker contemplating a journey in the dark was recommended to take to the precautions which it was expedient to take against the dangers of the road. A practical friend recommended a brace of pistols. "Nay," said the Quaker, "the effective reserve the men of Belial would take the pistols also." The British Government, in the statement about the Canadian frontier are very much in the condition of the Quaker's pistols. For the purposes of defence they are simply useless against the enormous force which would be brought by Americans against them. But their capture would form an attractive object for a foray, and they would be easy to take, if should the Americans cross the lake, be returned away along with less valuable plunder. If they are to remain there at all, they must be put into places where the weak have some chance against the strong. In other words, they must be protected by fortifications that are impregnable, so far as the word can be used, against the appliances of modern warfare. If the Government intends to maintain a force of British troops in Quebec and Montreal, it must forthwith begin the construction of works facilitating the task of the American officer who may be entrusted with the duty of capturing them. It will simply be assisting the part of the celebrated spossia, in the Quaker device, to save further trouble.

But then who is to pay for these fortifications? There is the rub. The defences of the Canadian frontier are much in the condition of a house which has the misfortune to be the subject of a Chancery suit. It falls into ruin because neither suitor is certain that it is his interest or business to repair it. Quebec and Montreal are remaining unfortified because the Colony and the Imperial Government agree which of them is to bear the burden of the fortifications. Of course, the time the Quebec line of fortifications parsimony will cost one or both of them a hundred times the amount of the money over which they are fighting. Whichever can be induced to undertake the task, however wrongfully he may consider it harder to the rest upon him, will win an enormous interest upon his outlay. To Canada, the secure possession of those two fortresses means simply the security of her most favored districts from devastation such as that which is now sweeping over Virginia and Tennessee. To England, it means safety from a danger which would involve her in one of the most desperate, and therefore one of the costliest, wars in which she has ever been engaged. The capture of the Canadian frontier by the Americans would be a disgrace for which it would need, in the eyes of the English people, a series of victories upon American soil to atone. But, judging from the national temper of the English and especially of official nature, there is no probability that such a grave misunderstanding will be undertaken. On the contrary, the Home and Colonial authorities will probably continue to wrangle over the payment of the expense of fortification until the moment when the enemy is actually at a step to the dispute, and will find themselves in a position to undertake the labor of that duty for themselves. The plan which the Duke of Newcastle assumes to be under the consideration of the War Office may, for aught we know, have been devised with the skill of Vauban. But there is not the difficulty. A good plan for fortifications is an admirable thing; but in order that the full advantage of its excellence may be felt, somebody must be found to pay for it. No one can feel much satisfaction at Mr. CARDWELL's assurances until it has been ascertained that he has more influence with the Lords of the Treasury than Chancellor the Exchequer, than he was able to exhibit in the case of the Colonial Governors' pensions.

THE DANISH IRON-CLAD IN ACTION.

THE special correspondent of the London *Times* gives the following account of the part played by the Danish iron-clad *Rolf Krake* during the fighting in Alsen :

At about two after midnight the officer on duty in one of the heels came to the Admiral's cabin, and, after the second for four or five miles, i. e., till close upon Kjer and Ulkebol, without hearing or seeing anything; yet hardly had he stepped on deck when the *Rolf Krake* fired a shot, the report of brisk musketry fire was heard by all on board. Captain Ehrin was ordered to go in the direction of the flashes. The point of Arnkellcore and advanced into the Als Sund as far as the narrowness of the channel allowed him to do so with safety. The enemy had in the meantime with Prussian boats laden with soldiers, and making the best of their way towards the Alsen shore. Among these he let fly his shell and grape with such effect that he sank several of them and completely swept the water of the remainder. He fired one hundred and eight shells from his five 60 pounders, and twenty-eight grapeshot. The batteries at Hovedstat let fly at him with all their might, but with no great effect on the vessel as only one shell had hit a single plate.

That day was a remarkably fortunate day for the *Rolf Krake*. Two of her masts were shot down by the enemy's fire, and the vessel herself cast among the rocks, and, so striking with all its might the front turret, plunging several inches deep into the iron plate, but without piercing it or doing any further damage to the turret. The *Rolf Krake* was hit about one hundred and fifty times during the day. At one time she grounded, the ebb-tide having already ventured so far within the narrow Als Sund as he could do with safety, and on this side, within reach of his guns there was no enemy to be seen. In the heat of battle, which had begun at Kjer was rapidly dying away, the fugitive Danish army and its Prussian pursuers having moved to the south of Sonderburg, Apenbo and Norburg, in the direction of Horup Hav. There was nothing more to be done for Captain Krarup on this spot, and backing out of the narrow channel he took to his former anchor behind the Arnkellcore point at the entrance of Augustenburg Fiord.

Having here rapidly cleared away the wreck of bismasts, and secured himself of the good condition of his ship, the captain put his vessel under steam, and through the broad part of the Sound to the northwest, or Als Fiord, he doubled the Cape of Hellesgaard, on the northern summit of the island, and anchored in the mouth of the estuary of Ake, and bringing sail aid as he could to the army at Horup Hav. On arriving off Hellesgaard, however, he sent one of his boats on shore to ascertain that the steam-vessel *Hertha*, which was anchored within the small creek called Rogs Fiord, was in the same condition as himself, and if he was, once more, Captain Rumm made for the Little Vig, and placing the helpless wooden steamer by the right side of the ironclad steered out to sea with her in tow, and bringing her with his mighty ironside from the shot that was showered down upon them by the Prussian batteries on the main peninsula, and which he safely carried into the safe and northern extremity of the island. The same assistance was extended to the gunboats that were lying inside the Augustenburg Fiord.

The vessels thus rescued performed the most useful services in bringing the Prussian land troops up and keeping up at various points no less than one thousand of the scattered corps that were quartered in the Nordberg district, which, but for the aid of the fleet, would have been cut off under General HEINMANN, when the Prussians had rushed forward from Augustenburg, and the Danish General was in full retreat upon Hadersleben. Keeping together with the minor vessels and with the rescued troops, the *Rolf Krake* then made for the Little Belt, passing Fyen Knude, whence she proceeded to Middelfahrt, and arrived at her present station off Fano Island on Thursday evening.

The *Rolf Krake* has been under steam nearly every day in the afternoon, but otherwise safe and sound, with steam up, ready for action, employed in watching the enemy across the Belt, and hastily repairing the damages inflicted upon her front turret. Her bulwarks were down, and she looked as trim a craft as a monitor can. She has now her new screw on board, which does not make her, as it was said, the swiftest vessel in the Danish navy, but considerably increases her speed, and enables her to go an hour. The captain's turret is now made as invulnerable as any other part of the ship, and the plates on some parts of the deck have been strengthened. A few trifling improvements

will soon make her a perfect vessel of her kind, and she proved lately, in a heavy gale on the Baltic, a tolerably safe and buoyant sea-boat.

A TRIP TO GENERAL MEADE'S ARMY.

UNDER this head "An Officer of the Royal Engineers" communicates an article to *Colburn's United Service Magazine*, in which he makes such return as he can for hospitality shown to him by officers of our army, by narrating the private conversations to which he was a listener. We do not know how such things are considered in the English service, but among American soldiers and gentlemen it is not customary to make public statements made in the confidence of social intercourse.

On Monday morning General BARRY, to whom we had been introduced the day before, showed us the plan of the Washington line of defence, and in the afternoon one of his aides, a Captain CAMPBELL of the Artillery, took me to ride over a portion of it.

The middle of the day saw us astride two Washington hacks (than which I have seen many worse), and off we went at a smart trot with Captain CAMPBELL followed by a Yankee cavalry orderly. We crossed the Potomac by a bridge, which had formerly been on aqueduct, and our first direction took us to Arlington Heights, where was quartered the general commanding the defences of Washington, in the very house once owned by LEE, the Confederate general. One could not help feeling, as one saw his park and gardens cut up by Northern troopers, his house turned into a dirty barrack, his drawing-room carpet covered with Yankee spittle, and his pictures and mirrors daubed disfigured with the dirt of Yankee boots, what sacrifices this man had made to ensure the freedom of his State. He gains honor, and I hope he may gain enough; for he has certainly a large fortune; he has lost the most beautiful of country places that looked over the unequalled scenery of the valley of the Potomac, as that river widens out in front of the city of Washington; and he has broken every tie of kindred, love, and home. The house was occupied by the general, from whom the Yankee general hooked down from each window the room pictures of Lee's own nearest relations, and one drawing made by poor himself, since almost every room bore now the sport of every idle inhabitant of that forfeited mansion.

Having left LEE's house, we proceeded to inspect one or two of the redoubts, forming part of the Washington line of defences; but, as I am not now writing *scientific*, I need only say that I found it rather hard work to understand them. Their construction was chiefly effected by civil labor under the direction of the engineer officer, and very proud seemed he (and with reason) of the work he passed what he had just done. Riding along still further by the line of defence, we arrived at a regiment at drill. Their performance was certainly not better, if as good, as one of our moderate county volunteer regiments in England.

PROCURING A PASS—INTRODUCTION TO GENERAL BURNS.

The next morning I set to work first thing to try and procure a pass which would enable me to proceed to the every outlet from Washington, and give me a chance of visiting the distant fields of operations now going on in America at the highest pitch of perfection. From office to office was I mercilessly driven, always with the greatest civility; but because the Secretary of War was not sitting without the Foreign Secretary's approval, and the Foreign Secretary could do nothing without a letter from the British Minister, and the British Minister, I knew, was away, at last a ticket arrived with the signature of Mr. SEWARD at the bottom, and, armed with this, I imagined that very day to seek General MEADE, and see what he was doing with his army among the hills of Virginia. I fell in with an old friend, a school-fellow, in the 1st battalion Grenade Guards, who was found on the same errand as myself; so we joined fortunes in our little expedition. A train started from Washington at two, we heard; so, at that hour, each provided with a carpet bag and rug, we appeared at that place, which by courtesy was called a station, but in reality was nothing more than some miserable wooden huts and single rickety line, where it was customary to eject or take in passengers as the train passed. The train was found to be filled with bags of flour, and amongst these bags we found some temporary arm-chairs, and settled ourselves for the journey. We were widely misled in our expectations, and our passes signed by Mr. SEWARD ensured us more than civility. All along the line were picket and sentries to guard against the inroads of Confederate cavalry. We noticed, as we passed, the well-known sites of battles at the stream of Bull Run, and the Manassas Gap Railway. The line had been taken up and destroyed by the Confederates in their recent advance, and the rails, having been re-laid in haste and great hurry, were on no consistent scale. Warrenton Junction, about fifty miles from Washington, was reached about 7:30 P.M., by which time it was quite dark. It is a better sort of village, and here General BARNEY we found horses at the quartermaster's tent awaiting our arrival; and a ride of two or three miles over roughish country brought us to camp, and to the picturesque configuration of camp-fires, brought us to the headquarters of the Army. The Adjutant-General, General SEYMOUR, was commodated in rough-and-ready tents, consisting merely of two uprights and a ridge pole supporting two thicknesses of coarse canvas. Here we found the General-in-Chief, the Chief of Artillery, whom we found, with his two aides, writing by the light of a small candle in their common tent. A hearty welcome from General MEADE was accorded, and a repast of eggs and bacon, and whatever else could be prepared at that time, was laid before us. With the ignition of the fare, and our hosts, surrounding in their kindness and civility, anticipated every want, treating us just as if they had found long lost brethren. A chat on all kinds of topics, aided by tobacco, that ever constant solace and companion of camp life, soon whiled away the evening. In the meantime, our servants, for I had brought one with me, were arranged for our use in an adjourning unoccupied tent. The weather was fine, but cool when the sun had gone down, so that all wraps were acceptable. We slept well that night, and dreamed of happy days past in other tents in times gone by.

GENERAL MEADE AND HIS STAFF.

The bugles of the Army of the Potomac woke the echoes along ten miles of the hills and valleys of Virginia, as we arose the next morning from our couches of straw. After a breakfast, which consisted of several kinds of dishes, light, solid, and sweet, all mixed up and greasy, from the use of ample supplies, we were taken by General HUNT and introduced to Major General MEADE, Commanding Engineer of the Army. He is one of the old Regular Army who has stuck to his original branch of the profession, and, it seems, suffered by his fidelity to the Union, for many officers efforts to leave the Army, join the volunteers, and thereby gain rank which would fit them for high commands over men perhaps long senior to them, who had remained at their proper work. Such has been the case with MEADE, WARREN, and many others, who have risen from a major, and WARREN a young captain of engineers, and now commanding one an army, and the other a corps. Our host, General HUNT, who succeeded to the command of artillery of the Army, complained very much of this system of promoting men to the detriment of their science, and expressed an opinion that it would permanently injure the efficiency of the latter. It seems indeed to me a difficult question to determine, and one that must never be overlooked when it becomes necessary to use a regular and volunteer army together in the same field. From Major DUVAINE's tent, and the large wall-tent usually occupied as a drawing-room, had been produced in our honor, we were conducted to that of the Commander-in-Chief. There we encountered several officers of the staff, all lounging around a table covered with plans and papers, and discussing news from Washington, and the operations of the day. Among the generals we were particularly introduced to HUMPHREYS, chief of the staff, and WARREN, commanding the Second corps, who had the day before distinguished himself in the battle of Bristoe Station. The advent of two strangers afforded new rest to the conversation, and gave rise to many fresh topics and inquiries. Over the table was spread a large military map, with a portion of a cigar in his mouth, to whom no particular attention was paid, as he was soon introduced to me as the Commander-in-Chief of the Federal forces. General MEADE is a man of middle height, with gray hair, whiskers, and moustache, a high forehead, and a quick keen eye. He looked, when we met him, a good deal worn. soon got into conversation with him, and he spoke in a very modest way of the battle which had led to over the victory at Gettysburgh (which is one of the greatest two by the North in the whole war), more to the fact of the Southern army having got away, than to anything else, than to any particular merit of his own. He talked of his present position, and the state of affairs in the Army commanded by a first-rate general in his front; of recruiting, interfering, yet timorous government in constant communication with him, and of the Army, which is chiefly composed of undrilled, undisciplined conscripts. The Washington authorities have from the commencement of the war been afraid to trust the Army to the generals of themselves, as they dread the idea of not having constantly a strong protecting force between Lee's army and their own precious heads and that of our Capital. We were very anxious to see the outpost arrangements, and to ride to the advanced line, but it was late in the day when we first received with some little hesitation, but at length General WARREN promised to send one of his staff and an escort for our protection, and we were to start more pleasantly at 8 next morning. I cannot help remarking here, once for all, the wonderful civility shown to us without exception by every officer we met from one end of the coast. MEADE was the officer, given with a hearty good will to entertain us and to afford us every facility during for an unlimited time; and frequent were the little acts of kindness and attention shown us, and for which there was the less probability of return, as we were to leave, after leaving General MEADE's tent, we walked up to a house standing near the headquarters camp, and heard among the woods, in the dark, the sound of our horses braying, which we understood was the general of cavalry being entertained at breakfast according to custom. The house near which we stood was occupied by a negro family, who is called, it is a remarkable fact, contradicting many rumors heard in England, very well treated by the Federal soldiers in the Northern Army, that hardly a house in the country we visited was burned or injured in any way, but in each the inhabitants were found living in the very midst of the Army, in perfect security and trust.

VISIT TO THE ADVANCED POSTS.

About 12 o'clock we left headquarter camp for our expedition to the front and advanced posts. General HUNT accompanied as part of the way, as far as our temporary destination, as we cantered along, he complained much of the way in which the Army was left to struggle on by the Federal Government; and seemed to be very anxious that his doings and those of his brethren in arms should be properly thought of and appreciated by posterity, as he considered. When we arrived at the Second division of the Second corps, we inquired for General WARD, and found him unexpectedly to his friends, absent from his post with the rest of the camp to assist him in eating a bullock's head, which had been made into mock turtle soup, preparatory to a grand feast in his campaign against the Red Indians in the far West. The head had been secured, hair and all, in a coating of clay, and baked in the hot ashes of a camp-fire, and when the warmth was retained around this primitive stove, and experience decided the proper moment for extricating the dainty morsel from its fiery bed, it was pronounced by General WARD, and one who gave us a hearty welcome to a first-rate meal. I must not be thought to be prejudiced by the hospitality received, when I say that our host was as good a general (at least in the care of his troops) as he was a cook. The arrangements for comfort, and the designs for little luxuries and conveniences throughout his whole camp showed the supervision of a master mind; and I would state as a proof of the fact, that the men of this Second division were more cheerful under difficulties, and more ready to endure privations and perils than any other division, where the irregular line of the untidy pitched tents, and the dirt on every side told of want of supervision and little care among those whom destiny and progress had put in a position of authority over it. The tents used throughout the whole of the Northern Army in America is the "*tente d'abri*" of the French. Two are slept in each tent, and carry it with their knapsacks on their backs. The tent, being so small, is tolerable in this country, as it always forms a roof, and a day's halt makes it a work of little moment to pitch one of a temporary habitation from the wood which abounds on every side. This same wood also forms a ready material for fires, so that cold, which is so painful a hardship, is rarely known in the American campaigner. As soon as we could get away from our friends, we started for our ride, accompanied by a party of about fifty troopers, some acting as a kind of escort, who was for the time a soldier, and doing duty on General WARD's staff. Our object was to ride round the front of the position held by the Federals, and reconnoitre that held by the Confederates. Many miles of ground had to be passed over to accomplish the proposed task; and we were obliged to prick on in order to get back to our own camp before night arrived, which would have found us in a perilous vicinity, almost impossible to traverse in darkness even by an inhabitant who knew it well. The Federal Army occupied the ground all along the railway from Warrenton to Warrenton Junction, a stretched back on its left along the main line to Washington. Its front stretched over more than seven miles. Its cavalry were posted six or seven miles, at least, in front of the infantry, and they had a complete chain of outposts extending round the Confederate position, and encompassing a large front. It is usual for the cavalry to be this distance in front until they receive timely warning to be sent to the infantry of any movements made by the enemy. The country we traversed, like the whole of Virginia, is very undulating, but the slopes of roads of hills and valleys, very wooded, and almost destitute of roads of any description. Where the cultivated fields used to lie, is now a growth of small trees, which grow up where the land is not cultivated, as attain a good size even in a single year. The country is thus peculiarly advantageous for defensive operations. We rode past many camps of soldiers, through several woods of various growths, and over excavations made in the hills for the purpose of forts. In fact, I must fairly say, think much of the Federal cavalry as seen at this time, and, in my humble opinion, they would disgrace the name of a yeomanry regiment of the South. We met at the time of the mutinies in that country. Their horses were poor and ill-kept, their equipment ragged, and their discipline bad, and their arms worse. The only redeeming mob of infantry on horseback, thus the cavalry were intended to appear, were the Lancers, who, mounted armed with swords, revolvers, and breech-loading carbines, which latter, by a Yankee device five rounds without reloading, and now in the hands of the cavalry of the North. After passing large bodies of cavalry in woods, and parties patrolling in the plains, and eventually a picket on the skirt of a wood with a strong reserve getting, we came to open the very advanced posts, and a line of videttes marked out the position taken up by the invading army of Virginia. We halted here a moment, and a couple of hundred yards ahead, clear against the bright autumn sky, we could see the videttes of the Confederate army, on a hill rising gently down the grassy plain. This was the Confederate picket. Only that little space of intervening grass separated us from the enemy, and we could not know how soon, before fighting together hand-to-hand in the struggle for life or death. We were very anxious to see and speak to the Southerner in the field, and I was glad able to go to the Confederate army, this seemed a chance not accompanied with danger. Having obtained General permission, we two Englishmen, leaving our escort behind, rode to the front, waved our hats, and, establishing thus a communication, rode up to the Confederate outpost. The leader of the picket was evidently a man of birth. A Virginian gentleman guarding his own Fatherland! His style and appearance were totally different to those of his adversaries whom we had just left. His dress consisted of a light grey jacket, belted and trimmed with yellow, long riding boots, a kind of jaunty wide-awake hat, a sash round his waist, and a coat which during the heat of the day was neatly rolled up and strapped behind him. His arm was easy, and he looked a thorough light horseman. His arms were a sword and revolver taken from the enemy. We were soon engaged in a friendly conversation. We pointed out to us the position of Lee's army, which we could see by the aid of our glasses. He pointed out to us the position of his opponents in the field, and talked confidently of the ultimate success of the South, saying that they had plenty of men, and that the Federal command had been wasting drawing on, we had to ride back; and as it was, had great difficulty in finding the headquarter camp, only coming in to the end of the camp, preceded by the General and his staff. General MEADE had been so anxious at the late hour we were in, that he had sent out a party to look for us, and to look after us, as some Federal officers had been that very afternoon killed by guerrillas on the very ground over which we had been riding. These guerrillas are a peculiar form of the Federal cavalry, and are dashing and daring in their attacks. No doubt we saw some of them, but they were not distinguished by any peculiarity of dress, and were expected our appearance, recognizing the difference between the British and the Yankee uniform. We dined, and after dinner evening, after our ride of a good thirty miles, hearing and recounting stories as we sat by the blazing wood fire, and smoking cigars, and drinking a sip from the bottle which circulated round and round among the friendly circle. I felt quite sorry when the embers died out, and one by one each moved off to his tent. We had arranged to start next morning to catch the mail train back to Washington. Our kind hosts were all civility to the last, bustling about our breakfast, and attending to all our wants, and one of the last words down with us to see us all safe as far as the Warrenton Junction.

On the authority of a prisoner escaping into General Sherman's lines, it is stated that at Americus, Ga., a stockade in an open field, without shade, and partly covered with water, and filled with crowds of unsheltered Union soldiers, without a blanket, overcoat or cooking utensil.

ARMY. GAZETTE.

ASSISTANT JUDGE-ADVOCATE-GENERAL.

WAR DEPARTMENT, ADJUTANT GENERAL'S OFFICE, }
WASHINGTON, July 25, 1864.

General Orders No. 239.

I. Colonel William M. Dunn, Assistant Judge-Advocate-General, will take post at Louisville, Ky., at which place the office of Assistant Judge-Advocate-General is hereby established.

All records of boards of survey, courts of inquiry, commissions which are required by Regulations to be forwarded to the Judge-Advocate-General will be sent by officers ordering such courts or commissions within the military departments of the Ohio, the Tennessee, the Cumberland, the Missouri, and the Arkansas, to the office of Assistant Judge-Advocate-General, at Louisville.

With reference to records of courts and commissions, it will be the duty of the Assistant Judge-Advocate-General to call for such as are not forwarded in due course, and to report to the Judge-Advocate-General such as are incomplete, and to give immediate notice of false returns in any proceedings which may be submitted to him for revision or approval. He will forward all complete records to the Judge-Advocate-General, but will not, as a general rule, prepare reports of such proceedings, but instructed to that effect by the Judge-Advocate-General.

II. The Assistant Judge-Advocate-General will have the assistance of a number of rooms at office, and fuel therefor, assigned to an Assistant Quartermaster, as provided in paragraph 1,042 of Regulations, 1863.

By order of the SECRETARY OF WAR.

E. D. TOWNSEND, Assistant Adjutant-General.

WAR DEPARTMENT, ADJUTANT GENERAL'S OFFICE, }
WASHINGTON, July 18, 1864.

General Orders No. 228.

By command of President, Major-General D. C. Wright is assigned to the chief command of all the forces moving against the enemy on the north side of the James River, including the troops under the 10th corps, under command of Brigadier-General Ewing, and any troops under Major-General Weitzel, Brigadier-General Turner, Brigadier-General Foster, Major-General Gillmore, or elsewhere.

Major-General Wright will make such temporary command of the parts of the troops specified in the Department of Washington, and will report to the Adjutant-General of the army, for the information of the President, the movements of the troops under his command. His personal staff will accompany him.

By order of the SECRETARY OF WAR, who will report to Brigadier-General E. D. Mattiscke, temporarily commanding, for duty, by command of

E. S. PARKER, A. D. C.

HIS FAREWELL ORDER.

HEADQUARTERS EIGHTEENTH ARMY CORPS, July 20.

To the Officers and Soldiers of the Eighteenth Army Corps:

I part from you, to be absent for a short time, as Lieutenant-General commanding the armies of the United States, with great regret, and my heart full of thanks for your kindness to me. Nothing but I have been your commander I have tried hard to share with you the dangers, the fatigues, and the honors of the campaign we have just finished, and this time your record has been brightened unsullied. Whatever in the future may be my fate, I shall always feel proud that I have been from its start or shortening of yours, and I trust you will believe that I have tried to do justice to your merits and services. May fair skies and always crown your efforts with victory.

W. S. HANCOCK, Major-General.

ORDER FROM HIS SUCCESSOR.

HEADQUARTERS EIGHTEENTH ARMY CORPS, July 20.

To the Officers and Soldiers of the Eighteenth Army Corps:

Sincerely regretting that any circumstance or necessity should deprive us of your able commander and his staff, I assume command by special order No. 56, paragraph three, from headquarters armies of the United States, dated July 19, 1864, and hereby establish my headquarters in the field of the Eighteenth army corps. I have only to ask that you will give me the same support and confidence you have so freely and liberally given your noble and unselfish commander.

J. B. MARTINDALE, Brigadier-General.

ARMY RATIONS.

SECTION 2, of the act approved July 17, having modified the army ration, the War Department has issued the following regulations:

First—Persons in receipt of rations of pork, bacon, or equivalent of salt or fresh beef, eighteen ounces of soft bread or flour, or twelve ounces of hard bread, or one pound and a quarter of corn meal, and to every one hundred rations, fifteen pounds of beans or peas, or ten pounds of rice or hominy, and ten pounds of potatoes, and eight pounds of roasted or roasted and ground coffee, or one pound and eight ounces of tea, and eight pounds of sugar, four pounds of candles, one pound and four ounces of adamantine or star candles, four pounds of soap, and two quarts of vinegar, and salt at the rate of two ounces of pepper. The Subsistence Department, as may be most convenient or economical, will issue the whole or any part of the ration and amount of its supplies, shall determine whether soft bread or hard bread, fresh beef or pickled pork, or bacon or salt beef, or green coffee or roasted coffee, shall be issued.

Second—On a campaign, on marches, or on board of transports, the ration of hard bread or corn meal.

Third—Deficiencies in potatoes, molasses, or dessicated compressed or pressed vegetables at the rate of one ounce and a half of the former and one ounce of the latter, or of rice or hominy, or beans or peas, may be issued.

Fourth—Beans, peas, soft and potatoes, fresh, shall be purchased, issued and sold at cost prices, and the difference between cost and charge added to 20 pounds.

Fifth—When deemed necessary, fresh vegetables, dried fruits, and cheese, pickles, or any other proper food may be purchased and issued, by and at the discretion of the officer in charge of regular supplies. The Commissary-General of Subsistence is alone authorized to order such purchases.

A new order allows sutlers to supply their respective commands in the Army of the Potomac with such articles as are included in the Willson Bill, and the supplement thereto, in such manner as may be prescribed by the Commissary-General of Subsistence.

Officers will be permitted to obtain such articles as they may desire for the mess table, upon the order of the Commissary-General of Subsistence, or of a circuitor of November 7, 1863.

The Secretary of War, by order of December 31, respecting the delivery of rations and liquors ordered by officers, and to order No. 221, of August 29, prescribing the quantity of rations that may be ordered by officers.

Sutlers and traders will at all times hold themselves in readiness to move the army upon short notice.

[PUBLIC RESOLUTION, No. 87.]

A RESOLUTION to increase the compensation of assistants in the hospitals.

Resolved by the Senate and House of Representatives of the United States of America in Congress assembled, That from and after the first day of July, eighteen hundred and sixty-four, hospital stewards shall be entitled to and receive ten dollars per month and one ration.

Approved, July 4, 1864.

[PUBLIC RESOLUTION, No. 85.]

JOINT RESOLUTION explanatory of a joint resolution relative to pay and rank of staff officers of the Lieutenant-General.

Be it resolved by the Senate and House of Representatives of the United States of America in Congress assembled, That the joint resolution relative to pay of staff officers of the Lieutenant-General, approved May twenty-fifteen hundred and sixty-four, shall be so construed as to entitle all the staff officers on the staff of the Lieutenant-General to the pay, emoluments, and allowances of cavalry officers of the same grade.

Approved, July 4, 1864.

[PUBLIC RESOLUTION, No. 86.]

A RESOLUTION in relation to the professors of the Military Academy at West Point.

Resolved by the Senate and House of Representatives of the United States of America in Congress assembled, That the thirty-first section of the act entitled "An act for enrolling and calling out the national forces, and for other purposes," approved March three, eighteen hundred and sixty-three, or the seventh section of "An act to promote the public defence by establishing a uniform militia throughout the United States, and for other purposes," approved June twentieth, eighteen hundred and sixty-two, shall not be construed to authorize the drafting into the military service of the professors of the Military Academy or being absent during the suspension of the academic duties of that institution.

Approved, July 2, 1864.

[PUBLIC RESOLUTION, No. 84.]

A RESOLUTION explanatory of an act entitled "An act to increase the pay of officers in the army, and for other purposes," approved June twentieth, eighteen hundred and sixty-four.

Resolved by the Senate and House of Representatives of the United States of America in Congress assembled, That the word "regulations," in the first section of an act entitled "An act to increase the pay of officers in the army, and for other purposes," approved June twentieth, eighteen hundred and sixty-four, is not to be construed to include any number less than twenty composing an enumerated or brigade; but such members of boards shall be paid as hereinafter provided: Provided, That members of such board thirty-four dollars per month, one-fourth of them twenty dollars per month, and the remaining half of them seventeen dollars per month.

Approved, July 2, 1864.

[PUBLIC—NO. 377.]

AN ACT for the relief of seamen and others, not officers, borne on the rolls of vessels of the United States in the civil service.

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That the proper accounting officers of the Treasury be and they are hereby authorized, in settling the accounts of the disbursing officers of the navy, not commissioned on board of any vessel in the employ of the United States, which, by any casualty, or by the sale of the vessel, or otherwise, has or have ceased to be employed, together with the rolls and papers necessary to the settlement of such accounts, to allow and pay to any seaman who, at the date of such loss, to assume the last quarterly return of the paymaster of any such vessel, and to any officer not commissioned who, at the subsequent credits to those on board, to the date of such loss, if there be no official evidence to the contrary. Where such quarterly return has been from any cause not been made, the said accounting officers are hereby authorized to adjust such claims and accounts on principles of equity and justice, and also to allow and pay to each person, not an officer, who was on board of any such vessel at the time when such vessel was lost, one month's pay in addition to the preceding sixty dollars on compensation for the loss of his personal effects.

SEC. 2. *And be it further enacted*, That the proper accounting officers of the Treasury be and they are hereby authorized, in settling the accounts of the disbursing officers of the army, not commissioned officers, seamen, or other persons, not an officer, such payment to be made to the legal representatives of such deceased persons as have not been made, the said accounting officers are hereby authorized to adjust such claims and accounts on principles of equity and justice, and also to allow and pay to each person, not an officer, who was on board of any such vessel at the time when such vessel was lost, one month's pay in addition to the preceding sixty dollars on compensation for the loss of his personal effects.

SEC. 3. *And be it further enacted*, That the proper accounting officers of the Treasury be and they are hereby authorized, in settling the accounts of the disbursing officers of the army, not commissioned officers, seamen, or other persons, not an officer, such payment to be made to the legal representatives of such deceased persons as have not been made, and to allow and pay to each person, not an officer, who was on board of any such vessel at the time when such vessel was lost, one month's pay in addition to the preceding sixty dollars on compensation for the loss of his personal effects.

SEC. 4. *And be it further enacted*, That the proper accounting officers of the Treasury be and they are hereby authorized, in settling the accounts of the disbursing officers of the army, not commissioned officers, seamen, or other persons, not an officer, such payment to be made to the legal representatives of such deceased persons as have not been made, and to allow and pay to each person, not an officer, who was on board of any such vessel at the time when such vessel was lost, one month's pay in addition to the preceding sixty dollars on compensation for the loss of his personal effects.

SEC. 5. *And be it further enacted*, That the proper accounting officers of the Treasury be and they are hereby authorized, in settling the accounts of the disbursing officers of the army, not commissioned officers, seamen, or other persons, not an officer, such payment to be made to the legal representatives of such deceased persons as have not been made, and to allow and pay to each person, not an officer, who was on board of any such vessel at the time when such vessel was lost, one month's pay in addition to the preceding sixty dollars on compensation for the loss of his personal effects.

SEC. 6. *And be it further enacted*, That the proper accounting officers of the Treasury be and they are hereby authorized, in settling the accounts of the disbursing officers of the army, not commissioned officers, seamen, or other persons, not an officer, such payment to be made to the legal representatives of such deceased persons as have not been made, and to allow and pay to each person, not an officer, who was on board of any such vessel at the time when such vessel was lost, one month's pay in addition to the preceding sixty dollars on compensation for the loss of his personal effects.

SEC. 7. *And be it further enacted*, That the proper accounting officers of the Treasury be and they are hereby authorized, in settling the accounts of the disbursing officers of the army, not commissioned officers, seamen, or other persons, not an officer, such payment to be made to the legal representatives of such deceased persons as have not been made, and to allow and pay to each person, not an officer, who was on board of any such vessel at the time when such vessel was lost, one month's pay in addition to the preceding sixty dollars on compensation for the loss of his personal effects.

SEC. 8. *And be it further enacted*, That the proper accounting officers of the Treasury be and they are hereby authorized, in settling the accounts of the disbursing officers of the army, not commissioned officers, seamen, or other persons, not an officer, such payment to be made to the legal representatives of such deceased persons as have not been made, and to allow and pay to each person, not an officer, who was on board of any such vessel at the time when such vessel was lost, one month's pay in addition to the preceding sixty dollars on compensation for the loss of his personal effects.

SEC. 9. *And be it further enacted*, That the proper accounting officers of the Treasury be and they are hereby authorized, in settling the accounts of the disbursing officers of the army, not commissioned officers, seamen, or other persons, not an officer, such payment to be made to the legal representatives of such deceased persons as have not been made, and to allow and pay to each person, not an officer, who was on board of any such vessel at the time when such vessel was lost, one month's pay in addition to the preceding sixty dollars on compensation for the loss of his personal effects.

SEC. 10. *And be it further enacted*, That the proper accounting officers of the Treasury be and they are hereby authorized, in settling the accounts of the disbursing officers of the army, not commissioned officers, seamen, or other persons, not an officer, such payment to be made to the legal representatives of such deceased persons as have not been made, and to allow and pay to each person, not an officer, who was on board of any such vessel at the time when such vessel was lost, one month's pay in addition to the preceding sixty dollars on compensation for the loss of his personal effects.

SEC. 11. *And be it further enacted*, That the proper accounting officers of the Treasury be and they are hereby authorized, in settling the accounts of the disbursing officers of the army, not commissioned officers, seamen, or other persons, not an officer, such payment to be made to the legal representatives of such deceased persons as have not been made, and to allow and pay to each person, not an officer, who was on board of any such vessel at the time when such vessel was lost, one month's pay in addition to the preceding sixty dollars on compensation for the loss of his personal effects.

SEC. 12. *And be it further enacted*, That the proper accounting officers of the Treasury be and they are hereby authorized, in settling the accounts of the disbursing officers of the army, not commissioned officers, seamen, or other persons, not an officer, such payment to be made to the legal representatives of such deceased persons as have not been made, and to allow and pay to each person, not an officer, who was on board of any such vessel at the time when such vessel was lost, one month's pay in addition to the preceding sixty dollars on compensation for the loss of his personal effects.

SEC. 13. *And be it further enacted*, That the proper accounting officers of the Treasury be and they are hereby authorized, in settling the accounts of the disbursing officers of the army, not commissioned officers, seamen, or other persons, not an officer, such payment to be made to the legal representatives of such deceased persons as have not been made, and to allow and pay to each person, not an officer, who was on board of any such vessel at the time when such vessel was lost, one month's pay in addition to the preceding sixty dollars on compensation for the loss of his personal effects.

SEC. 14. *And be it further enacted*, That the proper accounting officers of the Treasury be and they are hereby authorized, in settling the accounts of the disbursing officers of the army, not commissioned officers, seamen, or other persons, not an officer, such payment to be made to the legal representatives of such deceased persons as have not been made, and to allow and pay to each person, not an officer, who was on board of any such vessel at the time when such vessel was lost, one month's pay in addition to the preceding sixty dollars on compensation for the loss of his personal effects.

SEC. 15. *And be it further enacted*, That the proper accounting officers of the Treasury be and they are hereby authorized, in settling the accounts of the disbursing officers of the army, not commissioned officers, seamen, or other persons, not an officer, such payment to be made to the legal representatives of such deceased persons as have not been made, and to allow and pay to each person, not an officer, who was on board of any such vessel at the time when such vessel was lost, one month's pay in addition to the preceding sixty dollars on compensation for the loss of his personal effects.

SEC. 16. *And be it further enacted*, That the proper accounting officers of the Treasury be and they are hereby authorized, in settling the accounts of the disbursing officers of the army, not commissioned officers, seamen, or other persons, not an officer, such payment to be made to the legal representatives of such deceased persons as have not been made, and to allow and pay to each person, not an officer, who was on board of any such vessel at the time when such vessel was lost, one month's pay in addition to the preceding sixty dollars on compensation for the loss of his personal effects.

SEC. 17. *And be it further enacted*, That the proper accounting officers of the Treasury be and they are hereby authorized, in settling the accounts of the disbursing officers of the army, not commissioned officers, seamen, or other persons, not an officer, such payment to be made to the legal representatives of such deceased persons as have not been made, and to allow and pay to each person, not an officer, who was on board of any such vessel at the time when such vessel was lost, one month's pay in addition to the preceding sixty dollars on compensation for the loss of his personal effects.

SEC. 18. *And be it further enacted*, That the proper accounting officers of the Treasury be and they are hereby authorized, in settling the accounts of the disbursing officers of the army, not commissioned officers, seamen, or other persons, not an officer, such payment to be made to the legal representatives of such deceased persons as have not been made, and to allow and pay to each person, not an officer, who was on board of any such vessel at the time when such vessel was lost, one month's pay in addition to the preceding sixty dollars on compensation for the loss of his personal effects.

SEC. 19. *And be it further enacted*, That the proper accounting officers of the Treasury be and they are hereby authorized, in settling the accounts of the disbursing officers of the army, not commissioned officers, seamen, or other persons, not an officer, such payment to be made to the legal representatives of such deceased persons as have not been made, and to allow and pay to each person, not an officer, who was on board of any such vessel at the time when such vessel was lost, one month's pay in addition to the preceding sixty dollars on compensation for the loss of his personal effects.

SEC. 20. *And be it further enacted*, That the proper accounting officers of the Treasury be and they are hereby authorized, in settling the accounts of the disbursing officers of the army, not commissioned officers, seamen, or other persons, not an officer, such payment to be made to the legal representatives of such deceased persons as have not been made, and to allow and pay to each person, not an officer, who was on board of any such vessel at the time when such vessel was lost, one month's pay in addition to the preceding sixty dollars on compensation for the loss of his personal effects.

SEC. 21. *And be it further enacted*, That the proper accounting officers of the Treasury be and they are hereby authorized, in settling the accounts of the disbursing officers of the army, not commissioned officers, seamen, or other persons, not an officer, such payment to be made to the legal representatives of such deceased persons as have not been made, and to allow and pay to each person, not an officer, who was on board of any such vessel at the time when such vessel was lost, one month's pay in addition to the preceding sixty dollars on compensation for the loss of his personal effects.

SEC. 22. *And be it further enacted*, That the proper accounting officers of the Treasury be and they are hereby authorized, in settling the accounts of the disbursing officers of the army, not commissioned officers, seamen, or other persons, not an officer, such payment to be made to the legal representatives of such deceased persons as have not been made, and to allow and pay to each person, not an officer, who was on board of any such vessel at the time when such vessel was lost, one month's pay in addition to the preceding sixty dollars on compensation for the loss of his personal effects.

SEC. 23. *And be it further enacted*, That the proper accounting officers of the Treasury be and they are hereby authorized, in settling the accounts of the disbursing officers of the army, not commissioned officers, seamen, or other persons, not an officer, such payment to be made to the legal representatives of such deceased persons as have not been made, and to allow and pay to each person, not an officer, who was on board of any such vessel at the time when such vessel was lost, one month's pay in addition to the preceding sixty dollars on compensation for the loss of his personal effects.

SEC. 24. *And be it further enacted*, That the proper accounting officers of the Treasury be and they are hereby authorized, in settling the accounts of the disbursing officers of the army, not commissioned officers, seamen, or other persons, not an officer, such payment to be made to the legal representatives of such deceased persons as have not been made, and to allow and pay to each person, not an officer, who was on board of any such vessel at the time when such vessel was lost, one month's pay in addition to the preceding sixty dollars on compensation for the loss of his personal effects.

SEC. 25. *And be it further enacted*, That the proper accounting officers of the Treasury be and they are hereby authorized, in settling the accounts of the disbursing officers of the army, not commissioned officers, seamen, or other persons, not an officer, such payment to be made to the legal representatives of such deceased persons as have not been made, and to allow and pay to each person, not an officer, who was on board of any such vessel at the time when such vessel was lost, one month's pay in addition to the preceding sixty dollars on compensation for the loss of his personal effects.

SEC. 26. *And be it further enacted*, That the proper accounting officers of the Treasury be and they are hereby authorized, in settling the accounts of the disbursing officers of the army, not commissioned officers, seamen, or other persons, not an officer, such payment to be made to the legal representatives of such deceased persons as have not been made, and to allow and pay to each person, not an officer, who was on board of any such vessel at the time when such vessel was lost, one month's pay in addition to the preceding sixty dollars on compensation for the loss of his personal effects.

SEC. 27. *And be it further enacted*, That the proper accounting officers of the Treasury be and they are hereby authorized, in settling the accounts of the disbursing officers of the army, not commissioned officers, seamen, or other persons, not an officer, such payment to be made to the legal representatives of such deceased persons as have not been made, and to allow and pay to each person, not an officer, who was on board of any such vessel at the time when such vessel was lost, one month's pay in addition to the preceding sixty dollars on compensation for the loss of his personal effects.

SEC. 28. *And be it further enacted*, That the proper accounting officers of the Treasury be and they are hereby authorized, in settling the accounts of the disbursing officers of the army, not commissioned officers, seamen, or other persons, not an officer, such payment to be made to the legal representatives of such deceased persons as have not been made, and to allow and pay to each person, not an officer, who was on board of any such vessel at the time when such vessel was lost, one month's pay in addition to the preceding sixty dollars on compensation for the loss of his personal effects.

SEC. 29. *And be it further enacted*, That the proper accounting officers of the Treasury be and they are hereby authorized, in settling the accounts of the disbursing officers of the army, not commissioned officers, seamen, or other persons, not an officer, such payment to be made to the legal representatives of such deceased persons as have not been made, and to allow and pay to each person, not an officer, who was on board of any such vessel at the time when such vessel was lost, one month's pay in addition to the preceding sixty dollars on compensation for the loss of his personal effects.

SEC. 30. *And be it further enacted*, That the proper accounting officers of the Treasury be and they are hereby authorized, in settling the accounts of the disbursing officers of the army, not commissioned officers, seamen, or other persons, not an officer, such payment to be made to the legal representatives of such deceased persons as have not been made, and to allow and pay to each person, not an officer, who was on board of any such vessel at the time when such vessel was lost, one month's pay in addition to the preceding sixty dollars on compensation for the loss of his personal effects.

SEC. 31. *And be it further enacted*, That the proper accounting officers of the Treasury be and they are hereby authorized, in settling the accounts of the disbursing officers of the army, not commissioned officers, seamen, or other persons, not an officer, such payment to be made to the legal representatives of such deceased persons as have not been made, and to allow and pay to each person, not an officer, who was on board of any such vessel at the time when such vessel was lost, one month's pay in addition to the preceding sixty dollars on compensation for the loss of his personal effects.

SEC. 32. *And be it further enacted*, That the proper accounting officers of the Treasury be and they are hereby authorized, in settling the accounts of the disbursing officers of the army, not commissioned officers, seamen, or other persons, not an officer, such payment to be made to the legal representatives of such deceased persons as have not been made, and to allow and pay to each person, not an officer, who was on board of any such vessel at the time when such vessel was lost, one month's pay in addition to the preceding sixty dollars on compensation for the loss of his personal effects.

SEC. 33. *And be it further enacted*, That the proper accounting officers of the Treasury be and they are hereby authorized, in settling the accounts of the disbursing officers of the army, not commissioned officers, seamen, or other persons, not an officer, such payment to be made to the legal representatives of such deceased persons as have not been made, and to allow and pay to each person, not an officer, who was on board of any such vessel at the time when such vessel was lost, one month's pay in addition to the preceding sixty dollars on compensation for the loss of his personal effects.

SEC. 34. *And be it further enacted*, That the proper accounting officers of the Treasury be and they are hereby authorized, in settling the accounts of the disbursing officers of the army, not commissioned officers, seamen, or other persons, not an officer, such payment to be made to the legal representatives of such deceased persons as have not been made, and to allow and pay to each person, not an officer, who was on board of any such vessel at the time when such vessel was lost, one month's pay in addition to the preceding sixty dollars on compensation for the loss of his personal effects.

SEC. 35. *And be it further enacted*, That the proper accounting officers of the Treasury be and they are hereby authorized, in settling the accounts of the disbursing officers of the army, not commissioned officers, seamen, or other persons, not an officer, such payment to be made to the legal representatives of such deceased persons as have not been made, and to allow and pay to each person, not an officer, who was on board of any such vessel at the time when such vessel was lost, one month's pay in addition to the preceding sixty dollars on compensation for the loss of his personal effects.

SEC. 36. *And be it further enacted*, That the proper accounting officers of the Treasury be and they are hereby authorized, in settling the accounts of the disbursing officers of the army, not commissioned officers, seamen, or other persons, not an officer, such payment to be made to the legal representatives of such deceased persons as have not been made, and to allow and pay to each person, not an officer, who was on board of any such vessel at the time when such vessel was lost, one month's pay in addition to the preceding sixty dollars on compensation for the loss of his personal effects.

SEC. 37. *And be it further enacted*, That the proper accounting officers of the Treasury be and they are hereby authorized, in settling the accounts of the disbursing officers of the army, not commissioned officers, seamen, or other persons, not an officer, such payment to be made to the legal representatives of such deceased persons as have not been made, and to allow and pay to each person, not an officer, who was on board of any such vessel at the time when such vessel was lost, one month's pay in addition to the preceding sixty dollars on compensation for the loss of his personal effects.

SEC. 38. *And be it further enacted*, That the proper accounting officers of the Treasury be and they are hereby authorized, in settling the accounts of the disbursing officers of the army, not commissioned officers, seamen, or other persons, not an officer, such payment to be made to the legal representatives of such deceased persons as have not been made, and to allow and pay to each person, not an officer, who was on board of any such vessel at the time when such vessel was lost, one month's pay in addition to the preceding sixty dollars on compensation for the loss of his personal effects.

SEC. 39. *And be it further enacted*, That the proper accounting officers of the Treasury be and they are hereby authorized, in settling the accounts of the disbursing officers of the army, not commissioned officers, seamen, or other persons, not an officer, such payment to be made to the legal representatives of such deceased persons as have not been made, and to allow and pay to each person, not an officer, who was on board of any such vessel at the time when such vessel was lost, one month's pay in addition to the preceding sixty dollars on compensation for the loss of his personal effects.

SEC. 40. *And be it further enacted*, That the proper accounting officers of the Treasury be and they are hereby authorized, in settling the accounts of the disbursing officers of the army, not commissioned officers, seamen, or other persons, not an officer, such payment to be made to the legal representatives of such deceased persons as have not been made, and to allow and pay to each person, not an officer, who was on board of any such vessel at the time when such vessel was lost, one month's pay in addition to the preceding sixty dollars on compensation for the loss of his personal effects.

SEC. 41. *And be it further enacted*, That the proper accounting officers of the Treasury be and they are hereby authorized, in settling the accounts of the disbursing officers of the army, not commissioned officers, seamen, or other persons, not an officer, such payment to be made to the legal representatives of such deceased persons as have not been made, and to allow and pay to each person, not an officer, who was on board of any such vessel at the time when such vessel was lost, one month's pay in addition to the preceding sixty dollars on compensation for the loss of his personal effects.

SEC. 42. *And be it further enacted*, That the proper accounting officers of the Treasury be and they are hereby authorized, in settling the accounts of the disbursing officers of the army, not commissioned officers, seamen, or other persons, not an officer, such payment to be made to the legal representatives of such deceased persons as have not been made, and to allow and pay to each person, not an officer, who was on board of any such vessel at the time when such vessel was lost, one month's pay in addition to the preceding sixty dollars on compensation for the loss of his personal effects.

SEC. 43. *And be it further enacted*, That the proper accounting officers of the Treasury be and they are hereby authorized, in settling the accounts of the disbursing officers of the army, not commissioned officers, seamen, or other persons, not an officer, such payment to be made to the legal representatives of such deceased persons as have not been made, and to allow and pay to each person, not an officer, who was on board of any such vessel at the time when such vessel was lost, one month's pay in addition to the preceding sixty dollars on compensation for the loss of his personal effects.

SEC. 44. *And be it further enacted*, That the proper accounting officers of the Treasury be and they are hereby authorized, in settling the accounts of the disbursing officers of the army, not commissioned officers, seamen, or other persons, not an officer, such payment to be made to the legal representatives of such deceased persons as have not been made, and to allow and pay to each person, not an officer, who was on board of any such vessel at the time when such vessel was lost, one month's pay in addition to the preceding sixty dollars on compensation for the loss of his personal effects.

SEC. 45. *And be it further enacted*, That the proper accounting officers of the Treasury be and they are hereby authorized, in settling the accounts of the disbursing officers of the army, not commissioned officers, seamen, or other persons, not an officer, such payment to be made to the legal representatives of such deceased persons as have not been made, and to allow and pay to each person, not an officer, who was on board of any such vessel at the time when such vessel was lost, one month's pay in addition to the preceding sixty dollars on compensation for the loss of his personal effects.

Assistant Surgeon R. W. Wills, U. S. V., will report to the Medical Director Department of Arkansas, for duty.

VARIOUS NAVAL MATTERS.

EXPORTS are being made to raise the Monitor *Keokuk*, sunk off Morris Island, during the attack upon Charleston.

It has been mentioned in some of the foreign papers, that the *Fulda* was the vessel designed for the second *Alabama*; but a dis patch from Southampton, dated July 15, says that, by the Secretary of the Navy, says:—"The *Fulda*, which sailed from Bordeaux is reported to have passed into Prussian hands, and has entered the Weser."

GENERAL McDowell at San Francisco has issued an order requiring passengers on ocean steamers and ships to give up their arms to the captain of the vessel and permit an examination of their baggage. The object is to prevent the probable danger of attempts to take possession of steamers on the coast by private sailing as passengers.

THE practice ships *Marion* and *Marblehead*, and the yacht *America*, on which the midshipmen of the Naval Academy are taking their summer cruise, arrived in the port of London from from an uneventful cruise after the *Florida*. They went some eighty miles out to sea, first eastward of Nantucket, then southward, doubling Montauk Point, and then up the coast to Newport, New York, Boston and Judith. Several other vessels which went in search of the *Florida* have returned to Fortress Monroe after an unsuccessful effort to overhaul her.

THE prospect of a draft has perceptibly stimulated enlistments in the Navy, and the late excitement respecting the conduct between the Navy and Secretary of War and the challenge which are said to have passed between the officers of the Federal and Confederate squadrons, seem to have thrown a romance about the naval service which appeals much more forcibly to the public mind than more freely in it. In consequence of this sudden influx of men, we shall have more vessels of vessels to chronicle, some of which have been idly swinging at their moorings for want of seamen to man them for an active service.

THE prize lists for the *Connecticut* for the capture of the *Stonia*, and *Grand Gulf* for the capture of the *Atlanta*, have been received at the office of the Fourth Auditor, but the money has not been received back in Treasury, and it may be some weeks before they will be ready for distribution. The report of the sale of the *Young Republic*, captured by the *Grand Gulf*, amounting to $475,360 99, has been received, but the money will be ordered as soon as a return of expenses is rendered. Decrees for the prizes of the *Hatteras*, *Rosalind*, *Nellie* and *Warrior*, have not been received. The prizes *Fairfield*, *Springbok*, *Kate* and *Lilla*, have all been appealed to the Supreme Court, and cannot possibly be ready before January next. The prizes *Robert E. Lee* and *Cornelia*, have been sold at Boston, and a contest between the claimants is pending as to who shall share in the prize money. We are informed by Mersnal Heyn it will not be determined for some time yet. The *Alliance* for *South Carolina*, and *J. A. Dix* for *Florida*, are under distribution. We are indebted for the above information to Mr. M. Snyder, Jr., Army and Navy Agency and solicitor of claims, 19 Nassau street.

THE event of the week at the Brooklyn Yard is the launch of the *Ammonoosuc*, screw, 10-gun, 2,300 tons burden. This is the first of the class off the stocks; her sister ships being the *Wenguenoc* and *Pushmataha*. The former is on the building slip adjoining, and the Brooklyn Yard. These are to be the largest screw frigates in the Navy, and will form a most powerful and efficient class of vessels. The size just launched, it is thought will serve for a sportsman's hole in a substantial manner, almost entirely of white oak. Her dimensions are as follows: Length on gun deck, extreme length 254 feet; extreme breadth 44 feet 6 inches. The depth of the hold from the top of the timber to the gun-deck is 22 feet 10½ inches. The vessels will be ship rigged, and her tonnage when launched will be measured 2,300 tons. It is intended these vessels shall attain a high speed, and will accordingly be all that could be desired. The engines for all the vessels of this class will be built at the Novelty Iron Works, New York. They consist of two double acting-geared engines of ten feet strokes, and cylinders 100 inches in diameter. Eight main boilers furnish the steam, and there will be a spare boiler for the decks. After the accident occurred at the launching, a French flag being hoisted instead of that of the Union Jack, and creating much astonishment. The mistake was soon rectified, and the vessel was successfully christened by Miss Richards of New York and Miss Pruech, who was understood to be a grand-daughter of Commodore Stringham.

On the 26th inst. the U. S. supply steamer *Onward* was seen lying at Quarantine for some time, arrived at the Brooklyn Navy Yard, where she is now moored. Also the U. S. steamer *Queen*, from Hampton Roads, arrived. The supply steamer *Fred. Methers* sailed with a draft of 365 seamen for the North Atlantic Squadron on the 27th. The *Lexington* and the *Ascutney* are being prepared for sea with all possible dispatch. They are now under the supplies. The former will take a large draft of men to Hampton Roads. The Steam Engineering Bureau pay its portion of the bills has been towed into the stream, where she awaits orders. The *Mahoosuc* and *Nyack* have had new masts put to, and the riggers are now at work upon them. The *Nyack* has received her guns, and will be ready ready for sea. The *Genesbok* has been hauled up on "Rotten Row," and will probably be there until some time more becoming her worth. The steamer *Ivy* is also hauled up on the old ship yard wall, which is used to be a ropy ordinance yard. The *Maumee* is now called the *Jamestown*, and will be commanded by Captain R. Chandler. The U. S. steamer *Horace Beals*, formerly the *Arrow*, arrived at the Yard on the 25th from Pensacola, now being employed as a supply vessel to the South Atlantic Squadron. The *Nodowa* arrived again on the 26th, and sails on the 30th, taking with her a supply of men to Norfolk. The *Ascutney* was commissioned on the 28th, Captain Mitchell commanding. The *Kensington* was expecting to go into commission on the 29th, Captain Butterfield. The following commissioned vessels are lying at the Brooklyn Yard:—*Penobscot*, *Pawtuxet*, *Passaic*, *Canonicus*, *Monadnock*, *Mahopac*, *Oneida*, *Nesbaminy*, *Neosho*, *Kennebec* and *Kingfisher*. The other vessels are, the *Minnesota*, *Merrimac*, *Roanoke*, *Nyack*, *Pensacola*, *Portsmouth*, *Seneca*, *Tuscarora*, and *Genesbok*.

The Subsistence Department has accepted bids to supply five thousand barrels No. 2 flour, at from $13 25 to $13 68 per barrel.

To cure sea-sickness, pour cold water on the head; and to prevent it, place a wet cloth in the crown of your hat.

OBITUARY.

CAPTAIN S. W. BURDEE.

Captain Burdee was born in 1837, near Robinson's Tavern, Va., June 30th, 1864, of wounds received in the battle of the Wilderness. He was Captain Company B, Rockbridge, of the 58th Regiment U. S. Infantry, aged 28 years. Captain Burdee was the son of Colonel Samuel Burdee, of the 58 U. S. Infantry, and grandson of Gen. Lieut Reuben, Revolutionary Colonel of the 6th U. S. Infantry. He endured the service on the 27th of March, 1861, as Second Lieutenant of the 58 Cavalry — soon after joined his company; was with the advance when our army pushed to Manassas, and fought gallantly among as the Battle of Bull Run; afterwards exchanged as the 16th August and joined his regiment with the army of the Potomac on the Peninsula; but was taken sick with typhoid fever, and was left to leave the army. Joined on his recovery, and was with his regiment at the second Bull Run battle; afterwards at Antietam and Fredericksburg. In the spring of 1863, was for a short time on duty at Richmond, but returned to his regiment a few days before the battle of Gettysburgh. Was engaged in that battle, where his colonel fell on the second day. From that time he constantly followed the fortunes of his regiment, and was engaged in the campaign of the Wilderness, and fell mortally wounded on the first of which he was severely wounded, and left on the field of battle. He was shortly after captured, and removed to the hospital near Robinson's Tavern, where his leg was amputated, but he never recovered, and he did not recover; but, after lingering for several weeks, died on the 30th of June.

(Business Notice.)

A Card.—Owing to the enormous advance in the prices but only of the raw materials, and not of any other commodity, I find it impossible to continue longer the sale of my Pens at six rates. This I regret exceedingly, as I do not like to advance prices on any thing; but, having to buy gold at the present fabulous prices, this is no longer possible.

My friends and the public will give me credit, however, for having struggled long and hard against the unlooked pressure to deprive the advancing world and currency. The advance now made is not enough to cover me, with gold at present rates; should it increase where it is, or go still higher, a further rise in prices must be made. In any case, however, I intend, as heretofore, to sell a better article for less money than it can be bought for elsewhere.

A circular, with engravings of all the sizes, styles, and present prices will be sent on receipt of three postage. Address

A. Morton,
No. 25 Maiden Lane, New York.

July 11, 1884.

(Business Notice.)

We notice that O. S. Fowler, of New Haven, Conn., is Agent for "Reuben Brownlee's" paper, at $2 50 per year in advance—cheap enough. Try it you.

MARRIED.

[Announcements of marriages should be paid for at the rate of fifty cents each.]

Farnam—Trachter.—In St. Paul's church, by Rev. James S. Biddle, Right Reverend C. Franklin, U. S. N., to Miss Sallie S. Trachter, of Baltimore, Md. No cards.

Letters containing return stamp answered promptly and willingly.

HIGHLY IMPORTANT TO SOLDIERS AND SAILORS.

INSURE YOUR LIMBS OR YOUR LIFE.

THE NATIONAL UNION LIFE AND LIMB INSURANCE COMPANY of NEW YORK, chartered by the Legislature and Governor of New York, have now the pleasure to notify the heads of the Life and Limb Insurance Agency of the State the sum of $100,000 in U. S. Bonds, deposited for all who deal with it, is now issuing policies at its offices,

No. 243 BROADWAY, N. Y.

Officers, Soldiers and Sailors can now, for a small sum, insure their limbs, so that if either of them is lost, they can immediately secure a large sum of money for their own use. Or any relative, with their consent, can insure them.

We believe that nothing has yet been devised of greater value to the soldier. Instead of spending your last money for amusements or gambling, why not make provision, in the sure way, against the day of trouble. Information and circulars sent to all parts of the country free.

PROPOSALS FOR
BUILDING AND EQUIPPING TWO FIRST CLASS AND TWO SECOND CLASS LIGHT-VESSELS.

Treasury Department, Office Lighthouse Board, Washington City, July 3, 1884.

Separate sealed proposals will be received at this office until 12 M., on Saturday, the 25th f August, 1884, for building and equipping two first class lighthouse vessels, to be named respectively

Length from stem to stern of outer post to fit fore side of main keel, 128 feet; length of keel for tonnage, 102 feet 6 inches; depth of hold from top of floor timber to top of beam, 14 feet; tonnage about 283.

Also for building and equipping two second class lighthouse vessels, to be named respectively

Length between perpendiculars, 97 feet; breadth, moulded, 24 feet; depth of hold from top of floor timber to top of beam, 11 feet 6 inches; tonnage about 175.

The vessels are to have one mast each, abaft and the yellow pine of the finest grain stopped with Dutch metal. The work is to be executed in which the vessels are to be constructed, all which will be required to be built in the United States and in form a part of the contracts, can be had on application to the Lighthouse Board, or to the Light-House Inspector at Portland, Boston, New York, or Philadelphia, at which places, also, the plans and drawings may be seen and examined.

The Board reserves the right to reject or propose, or to refuse to receive any vessel so built in accordance with the terms of the contract; and no contract will be considered binding until it shall have been approved by the Secretary of the Treasury. No proposal will be received or considered, unless the party proposing is engaged in ship building, and each offer must be accompanied by the signature of two responsible persons as sureties for the faithful fulfilment of the contract.

Each proposal must be for the vessel complete, with the sum for which the bidder proposes to build each vessel, specifying the time for completion, and the amount of each of the printed specifications above mentioned to which he will agree to adhere. There is no mistake as to the object of the proposal.

The Board reserves the right to reject or propose, or to refuse to receive any vessel so built in accordance with the terms of the contract; and no contract will be considered binding until it shall have been approved by the Secretary of the Treasury. No proposal will be received or considered, unless the party proposing is engaged in ship building, and each offer must be accompanied by the signature of two responsible persons as sureties for the faithful fulfilment of the contract.

Each proposal must be for the vessel complete, with the sum for which the bidder proposes to build each vessel, specifying the time for completion, and the amount of each of the printed specifications above mentioned to which he will agree to adhere. There is no mistake as to the object of the proposal.

Persons making proposals to build or of these third-vessels may suggest any change or alterations by which they may be able to improve the model, form or materials, and in making such suggestions the proposer shall state in the offered that he will be governed, with the amount saved thereby. The proposer also for each proposal will be required to complete the vessel and deliver it to the agent of the Board at such place as may be designated, when the same to be named in the bill. All proposals must be sealed and endorsed "Proposals for building light-vessels," and then enclosed in another envelope, and addressed to the Secretary of the Lighthouse Board, Washington, D. C.

No bid will be considered that doesnot conform to the requirements of this advertisement.

Any person submitting a proposal as be present, and will forfeit the security at the time and place hereinbefore specified.

By order of the Lighthouse Board

W. B. Shubrick, Chairman.

PROPOSALS FOR TIMBER AND MATERIALS FOR THE NAVY.

NAVY DEPARTMENT,
BUREAU OF CONSTRUCTION AND REPAIR,
June 30, 1864.

Sealed proposals to furnish Timber and Materials for the Navy, for the fiscal year ending June 30, 1865, will be received at the Bureau of Construction and Repair, until 12 o'clock of the 1st day of August next, at which time the opening will be commenced. "Proposals must be addressed "Proposals for Timber and Materials for the Navy," and they may be distinguished from other business letters addressed to the Chief of the Bureau of Construction and Repair.

The materials and articles embraced in the classes named are as follows, particularly stated in the printed schedules, any of which will be furnished to such as desire to examine them on the Commissioners' Wharf at the Navy Yards or to the Navy Agent nearest thereto, and there to receive the proposals and contracts for the Bureau.

The division into classes being for the convenience of dealers in such articles, bidders will be required to bid as near as may be for the whole of the class as actually required for bids. The Commissioners and Navy Agents will also furnish to all parties applying the schedule of classes of their own Yards, being a copy of the schedules in the other Yards, for the information only, from which may be judged whether it will be desirable to make application for any of the classes of those Yards. All other things being equal, preference will be given to those of home manufactures.

Offers must be made for the whole of the class at any yard, upon one of the printed schedules, or in such condensed form as may be given in the advertisement.

Upon application to the Bureau, to the Commandant of any yard, or to any Navy Agent, the form of such condensed form, and other necessary information respecting the proposals will be furnished.

The Government will be awarded to the lowest bidder or lowest proper guarantees, as required by the law and regulations of the Navy Department, reserving the right to reject the lowest bid, if deemed exorbitant.

Bidders will bear date the day the notification is given and deliveries can be commenced at their stations.

Sureties in the full amount will be required to sign the contract, and their responsibility certified by a United States district judge, United States district attorney, collector, or navy agent. Bonds without sureties, twenty per centum will be withheld from the amount of bills rendered for deliveries until they are completed, and eighty per centum of each bill, approved by the Commandant, will be paid quarterly as deliveries yards, will be paid by the Navy Agents at the points of delivery, within ten days after the requisition of the Government, within ten days after the warrant for such payment is received from the Secretary of the Treasury.

The following are the classes required at the respective Navy Yards.

KITTERY.

Class No. 1, White Oak logs; No. 2, White Oak Keel and Keelson, Sided; No. 3, White Oak Plank and Timber and Knees; No. 4, White Oak Plank; No. 6, Yellow Pine Timber; No. 7, Yellow Pine Plank; No. 8, Yellow Pine Masts and Spar Timber; No. 11, White Pine Plank and Boards; No. 12, White Pine and White Oak Deck Plank; No. 13, Ash Logs and Plank; No. 14, Ash Oars; No. 16, Black Walnut Plank; No. 17, Cedar Boards; No. 18, Locust; No. 19, White Oak Scantling; No. 20, Yellow Pine Scantling; No. 23, Lignumvitæ; No. 25, Iron round, flat and square; No. 26, Steel; No. 27, Iron Rods; No. 28, Iron Nails, wrought and cut; No. 30, Lead; No. 34, Tin and Sheet Iron; No. 35, Copper; No. 36, Tools for Stores; No. 36, White Lead; No. 37, Zinc White; No. 38, Linseed Oil; No. 39, Spirits Turpentine, Varnish; No. 40, Linseed Oil; No. 41, Glass; No. 42, Pitch; No. 43, Tar; No. 44, Rosin; No. 47, Ship Chandlery.

CHARLESTOWN.

Class No. 1, White Oak Logs; No. 2, White Oak Keel and Keelson, Sided; No. 3, White Oak Plank and Timber; No. 4, White Oak Plank; No. 6, Yellow Pine Logs; No. 7, White Pine Plank and Boards; No. 8, White Pine Timber; No. 9, White Pine Log, Plank and Boards; No. 12, White Pine Deck and Scant Plank; No. 13, Ash Logs and Plank; No. 14, Ash Oars; No. 16, Black Walnut and Cherry; No. 17, Cedar Boards; No. 18, Locust; No. 19, White Oak Scantling; No. 20, Yellow Pine Scantling; No. 23, Iron Nails, wrought and cut; No. 24, Iron Bolts; No. 25, Iron round, flat and square; No. 26, Steel; No. 27, Iron Rods; No. 28, Iron Nails, wrought and cut; No. 30, Lead; No. 34, Tin and Sheet Iron; No. 35, Copper; No. 36, Tools for Stores; No. 36, White Lead; No. 37, Zinc White; No. 38, Linseed Oil; No. 39, Spirits Turpentine, Varnish; No. 40, Linseed Oil; No. 41, Glass; No. 42, Pitch; No. 43, Tar; No. 44, Rosin; No. 47, Ship Chandlery; No. 48, Gaskin; No. 49, Lignumvitæ; No. 50, Iron Copper; No. 51, Paints; No. 54, Balloons.

NOTE.—The copper referred to in Class No. 50, and to be delivered on it, must be wrapped in the boats there is specified, and is subject to the inspection of the navy, as required by the schedule.

PROPOSALS FOR MATERIALS FOR THE NAVY.

NAVY DEPARTMENT,
BUREAU OF STEAM ENGINEERING, July 15, 1864.

Sealed proposals are invited for supplying the navy for the fiscal year ending June 30, 1865, will be received at the Bureau of Steam Engineering, until 12 o'clock of the 15th day of August next, at which time the opening will be commenced.

Proposals must be endorsed "Proposals for Materials for the Navy," that they may be distinguished from other business letters, and directed to the Chief of the Bureau of Steam Engineering.

The materials and articles embraced in the classes named are as follows, particularly stated in the printed schedules, any of which will be furnished to such as desire to examine them on the Commissioners' Wharf at the respective yards, or to the Navy Agent nearest thereto, and there to receive the proposals and contracts for the Bureau.

The division into classes being for the convenience of dealers in such articles, bidders will be required to bid as near as may be for the whole of the class as actually required for bids. The Commandants and Navy Agents will also furnish to all parties applying the schedule of classes of their own Yards, being a copy of the schedules in the other Yards, for the information only, from which may be judged whether it will be desirable to make application for any of the classes of those Yards. All other things being equal, preference will be given to those of home manufactures.

Offers must be made for the whole of the class at any yard upon one of the printed schedules, or in such condensed form as may be given in the advertisement.

Upon application to the Bureau, to the Commandant of any yard, or to any Navy Agent, the form of such condensed form, and other necessary information respecting the proposals will be furnished.

The Government will be awarded to the lowest bidder or lowest proper guarantees, as required by the law and regulations of the Navy Department, reserving the right to reject the lowest bid, if deemed exorbitant.

Bidders will bear date the day the notification is given and deliveries can be commenced at their stations.

Sureties in the full amount will be required to sign the contract, and their responsibility certified by a United States district judge, United States district attorney, collector, or navy agent. Bonds without sureties, twenty per centum will be withheld from the amount of bills rendered for deliveries until they are completed, and eighty per centum of each bill, approved by the Commandant, will be paid quarterly as deliveries yards, will be paid by the Navy Agents at the points of delivery, within ten days after the requisition of the Government, within ten days after the warrant for such payment is received from the Secretary of the Treasury.

The following are the classes required at the respective Navy Yards.

THE DERINGER PISTOL.
TIFFANY & CO.,
550 and 552 BROADWAY, NEW YORK,
SOLE AGENTS FOR NEW YORK AND THE EASTERN STATES.

By a recent arrangement with Mr. DERINGER, the inventor, we have undertaken the exclusive sale of the Pistol bearing his name in the world-known perfect arm of which he is the maker and only manufacturer. They propose keeping constantly in store a full assortment of the pistols and the ammunition for the same, and will be at all times prepared to fill orders for large quantities, at manufacturer's prices. The arrangement has become necessary on the part of Mr. Deringer, in order to protect the public from spurious articles assuming to be his genuine, and thus purchasers, by ordering of retail, will be safe who appreciate this fact.

THE CAMPAIGN IN VIRGINIA.

THE spell of inaction at Petersburgh has at length been broken, and the record of the week is one of daring and skillful attempt, of failure, and of disaster. The early week was celebrated by the customary occasional artillery game of iron marbles at long taw. On Sunday, the 24th, there was brisk shelling and picket firing all day in front of the Ninth corps, and the preceding night had been made noisy by the mortars. During the afternoon, a shell exploded one of the enemy's caissons, disabling a score of men, and in return, a bomb from him burst in the headquarters of the Fifty-seventh Massachusetts, severely wounding some of the officers of that regiment. But our whole loss during the day was not more than twenty or thirty men. A grateful rain fell all night. Next day, another explosion, as if of a second caisson, occurred in the enemy's works. Tuesday morning was mainly quiet, except in front of the Ninth corps, where, as has been said, picket-firing has always been incessant, night and day. But, about noon, the enemy's guns opened on the right of our line. As dark there was again a very heavy cannonading along the right and right centre, lasting with fury till after midnight, the skirmishers, also, engaging in rapid musketry fire.

THE RUSE AT DEEP BOTTOM.

Meanwhile, General GRANT had already inaugurated the great operations for which a month of preparation had been spent. It must be remembered that our line is full twenty miles long. Far away to the right, and across the James at Deep Bottom, just above Four-Mile Creek, FOSTER's division of the Tenth corps had been for a long time in possession of an entrenched camp. The importance of this position is two-fold. First, it prevents any sudden demonstration on our right flank from Malvern Hill, still in the enemy's possession, and it checks the constant disposition of the enemy to occupy the north bank of the river at this point, and to blockade it against our gunboats and transports by field artillery. Secondly, it furnishes a good base for threatening an advance on Richmond from the southeast along the three parallel roads, and lends, as well, important assistance to a feint in that direction. The former purpose it has long served, as has been duly recorded. To the latter use it was now for the first time put. A short time since, the enemy moved a Whitworth battery to a place called Strawberry Plains, opposite Jones's Neck, and a mile and a-half below FOSTER, and with that temporarily drove off the *Mendota*, and blockaded the river. Strawberry Plains was accordingly occupied by us, as has been stated. FOSTER remained strongly entrenched in his position, with a pontoon bridge crossing the James in his rear, being thoroughly protected by our gunboats. But, in his front, a large force of the enemy barred any advance. On Thursday, the 21st, a second bridge was thrown across the James at Strawberry Plains, and next day a brigade of the Nineteenth corps crossed, and held the bridge head. From that time until the Wednesday following, there was constant skirmishing; and, as threatening were our demonstrations, that a division (reported as KERSHAW's) was added by the enemy to WILCOX's division of infantry and the cavalry force hitherto in position in front of FOSTER. All this was as General GRANT desired. On Thursday, the 26th, at daylight, very rapid and heavy artillery firing, intermingled with musketry, was to be heard from FOSTER's front at headquarters, near City Point. It continued all the morning. At evening, this demonstration was renewed, the gunboats opening heavily on the enemy, and all Thursday night the roar was incessant. Rapid skirmishing by infantry continued throughout the day, resulting in a loss in FOSTER's division of about fifty men, principally in the Eleventh Maine.

About 4 P. M. of the same day, the Second corps silently took up its march from the extreme left of the line, and soon after was followed by SHERIDAN's cavalry, which lay in camps, protecting our left flank and rear. BARLOW's division took the lead, with MOTT and GIBBON following. The column marched very rapidly, and without straggling, to Point of Rocks on the Appomattox, crossing the river early in the evening. At midnight the James was reached at Jones's Neck, and, before daylight, the crossing began on the pontoon bridge, which had been muffled with hay and grass. SHERIDAN's cavalry followed, soon after daybreak, sweeping by the infantry on the Newmarket road. Our line of battle was, when established, as follows:—SHERIDAN and KAUTZ on the right; HANCOCK's Second corps next, at Strawberry Plains; the brigade of the Nineteenth corps on his left; and FOSTER in his old position on the extreme left at Deep Bottom. The work of the day, however, had been assigned chiefly to HANCOCK's corps. In their front, stretched along a road skirting a pine forest, lay the enemy, under KERSHAW, in strong rifle pits, defended by one battery. Up to this point run a road from the crossing, on which the Second corps, about 7 o'clock, began to advance. In the stream, the *Mendota* opened fire with 100-pounder Parrotts, and our skirmishers spread out at once across the open space in front of the enemy. The latter's battery began a rapid fire. With great celerity, however, MILES's brigade of BARLOW's division, advancing under cover, handsomely flanked the whole position in a brisk charge. The enemy immediately retreated, abandoning four 20-pounder Parrott guns and their limbers, with two caissons, which, with a few prisoners, were sent to the rear as trophies. The guns were a battery captured from General BUTLER at Drury's Bluff, two months ago. Our forces having now halted, the enemy also paused, a mile distant, and threw up new entrenchments on a commanding ridge. Our loss was probably not fifty in killed and wounded. In the evening, MOTT's division was pushed out to skirmish towards the enemy's new position. Brisk firing occurred, with a greater loss to us than during the morning's affair, the whole day costing a little over a hundred men. In sixteen hours, the Second corps had broken camp, marched twenty miles, crossing two rivers, and captured a line of entrenchments and a battery. The skirmish took place at Newmarket, a mile from Deep Bottom, and twelve from Richmond.

On Thursday, the demonstrations north of the James were continued, FOSTER moving about on the left, and HANCOCK on the right, and the gunboats occasionally shelling the woods. The preceding evening, SHERIDAN's cavalry division had taken position on the right of HANCOCK's corps. At seven o'clock on Thursday, a general cavalry advance was ordered, and, after a march of three miles, SHERIDAN came upon a strong infantry force of the enemy. The cavalry was quickly dismounted and formed in a belt of woods, with GREGG on the right and TORBERT on the left. TORBERT's division was briskly attacked, and fell back into the woods. But, rallying, both MERRITT's and DAVIES' brigades charged, and broke the enemy, who left the field in our possession with two stands of colors, belonging to the Eighteenth and Twenty-eighth North Carolina, and a hundred prisoners. It is reported that about 150 of the enemy's killed, wounded and prisoners, fell into TORBERT's hands. On the right, GREGG was less fortunate. DEVENS' brigade was steadily forced back, with the loss of one gun and many men. At length, about 9 o'clock, GIBBON's division of the Second corps came up and relieved GREGG, and subsequently skirmished a little with the enemy. On the whole, the cavalry battle was very even, one division being successful and the other unsuccessful. Our loss was about 250. That of the enemy was probably much greater, as more than a hundred prisoners were captured from him, besides his killed and wounded, and our loss in prisoners was very slight. The enemy's advance was handsomely and deliberately conducted, and at first swept our cavalry before it. He used no artillery, however, and our superiority in that respect, as well as in numbers and position, soon checked him. The arrival of our infantry, of course, made us masters of the field.

On Friday, these demonstrations were continued. To add to the feint, a train of about 400 empty wagons, being chiefly the transportation of the Sixth corps, was ostentatiously crossed on one of the pontoon bridges, as if an advance on Malvern Hill was to be made in great force. Nearly twenty thousand men and about twenty cannon had been sent north of the James. The demonstrations had the desired effect. LEE hurried off from Petersburgh a force thought to be as large as 10,000 or 15,000, to check these dangerous manifestations. KERSHAW's and WILCOX's divisions of infantry and a force of cavalry were reported as already arrived on Thursday, and twenty-nine car loads of reinforcements were said to have been counted passing up from Petersburgh the preceding evening. On Thursday evening, then, MOTT's (Third) division of the Second corps was secretly removed again to Petersburgh, and, after some skirmishing with the enemy on Friday afternoon, after dark the rest of HANCOCK's corps and all the cavalry retraced their steps, marching all night, and arrived before daybreak at Petersburgh. At the latter place, there had been the usual fusilade on Tuesday, Wednesday, Thursday and Friday, except that it had grown obviously bolder along the line, and especially on the right. Considerable loss was caused on both sides by the accurate bursting of shells. On Thursday evening, the fire was particularly vindictive, and the dark and gloomy night was illuminated by the constant flashing of guns and bursting of bombs. During the evening, a fire broke out among the houses of Petersburgh, probably caused by our shells.

THE MINE.

But all these events were only preliminaries of a great experiment, on which much of our fortune was staked. This was nothing less than the explosion of a heavy mine, which had been planted under one of the strongest of the enemy's works. The idea of this mine originated with Lieutenant-Colonel PLEASANTS, of the Forty-eighth Pennsylvania. He and his regiment having been accustomed to mining before the war, by them the whole work was accomplished. It

was begun on the 25th of June, soon after the impregnability of Petersburgh as it then stood, had been demonstrated by the fearful slaughter of our troops in many assaults. It was started in the side of a ravine surmounted by an earthwork, in front of Burnside's (Ninth) corps, and was pushed towards a formidable fort of the enemy, situated about 2,000 yards from Petersburgh. The distance to be mined was about 500 feet, and the work was difficult. Its complete success reflects credit on the projector and his regiment. The mine was constructed in the usual method. First, the surface was carefully measured by triangulation. Tools were altered to suit the exigencies of the work. The excavation was then begun. The gallery was made in the usual shape, about four feet wide at the bottom, sloping up to the top. It was about 4½ feet high, and, as has been said, about 500 feet long. A ventilating shaft was sunk near the entrance, and skillfully managed. The ground rose towards the enemy's fort, and that fact, as well as the presence of a quicksand, caused the tunnel to be sloped upward as it progressed. Difficulties, in the way of marshy ground, water, and quicksands, were encountered and overcome. At length the fort was reached. It was about 20 feet overhead. Now, wings were extended right and left, so that the main gallery might issue into two diverging galleries, running along the outer contour of the fort. Into these latter were introduced eight chambers, carefully tamped, or separated by packings of sand bags and wood. Wooden pipes ran about a hundred feet from the magazine towards the mouth of the gallery, and were connected there by a hose or fuse, which extended the rest of the distance. Finally, the chambers were charged with about four tons of powder—a vast quantity. Just a month from its inception the work was completed. But it was not immediately fired. A delay of several days ensued, during which the successful feint at Deep Bottom was made.

PREPARATIONS FOR ASSAULT.

The excavations were conducted with great secresy, and with all precaution against failure. The earth was brought out and thrown on works, to prevent notice. But our operations during the campaign have never been models of secretiveness. There was some discussion amongst subordinate officers on the plan, before the commanding general accepted it. The work, also, was of such a nature, that our own neighboring soldiers near and then had their suspicions aroused. It was generally believed that mining had begun, but it was talked of in our camps with great doubt, and very few could locate the subterranean operations. To assist concealment, intercourse between the opposing picket lines was strictly prohibited. An incessant skirmishing and artillery fire has been kept up in front of the Ninth corps, while the rest of the line was comparatively quiet and peaceful. And this will explain our record of late so often repeated, "the firing has been chiefly on the right and right "centre, in front of the Ninth and Eighteenth "corps."

The enemy undoubtedly suspected our work. First, it was *a priori* probable. Again, intimations of this affair, as of others, would naturally leak out. It is said that counter-shafts, indeed, had been sunk by the enemy, and that he was mining towards our lines. The results seem to show that he was ignorant of the exact locality of our magazine. For, even after the chambers were excavated under the fort, while his movements and voices were heard, ours were concealed. But, undoubtedly, however loosely informed, he had prepared against the denouement, wherever it might occur. And the fact that the fort actually stood over, and to the key of his position, as the event behind, induced him to be on his guard at this point. Accordingly, in effect, the springing of the mine in part, but only in part, took him by surprise.

The plan of assault was, of course, to explode the mine, and immediately to open a terrific cannonading from every gun in the line. This concentrated fire would naturally unnerve the enemy somewhat, and, under its cover, a strong storming party would rush through the gap made by the explosion, and endeavor to carry the enemy's position beyond. In the rear of his first line was a very strong crest, which quite commanded the city of Petersburgh. To gain this would gain the battle. For a long time our lines had been gradually pushed forward, until they were now distant from the enemy less than 150 yards at the nearest points. The fort to be charged was only about 150 yards distant. But the interior was difficult and arduous, entanglements and chattis being planted near the fort, and the whole intervening space being swept by the enemy's artillery. Our own heavy guns had been brought up after much hard and dangerous labor through six weeks, and with much loss of valuable life among officers and men. They now numbered nearly 100 pieces, some of which were 8-inch and some even heavier mortars.

THE ASSAULT.

Soon after midnight, on Friday, July 29th, the troops were in position. The Ninth corps had been carefully arranged fronting the mine, to head the assault. The Eighteenth corps was drawn off from the right of the Ninth, and massed in its rear. Mott's division of the Second corps was moved into the vacancy left by the Eighteenth, and the other divisions occupied adjacent intrenchments, arriving. The Tenth and the fractios of the Nineteenth corps remained on the James and near Bermuda Hundred. The assaulting column, then, was the Ninth corps, supported by the Eighteenth, with the Second in reserve on its right and the Fifth on the left. The whole force was closely massed, only the necessary garrisons lining the more distant entrenchments. The cavalry would operate on the left, if opportunity offered. The Ninth corps was disposed with LEDLIE'S gallant (1st) division in advance, WILCOX'S (2d) and POTTER'S (3d) next in support, and FERRERO'S (4th), the colored division, now in command of WHITE, in the rear.

The time for the explosion of the mine was 3 o'clock on the morning of Saturday. At that hour the troops were all prepared, and alive with excitement. An hour passed, and there was no explosion. The fuse had gone out in the damp gallery. Again it was lighted by some bold soldier. The sun had already risen, when, with a terrific peal, the heavy trembling of the earth was followed by a terrific explosion, and huge clods of earth, with all the contents of the doomed fort, guns, caissons and limbers, and the regiment who manned them, were flung into the air. To the myriad of astonished spectators it resembled a great fountain, "a thousand or three thousand earth-"spouts, rising a hundred feet;" another "a colos-"sal Prince of Wales' feather;" a third, a "cone-"shaped mass, a mountain upside down, vanishing, "in an all enveloping cloud of dust." Poised for a moment, the mighty column then descended with a resounding *thud*, and the swaying, quaking and trembling of the earth adjacent. A gaping chasm, varying erster 100 feet and more in length, with half as great width, and a depth of 20 feet, with heaps of ruins, was left where once stood a six gun fort and its camp equipage, and 200 men. Instantly upon the explosion, a gun broke out from our line, then another, and nearly a hundred cannon, from our entrance along the line, joined in a fire which exceeded in intensity even that of Malvern Hill and Gettysburgh. Far distant, the batteries of Generals BUTLER and FOSTER echoed the roar, while now and then all along the line were heard the rattling volleys of musketry. Gradually recovering from the palsy of surprise and tremor, the enemy began to respond, and soon their entire line added its thunder of artillery and musketry to our own. The alacrity with which the enemy rallied to his task from the sudden shock, and the steadiness with which he turned his fire to the storming party, in spite of the tremendous shelling with which we endeavored to disconcert him, distrust his attention, should provoke no little praise.

Meantime, LEDLIE'S division was already massed in front of its entrenchments, with MARSHALL'S (Second) brigade in advance and BARTLETT'S (First) brigade in the rear. On the left of LEDLIE was HARTRAUPFT'S brigade of WILCOX'S division, and on his right, GRIFFIN'S brigade of POTTER'S division. Strange and mortifying to say, some of MARSHALL'S brigade got the fancy in the deceptive light, and from the proximity of the mine, that it was one of our works which the enemy had exploded. Either a half-panic or a want of preparation delayed them. But, after a few minutes, they were ready, and, their officers in advance, with a wild, enthusiastic cheer, leaped to their work, and, rushing across the deadly plain, under hot fire, stumbled down into the horrible breach which the mine had made. The supporting brigades spread out and enveloped the flanking rifle-pits, captured 200 prisoners, and the three lines in rear. The Fourteenth New York Heavy Artillery were first to enter the gap, and a strange sight met them—the wreck of the fort and the upturned earth, with the mangled bodies and discovered limbs of its occupants protruding here and there from the disordered, fallen debris. The dense cloud of dust still rolled over the place, thickened by the heavy smoke of battle, which had now shrouded the whole field from view. But there was no time for delay. Some were set at digging out two of the six cannon of the fort; others threw up hasty breastworks against the tempest of shot and shell which already swept the place from the enemy's second line, and began covering the slope of the entrenchments, and extending them. Others exhumed the straggling garrison, such as were living, and carried back the prisoners to our lines, where now ammunition carts and ambulances are hurrying to and fro, "while the white coverlets of thousands of "beds, and the steaming coffee-pots, and army surgeons, "with aprons on, their instruments at work, and "sleeves rolled up, are quietly awaiting the bloody "harvest of war."

So far, all was well. Our troops had gained the breach, and were re-forming for assault. A hundred guns were thundering at the enemy's batteries to call them from the storming party. But now came the error which culminated in entire disaster. Above all things it was needful to burst at once on the crest of Cemetery Hill, frowning above, 400 yards distant. But the advance brigades were suffered to throw up entrenchments, and spend time in getting two guns to bear on the enemy. This gave quite recovered him his consternation, and promptly and handsomely rallied, poured in a terrific enfilading fire upon the captured fort. At length, after an anxious and fatal delay, the Ninth corps was reformed, and, with LEDLIE in the centre, POTTER on the right, and WILCOX on the left, under cover of the fire of the guns, began the charge. On they went with a will, leaping over obstacles, MARSHALL'S brigade again leading, and BARTLETT'S pressing on their heels. At every step the fire of the enemy from front and either flank concentrated with greater fury on them, and, from the fortified defences of Cemetery Hill, from redoubt and redan, salient and curtain, poured up their ranks with bloody slaughter. The charge was checked, on the side of the crest, there was a halt, and finally, the whole line, wavering under terrible odds, recoiled to the fort. One division, FERRERO'S (now under WHITE), remained of the corps. As a forlorn hope, this was disposed of to what the other three had failed to do. It dashed forward confidently upon the deadly interval of 400 yards which separated them from the enemy. But it only met the fate of its comrades. Advancing gallantly for a time, the colored division succumbed at length under the withering fire of the enemy (which had now been increased in volume and in deadly accuracy), and was finally flung with great violence down the declivity. When once broken, FERRERO'S division was unmanageable, and plunged headlong into the fort. Upon this latter point had now been concentrated a very fire of hell, disorganizing the shattered remains of the first three divisions of the Ninth, many of whom most gallant officers and men were already stretched on the plain. This influx of the Fourth division, driven back in great rout, redoubled the confusion, and to all minds it was evident that the day was lost.

It was now only the question how best to save the troops. This matter they were left to decide for themselves. The Fifth and the Eighteenth corps were under brisk fire, and had suffered considerable lose. A division of the Eighteenth with TURNER'S division of the Tenth, had demonstrated on the right (the latter even gaining the crater, and the slope beyond), in useless attempts to distract the attention of the enemy. He directed his fire straight upon the dismantled fort, now a mere slaughter pen, in which huddled the fragmentary brigades of the Ninth corps, hoping for relief from their comrades, who lay 200 yards distant in their entrenchments. Now, squads of men began the work of retreating. But this was a perilous undertaking. The enemy kept a deadly cross fire on every part of the space which intervened between the fort and our lines. In spite of this, the disorderly movement was kept up.

Meanwhile, some of our officers, including General BARTLETT, the gallant leader of one of the very finest brigades in the Army of the Potomac, were still holding the line, and repelled several charges to retake it. The exultant enemy rushed on the ruins of the fort,

cuity to find the bloody reception which they had just meted out in greater degree to the corps whose remnants were now at bay. But, about noon, a general retreat was ordered. A considerable part of the survivors of the assault had crossed towards the rear. And now the men in the fort, who had preferred the chances of honorable death in repelling the enemy to those of the perilous retreat, had discharged nearly all their ammunition. Thus unsupported by the rest of the Army, a final charge of the enemy, about 2 o'clock, captured them. What treatment the black troops received from the victors, there is now too much conflicting testimony to determine. Amongst the captured were General BARTLETT and most of his staff.

By the middle of the afternoon, the bloody day was done. Our loss was in round numbers about 4,000 men, of whom the majority now lie wounded in our hospitals. The loss of the enemy was about 1,000 men, of whom a fifth were prisoners. It is conjectured that nearly 200 men were destroyed by the mine.

Sunday opened on a quiet day. Our dead and wounded lay festering on the plain through two of the hottest days of the year. On Sunday a flag of truce was sent for permission to bury the dead. It was forwarded, and the answer delayed. But on Monday, 36 hours after the contest closed, the flag was granted, the dead buried and the wounded removed.; Instantly on the expiration of the truce, the enemy opened with his guns. But so far, there has been no movement of importance, nor is there likely to be an offensive one by us for some days to come.

EARLY'S SECOND RAID.

So meagre, indefinite, and speculative are both public and private advices about the Maryland raid, that we shall refrain from reducing them to anything like material form until another week has more thoroughly developed them. We have been some scouting parties sent through Maryland to Pennsylvania, but as yet nothing of particular moment has occurred. About 500 men under MCCAUSLAND entered Chambersburgh on July 30th, and, finding they had matters to their own liking burned down the town. After they had left, cavalry rode furiously after them, but, though there have been wild rumors of enormous battles, but few guns have yet been fired, either by the owners of the burned and stolen property as individuals, or by our soldiers in that region.

GENERAL SHERMAN'S OPERATIONS.

We have the particulars this week of the second assault by General HOOD upon our encircling lines at Atlanta; an assault intended, like the first, to take our columns upon the move and while beyond the protection of the earthworks they have learned to throw up so promptly in front of each new position. The previous assault was made on the right of our Army, or more exactly on the left of the right wing, where Newton's division of the fourth corps, and the Twentieth corps (HOOKER'S), bore the brunt of the assault. On the night of the 21st, the day succeeding the assault, the enemy's line on Peachtree Creek was drawn in and shortened, their forces being massed for a second assault, this time on our left wing, our right having defied their stubborn attempt to turn it. Though the noise of their movements was heard in our lines, its full meaning was not discovered, the withdrawal of the enemy from their main line of fortifications one-and-a-half miles nearer Atlanta, seeming to follow legitimately from the repulse they had received on our right. But it was soon evident that General HOOD determined on another assault, had sought, by retiring, to draw us on further, that he might again attack our lines before they had opportunity to re-form in their new position nearer Atlanta.

Early on the morning of Friday, the 22d, a small body of Rebel cavalry were discovered reconnoitering on our extreme left, where was stationed the Seventeenth corps (General BLAIR'S), which, with the fifteenth and Sixteenth corps, formed the Army of the Tennessee, then under the command of General MCPHERSON. It was soon evident that the enemy were cautiously advancing to feel our lines, just then in a bad position to meet an attack, for General MCPHERSON was occupied in getting his Army into position, the Sixteenth corps being on the march to extend the left flank. But the advance of the enemy was fortunately delayed sufficiently to give them an opportunity to form in line of battle in season to assist the Seventeenth corps, though were unable to dispose our lines in the most favorable manner for defence. Indeed, the manner of the enemy's retreat on the previous day prevented any suspicion of an attack from this direction.

The position General MCPHERSON was in process of occupying extended from a point some two miles south of the railroad running from Atlanta to Decatur, across the railroad to near the Buckstown road, northeast of Atlanta, where his right (the Fifteenth corps), joined on to the left of the Twenty-third corps (SCHOFIELD'S).

As soon as the Rebels were discovered advancing, the First brigade, Fourth division, Sixteenth corps, which had fortunately been ordered on the previous day to report to General BLAIR as a reserve, was pushed forward to the front and check the enemy. About eleven o'clock the Rebels advanced in force, debouching from the woods into an open field, where the Seventeenth corps lay in position behind such works as they had already found time to construct, along a ridge of which they had taken advantage. Retiring before the first fury of the assault, the Seventeenth corps were soon reinforced by a portion of the Sixteenth corps, who were actively engaged, as were also the Fifteenth corps. In the absence of official reports, it is impossible to give more than the outlines of this important engagement, in which, after a long, gallant, temporary success, the Rebels were driven back with heavy loss. Five times, General THOMAS tells us, did the Seventeenth corps repulse the assaults, until they finally fell back only to rally again, and with the aid of the Sixteenth corps, retake the positions they had temporarily lost, capturing many prisoners.

In the afternoon at 3 o'clock a simultaneous assault was made on the Fifteenth, Sixteenth, and Seventeenth corps, the two latter for some hours bearing the burden of the attack. Later in the day the enemy massed heavily against the Fifteenth corps, the Third and Fourth divisions of which were driven in some confusion from their main line of entrenchments to the second line, 500 yards to the rear, when the troops recovered from their temporary panic, re-formed, and, reinforced by the Second brigade, of the First division, Fifteenth corps, charged and retook their former position from the Rebels, who were preparing to turn against them the guns abandoned in retiring from their works. The unfortunate halt made in the Fifteenth corps is ascribed to the fact that at the time of the assault upon them, firing was heard in their rear at Decatur, where a cavalry force under the Rebel General WHEELER had penetrated with the design of capturing our supply trains gathered there. This movement was checked by Colonel SPRAGUE, commanding the Second brigade, Fourth division, Sixteenth Army corps, who repulsed the Rebel cavalry after a severe fight. They succeeded in carrying off ten wagons, however.

The battle of the 22d of July was even more hotly contested than that of the 20th ult., and the loss on both sides was correspondingly great. In the battle of the 20th, in which the Twentieth corps, one division of the Fourth corps, and part of the Fourteenth corps were engaged, our loss as officially stated was 1,750 against 3,500, or twice as many in the present engagement. On the 20th, 113 Rebel dead were counted and buried. On the 22d, 2,142 were buried by us, and 700 more, as estimated, lay beyond our lines, in front of the Fifteenth corps. This would make a total Federal loss in the two engagements of 5,250, and a Rebel loss of 3,915 or more killed, which, taking the usual Rebel proportion for the wounded, should amount to some 20,000 in all, to which are to be added 3,200 prisoners captured by us. Thus the enemy have a loss of over 20,000 men to charge already to the account of their fighting General. Twenty-five colors and five thousand stands of arms were captured from the Rebels, to compensate in part for which they have given pieces of artillery, taken in the fight of the 22d. For these estimates we have official authority. In the death of General MCPHERSON, who fell early in the engagement of the 22d, we have experienced a loss impossible to estimate. From the latest accounts received it would appear that the General by some unfortunate error rode, accompanied by his orderlies, through a gap between our lines directly upon the enemy's skirmishers, before whose fire he alone was destined to fall. He lay after his death within the hostile lines a sufficient length of time to enable the Rebel soldiers to rifle his pockets of a purse containing a thousand dollars and a number of important papers and maps, which latter were fortunately discovered on the person of a prisoner taken soon after. General MCPHERSON'S body was subsequently recovered and brought North for burial.

We have reports of an attempt by the Rebels to interfere with General SHERMAN'S operations by an attack made on the 28th of July, during an important movement of his Army toward the right, for the investment of Atlanta. The attack was met and promptly repulsed by the Fifteenth corps.

General GARRARDS returned on the 24th from a cavalry expedition along the Augusta Railroad. He succeeded in destroying the railroad bridge, 350 feet long, over Yellow River, and reached Covington, forty-three miles east of Atlanta, where the railroad was destroyed for some distance. Cotton factories and Government buildings were also destroyed, and one hundred wagons and many horses and mules brought in. The country was found full of refugees fleeing, they knew not whither. The crops were found to be mostly gathered, except corn, which was growing finely.

A telegraphic dispatch, dated Nashville, August 3, reports that General STONEMAN had succeeded in tearing up eighteen miles of the railroad to Macon, the only undisturbed line of communication from Atlanta. This success was purchased, however, with the loss of MCCOOK'S division, which, while covering by the way of Newnan, on the Chattahoochee, was attacked and routed by General RANSOM, the greater part of the command being captured. General MCCOOK is reported killed. But 500 of his command had come in at last accounts.

THE FIFTH CAVALRY CHARGE, 27TH JUNE, 1863.

It has occurred to me to offer the JOURNAL the accompanying lines, concerning one of the most gallant deeds of the late war—the charge of the skeleton Fifth U. S. Cavalry, upon a Rebel battery at Gaines' Mill, two years ago. W.

We ? under on by the guns in our infantry ranks
How the foe was excelling himself in his fire,
And we felt, as we nervously patted the flanks
Of our steeds, that the time had to which soldiers aspire,
To silence those guns.

The battalions of infantry stood to their work,
And they gallantly bear them, brave sons of the North!
Regardless, whatever the danger may lurk
In the stream of the shell that, encircled with death,
Tells out from the guns.

Not a step do they yield, never falter their lines,
Though the ranks that go in are to be hearing in vain,
Toward the far-reaching guns.

From the covert we hold we looked anxiously out
To see with what force those flies would be strengthened,
Were to see ever rebel rode a bombarding scout,
While, straightway the enemy's skirmishers lengthened,
In front of the guns.

Though we knew from the smile that the General had,
That every man would be work-ready soldiers could do,
We never imagined a triumph so glad
That, chosen from out of our midst were the few
To dash at the guns.

Every sword-belt was tightened, each loosened his blade,
As the Fifth, filing past, led the column to fame!
A last tribute, it might be, to sweethearts we paid,
Then waited the order for death or a name,
Nor thought of the guns!

Our order came not, yet the Fifth on we pressing!
Alone, with the foe! but five cannot invoke!
Our spare touch our horses, that snorted we caressing,
As hot-breathed and eager, we long for the stroke
Of death, or the guns.

How we envy the Fifth as they turn into line,
While the charge of the bugle the boiling blood stirs,
Scather cursing than even white heated by wine,
As it dashes in madness those who are wishing gold spurs
At the mouths of the guns!

What to them is that battery of death and disaster
That pours its defiance and opens their ranks!
It only makes welcome; faster and faster
The troopers rush on, though there's fire on both flanks,
Toward the guns.

On light horse gallop, and charge is the chief's cry!
While away, with a cheer dash our death-bearing men;
No Crimean inertia can falter or batter in
Our Light Brigade brows than the First gathered when
They rode on the guns.

On, over the pieces and over the limbers,
Red-handed and fearless the wild troopers pour on;
They extend them and hold them in spite of the numbers,
A blood-baptized prize fairly won by the sword,
These terrible guns.

Or saddles, platoons there were backing a rider,
And many a trooper his best charge had known,
And officers all, but one stood death-derider,
And horses in heaps, on the ravell was blown,
Fell as the guns.

MEDICAL ORGANIZATION OF THE ROMAN ARMIES.

It has been asserted by persons claiming to be experts in historical matters, that the Roman armies had no regularly organized medical department or organization for the care of their sick and wounded, that the grievously wounded were abandoned where they fell, and that those so severely injured as to be unable to crawl or totter after their corps were suffered to die where the casualties occurred or exhaustion supervened. One accomplished and deeply-read professor alleges that CÆSAR's silence as to any hygeiëic organization or systematization for the care of wounded or sick soldiers is proof positive, that, in his day, such was unknown, and avers that throughout Roman history a military medical organization was unknown. Were silence proof, he might claim a verdict, but silence in such a case is not proof. How many military histories pay no attention whatever to such and similar details. Upon the same basis of argument we might claim that the Roman armies were exempt from ordinary diseases, since neither their existence, symptoms, treatment nor effects are any where alluded to. LIVY, who lived in the time of JULIUS CÆSAR, and flourished under AUGUSTUS, speaks of a military man as "wounded in the wars stopping the body of his enemy, and being carried back conqueror to the camp, *he died under the service's bonds*" (Liv. xl. 20). Witness likewise the different titles for a surgeon, *Vulnerarius*, *Fabricensis* and *Chirurgus*. Were we unable to find mention in civil life to justify the distinct profession of surgery, when there were already physicians, unless the attention of the former was directed to a different class of cases, particularly those arising from military service? CELSUS (Celsus, C. 1, 1) says, "He served during 17 campaigns, followed the army with XENOPHON served, and was taken prisoner, discharging the duties of his profession on the battle-field (Retreat of the Ten Thousand, Bib. His. and Mil. i. 472, 24 Col.). DIOCLES CARYSTUS, another successor of HIPPOCRATES, "invented the bellows, and the instrument for extracting darts," and besides other improvements, curious in bandaging "ing wounds of the head." Is it probable that such practice originated in, or was confined, to civil life, or that he had no pupils or successors? ASCLEPIADES, a Greek, B. C. 129, at first a soldier and physician, "healer of wounds," became subsequently so fond of the knife and cautery that he won the sobriquet of "executioner," and was banished from Rome. HORACE mentions a wise physician at the siege of TROY.

PAUSANIAS, A. D., 24 Century, states that in the Gallic armies, consisting chiefly of cavalry, which made an expedition into Greece, each horseman had two servants mounted like himself. If their master lost his horse during the combat, one of the servants gave him another—his own—instead; if his master fell wounded, he took him behind him, and if the latter perished the second servant succeeded him. *If the master was wounded one servant bore him from the field*, while the other replaced him in the ranks (*Armées dans l'Antiquité*, *Curiosités Militaires*, 219, Paris, 1855). Here are sufficient refutations of the testimony of silence. What is more, there never was a military people who paid more attention to discipline and organization, especially of the subsistence, quartermaster, and transportation departments, than the Romans. Is it likely, is it probable, that they were entirely destitute of all medical arrangements, of care, transport and shelter for their numerous and valuable wounded? Is it not absurd to suppose that silence is a conclusive proof—taking everything else into consideration, especially the care for the *impedimenta*, which may have included the care and transport of the sick and wounded? Roman armies there were neither surgeons, medical provisions, nurses, &c. &c.?

XENOPHON and LIVY prove that surgeons officiated in the field; PAUSANIAS, that there were some provision for assisting a soldier in case of wounds. Prior to ORIBASIUS, VEGETIUS and LEO, there were no technical works on tactics. With the commencement of such publications, we at once find mention not only of the care of the wounded, but directions in regard thereto.

ORIBASIUS, who lived in the 1st Century, A. D., under the Emperor CRACTIUS, wrote his "*Strategikon Logos*," translated, "Science of the Commander of an Army," which was highly prized by the great soldier and general and Emperor LEO, the Philosopher. The Marshal Count SAXE deemed his precepts worthy of their study. "A general "should have special care," says he, "to bury his dead. "Neither haste nor danger constitute reasons which can ever "excuse the conqueror from doing so. It is not only a pious "duty owed to those who are no more, but one which a gen"eral should discharge to satisfy those who survive. Every "soldier will observe with dissatisfaction that the general is "wanting in this regard for his comrades whom he has seen "fight and die valiantly, and he will mark the shame of "being treated in the same manner" (*Bib. His. and Mil.* iii. 430, 26).

It is likely that the duty of burying the dead would have been enjoined with so much force upon a general and all advice concerning the care of the sick and wounded omitted, had not the latter been considered a matter of course by this military writer?

We now come to VEGETIUS, who flourished toward the end of the fourth century, under VALENTINIAN the Second, and wrote a work in five books, entitled Military Institutions. In Book ii., Chapter 10, speaking of the functions of the *prefect of the camp*, he says: "that this officer's authority extends over all the physicians — surgeons, "properly speaking—of the Legion, over the sick and "their expenses. It was his duty to provide that chariots "—wheeled trasportation of all kinds—and pack horses "should never be deficient" (*Ibid* iii. 342, 13). Here we have an important reference to supply that ambulances and all the apparatus of field hospitals were provided.

Again, Book iii., Chap. 2d, is devoted to the consideration of the Means for preserving the Health of Armies. After proceeding into particulars he goes on to say: "If some of "the soldiers are attacked by maladies, recourse must be "had to aliments proper for the reestablishing of their "health and *to the art of the physicians*." "This is to "which all the officers from the highest to the lowest "should pay particular attention, for war is carried on hadly by soldiers who, besides the fatigues inseparable from "their condition, have likewise to support the sufferings of "sickness" (Ibid iii. 364, 24).

Passing over another interval of about five hundred years, we reach the era of the renowned Emperor LEO VI., famous as an author as well as a statesman and a warrior. His finest work was one upon military tactics, from which generals of to-day can learn much. "It is a precious frag"ment." Some consider it to be a compilation of his ideas from the works of the Emperor MAURICE, who wrote three hundred years previous on the same subject. If so, it only goes further to bear out the opinion that the Roman armies were provided with a medical department. *satisfaction* iv. Leo writes, mentioning the different classifications of the troops: "Of the certain persons who, in the day of "battle, follow the army to pick up the wounded and ap"ply the first dressings; we call them now *Scribons*" (*Ibid* iii., 167, 1st). This term *Scriboni* is undoubtedly derived from the name of a celebrated Roman physician, who lived in the time of TIBERIUS and CLAUDIUS, first Century, A. D., and is it not likely that the title of Scriboni was *immediately* applied to field surgeons rather than that any long time elapsed before such was the case; and is it not likely that he was at least the author of the improvements in the field administration, and the *personnel* of which receives his name?

In *Institution* xiv., "concerning the day of battle," Leo directs, "and after the action you will cause the neces"sary assistance to be given to the wounded; the dead will "be immediately buried and extolled" (mentioned in orders?) (*Ibid* iii., 497, 2d).

Further on Leo adds: "If it is the season of hot weather, "wine should not be served out to the soldiers, because it "will affect the head, but water must be brought to the "army in leathern bags, which are distributed to those who "need it when in line of battle." Is it likely that in an army which had wagons for the conveyance of water there were no means of conveyance for wounded soldiers? (*Ibid* iii., 512, 2d).

Institution xx. speaks of the necessity of selecting out all the infirm and sick, and sending them into garrison, which shows that a medical inspection must have taken place (*Ibid* iii., 539, 1st). Further on he remarks, "If "you desire that your soldiers should go willingly to battle, "the spectacle must not be that of attending to the wounded. "Those who superintend the duty of picking them up are "likewise charged with collecting and turning over the "clothing and property of the dead to their non-com"missioned officers." Here we certainly have a sort of hospital corps (*Ibid* iii., 543, 1st).

In his recapitulation and conclusion, LEO writes, that a general must take great care of his sick and wounded (*Ibid* iii., 549, 1st); that war derives the greatest assistance from certain sciences; among these medicine. "The art of "medicine," he remarks, "cures the contusions made by the "blows of stones, the wounds of missile weapons, such as "darts, or of other arms, and keeps to that end the proper "medicines all ready prepared. It cures likewise the differ"ent maladies produced by heat, cold, fatigue, changes of "water, the unhealthiness of localities, the variations of "the seasons or temperature, and bad food, resulting from "the use of green fruits and other similar causes." "The "arts of which I have spoken, and the people who make a "profession of them, are therefore necessary to the organi"zation of an army, to its supplies, and to its health" (*Ibid* iii., 551, 1st).

It would appear to the writer that he has clearly shown that the Romans had a medical department pretty well organized, certainly one for the lower empire, and with high probability for the earlier periods. That they possessed surgical instruments is incontestible. *Forceps* and *dilators*, —or specula—were discovered at Pompeii, where they must have been buried 70 years B. C., and *rhinoplastic* operations, termed *taphiocleion*, and claimed as an Italian discovery of the 16th Century, were practiced by CELSUS in the time of AUGUSTUS (*L. Virunneal*, by FOURNIER, i., 146, 7).

During the Dark Ages, or mediæval era, discipline as a science had almost disappeared. It is not remarkable that with such a condition of things the medical department should have fallen into decay. The fate of the sick and wounded was hardly better than that of prisoners; those who could not crawl from the field were generally put to the sword by the victorious enemy, whose own wounded did not experience a much better fate.

The Abbé SUGER, State minister and historian of LOUIS the Fat, in the 11th and 12th centuries, says, "that as "many as possible of the wounded were carried off *in litters*." "Those who could not be removed were left as a prey to the "victors." The Rebels, and we, ourselves, have done no better in some cases.

In 1124 there was a trial of a proposed ambulance. LANFRY only introduced the first real field ambulance, in CRAINE'S army, in 1792. At that time (1124), the army was furnished with carts loaded with water and wine for the wounded or exhausted soldiers. These carts were disposed in circles, like FREDERICK the Great's "wagon forts," wherever the ground was suitable and served as rallying places.

The medical department of the French army dates from the time of HENRY IV., about the time of the siege of *Spires* toward the end of the sixteenth century, or beginning of the seventeenth (*Curiosités Militaires*, *Melanges*, 402–3).

The sick and wounded had a hard time in the thirty years war, and it is very doubtful, if during any of its numerous sieges and storms and surgery, if sick and wounded soldiers, in the field, were better looked after even in the first half of the eighteenth century than they were under LEO the philosopher. But with the medical department of modern times this article has nothing to do, as it is simply written to show that there was such an organization under the Roman eagles.

ARTILLERY AND MINES IN SIEGE OPERATIONS.

ALTHOUGH the exact date of the introduction of artillery, as a means of breaching walls, is still a matter of historical conjecture and research, there appears to be little doubt that cannon of some species were employed for this purpose in the Spanish-Arab wars during the first quarter of the fourteenth century. But the commencement of nearly all the European wars waged in the latter half of that century show that the use of this branch of the engineery of war had become general, without banishing, however, the ancient breaching machines, which continued to be employed even down to the middle of the fifteenth century.

The earliest cannon were, of course, of small calibre and imperfect manufacture, being constructed of iron bars hound together by rings of the same material. The powder was of the most wretched quality. The most effective projectiles were stone balls. The cannon materials only fit to work with, the besiegers of strongly fortified places were frequently obliged to resort to other means for the attainment of their object. The English, for example, at the siege of Roumcrutin, in 1356, according to some authorities the commencement of the use of gunpowder, after having in vain attempted to effect a breach in the walls, at length employed their artillery to throw Greek fire into the city, thus anticipating General GILLMORE by several centuries. With better fortune than attended the experiment of our Lesser general, they succeeded in kindling a furious conflagration in the city, which compelled the inhabitants to surrender. Artillery was used with similar ill success in 1357 against Rennes, and in 1378 against St. Malo. In the latter siege 400 pieces of artillery were found insufficient to effect a breach in the massive walls; and the besieging army was at length compelled to resort to the old system of undermining.

These and many similar failures suggested the expedient of charging the calibre of artillery to an enormous degree —sometimes even to the latest developments of science in this branch of the engineery of war; but the monstrous bombards, as they were styled, were so few in number, so clumsily put together, and so slowly served, that the results, when these engines were employed, were generally even more unsatisfactory than those obtained with the smaller calibres. The chronicle of the siege of Groifenstein in 1414 relates that the huge projectiles, hurled at a low velocity against the fortress, had no more effect on the defences than if they had been snowballs.

The inefficiency of these huge cannon against fortifications was owing to several causes In the first place, they were not strong enough to sustain a charge adequate to the propulsion of the enormous balls, weighing in many instances several hundred pounds, at a proper velocity. Horizontal firing was thus out of the question, unless the batteries could be pushed close against the walls. The

artillerist was compelled to give his piece an elevation which not only impaired the effect of the shot upon the walls, but, in the imperfect practice of the time, rendered accuracy of aim almost an impossibility. In the second place, the lower part of the wall of the besieged town or fortress was effectually screened by the moat, unless the battery was planted directly on the outer edge. To do this at the commencement of a siege was hazardous, as the artillerists were exposed to the fire of archers and musketeers from the battlements. It was thus a matter of necessity to begin the work of demolition by pounding away at the top of the wall, in order to dislodge the defenders; and this method of attack had not only the disadvantages of uncertainty and slowness, but even when most effective, had a result which, in many instances, defeated the object of the besieging force. For the debris of the wall, as it crumbled away, was often sufficient to fill up the moat, when this was wide and deep, but falling against the foundation of the wall, rendered the defences stronger than before; so that when the fire of the archers and musketeers was silenced, and the batteries were pushed forward to the outer edge of the moat, it was often found impossible to make a practicable breach in the ruins for an assault, and the besiegers were compelled to resort to the expedient of blowing up the walls by the use of mines.

This practice seems to have come in vogue during the first half of the fifteenth century. One of the earliest instances of this method of breaching walls occurred at the siege of Bonifà, in 1411, and again in 1415 at the siege of Harfleur. More authentic accounts of the use of explosive mines occur in the history of the Turkish wars in Europe. The Emperor Louis Lavatero, in his History of the Turkish Wars, in the manuscript *du Seroil* of PAOLO SANTINI, who lived before the capture of Constantinople, and to the manuscript of TACOLA, in the library of Venice, both of which mention the use of powder in mines. SANTINI, who wrote in general of the method of very minutely, says that the mines were first those mines supported by wooden props, which were afterwards burned away with fire; and afterwards, in the case of a fortress situated on a solid rock, he mentions the use of gunpowder mines as a means of destroying the walls. But he enumerates this method only when the former was impracticable, a view explained by the wretched quality of the powder at that time, as well as by the fact that the necessity of confining the charge in a small and close chamber was not then understood. These reasons for the non-effectiveness of the explosive, noted as they are by the writers of the Imperial historian, explain the singular practice, which prevailed at that time, of using powder merely to overthrow the props which supported the mines until they were completed. Under the old system, these props were burned away—a slow and unsurely method—and therefore the advantage of using powder was that the props could be simultaneously and effectually shattered, thus insuring the success of the undertaking.

In their operations against Belgrade, in 1439 and 1441, the Turks first made use of explosive mines a more effective means of breaching the walls then even their huge artillery, which carried 100-pound projectiles. But at the siege of Constantinople, in 1453, they used with complete success an enormous bombard, cast by a Hungarian. It carried a projectile weighing 1,200 pounds, and was so large that it required to drag it along, and two hours were consumed in loading it. In the records of this memorable siege we find the earliest record of a system of artillery instruction. The gunner in charge of the huge bombard was directed to fire two shots at 9, 3 and 6 o'clock every day, and then a third directly in the centre between them, by which the wall, thus previously shattered and weakened, would be more likely to give way. From this it would appear that the earlier practice of peppering away at the battlements had already given way to a more correct system of attack.

An important step in the improvement of artillery was the introduction of cast projectiles, in place of stone balls, during the French war of independence against the English. A work, whose date is unknown, but which is believed to be anterior to the 15th century, in this period, contains the following directions to the artillerist, which show the steady advancement of the art:—

"In order to demolish a tower with a few shots, the cannon should be loaded with wooden plugs, previously softened by being soaked in water. The stone ball must be strongly bound by two iron rings crossing each other at right angles. Then the gunner must have chosen a fair place and accurately measured distance, and must aim so as to strike the wall at the height of a man above the ground, and as the shots close and evenly together, not one high and the next low, but exactly according to these directions. In this manner he cannot fail to shatter the tower to such a degree that it will fall."

The Richmond *Enquirer* calls upon us to believe on the indisputable testimony of an eye-witness, that a tree two-ty-two inches through and sixty-one inches in circumference, was actually cut through by the concentrated fire of Minie balls from our troops at the battle of Spottsylvania. The tree fell, it asserts, inside the Rebel breastworks where it was measured.

NEW PUBLICATIONS.

The *Spectateur Militaire* for July 15, 1864, has the following table of contents:—Progress in Tactics, or Preliminary Considerations of a Single Method for the Three Arms, by Marquis DEL DUERO—translated from the Spanish (second article); Study and Observations upon the Progress in Tactics of Marquis DEL DUERO, by General Baron D'ARMAGNAC; Studies upon some Military Writers of Antiquity, by Captain MAUCHAL, librarian of the Imperial Military School of Saint Cyr (second article); Military Thermal Establishments—*Bourbonne-les-Bains*—by M. FERDINAND DE LACOMTE; various notices upon artillery and the marine, by M. F. DE LA BARRE; Map of the Grand Duchy of Baden, by M. C. MAUCHAL; letter of the Chief Staff-officer to the Director of the *Spectateur*; reviews of the foreign military press and of foreign military news, by M. LEON DELUIT; Political and Military Chronicle, by M. ANTOINE CARE.

RELIGIOUS TRAINING OF CHILDREN. By CATHARINE E. BEECHER. New York: HARPER & BROTHERS. In this work, Miss BEECHER has again placed the social and religious world under obligation, by her earnest and womanly contribution to an important subject. Every intelligent person can find aid in the book to approve, while few will disapprove its views.

WAR LETTERS OF A DISBANDED VOLUNTEER. New York: F. A. BARLY. This is an amusing volume, in the style which ORPHEUS C. KERR, and other similar wits, have made popular in this country. Some of the sketches may find a pleasant to read, with its puns and comic spelling. The Disbanded claims to have been for more three years the "unofficial adviser" of Mr. LINCOLN—and the best of his jokes go towards substantiating the claim.

OUR CONFLICT: A HISTORY OF THE REBELLION. New York: A. H. ROME & BROTHERS. This is a pleasantly written memorial of what was endured, suffered and accomplished by the Twenty-third regiment of New York State Militia, and other regiments associated with them, in their campaign of Texas and July, 1863. It may prove of interest to all those who had soldier friends in that bloody, decisive battle-field.

THE COWARD. By HENRY MORFORD. Philadelphia: T. B. PETERSON & BROTHERS. A new novel, connected with LEE's invasion of June and July, 1863, by the author of "Shoulder Straps."

CORRESPONDENCE.

THE MONITOR QUESTION.

To the Editor of the Army and Navy Journal:

SIR:—You have put the Monitor question before your readers very frequently, and elicited responses to your last number; but it may be said that you give undue prominence to Admiral DUPONT's opinion, and pass over historical facts which cannot be excluded from bearing on the merits of the Monitor iron-clads.

Admiral DUPONT bases his opinion of these vessels chiefly on the result of a forty minutes' engagement, before their mechanism had been fully tried, sufficient experience in their management, and their guns certain indispensable additions had been made. Among these may be mentioned the application of "jackets," casings composed of plate-iron three inches thick, to the turrets, and the shields of the pilot houses, and the application of base rings composed of solid wrought-iron, fifteen inches deep, five inches thick, to protect the lower part of the turret, and to prevent derangement of the gun slides. It was after these additions had been made that the Monitor fleet, under the command of Admiral DAHLGREN, engaged the enemy's batteries at Charleston eighteen times, between July 18th and September 8th, 1863. Were Monitors, Captain Worden, Admiral Dahlgren, Rear-Admiral Sullivan Island were successively engaged, the fleet being lit seven hundred and eighteen times, "almost entirely by such shot," says the latter officer in his report to the Secretary of the Navy. The Admiral puts the question, "What results have been reached by the use of it" jected to such a test?" Surely this is not theory. The deck plating, it is true, suffered considerably, because the vessels there above the water line, from the angle of fire, means, thus enabling the enemy to obtain accurate range; but the entire steam machinery, motive engines, blower engines, forced draft, and steering gear of the Monitors, were not in a single instance deranged by the enemy's fire. Considering the severity of the engagement the first and the frequency of the conflicts, this will ever be regarded as a great mechanical triumph. Practically, then, the Monitor fleet have proved their efficiency. As to the defensive power of the system, the plates have been indented and partially fractured, bolts have broken and partial penetrations have taken place, but not a single instance is known of a want of impregnability. The position of the disputants has thus been reversed, the offensive power of the Monitors, and likewise while its opponents can only make their position good by calling theory to their aid. Had the practical success proved the same with regard to the impregnability of the Monitor system over all other known means of naval attack and defence would still be incontestible, since it admits of employing heavier armature than any other. All other questions are subordinate to this, now that guns have been produced which can destroy the heaviest armor applied to iron-clads of the European type. The comparative strength of solid plates and laminated armor is of no moment in deciding the question of form. The *Dictator* carries side armor ten inches thick, backed by four feet of wood, protecting motive engines, propeller and rudder as well as the quarters of officers and crew, the battery being protected by fifteen inches thickness of iron. The battery and engines of the *Roanoke* are protected by seven inches of iron, backed by 9 inches of wood, attached to a plate very little below the deep the hull plating of the *Dictator*. But the quarters of the officers and men of the *Bellerophon* are unprotected, so that after being shelled by an opponent the British ship is not fit to remain at sea nor even seaworthy. As before stated, whether the combination of plates and slabs which, for convenience sake, has been adopted in the *Dictator*, affords the same protection as solid armor, does not affect the principle or the system. It is enough that the Monitor iron-clads can, and do, carry turrets fifteen inches thick and side armor of the same thickness, while the casemate ship cannot carry half that weight of armor.

Combining speed, seaworthiness and steering qualities of the small Monitors, we have positive testimony in the best experienced naval officers completely rebutting the absurd statements made by the New York Herald Journals. Admiral DAHLGREN, in his report to the Secretary of the Navy, dated from his flag ship off Morris Island, January 28th, 1864, says: "The Monitors can steam, under ordinary circumstances, seven knots, but it is quite respectable with clean bottoms and "is fairly equal to that of the *Ironsides*. Their steerage is excellent, and when hampered and rightly managed not "difficult of control. They pivot with celerity and in less than their own length, in either case of winds." The serious retardation of speed occasioned some time ago by the fouling of the bottoms in the warm climate on the Southern coast, Admiral DAHLGREN now obviates by hauling the vessels. By this simple expedient cleaning and repainting are readily performed and the supposed insuperable difficulty of foiling entirely removed. As to the safety of the Monitors at sea, provided their decks are tight, ex-well informed officer now commanding the Monitor squadron, observations of Commodore JOHN RODGERS set that question at rest years ago. Experience has verified his early conclusions.

The Monitors are not ocean steamers, like the small Monitors. It may be admitted that no extraordinary means were at first deemed necessary, it being supposed that the blowers would be sufficient to ventilate the fire rooms when ventilation was required, but the ingress of air drawing the atmospheric air down through the turret into the body of the vessel. Experience having in the meantime proved the inadequacy of the means employed, a very complete system of ventilation has been introduced, and the large tenders of the *Dictator* and *Kalamazoo* class. As the *Dictator* is now nearly ready for sea, a description of the new ventilating machinery may, with propriety, be deferred until after trial.

Yours very respectfully,

J. ERICSSON.

NEW YORK, July 27, 1864.

THE MAORI WAR.

To the Editor of the Army and Navy Journal:

SIR:—In an article on the Maori (spokes Mowry) war, in your last week's issue, you speak of the fort or entrenchment as a "*Pah*." Now the correct word for a New Zealand Pah, as pronounced by the natives, is "Pah." These Pahs proved oftentimes to be formidable affairs, and quite impregnable to a storming party, without having previously been subjected to the use of ordinary means, for a very heavy bombardment. I saw the ruins of several in the Waikato war, with military zeal, to give you a correct idea as to them, farther than that they are perched upon steep acclivities, very difficult of access, and have, upon them on occasion, been successfully defended against British troops.

As regards the Maories themselves, they are very far superior to the Kaffirs of South Sea Islanders, in many qualities. A large, finely formed, powerful race of men, full of life and intelligence, with much civilization, inhabiting a country, from its natural formation (precipitous and abounding in rocky defiles)—easily defended, and not unskilled, after many previous encounters with the English, in the art of war, I believe that, under *Yankee* officers, and with the proper "material," they could sweep John Bull from their shores in a very short time.

This Maori war has been in progress now for many years, and is only another instance of England's waging an unjust war—warfare, to *spare accounts* with a nation which she has, in the first place, grossly outraged.

MAZELOT.

CATSKILL, July 31, 1864.

ENGLISH FLUNKEYISM.

To the Editor of the Army and Navy Journal:

SIR:—I have before me a most audacious, yea mild notice of the article from the English *United Service Magazine*, by an officer of the "Royal Regiment." That any thing but the most servile adulation will accompany the effort will appear in that print, which, like *Blackwood*, has ever been a systematic maligner of every thing American, is not to be looked for. It is the same thing, over and over, in praying sought and accepted the courtesies of the officers of our Navy, and the same spirit of sneering to the peculiarly prurient English relish for abuse of the United States, to be given to understand, that men who profess to have received the attentions of gentlemen are not expected, at the least, to reciprocate them in some other way than in detailing private tittle-tattle, and writing scurrying paragraphs of abuse. The *United Service Magazine*, whose circle is limited by the Tems and Harrys of "*our*," and the Jacks of the English royal military service, is privileged, should, if his brain can furnish the ideas, write in such a vein I can understand; but that an officer of the Royal Engineers should be so ill-mannered as to do so, I confess, surprises me. For, the world over, these corps, in every service, sustain the reputation of eminent respectability, both professionally and socially.

I should regret that any thing should be done to abridge the amenities of social intercourse between the officers of our Army and those of Great Britain; but, with such specimens of feeling towards us as this and like productions in *Blackwood* show, we must do something to protect ourselves from being made the victims at least of tourists of this class. That there will be a continuance of such attacks there can be no doubt. The state of feeling of the higher classes in

England towards the United States unhappily courts it; and that part of the British army for the great majority of whom do not belong to the titled class, are like all below it, as thoroughly imbued with the peculiar English institution, *Kotoiyism*, that the temptation to eater to this taste is irresistible. It would be sheer nonsense on our part to shut our eyes to this fact. The deadly hostility of our Southern brethren can be met face to face, and is at least not to be wondered at; though time may see us again shoulder to shoulder against all and every comer. Not so with the implacable and insidious enmity of the spirit of caste by which our English cousins are goaded on, by sneers and falsehoods, to hatred and fame to the very verge of a ruinous libelling.

To my old pupils of the Military Academy I would say, always meet an Englishman as I do myself, by acknowledging his well-award, shuffling bow with a simple nod, and wait till he wishes to talk of Shakspeare or of the weather, to depend upon it that, in nine cases out of ten, we will have a secret feeling of pressure in the act on your part, and of condescension on his.

Very respectfully yours,

D. H. MAHAN

NEWPORT, August 1, 1864.

THE INVENTOR OF CHAIN-PLATING.

To the Editor of the Army and Navy Journal:

SIR:—The action between the *Merrimac* and *Alabama* has passed into history. The relative dimensions of the combatants, their offensive and defensive powers, the superior 60 lbs. of metal thrown by the *Alabama* at a broadside, the gallantry and excelling ordnance practice of her officers and crew, etc., are matters about which there can be no question. She lacks nothing that can entitle her to unstinted praise and widely circulated. The efficiency of the chain-plating, as it is here termed, is another thing that concerns deeply the living principle of the vessel, and an important element of success in the conflict, is universally acknowledged by all who have read the official reports of the action. It appears that shots, the momentum of which would certainly have carried them through both walls of the ship, expended their force in the chains, and fell into the water alongside.

In view of the effectiveness of this system of armor-plating, it is important that those who are desirous of acquiring the honor of the origin and invention of Mr. MOORE, by suggesting that the latter cables be stopped up and down on the sides of the ship in the form of a diamond, should know that it has existed.

This fact establishes beyond question, the fact that, to the fertile brain of Chief Engineer JOHN W. MOORE, U. S. Navy, is the country indebted for the origin of this novel application of chain cables to protect the hulls of the *Roanoke*, *Hartford*, *Brooklyn*, and *Pensacola*, in their hard parts during their operations in the Mississippi river, and has again so recently contributed to the security of this property, and assisted so materially in promoting the most gallant achievement in naval combat on record.

VERITAS.

THE IRON-CLAD QUESTION.

THE HARBOR-DEFENCE CLASS.

[The following remarks upon the harbor-defence class of iron-clads, form the conclusion of Lieutenant-Commander SIMPSON'S Report, of which the first part was published last week:]

For the service of defending the harbors and of destroying the armament of a fortified enemy, the monitor system is unquestionably the most perfect that has been devised. For the defence of a harbor, it must be the effort to construct a vessel impregnable in her hull, and as nearly irresistible in her power of offence; in carrying out this idea under a Monitor model depend many features, desirability to vital parts of the structure is produced by its immersion below the surface of the water, while its irresistible character for offence and defence is attained by

The general principle of construction is that of a raft, to which is attached the hull of a vessel, in which is placed the motive power, and in which are deposited the armament and *materiel* required for the service of the vessel. The guns, mounted in the hull, are protected by a heavy armor; and while on the top of this is placed the pilot-house, from which alone the scene of action is viewed by the commander, and from which place all orders emanate. The vessel, as here put proposed combines so many points necessary for a perfect vessel for harbor service.

In a vessel of the Monitor construction, the surface exposed to the fire of an enemy is reduced to a minimum, and the portion of the hull necessarily exposed to the water can be made impregnable to such artillery as can be used by her armored crews, if no errors in the designing of the vessel are made which can deprive her of floating capacity to support the necessary weight of armor. In our experience before Charleston, the only point of weakness to fire that has been developed is in the docks; and as the water can be made impregnable to such artillery as can be used by her armored crews, if no errors in the designing of the vessel are made which can deprive her of floating capacity to support the necessary weight of armor. In our experience before Charleston, the only point of weakness to fire that has been developed is in the docks; and as the water can be one inch of extra iron. I have seen an extra inch plate act as a perfect protection to the vessel, when it was in one place, while a bolt from the same rifled gun had broken through and through the original deck only a few feet removed.

The 15-inch gun, mounted in the turret of a Monitor, constitutes an armament which is irresistible at short range against any naval structure that can keep the sea, and is sufficient to ensure the destruction of any armored cruiser that may be so unfortunate as to receive its crushing blow. Its size and frames must yield before the concussion of the ball, while the application of the charge which experience in its service has introduced, enable a crew of eight men to work the gun with ease. Until a naval structure has been devised which can resist the 15-inch shot, as well as the 9-inch injudicious to introduce a gun of a heavier calibre, but a Monitor, properly designed, with an armament of two 15-inch guns in her turrets, may be considered impregnable and irresistible—in short, may be regarded as a perfect type of an armored vessel for harbor defence.

It is unfortunate for the reputation of these remarkable and valuable vessels that they have been used, owing to circumstances not to be controlled, for purposes for which they are not fitted, and for which they were never intended. They were designed to contend with armored vessels, and in that service have proved themselves equal to do all that was expected by their inventor and all that was required by the Government. But the necessities of the service as floating batteries has been shown before and batteries, and their most prejudiced partisan will not assert that they are fitted to act as ocean cruisers. Powerful ships required of a Monitor is to carry a gun of larger dimensions and power than can be used in broadside, consequently the whole structure is adapted to the weight of the gun, there, to be wondered at that they should be found comparatively inefficient as floating batteries? Such vessels were designed in order to interfere with the accuracy of the fire of the enemy, and finally to force him to leave his guns; it is only surprising how well they have succeeded for which they were never intended. It is also much to be regretted that of the three classes of Monitors now in the service, there has been in the construction of each a change in the original designing, or else some changes in the design introduced during the progress of construction which have prevented the attainment of perfect success.

In the *Passaic* class, the turret being placed amidships of the length of the vessel, and being not so much "a tub on the stern" as to make it necessary to place from eighty to one hundred tons of ballast in the forward part of the vessel in order to counterbalance the weight of the engines and the vessels of so much floating capacity, and occupied with old iron space in the hold which could have been used for many other important purposes. In the next class, this error was corrected, but some other essentials were introduced which, causing them to be unsuccessful in the original design intended, made it necessary to build up on them, thus increasing their draft of water. A opening is also introduced in this class, which is a minor defect, but, nevertheless, in any swell, will make them indifferent gunnery ships as compared with the *Passaic* class, which vessels are so little affected by rolling motion as to be a source of a feature in the latter cases. I do not sympathize with the Navy prejudice which forced the introduction of this opening, as from my long experience in command of the *Passaic* I am satisfied that there is no danger to be apprehended from a separation of the hull at this point. The principal cause of the sinking of the *Monitor* and *Weehawken* centres around another point, which I consider the only point of weakness in the construction of the class, and which explained to the Navy Department in a letter of the 5th of February, 1864, but which, as the Department has not published it, I will not again repeat. I will simply remark in connection with my idea, then stated as original, that I see in a communication from Mr. EADS, under date of December 13th and December, 1863, a virtual acknowledgment of the weakness to which I requested the attention of the Department. The weakness of this construction was also declared by Mr. ERICSSON to require certain precautions to be taken in order to ensure safety. In my communication of February 5th, 1864, I proposed a way to obviate the defect which the cause may be prevented.

Of the so-called light draft Monitors it does not become me to speak, as so little is generally known of their state of advancement. It is acknowledged, however, that some great error of design or construction exists in consequence, has made their success very doubtful, and is a subject of painful embarrassment to the Government. It is most earnestly to be hoped that this error may be found to be made them fit for service, for, for the defence of harbors with good water they will be of the greatest service.

Notwithstanding the difficulties of navigation, and the many difficulties with which they have had to contend, the Monitor class of vessels have undoubtedly gained a position in the defence of our harbors which can never be shaken, and endorses them as the best of all plans yet devised for harbor defence. Any vessel which can keep the sea, and, therefore, for with a fleet of Monitors spread along our coast, occupying safe anchorages under the lee of shoals and islands, they can be satisfied that no enemy's vessel can long remain in safety under our harbors, and should transports bring armed men to the coast there would be no rushing to a sudden doom, for before arrangements could be made for landing, or before the avenging Monitors would sweep down upon the devoted harbor and pitch destruction into it, the ocean of some wiser opinions are to be received with consideration and respect, it is thought that a Monitor should be built of wood in order to ensure a greater buoyancy than is now afforded admitted with the hull formed of light iron. I desire to state one point in connection with this which I think will demonstrate how injudicious it would be to build the vessel without considering the consequences that may ensue. When clearing for action in the Monitor class vessels we "buy up" the turret, thus raising its base from the deck, and supplying thus its weight on the central spindle. The great weight of the turret when at rest rests upon the deck, and there is no strain on any yielding in the material on which the weight bears, but the turret will settle down again so as to prevent it from revolving until it is lifted off. In the vessel now under consideration, I will cite that of the *Roanoke*, a converted vessel, a wooden hull, originally designed and supplied with three turrets. The section in the *Roanoke* has been built up so as to be sufficiently pulled under the centre turret whenever it has been keyed up as much so as to suggest the idea that the bottom would be forced out; and I am under the impression that the keying up of the centre turret is now dispensed with, the guns being useful only in one direction. I may be misinformed as to the extent of the disability to the turret of the *Roanoke*, but the above remarks illustrate the danger that I wish to point out as likely to result from building the hulls of turreted vessels of wood. When a turreted vessel is constructed of wood, I think that the effort ought to be made to cause the weight of the turret when keyed up to bear on as large a portion as possible of the keelson. This could be done by means of plate-iron disposed in the form of a flat arch, or in the form of a diamond, and extending along the whole length of the keelson, or made in lines extending for a certain distance forward and abaft the turret. On this arch the spindle may rest, and thus the weight will be divided over a large portion of the vessel. Without some such precaution as this, I conceive that the working a turret in a vessel constructed of wood will be always accompanied with some difficulty, owing to the yielding character of the material.

RAMS.

The armored vessels of the sea-going class, as well as those of the harbor defence class, should be provided with a ram of sufficient size and strength to enable them to use it with better, but I consider the ram as a weapon to be used as a last resort, when it is doubtful that the enemy can be defeated with the ordinary means at our disposal. The ram is a remnant of barbarism, and it is much to be regretted that it is again finding favor in the world as an element in war We must, of course, be prepared in all points, and must be ready to fight with all weapons that are likely to be used against us, but the introduction of the ram at the same time we go back to the character of the warfare of the Greeks and Romans, in which the effort was always to destroy as much life as possible. There is a sentiment in the human mind that is desirable to preserve, even in the putting a man to death, and the fair exchange of projectiles fired from heavy guns commends itself as a decent manner in which to discuss the differences of nations. But the object of the ram is to destroy the life of the enemy by sinking his vessel and so that her reeling to the bottom, without one chance in the billing left to her freight of living souls. The bow of a Monitor is adapted to the use of a submarine torpedo attached to it, and it is merely formed by the union of the side armor from both sides tapered down to a point; the security is quite insufficient to resist the force of a shock of moderate force. We have seen the side armor at the stern of a Monitor spread apart four or five inches by a simple contact with the side of another vessel, and the bolts in the rear rib of the turret as slew as possible. Of course the bows of these vessels can be fitted with a ram, but I am not aware that any such arrangement for the purpose without some special arrangement be made for them.

I shall here close this paper, trusting that its undue length may not be considered as an intrusion. My recognize, to express an opinion on the whole subject of armored vessels, but especially in connection with the point as stated by me, that the full power of the armament can be discharged by armored vessels, and that the different classes of vessel must be prepared to meet each other. It has seemed to me that much of the trouble attending the subject has arisen from trying to solve a problem which cannot be solved, and that the best results will be obtained when the different classes are required for the thorough arming of a great nation, and being convinced of the want, to act accordingly.

Very respectfully your obedient servant,

E. SIMPSON, Lieutenant-Commander.

HON. GIDEON WELLES, Secretary of the Navy.

SUPERIORITY OF THE BREECH-LOADER.

[From Colburn's United Service Magazine.]

THE striking effects of the breech-loader, both in the forest and on the battle-field, have been practically proved the superiority assigned to it in theory of the experience of war. In every encounters, where their numbers were equal or nearly so, the breech-loaders have found themselves of their superior weapon—the Zundnadelgewehr, or needle-gun.

We can we wonder at the result. If there be one point in which all who are acquainted with the tactics of the battle-field will agree, it is the never-failing success resulting from a superiority of fire at a given point of attack. Now, what can be more conducive to such a result than the use of a weapon which, on the average, will give four in a rapid succession of discharges of deadly missiles on the enemy.

Again, the difficulties of loading an ordinary rifle are amongst the greatest evils. They hinder the rapid service especially in skirmishing, when he has often to load kneeling, sitting, lying down, and running.

In the breech-loader the charge of powder should reach its proper place in the barrel, and yet, after a single discharge, even when keeping the barrel perfectly upright, this is next to impossible, some of the powder necessarily sticking to the sides of the bore. The breech-loader obviates this difficulty, as the charge can load noiselessly lying on the ground, so that at the distance of 300 yards, a tuft of grass or small stone will be sufficient to conceal the whole body.

It dispenses with the implacable ramrod, so injurious to the rifled barrel. It does away with the absurdly numerous caps required in the muzzle-loader, with an action which has become absurd in the presence of that celerity of movement which is the great characteristics the tactics suited to the modern implements of war.

In skilful hands, the breech-loader will nearly rival the arrow of the Parthian. The ease with which the rate of production will immensely modify the tactics of the battle-field. The infantry armed with breech-loaders, and readily "formed" will be able to form themselves into hollow squares, which checks the advance, and renders it so vulnerable to artillery. The breech-loader, effectual fire of the deadliest kind could be delivered with a rapidity that nothing could withstand, namely, in four ranks, and even in five—the first kneeling, the second sitting, the third kneeling, and the fourth and fifth standing.

The danger of movements in the battle-field will be diminished from 400 to 200 yards. The tactics of the troops could readily form so as to protect their comrades, by pouring their incessant fire into the enemy that might seek to take advantage, as usual, of the new formation before it is accomplished. All the modes of firing will become easier and improved by the adoption. Indeed, it is impossible to estimate all the tactical advantages that will result from the use of breech-loaders.

Obtaining is certain—if all our forces become armed with breech-loaders, and become skilled in their management, every hundred men will be equal to a thousand for defence against attack, and to a force of ten times their standing army, and a thoroughly efficient militia, let us arm the

former, at least, with breech-loaders, each of which will dispense with the use of nine men, and so pay for itself by *saving money*; for by the rear breech-loader could not cost more than £18, which is less than the soldier's annual pay.

Breech-loaders would be of incalculable advantage to the foot artillery for the defence of their batteries; to the sappers and miners and breech guards, to repel surprises while carrying on their works; for the defence of baggage trains and stockades, bridges, defiles, &c.; and lastly, against the hitherto crowning glory of the musket, the cheering rockets at the ship. Such an amount of fire delivered coolly and steadily by a platoon formed on light troops armed with breech-loaders, would be destructive of all order among the assailants for effective attack.

The difficulty of loading with the red on horseback, has settled the question of breech-loaders for the cavalry.

Breech-loaders will promote improvements in cavalry tactics. Henceforth we may dismount for the purpose of assigning infantry with the cavalry. Henceforth it will be well to have the suite of cavalry divisions, battalions of Foot-Chasseurs habituated to running, and armed with breech-loaders. If the same be objectionable, we may revert to the old time-honored system of Light Infantry, forming square in four ranks, a battalion of these effective would present a buttress against the charge of the enemy's cavalry; and since the cavalry would not be less hampered and compromised by the slow pace of the infantry, and better protected by it, they will move chary and scrupulous of abandoning the infantry to its fate, as is now often the case.

In fortifications the breech-loader will be of incalculable benefit. The lines of defence are estimated by the good range of fire-arms. Now, with the breech-loaders we can give greater range to the lines of defence, and for the emplacements, consequently more amplitude to the front of fortification. Moreover, the breech-loader can rest in an embrasure during the entire loading of the piece, to fire no more shot; the gallery of the counterscarp in which the embrasures are placed not be exposed as usual, and it will play a more important part in blackening the ditches at the inset angles.

For the Marine and naval fighting in general, breech-loaders are eminently adapted. They may be kept at the port-holes incessantly firing; or small parapets might be made on the deck, constructed of heavy planks, or bulwarks. Such are a few of the tactical improvements which the breech-loaders would effect.

The performance of certain regiments armed with breech-loaders exemplifies the advantage of the weapon. After deducting the time lost in loading, the simple concerted firing from the knee, from the 300 to 50 yards' ordinary man put 54 shots into the target, out of 60 rounds per man, fired in the open at Hythe, England. The Prussian soldier, rather more than two shots can be fired for one with the muzzle-loader. The soldier advances more rapidly, as he is not delayed by loading, and when he arrives he is a good position for self-defence and rapid firing.

There can be no doubt that in the recent successes of the Prussians, secured by their breech-loader, every European nation will have its attention directed to the weapon. It is well known that the French have for years been experimenting on the best mode of its construction, with the view of adopting it for their army; and we cannot but rejoice that, at last, the Bill has passed the House of the Government, and 2,000 breech-loaders have been ordered for the purpose. We supplied the Prince Frederick Regiment, whose breech-loader is already in the hands of some of the cavalry.

We regret, however, that one of the most essential attributes of the breech-loader will be wanting in these weapons —self-capping, or rather the dispensing with the capping altogether, as the Prussian breech-loader does, by means of the descent of a needle into fulminating powder with which the cartridge is provided. In spite of the suggestion of Mr. Wright (Liverpool), in the Parliamentary debate, that if the Prussian rifle should be adapted, the Government have resolved to adopt the Enfield percussion cap, the use of which almost reduces the breech-loader to an equality with the muzzle-loader in celerity of fire. Like the red motions, the capping motions of the soldier are become incorrigible in modern warfare. To the often be ambed and agitated finger in the moment of peril, these motions are both difficult and uncertain; the cap is often lost, and the soldier is thereby reduced to self-defence with the bayonet alone. We cherish the hope that in the general adoption of this immense improvement in modern warfare, the breech-loader, which must inevitably take place, our authorities will see the peremptory necessity for at once adopting the Prussian, in the matter of ignition, to that of the Prussians.

A TRIBUTE TO BRIGADIER-GENERAL HARKER.

In the letter which we publish below, General HOWARD gives expression to sentiments which every one who knew the late General HARKER, or who was at all familiar with his career as a soldier, fully endorses. The letter was written shortly after the gallant officer fell near Atlanta:

HEADQUARTERS FOURTH ARMY CORPS, }
SUNDAY, July 10, 1864. }

MY DEAR COLONEL:—Knowing my heart intimacy with the late General HARKER, I thought I would forward you a few lines regarding his life, his noble character; perhaps while I would try and write to some of them. I knew General HARKER as a cadet while I was on duty as instructor at West Point. He was then remarkable for intelligence of character, and uprightness of conduct. I was particularly happy to renew my acquaintance with him after I came to the West. I was surprised and pleased to find that so young a man had won the complete confidence of the Commanding General of the Department. On taking command of this corps HARKER was still a Colonel, and, as I was a comparative stranger in the corps, I was anxious to get him as my chief of staff. He declined the position. I would do everything in his power to aid me in my duties, but, if I would excuse him, he greatly preferred to command in the field. His choice I was learned to appreciate. Strict and exact in the performance of his own duty, he obtained the most willing and hearty co-operation from all his officers, without apparent effort. The only complaint I ever heard was that General HARKER got started against the enemy he could not be kept back. Yet I never found him other than cool and self-possessed. Whenever anything difficult was to be done—anything that required peculiar pluck and energy—we called on General HARKER. At Dooley Farm, where his division wrested one-half of that wonderful wall of strength from the rebels at Resaca, where he tenaciously held a line of works close under the rebel fire at Kenesaw, where he fought for several days, with this line, in conjunction with his brother officers, and hammered the Rebel works at a distance of less than 100 yards; at Mud Creek, where he held the advance works, and directed their movements with as much skill and vigor as he ever did a battle, and with a strong line of the enemy's earthworks; in fact, in every battle of this campaign, before engaged, the noble young man earnestly and heartily performed his part. On the 27th of June he led the terrible assault on the enemy's breastworks. As did not carry them, that part of his command reached the works. A sergeant bearing the colors was bayoneted as he was climbing over. Our beloved and trusted young general was close by, pressing forward his column, when the fatal wound was received. I never saw him after the battle. I do not yet realize that he is gone—one so full of rich promise, so noble, so pure, so true a friend, so patriotic a soldier. God grant that we may live like him, and if called to do, like him, with earnest of enduring peace in heaven as had our lamented General G. C. HARKER.

I am, Colonel, respectfully,
Your obedient servant,
O. O. HOWARD, Major General.
Colonel G. P. BUELL, commanding Fifty-eighth Indiana.

ARMY AND NAVY PERSONAL.

COLONEL Dudley has been put in command of the cavalry of the Nineteenth corps.

CAPTAIN William M. Graham, First U. S. Artillery, has been ordered to Washington, Washington, D. C.

LIEUTENANT-Colonel C. E. Fuller has been appointed Chief Quartermaster of the Department of Virginia and North Carolina.

FIRST Lieutenant Walter J. Morgan, Co. G, 28th Massachusetts Volunteers, has been reduced to the ranks to serve three years.

GENERAL J. A. Martindale has arrived at his home in Rochester, N. Y., having resigned his commission on account of his health.

CAPTAIN William H. Walcott, Seventh U. S. Infantry, has been assigned to duty at Fort Preble, Portland. He lost a leg in the battle of Gettysburgh.

Colonel Gouverneur K. Warren, present commanding the colored division, Ninth corps, in place of Brigadier-General Ferrero, whose absence we hope is only temporary.

THE following is the order of Major-General Burnside's staff:—Lieutenant-Colonel John H. Dale, Chief Commissary of Subsistence; Captain Heiland, Quartermaster; Lieutenant Wm. Rossell, Aide-de-Camp.

BY order of Major-General Butler, all the territory lying east of the Chowan River and north of the Albemarle Sound is erected into the District of Nansemond, under the command of Brigadier-General George F. Shepley.

AT a late meeting of the Corporation of Yale College, Professor Theodore D. Woolsey, formerly of the United States Army at New Orleans, was elected in the Medical Department, in the place made vacant by the resignation of Dr. Knight.

LIEUTENANT-Colonel W. Babcock, of the Seventy-fifth New York Volunteers, Acting Inspector General on the staff of Brigadier-General Neill, Chief of Cavalry, Department of West Mississippi, has been relieved from staff duties and will rejoin his regiment.

FIRST Lieutenant Joseph G. Sage, Sixty-sixth New York Volunteers, has been discharged from the United States service, with forfeiture of all pay and allowances due, and imprisonment during the war, at Fort Lafayette, Florida.

BY command of Brigadier-General I. N. Palmer, the field work at the north end of the railroad bridge over the Trent River, at Newbern, North Carolina, known as "Fort Palmer," in memory of Colonel Simon H. Mix, 3d N. Y. Volunteer Cavalry killed in battle.

LIEUTENANT-Colonel Joseph G. Grane has been ordered to resume his duties as Commissary of Subsistence, Eighth Army corps. Captain J. H. Gilman is relieved as Commissary of Subsistence, Eighth Army corps, and ordered to resume his former duties.

BY command of Brigadier-General I. N. Palmer, the field work on the right of the Trent River, on the North Carolina, known as "Fort Union," is designated "Fort Dutton," in memory of the late Arthur B. Dutton, Colonel of the 21st Connecticut Volunteers, and Assistant Captain of the Corps of Engineers U. S. Army—killed in battle.

THE following-named officers are announced as constituting the personal staff of Major-General A. E. Burnside, Commanding Tenth Army corps:—Captain J. C. Briscoe, Forty-fifth U. S. Infantry, Chief of Staff; Captain Clayton McMichael, Ninth U. S. Infantry, A. D. C.; Captain Charles Noble, One Hundred and Nineteenth Pennsylvania Volunteers, A. D. C.; Captain J. E. Sweet, Twentieth Indiana Volunteers, A. A. D. C.

THE following Regular Army officers have reported at Washington Headquarters, Army of the Potomac, D. C., for medical treatment:—Captain S. F. Smith, Sixth U. S. Infantry (Col. Vols.), leave for fifteen days. Lieut. S. Atchison, Fourth U. S. Infantry, (sick). Captain L. Walker, Fifth U. S. cavalry, (sick). Captain L. C. Hunt, First U. S. Cavalry, leave for ten days. Lieutenant W. W. Lyon, reported for mustering duty on account of disability.

CAPTAIN Thomas Amory, Seventh Massachusetts Volunteer Infantry, has been assigned to the command of the sub-district of Beaufort, relieving Colonel J. Jourdan, One Hundred and Fifty-eighth N. Y. Volunteer Infantry. He will be obeyed and respected accordingly. The commanding general takes occasion in issuing the order to thank his thanks to Colonel Jourdan for the energy and ability exhibited by him while in command of the sub-district.

BRIGADIER-General J. Kenley is relieved from command of the Third Separate Brigade, Eighth Army corps, to take effect from the 14th of July. Brigadier-General H. H. Lockwood is assigned to the command of the Third Separate Brigade, and the district included therein, and will report to O. O. No. 17, current series, headquarters Military Department of Washington, Washington, D. C. Brigade will include the District of Delaware and the defences of Baltimore, exclusive of Forts McHenry, Carroll, Marshall, and Federal Hill.

OBITUARY.

CAPTAIN STEPHEN S. REYNOLDS, A. A. G.

CAPTAIN STEPHEN R. REYNOLDS, A. A. G., died in New York on the 30th of June from the result of wounds received in the action at Cold Harbor, June 3d, 1864. Captain REYNOLDS was graduated at Columbia College in 1856, and two years thereafter, before he had become settled in a profession, the outbreak of war called him to arms. Though eager from the very first to enter the military service for which he felt his rare aptitude young REYNOLDS was for a time thwarted by motives of filial affection. But, before the close of 1861, all obstacles were removed, and in December of that year he left New York for Fort Monroe with a little company of men who had been recruited through his means, and joined a regiment then called the Union Coast Guard, but afterwards known as the 99th New York Volunteers. Early in January of 1862, he was commissioned a lieutenant of that regiment, and served with it at the capitulation of Norfolk, and for more than a year subsequently remained in the vicinity of that city. During a few weeks of this time, however, he acted as aide-de-camp on the staff of Major-General RENO, commanding the Fourth corps, Army of the Potomac, but upon the removal of that officer from the command Lieutenant REYNOLDS declined him to ask for his relief, which was granted by the General, who at once sent him at the time a deserved letter complimentary of his soldiery bearing. Soon after this Lieutenant REYNOLDS was made Quartermaster of his regiment, which in the spring of 1863 was ordered to Yorktown, where he remained more than a year.

In July of last year, he was appointed Assistant Adjutant-General, with the rank of Captain, and, at the request of that officer, assigned to duty on the staff of General WISTAR, then in command at Yorktown, and, on the evacuation of that place, the troops there were incorporated with the 18th Corps, under command of Major-General BUTLER, Army of the James. Captain WISTAR taking command of the 2d Brigade, 2d Division. Captain REYNOLDS remained with him during the south side of the James, taking part in two severe engagements, and in the operations before Petersburg, Virginia, and participated in the fatiguing march to Cold Harbor, where the army of which was put into action immediately upon the arrival on the field. Two days after the battle, Captain REYNOLDS fell during the third severe engagement, which in its terrific intensity, and its destruction of life, rivalled the severest actions of the war. At this battle, while the troops were in the act of the occupation of the rifle pits, Captain REYNOLDS received two wounds, one in each arm. Five days after the fight he was removed to Washington, where, in the Armory Square Hospital, he remained in a languishing, mid-night state, when he was transferred to his home in New York, where in spite of the most assiduous attentions of the most skilful physicians, he died, and his constitution impaired by the miasmatic climate of the Peninsula, the combination of pyæmia finally produced his death, at the age of twenty-six years.

Captain REYNOLDS was an officer who had endeared himself to all with whom he had been associated in the Army as well as in civil life. As a companion and friend, he was ever ready to extend an accustomed affability, a pure patriotism, a fine sense of honor, and a knowledge of men, which not only won him friends but gained him the esteem and confidence of his superiors. As an officer, a gallant soldier and a Christian gentleman, he has enrolled his name among the fallen heroes of the war.

CAPTAIN FRANCIS W. BUTLER.

CAPTAIN Francis W. Butler, fell an officer upon the staff of Major-General Hancock, in the battle at the crossing of the Chickahominy at Bottington, N. H., on Saturday last, in the twenty-third year of his age. He was severely wounded in the knee before Petersburg on the 16th of June, and died a few days after the close of the 18th of July. His wound assuming a more dangerous character, amputation of the limb was at last resorted to as the only means which promised to save his life. For a few days after the operation Captain BUTLER appeared much better, but subsequently commenced failing, and on Saturday last, in the most extreme debility, he calmly resigned to the sustenance of 1861, as Second Lieutenant in the 6th New Hampshire Volunteers, then in command of the late Colonel CROSS. He was afterwards promoted to First Lieutenant, and in December, 1862, was promoted to a Captaincy. Soon after entering the field he was detached from his regiment and assigned to a position in the Signal Corps of the army, and on the staff of General HANCOCK. At the siege of Petersburg he most conspicuous bravery, and received from General MCCALL a beautiful signal flag as a token of affection from his commanding officer. Captain BUTLER was a native of Boston, and was at one of the re-enlisted veterans, and on going back to the field was appointed upon the staff of General HANCOCK, when he received his death wound in the service of his country.

THE following is a copy of the official statement of losses, as published by order of General SHERMAN, near Atlanta, July 28, 1864:

Total loss of Rebels, July 20th	1,750
Rebel dead counted and buried, July 20th	1,442
Rebel dead counted and buried, July 21st	2,142
Rebel dead in front of our main line not counted	500
Rebel dead buried, July 22d	8
Rebel colors captured, July 22	3
Rebel prisoners captured	5,300
Rebel dead buried, July 28	287
Rebel loss of cannon, July 28	2
Rebel prisoners, July 28	1,200
Total Rebel loss of artillery pieces	10
Total Rebel loss of colors	3
Total Rebel loss in prisoners	6,500
Total Rebel loss in dead	4,379
Number of rebel wounded unknown	5

NOTICES TO CORRESPONDENTS.

The Editor of this JOURNAL will always be glad to receive communications of a character in the two services, correspondence and general communications of a character united in its columns. It is necessary that the name of the writer should, in all cases accompany his communications, not for publication, but as a guarantee of good faith.

Officers are especially requested to give us early notification of all personal matters of general interest; of the movements of vessels of cavalcade having officers; and military and naval events.

The Editor will, at all times, be pleased to respond, in these columns, to enquiries in regard to habitual and other matters.

The subscription price of THE ARMY AND NAVY JOURNAL is FIVE DOLLARS a year, or THREE DOLLARS for six months, invariably in advance. Remittances may be made at our risk, by Government drafts, Post Office Orders, or other drafts, which should be so payable in the order of the Proprietor, W. C. Church.

Subscribers who fail to receive their paper promptly, will please give immediate notice of the fact.

Subscribers ordering the address of their paper to be changed, should be careful to give their previous address.

The Editor does not hold himself responsible for individual expressions of opinion, in communications addressed to the JOURNAL.

The postage on the JOURNAL is twenty cents a year, payable quarterly in advance, at the office where received.

All communications should be addressed to the ARMY AND NAVY JOURNAL, New York.

PUBLICATION OFFICE 79 FANE ROW, THEE BUILDING.

SUBSCRIBERS to the ARMY AND NAVY JOURNAL are again reminded that but two numbers remain to complete the present volume. Those who purpose to renew their subscriptions for the coming year, will oblige the publisher by remitting their advance subscriptions, as a reason to receive the first number of the new volume without delay. We shall furnish an index and title page with the last number of the volume. Those who desire can have their numbers bound for one dollar a volume, by forwarding the numbers to us. Any numbers desired to complete sets can be furnished. Covers will be furnished when desired, at a price which will be stated next week.

U. S. ARMY AND NAVY JOURNAL.

NEW YORK, SATURDAY, AUGUST 6, 1864.

THE MINE AT PETERSBURGH.

THE last effort to carry the rugged works of Petersburgh, enclosing the explosion of an offensive mine and the dispatch of a storming party through the wide breach, has resulted in failure. It was in its nature an experiment. Success could not be predicated of it, because success pre-supposed surprise. Boldness has mingled in all the conduct of the campaign. But, who will not risk, shall not win. General GRANT has too often been a favorite of Fortune, not to throw himself now and then on the chances of success. Surprise has more than once played a decisive rôle in this campaign. In HANCOCK'S famous charge at Spottsylvania on the 12th day of May, the enemy were taken in their sleep, or, just awakened, at their rations. But success was achieved because HANCOCK'S corps, bursting on the astonished pickets of the enemy, drove them in, pressing on their very heels, and vaulting the entrenchments side by side with them. Once there, they stood astonished at the accumulations of artillery to cover the assault, and especially the admirable feint at Deep Bottom, well deserved success. The latter manœuvre deceived the enemy as thoroughly as could be desired. The mining operations, however, had long been suspected by him. What can be affirmed is that the time of the explosion was a complete surprise, and of the place he could only surmise, though events proved his speculation to be accurate. He had trained his guns to an enfilading fire upon this spot and the slope beyond, and lay prepared for the blow, whenever and wherever it should fall.

The first cry of the North, at the repulse, was that "somebody had blundered." Some general officer was personally responsible. How many and who have blundered, it is not difficult to decide. But the general officer who directly caused the failure may, with tolerable accuracy, be pointed out as General ROBERT E. LEE. The skill of his fortifications, the rapidity of his return from Malvern Hill on discovering his opponent's ruse, and the adroitness, strength and celerity with which his slender garrison at Petersburgh was rallied out of its consternation, are very noteworthy. Yet it is nevertheless true that there was blundering on our side, and blundering enough to preserve to LEE his reputation and his city.

We were unfortunate as well as unskilful. The damp fuse would not explode the mine till more than an hour behind its time. Here was a sad calamity, like the fatal delay at the first Manassas. It brought broad daylight and wakefulness upon a work intended for that dark hour before dawn, when the enemy slept most heavily. Time, also, was now very precious to LEE, hurrying back from his side journey to Malvern Hill. But the sluggishness of the fuse was only prophetic of a general want of promptitude to come. There seems to have been half an hour's delay in getting the charging column in motion. That single fact will account for all. When the "forward" was sounded, the enemy had recovered from the shock of bewilderment with which the deafening roar of a hundred cannon startled him, and bravely answered gun for gun. That lost half-hour should have seen the storming party through the breach and sealing Somebody Hill at its very crest. Minutes then were worth ten hours at midday. But a delay still greater, if not more astonishing, took place at the ruins of the exploded fort. Again the enemy was allowed to recover from our onward rush, and an hour was consumed in entrenching, in exhuming and mounting guns, and in re-forming his battle lines. Let this charge ever so gallantly afterwards, their doom was sealed.

In addition to the delay and other tactical mismanagements, there may be detected a want of co-operation, a want of sympathetic action among subordinate commanders, in the affair of Saturday, similar to that of Spottsylvania and Petersburgh. For a long time there was a painful lack of support. There was need of fresh brigades to be thrown into the gap, and up the slope; and, in truth, there was need of a better handling of the troops who did gain the first of the enemy's lines. There was some effort to attract the enemy's attention on the right by diversions of the Eighteenth and Fifth corps, but the brunt of the affair was borne by the Ninth. When it was clear that the plan had failed, the troops seemed to have been called off where it was practicable, and the rest left to their fate. These in the fort, including BARTLETT and most of his gallant brigade, repulsed several charges of the enemy, preferring to sell each his way, than in the perilous retreat. But no support could be tendered them. To a soldier who reflected only on what he saw, and not on what was practicable, it would seem that some of the bravest regiments in the Ninth corps had paid the penalty of gallantry by being coolly sacrificed, like the mechanical *débris* of a bad job, of which it would be well to wash one's hands.

For so important an attempt it might have been well to select a storming party from the whole Army. There were certain advantages for this task possessed by some corps in officers, by others in experience, and by others in the men themselves. But the choice fell on the Ninth corps to head the assault. The composition of this corps was not in all respects perfect, and there was considerable inequality in the character of its sub-divisions. But some of the regiments most hotly engaged in this affair, had fairly earned a reputation for gallantry unexcelled in the Army. Have civilians so soon forgotten the glories of Wilderness, Spottsylvania, and Cold Harbor, that they now seek to throw the responsibility of this disaster on the men in the ranks? Were this true, we might indeed despair for the future. There was, it is true, some raw heavy artillery troops in the Ninth corps, who, enlisting in that arm, doubtless never expected the dangerous fighting that the recruit for a veteran infantry regiment looks for. And, again, one entire division, FERRERO'S colored troops, were raw, now for the first time taking part in battle. They fought well till they broke, and then betrayed a lack of discipline and *morale*.

We must trace out elsewhere than among the rank and file the main cause of Saturday's disaster. But yet there was a sign of weakness in the men themselves. Sometimes it happens that troops will be seized with the presage of defeat, as, at others, they are flushed with confidence in victory. We have not failed to notice the statement of one correspondent, that a part of the storming column were so startled by the unexpected proximity of the explosion, and of the earth upheaved in the deceptive light, as to cause a rumor that it was *our* fort which had been blown into fragments by the enemy. Thereupon the men "hesitated," says the writer, "and the tide of battle swayed." Whatever the cause, it was many minutes before the column rallied, and then it bounded forward with a cheer. Again, for a long time, there has been prevalent among our camps a fancy that the works on Cemetery Hill were undermined, and even should they be carried, a grand explosion would destroy as once conquered. The remembrance of this doubtless had its effect after the enemy's first line was gained, and the crest above frowned ominously upon the charge yet to be made. Such singular impressions are often prevalent, and decide battles for which no logic can furnish explanation. In the two engagements at Spottsylvania already recorded, the spirit and confidence of the men at the first, and successful, assault, were unbounded. They *knew* they would win. In the second, it is unquestionable that many approached the frowning breastworks with heavy hearts. In that peculiar strategy which soldiers make for themselves, it was laid down that the works could not be carried. Skirmishers had told their comrades the Rebels had laid a trap for them. In effect it *was* an ambuscade, and though the troops charged gallantly, despite foreboding, the result was what they had anticipated. A similar misgiving in a part of the troops employed, would seem to account for their inertia on Saturday. It was by no means enough to decide the day. Skilful and vigorous handling would have dissipated it in a few moments, and the troops would have swept forward to victory. But undoubtedly it oppressed officers and added its weight to the other misfortunes of the day.

We have chosen to call the affair of Saturday a repulse, rather than share the pardonable attempts to belittle it into a "reconnoissance" that the country may not despond. Our journalist avers that General GRANT regards his achievements by no means as a failure, but as a rather favorable effort. Another says it puts him in possession of facts about the enemy's strength which he could not otherwise have obtained. Except the assurance that EARLY could be still longer spared for his Maryland vacation—a piece of information which he must share with General LEE, to whom it was also agreeable—their source to have been no important fact educed. And to possess that fact would hardly justify so great a holocaust of victims. No, we may fairly conclude that it was not General GRANT'S aim to pursue knowledge under such difficulties as those of Saturday. There are many unpleasant evils left in the train of this repulse. There is a serious loss in men; a serious loss of *morale* to a portion of the Army; there was an exposure of unskilful tactical management; there is the great relief it afforded to the enemy in a moment of anxiety, and the confidence it lends him towards carrying out other offensive plans like the invasion of Maryland; there appears, finally, for the first time in the campaign, a spirit of complaint and recusation amongst officers and men. There is also the chagrin of the commander at the failure of a plan deserving a better fate. He was confident of success, and so expressed himself to members of Congress and other visitors, who, in turn, spread the news of success approaching victory to the country.

But neither this disaster nor all its train need cause even a moment of despondency. The cause is the same, and our resources the same as before. The unconquerable spirit of the Army has risen superior to even more adverse fortune, and never need be doubted. The disparity between our loss and that of the enemy was far outweighed to our advantage but ten days since at Atlanta. We still greatly outnumber the enemy, and the Lieutenant-General has a temperament too elastic and a heart too stout to be subdued by a disappointment.

INASMUCH as there are still many officers in the European armies who fancy that the United States is destitute of military talent, and in grievous want of some of foreign importation, it would be an act of real kindness, if the military gazettes abroad would disabuse their readers of the idea, and remind them that in more than three years of active war we have trained a body of officers who are more valuable than any whom European will be likely to send us. Whatever their friends may tell them, these self-denying foreigners ought to know that even a certificate of service in

an English or German army will not invariably procure for the applicant a general's, or a colonel's, or even a subaltern's position; that, indeed, the chance is hardly sufficient to encourage a journey across the Atlantic, unless the traveller comes prepared, in the event of failure, to put his military experience to use in the ranks, or has some aptitude for pursuits outside of these relating to war. If our European contemporaries would say something of this kind, they would save us no little trouble in repeating the above to despondent gentleman from across the water, and would spare their countrymen a deal of mortification.

THE PROSPECT BEFORE ATLANTA.

At no time has the prospect in Georgia presented such encouraging features as now. If we have lost the invaluable services of McPHERSON, the enemy are, in this critical moment, deprived of their FABIUS MAXIMUS, JOHNSTON, who, if he could win save Atlanta, was, at least, determined to preserve his army for use in some day of more propitious fortune. With Hood the maxim seems to be, Atlanta or destruction. Thrice in fierce attack has he hurled his troops against our lines, in assaults, which, taking the estimate of so truthful a witness as General THOMAS, must have cost him twenty thousand men. While the Rebel army has been thus weakened, General SHERMAN's large force can scarcely feel in comparison the loss of less than half the number, which is the official report. It may be that some portion of the Rebel loss is in the State militia, who can be spared much better than older soldiers. But there must still remain a large percentage to be deducted from the effective force of the enemy. They hope for reinforcements, but how these are to reach them with an army securely plantted on one of their main lines of communication and seriously interfering with the other two, is a problem which only rare skill or great good fortune can solve.

As the result of the two important engagements of the 20th and 22d of July, General SHERMAN has drawn so near Atlanta as to extend his right to threatoo, if he has not already occupied, the line of railroad, which, branching into two at East Point, six miles to the south, connects the beleagured city with Macon and Montgomery. This line is our possession, Atlanta is securely invested and must fall. Determined to defend Atlanta, HOOD saw that his only hope lay in hurling his army promptly against SHERMAN; at any cost to delay his progress until the trans-Mississippi army could reinforce him and the levy *en masse* of Georgia militia be made available, at least, to guard his communications.

Failing in his double attack, we believe that his opportunity is gone. If not permanently destroyed, the railroads in the South have been injured with sufficiently to delay reinforcements and supplies until SHERMAN can tighten his hold about Atlanta into a death grasp. The line toward Augusta is in our possession at Decatur, and to prevent any movement in his rear from that direction, SHERMAN's cavalry have destroyed a portion of it forty-three miles to the east at Covington; including a bridge 350 feet long. The Montgomery road was badly injured by ROSSEAU, and STONEMAN is now reported to have torn up eighteen miles of the Macon line, while SHERMAN's right, as we have said, is extending to cover the junction of both the latter roads.

Thus, if we can find little in the present aspect of the Virginia campaign to encourage sanguine hopes, we may at least turn with satisfaction to the Army in Georgia. From there comes, as yet, no evil report to defer hope or disappoint expectation. It may be that distance softens the harsher features of the more remote scene. But we have abundant reason for, we hope that here, as is usual, Providence withholds the favor for which we have grown too importunate, only that it may bestow the equal or greater boon, of which, if not indifferent, we have at least grown in some degree unmindful, in our eagerness for the prize upon which our hearts have been chiefly set.

By an order issued from the Adjutant-General's office and published in our ARMY Gazette, it will be seen that, volunteers serving in three years' organizations who may have at the date of recalistment less than sixty days to serve, may reënlist in the regiments or companies to which they belong, for one, two, or three years, as they may in each case elect. The new term will commence from the date of reënlistment. All men re-enlisting will be entitled to the bounty provided by the Act of July 4, namely, for one year, $100; for two years, $200; for three years, $300. Men reënlisting as therein provided, no furlough will be promised, and Commissaries of Musters and their assistants will be held responsible that this condition is distinctly understood by all parties concerned.

SOME of the good people of Pennsylvania complain a little of the apathy of the more Northern States with regard to their perils. And it must be admitted that hitherto but little interest has been taken in military matters in Maryland and Pennsylvania, except by the inhabitants of those States. Some apology for this general lukewarmness may be traced to a popular distaste for being harrowed up in feelings one day with stories of fifty or a hundred thousand veteran Rebels within sight of Harrisburg, and the next to learn that it was only a ridiculous gang of highwaymen, which had just committed the absurdity of crossing the Potomac. A single whisper that great events were rife at Petersburgh, threw into oblivion the adventures of the pacific Keystone farmers.

The stentorian lungs of benevolent citizens of the "North" has now been called off again from the Appomattox by an appeal from the inhabitants of the late town of Chambersburgh. The promptness with which this appeal was written, it arriving North with the first news that the town was burned, its statement that, including merchandise and all sorts of property, "the loss will be at least two millions of dollars," and the fact that it was signed, as it states, in all this hurry "by a number of old, responsible and prominent citizens," istroduce a mixture of the ludicrous, even into our natural sympathy and pity.

One fancies that in such a predicament, he would rather wait and see what the Government and his fellow citizens throughout the State would do for him, before dispatching a circular post-haste to that very large and indefinite body, "the benevolent people of the "North." Would not the charity be as acceptable, if one moment had been spared for allowing it to be voluntary? Or is it likely that any pressing need, and, meanwhile, the neighboring communities were not to be trusted with the officers of sympathy and philanthropy? This latter is a hard solution; in spite of what some sons of the benevolent people of the North have said of Central Pennsylvania. They used to say that they found some fine people there, but only few Samaritans. We trust the people of Chambersburgh may have a pleasanter experience.

One cannot help thinking of how well a little over "a million of dollars" would have been expended in a Home Guard. Or even should one half of the farmers on the line the road which McCAUSLAND travelled from the Potomac, have banded together for fight, he and his troopers would have been driven from the State. As the record now stands, a town of 6,000 people as far north as Pennsylvania, was fired by five hundred Virginia cavalry, who were unmolested in their amusement, and not even a boy's popgun was let off by the people in self-defence.

WE are very glad to publish Professor MAHAN's sharp rebuke of that English artillery officer who abused the courtesy of gentlemen in our Army, by printing their private conversation, and using it to cast discredit on themselves and their service. Though it is hard to think thus of so officer of so honorable a corps as that to which this Englishman belongs, we believe that he has been guilty not only of outrageous discourtesy, but of positive untruth. We may also say that, if the reading of the article we copied last week has the effect of preventing the visits of these wandering English officers, it will have accomplished the object we had in view in publishing it in these pages.

THE *Spectateur Militaire* says of the Russian irregular troops, that their number was, on the 1st of January, 1864, 177,460; but the number of cossacks who could be called into service is 307,000. It is seen by these figures that the number of irregular troops has been diminished in consequence of the incorporation of a part of their contingents into the active troops. In a former number of the JOURNAL, we spoke of the large military power which Russia has at her command at the present time. Never, says M. LEON DE CESARY, in the *Spectateur*, has Russia had any other epoch had so great a force at her disposal. In her regular army of 1,185,000 men, 986,000 are armed, drilled, equipped, and constantly at the disposition of the Government, and ready to enter on a campaign. The great difference which is to be remarked between the size of the Russian army at the opening of the year 1863, and at that of 1864, is traceable to two recruitments, one of 5, and the other of 10 men, in every thousand, which took place in the course of the former year. These levies were finished before the published time, thanks to the reforms which have been introduced into the system of drilling, and which render military service less grievous. In spite of the great number of recruits and the long distances they had to travel, more than two-thirds of the men drawn arrived at their corps during the first two months. Formerly, this operation required at least seven months. The school of the soldier is conducted with a rapidity hitherto unknown.

THE English newspapers in describing the launch of two new iron-clad turreted vessels near St. Petersburgh,—a launch which was deemed so important and interesting as to draw many thousands of curious spectators to witness it,—make bold to say that the turrets are built on Captain COLES's plan. The statement is, of course, incorrect. Captain COLES's cupola has been entirely abandoned in continental Europe, and the American plan of cylindrical turrets substituted. The mode adopted by the British engineer for turning the turret borrowed from us, will possibly answer for the light guns employed, but for such enormous pieces as we use, it would probably be found insufficient. The failure of the turret ship *Royal Sovereign*, which we recently noticed, was principally owing to the insufficient means employed for sustaining the weight of the turrets. The Russian turret vessels, like the *Roll Krake*, are not fitted with the COLES cupola, but with cylindrical turrets of two feet less diameter than those of the Monitors.

THE *Allgemeine Militär-Zeitung*, speaking of the character of the Swedish army, says that, as to the worth of this army, you can either say very little or a good deal. Its discipline is very severe, and is maintained by flogging. The military service being in a portion of the army for life, the advancement of the private soldier to the grade of corporal is very slow, and also by favor. Advancement to the grade of officer is possible to but very few. Admission to higher branches of service is extremely difficult. The arms, except the artillery, are all bad, and as the Swedes have not yet adopted all the perfections of artillery, the value of that arm, also, is only conditional. They are making great efforts to manufacture new guns, and a large number are already finished; but the army is not yet entirely supplied with them. The bravery of the Swedes is known. They are, however, better for attack and the onset, than for an obstinate resistance. The Swedes have the patience all sorts of privations. The *Militär-Zeitung* concludes that whatever else may be the merit of the Swedes, Germany will have nothing to fear from them in the continuation of the war, supposing they should take the part of the Danes.

WE suppose it is altogether useless for us to say that another case of gross injustice done to so officer, in publishing his name amongst those dismissed for absence without leave, has this week come to our notice. With his leave, regularly issued and granted, in his pocket, he has had to endure the mortification of reading his dismissal in nearly every daily newspaper in New York. Of course, there is a mistake somewhere; but the character of an officer should not be constantly liable to injury by reason of such errors. The whole service suffers in consequence of this carelessness about dismissals.

CORRESPONDENTS report that Major-General HOOKER, who has come East, has been, at his own request, relieved of the command of the Twentieth corps, he feeling dissatisfied with recent changes in his Department. His advent here is the occasion of rumors of his assignment to important command in Virginia. To these, however, we are unable to give confirmation, or to show on what foundation they rest.

THERE are numberless stories afloat as to changes to important military commands; but they are merely the shrewd surmises of active telegraphers. They have, however, this much foundation, that, according to the law of precedent and the mutability of governmental minds, the time has come around for new transfers and new organizations.

FOREIGN MILITARY AND NAVAL MATTERS.

THE *Alexandra*, about which so much discussion took place in the Court of Queen's Bench, lately left the Mersey for Nassau with a general cargo of merchandise. The name of the vessel has been changed, and she is now called the *Mary*, and is to be a trader between the Mersey and Nassau.

THE paddle-wheel steamer *Terrible*, 21 guns, 800 horse-power and 1,350 tons, the largest paddle-wheel steamer in the British navy, having been upwards of two years in dock undergoing a most extensive repair, has been undocked, and is now being fitted for the Chatham reserve in readiness for immediate commission. During the time she has been in the shipwrights' hands she has been almost entirely rebuilt.

On the 28th of June experiments were made with rifled guns and iron plates in the presence of the Emperor of Austria. The thickness of the plates used is not known to the public, but certain it is that they were neither smashed, pierced, nor cracked. The gun used was a 48-pounder; the shot, which were of cast steel, weighed fifty-six pounds; the charge of powder was about fourteen pounds English. Though forty shots were fired at a distance of five hundred yards, no injury was done to the plates, to which, by an ingenious contrivance, only a horizontal motion has been given. Notwithstanding that the gun used was loaded at the breech, the gunners did not once miss the object at which they fired.

WE have dates from Vera Cruz to July 23. MAXIMILIAN has extended an amnesty and pardon to all political prisoners; but those who have killed a French soldier or burned a piece occupied by the French are excluded from the amnesty. A conspiracy against the French has been discovered at Puebla. The French forces were about to enter Durango. The forces of the national government which were at Saltillo had marched from there to Monterey, where JUAREZ had been joined by NEGRETE with over 600 men. The Mexican military law has been introduced by MAXIMILIAN until further notice. The forces of CORTINA at Matamoras have been joined by many Union and Rebel deserters, who are paid $1 per diem in Mexican gold.

ON the 23d of June, from the yard at St. Petersburgh appropriated to the building of iron-clads, the Russians launched two more Monitors. The *Ne tron Menya* (Tremble not Me) was the largest of the two iron-clads just launched. is 230 ft. long, 53 ft. broad, and 27 ft. deep. She is covered from stem to stern with armor 5½ in. thick at the water-line, and 4½ in. thick on the remaining surface of the sides, on a backing of teak 12 in. in thickness. The armament will consist of twenty 600 pounder rifled steel guns. The machinery is of 450-horse-power. The quantity of water when fully equipped for service, with coal on board, 15 ft. As the *Ne tron Menya* is destined chiefly for coast defence and for service in the Baltic, she will be only lightly rigged. The second iron-clad, the *Swertch* (Watterspout), is a double-turret vessel about the same size and tonnage as, but is of different construction to, the preverment on, the Danish iron-turret ship *Rolf Krake*. The chief dimensions are as follows:—Length, 160 ft.; breadth, 38 ft.; and depth 14 ft. The draught of water when in fighting trim will be 10 ft. 6 in.; the armor is 4½ in. thick, and extends the entire length of the side, and to a depth of 4 ft. below the line of flotation. The turrets have an internal diameter of 18 ft., and are each capable of carrying two large guns; but in this instance but one 300-pounder gun will be placed in each turret. The armor on the turrets varies from 6 to 4½ ins. in thickness. On the 11th of July, another turreted iron-clad, the *Duragan*, was launched. She is the cheapest of the fleet, costing but $307,200 gold.

ACCORDING to the *Spectateur Militaire*, the Austrian marine for the present year is as follows:—First, to *maritime authorities*. These consist, first, of the Ministry of Marine, or, as we should say, of the Navy Department, which has general cognizance of naval affairs, including the direction of technical works, the artillery, the construction of ships and machines, the internal management of the navy, &c. Next, the command of the marine, the headquarters of which is at Trieste. Under its authority are eight sub-commands—the inspectorship of the naval troops; the Port-ad miralties of Pola, of Trieste, and of Venice; and the commands of marine-stations at Pescheria, Pest, Lissa, and Mantua. Secondly, as to the *personnel*. It comprises, first, 3 vice-admirals (with rank corresponding to the French lieutenant-marshal), 4 rear-admirals (major-generals), 1 major-general, who is the inspector of the naval troops, 10 captains (colonels), 25 captains of frigates (lieutenant-colonels), 87 lieutenants (majors), 103 ensigns (lieutenants), 30 cadets (or sub-lieutenants). Besides, there are the marine corps, at Pola, the engineer corps, a regiment of marine infantry, the ecclesiastical *personnel* or chaplains, auditors, the health department or surgeons, the construction departments both on land and sea, the *personnel* for managing stores, the administration department, and the hydrographical. Thirdly, as to force, or *material*. At sea, Austria has 38 steamers, carrying 575 guns; and 16 sailing ships, with 225 guns: the whole having a force of 10,450 horse-power. On lakes and rivers, she has 26 steamers, carrying 72 guns; and 33 sailing ships, with 115 guns: the whole being of 1,531 horse-power. The grand total is 115 vessels, 987 guns, 11,981 horse-power.

COLONEL Cathcart, of General Hunter's expedition, explains that the burning of the Institute at Washington was removed from the Lexington Military Institution to save it from the destruction decreed to that building. It was brought to Washington to receive it from the "hands of degenerate sons of worthy sires."

IT is asserted that the official records record the discovery of over one hundred and fifty female recruits, most of whom are supposed to have substituted themselves for male friends with whom they were in collusion. Over seventy of them have discovered a place in efficient servants, one regiment employing seventeen in that capacity.

A PRIVATE in the Thirteenth Maine regiment had on the allotment roll $10 per month reserved to be deposited in the Savings Bank, reserving only $3 per month to spend for himself. After three months's pay the allotment was discontinued. Two hundred dollars were thus deposited. Out of the $3 per month, and by taking what money he showed if desired a pipe to smoke, he was able to save and send home at one time $25, for a watch and some other things; at another time, $21, to be forwarded to his father in Nova Scotia, and at the time $230 have come by express to be deposited in the bank. The State and city bounties to which veterans are yet to be paid, which will swell the sum, with interest accrued, to upward of $750.

In accordance with General Orders No. 193, War Department, Adjutant General's Office, Washington, D. C., May 18, 1864, the following officers are hereby detailed Ordnance Officers of the Department of the Cumberland:

DAVID PORTER, Lieutenant-Colonel, 3rd U. S. Artillery.
Captain E. P. Townsend, 15th U. S. Infantry, at Nashville, Tennessee.
Lieutenant O. E. Michalis, Second Lieutenant Ordnance Corps, at Chattanooga.
Captain Alexander Piper, 2d Wisconsin; W. W. Armstrong, 17th Indiana Mounted V. V. I., to the field.

DIVISION ORDNANCE OFFICERS, 4TH A. C.—First Lieutenant R. P. Easton, 91st Ohio V. I., 1st Division. First Lieutenant A. J. Douglass, 71st Ohio V. I., 2d Division. First Lieutenant P. Haldeman, 3d Kentucky V. I., 3d Division.

DIVISION ORDNANCE OFFICERS, 14TH A. C.—Lieutenant W. D. Lowe, 19th Indiana, 1st Division. Lieutenant George Scroppe, 125th Illinois V. I., 2d Division. Lieutenant W. B. Biddle, 87th Indiana V. I., 3d Division. Division Ordnance Officers, 20TH A. C.—Lieutenant W. J. Augustine, 29th Pennsylvania V. I., 1st Division. Captain H. H. Wilson, 147th Pennsylvania V. I., 2d Division. Captain J. C. McKell, 73d Ohio V. I., 3d Division. Captain A. H. Plummer, 19th U. S. Infantry, 4th Division.

CAVALRY BRIGADE.—Lieutenant Thomas O. Cunningham, 4th Indiana Cavalry, in charge of Brigade Ordnance Train.

The 73d to be formed by consolidation with the 75th and 83d.

The 74th to be formed by consolidation with the 91st.

The 75th to be formed by consolidation of the 75th, 84th, and 89th.

The 76th to be formed by consolidation with the 78th.

The 77th to be formed by consolidation of the 81st, 86th, and 99th.

The 78th to be formed by consolidation of the 82d and 85th.

The 79th to be formed by consolidation of the 80th and 93d.

The 80th to be formed by consolidation of the 90th, 98th, and 98th.

The 81st to be formed by consolidation of the 87th and 95th.

The 82d to be formed by consolidation of the 97th and 99th.

The last three regiments are constituted Engineer troops. The 73d and 75th regiments will be organized at Morganza; the 81st at Forts Pike and Macomb, and Ship Island; the 76th and 77th at Fort Barrancas; the 78th at Pensacola; the 79th, 80th, and 82d, at New Orleans, and the 81st at Brazos Santiago.

ARMY GAZETTE.

RE-ENLISTMENTS FOR ONE, TWO AND THREE YEARS.

WAR DEPARTMENT, ADJUTANT GENERAL'S OFFICE,
WASHINGTON, July 26, 1864.

General Orders No. 252.

I. On and after the date, volunteers serving in three (3) years' organizations who may have, at the date of re-enlistment, less than sixty (60) days to serve, may re-enlist in the regiments or companies to which they belong for one, two or three years, as they may to each case elect. Such re-enlistments will commence from date of re-enlistment.

II. All men re-enlisting will be entitled to the bounty provided by the act of Congress, Approved July 4, 1864, and promulgated in General Orders No. 226, current series, from this office, viz: $100 for one year, $200; for two years, $300; for three years, $400. The new provision also entitled all re-enlisted men to a furlough, as accordate at the time of his being mustered (re-mustered) into the service, one additional day for each day of service he may have spent in the field prior to the expiration of his term of service.

III. All the pay, clothing, and other allowances of bounty will be paid when the men are re-mustered, and as follows: For re-enlistments for one year, $100; for re-enlistments for two years, $200; for re-enlistments for three years, $300.

IV. The Quartermaster and Surgeon, re-enlistments, re-musters and payments under this authority will be regulated by the general provisions of General Orders No. 236, series of 1863, from this office.

V. The following remarks are made to guide the muster-out rolls:

"Discharged by re-enlistment as a veteran on the muster-out roll, as the case may be, under the provisions of General Orders No. 226, War Department, series of 1864."

VI. Reports of Credits (see Circular No. 8,) current series, from this office), under the foregoing, must be made and kept separate from those of other credits.

V. To men re-enlisting as herein provided, no furlough will be granted except upon the certificate of the mustering officer that he hold reasonable that this condition is destitutely necessitated by said portion mustered out.

By order of the Secretary of War.

E. D. TOWNSEND, A. A. G.

TO THE ARMY OF THE CUMBERLAND.

ARMY HEADQUARTERS, July 26, 1864.

The Major-General commanding this army takes pleasure in the troops upon the brilliant success attending the Orders Army in the late battles before Atlanta. On the 20th of July, the Fourth Corps, Twentieth corps, one division of the Fourth corps and part of the Fourteenth corps were engaged with the rebel army. The rebel loss is reported and missing was 3,733. In front of the Twentieth corps there were and out of the 3,000 rebel dead left on the field, buried by our troops, and the rebels were permitted to bury 500. The second division of the corps reports a rebel loss in front of its line of 1,000 dead, with light loss to themselves, and which must have swelled the number of dead buried by the rebels to 1,500. In front of the Fourth corps about seven stand of colors. No report has been received of the part taken in the battle by the Fourteenth corps, but its loss was 353 killed, the total Union loss in killed, wounded and missing was 2,500, and ten pieces of artillery. Thirty-two stand of colors captured are in this office. The known dead of the enemy in front of the Fifteenth and Sixteenth corps and other divisions of the Seventeenth corps, as well as the other divisions of the Seventeenth corps populated six months of the enemy before Atlanta, 8,000 dead, as well as their wounded loss in killed to at least 8,000. The latest report status we buried over 2,300 dead rebels in front of the Fifteenth corps alone. The total loss in this battle 18 stands of colors and 5,000 stands of arms.

By command of Major-General THOMAS.
W. D. WHIPPLE, Assistant Adjutant-General.

CONVERSION OF GUNS.

HEADQUARTERS DEPARTMENT OF WASHINGTON,
220 ARCH STREET, WASHINGTON, D. C., July 21, 1864.

Circular.

The following is published for the information of this command, viz:

TO CONVERT 8-INCH IRON SHELL BOMBS OR A FIELD GUN INTO A MORTAR.

Dismount the piece, remove the trunnions and mount the piece with the muzzle towards the trail; raise the axle and place 3 inch blocks 2 or 3 feet apart underneath it to get the proper range of the piece, under the chocks, and sufficiently far apart to allow the piece to pass between them. Then bore out the vent, and open a pan 6 inches and dig a hole to let the breech down sufficiently to give the proper elevation. Secure the piece to the chocks and platform by bolts through rest on the axle. The axle should be slightly inclined, so as not to chock the recoil more than is desired. The chocks should rest on the ground. The above is under the direction of Lieut.-Col. A. H. Dutch, Chief of Artillery.

By order of Major-General HEINTZELMAN.
J. A. HARDIN,
Lieutenant-Colonel and A. A. G.

TABLE OF RANGES FOR 8-INCH SHELL IRON BOMBS FIXED AS A MORTAR.

1st charge 4 oz.	Shell 45 lbs.	Elevation 45°.	Range 302 yards.
2d " 8 oz.,	"	"	" 620 "
3d " 12 oz.,	"	"	" 1,000 "
4th " 16 oz.,	"	"	" 1,462 "
5th " 20 oz.,	"	"	" 1,923 "

Spherical case can be used with great effect against troops in trenches, if cut to burst in the air or case loaded with shot reaching the ground.

Lieutenant-Colonel A. H. DUTCH,
Chief of Artillery.

ARREST OF DESERTERS.

WAR DEPARTMENT, ADJUTANT-GENERAL'S OFFICE,
WASHINGTON, June 21, 1864.

Circular No. 46.

To facilitate the arrest of deserters from U. S. General Hospitals and colored troops, a Provost-Marshal will be placed in charge of Hospitals, and Post Commandants, as soon as a deserter is ascertained, will report the fact (with copy of charges and description, if not on file at the Full particulars) to the Provost-Marshal of the District in which the Hospital is situated, or to such other Provost-Marshal as the latter may be able to give immediate aid in making the arrest. This in addition to the regular duties of the Quartermaster, who will be assigned to each Marshal-General's Bureau, and to the cities, from such General Hospitals and colored troops may be stationed.

E. D. TOWNSEND, Assistant Adjutant-General.

AN ACT to provide for the better organization of the Quartermaster's Department.

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That there shall be established in the office of the Quartermaster-General of the Army, to rank next after the Commissary-General of Subsistence, an additional bureau, of which shall be placed in the charge of a competent officer of the Quartermaster's department, to be assigned to duty by the Secretary of War, who shall, under such rules as may be prescribed by the Quartermaster-General, with the approval of the Secretary of War, transact the business of such division as hereinafter provided to be made.

SEC. 2. And be it further enacted, That the purchase, procurement, and disposition of horses and mules for cavalry, artillery, trains, and ambulances of the United States Army, and such horses and mules may be procured for the Armies of the United States.

SEC. 3. And be it further enacted, That the purchase, procurement, and disposition of cloth and clothing, knapsacks, camp and garrison equipage, and all supplies and appurtenances of the same shall be provided by the Quartermaster's Department.

The third division shall have charge of the purchase, charter, hire, and maintenance of all vessels to be used in the transportation of the Army, and of prisoners of war, and of their supplies, on the ocean, and the bays and sounds connected therewith, and upon the northern and western lakes and rivers, including all vessels purchased or otherwise so, owned or employed by the War Department, excepting river steamers employed in the Western river service.

The fourth division shall have charge of the purchase, charter, hire, and maintenance of all vessels to be used in the transportation of the Army, and of prisoners of war, and of their supplies, on inland waters and on the Western rivers (other than transportation of troops and their supplies, and the construction, repair and operation), including all railroads and telegraph lines operated by the

United States for military purposes, and of all steam vans and gunboats owned or operated on bay or river improvements up the Western rivers, and other inspection shall be as to the seaworthiness of vessels.

The fifth duty shall be to examine all claims for pay, pay in lieu, procurement, and disposition of forage and some for transportation.

The sixth division shall have charge of the erection, preservation, maintenance, and disposition, and to forfeit, all barracks, hospitals, storehouses, and offices (other than rented buildings), wharves, and other structures occupied on the whole or in part of vessels, and of all lumber, and materials necessary for building purposes; and of the hire and commutation of quarters for officers, the hire of quarters for troops not in public grounds, for prisoners of war, and for deserters, and of rents, and the repair and care of all buildings and other structures hereby assigned to the said division. It shall also have charge of military purposes, exc pt such as are lawfully under the charge of other bureaus of the War Department, and of the purchase of fuel, and of the rents in erecting barracks, or other lodging duty, under the acts of March 3d, 1813, and July 5th, 1862.

The seventh division shall have charge of the purchase, procurement, sale, and disposition of all horses, mules, wagons, carts, and harness, except such as are furnished by the Ordnance Department for the use of all horses and mules purchased; and of all the fuel for officers and enlisted men, camps, garrisons, hospitals, posts, and stations, and for all offices in the Quartermaster's Department, and of all stationery required for normal power in the field, at camps, garrisons, posts, depots, and stations, and for all offices in the said department, and of all forage required for the subsistence of troops and of horses and other animals, and of the transportation of troops and of all military stores of every nature and description, and of the expenses of carrying the mail, military and naval supplies, and of the hire of all teamsters, and of the transportation of troops and of their baggage and subsistence stores, and of the transportation of recruits and of the expenses of courts-martial, military commissions, and courts of inquiry, and of the transportation of funds and property for the transportation of themselves and their baggage when traveling on duty without troops, escorting, or guarding prisoners, and of the expenses of war and such rebuses as the Secretary of War may direct. And the duties hereby provided for in each of the preceding divisions shall be performed under the Quartermaster's Department; and of the printing, binding, and blank books for the Quartermaster's Department; and of the printing, binding, and blank books for the Quartermaster's Department; and of paper and authorized expenses for the movements and operations of an army in the field, or during any campaign, or for the defense of any place.

The eighth division shall have charge of all inspections of the Quartermaster's Department, and of the transportation, the safe-keeping, and the expense duty, rendering and preserving the reports as receives, and communications, and returns, and accounts connected with the duties of the proper divisions, such portions of these reports as may be necessary for their information and action, and the Quartermaster-General shall prescribe; but duty shall have power to notify to report and to point out any erroneous abuses which may be found to exist in the management of any part of the Quartermaster's department, but to give, by order of the Quartermaster-General, the duty of the division to which the subject matter may belong, and to prevent a continuance of such abuses or errors: *Provided, further*, That all the duties of the Quartermaster-General's department, and of the inspection division or the approval or otherwise of the Quartermaster-General.

The ninth division shall have charge of all the correspondence, returns, reports, and accounts of the Quartermaster-General, and of the Quartermaster-General, and of the transmission thereof to the several chief divisions, and of the preservation of the same.

Section 2 and be it further enacted, That the heads or the several divisions above mentioned shall be appointed by the Secretary of War, upon the recommendation of the Quartermaster-General, from officers in the regular service for proposals for the supplies necessary for the service, and for the purchase of the same, and for the advertising, and for other military purposes, in newspapers having general circulation at or near the place where such supplies are required, or such advertising is to be done, and regard also to the gin as shall such supplies be purchased, and the price to be subject to careful inspection; and all stations and the quality of the supplies to be subject to careful inspection, both as to the quality of the material, and second, as to the kind and character of the workmanship, which inspection shall be made by inspectors appointed for such inspector, with suitable assistants, who shall have had ample experience in the manufacture of the articles to be inspected, and who shall receive compliance; and all proposals for supplies so purchased shall be made under the direction of the chief of the bureau for which the supplies were required, and be referred to the Secretary of War, who may accept or reject any or all bids as he may deem best for the public interest.

Section 3 and be it further enacted, That when an emergency shall exist requiring the immediate purchase or delivery of any article or material or movements of troops, and when immediate action is necessary, and when such supplies cannot be procured from any established depot, or when the Quartermaster's Department, or any officer thereof, cannot wait the usual time of advertising as in case he, within the required time, then it shall be lawful for the Secretary of War, or any officer of the Quartermaster's department of such army or detachment as to procure such supplies or to make such movements, and without advertisement; and it shall be the duty of the officer making such purchase to keep an exact account of the disbursements of money for such supplies shall be accompanied by the certificate of the officer making the purchase as to the certain copy of the same, and also by a statement of the particular facts and circumstances which prevented the advertising as required by law.

Section 4 and be it further enacted, That it shall be the duty of the Quartermaster-General, immediately after the passage of the act, and at least once in every month thereafter, to prepare and publish instructions and regulations of the several military departments and depots approximate stations and of the officers and agents of the Quartermaster's department, and the additional amounts required for the service for the ensuing month, stating in what quarters and depots the several supplies and arrangements are legally contracted for, but not yet delivered. And it shall be the duty of the Secretary of War to cause to be published in like manner the cause to be made for purchase or contracts for the supplies which the Quartermaster-General may deem it for the public interest to purchase with him, and all quartermasters shall for such reports to the Quartermaster-General, as the Secretary of War may direct, and all contracts and proposals received or supplies of any kind to be opened at the office of the Quartermaster-General, in the presence of one or more bidders who may choose to be present, and every such contract or proposal, such supplies or returns shall be preserved in the office of the Quartermaster-General, and the Secretary of War may publish shall have made a satisfactory explanation to the Secretary of War of such non-compliance.

Sec. 5. And be it further enacted, That all inspectors of horses, mules, clothing, forage, harness, and other supplies shall be appointed by order of the Quartermaster's Department, shall be sworn for efficiently to perform their duties, and shall receive such compensation as may be fixed by the Secretary of War, and shall be subject to removal by him at any time for incapacity, or neglect of duty, or dishonesty, or other sufficient cause, to be certified by the Quartermaster-General; and it shall be the duty of every inspector of such supplies or transportation, or to any other purpose, for his own benefit or indirectly, or for any other person, under any consideration, such person giving or offering to give, such money or other valuable consideration, shall forfeit to the United States the full amount of his contract or contracts with the United States, and the name and offense of such person shall be published in general orders, and also in one newspaper of general circulation nearest to his place of residence.

Sec. 6. And be it further enacted, That the provisions of the sixteenth section of the act approved July 17, 1862, entitled "An act for the payment of certain officers of the Army, and for other purposes," approved July 17th, 1862, shall not apply to all quartermasters, commissaries, or other officers referred to, whether as agents of such contractors, or as claiming to be assignees thereof, or otherwise, and to all inspectors employed by the United States for the inspection of subsistence, clothing, arms, ammunition, munitions of war, or other description of supplies for the Army or Navy of the United States, and to all persons who shall hereafter so be and are charges for a violation of the provisions of this section, or of an act to which it is an addition shall be admitted to bail for his appearance, to answer the charges made against him before any court-martial constituted to try him, or such fine and with such sureties as shall be so granted and approved by the judge of the district court of the district in which such person may be found, or the circuit court of the same district, or any commissioner appointed by such court.

Sec. 7. And be it further enacted, That all vessels employed in the Quartermaster's service or transportation, steam pipe, or other to give, or cause to be given, to the Quartermaster-General or Quartermaster's Department, or to any officer thereof the receipt or disposition of the supplies or transportation turnished by such vessels, or to any person or persons, or to any officer thereof, for his own consideration, directly or indirectly, all contracts and charters with such vessels, or for the transportation of the army or Navy, or any part thereof, or for the use or employ of the Quartermaster's Department shall knowingly enter into any contract or charter with any person or persons who shall be found guilty of misfeasance, and shall be punished by fine or imprisonment, or both, as a court may direct, and shall be dismissed from office.

Sec. 8. And be it further enacted, That whenever it shall become necessary for the Quartermaster-General, or any officer of the Quartermaster's Department, the same shall be first inspected by one or more competent persons, to be appointed by the Quartermaster-General, the decision of the act authorizing the detail of naval officers for the survey of the Navy Department, and that the report of the board of inspection vessels shall be inspected by an officer skilled in the construction of such vessels: *Provided*, That the provisions of this section shall not apply to vessels purchased in the ordinary course of trade in the Western rivers; but such river steamboats or other vessels shall be so inspected by competent persons before the purchase of the same.

Sec. 9. And be it further enacted, That the officers placed in charge of the several divisions of the Quartermaster's Department shall, during the time that they remain in such charge, each have the rank, pay, and emoluments of a colonel of cavalry in the regular service: *Provided*, That the Quartermaster-General may, with the approval of the Secretary of War, assign to the charge of the several divisions herein provided, public service, change the distribution of duties among them; and all officers detailed for duty in the bureau shall be entitled to receive the pay of their respective rank.

Sec. 10. And be it further enacted, That during the continuance of the present rebellion, the Quartermaster-General may assign to duty, as inspectors of the Quartermaster's Department, such officers of the regular army as he may deem necessary, not more than one for each State, who have served not less than one year, who shall have, while so employed, the rank, pay, and emoluments of a major of cavalry in the regular army of the Quartermaster's Department; and also, when in his judgment it is necessary to appoint by brevet, from the line of the army, officers to act as assistant quartermasters, and to such military departments and to such principal depots, not exceeding in the whole one for each State, as the Secretary of War may, by instructions, as officer to act as chief or senior quartermaster of any army, military department, or military district, or of any other separate and temporary rank, pay, and emoluments of a colonel of the Quartermaster's department, and also, when in his judgment it is necessary to appoint by brevet, from the line of the army, officers to act as assistant quartermasters, as division quartermaster, who, while so acting, shall have the rank, pay, and emoluments of a lieutenant-colonel of a corps of the Quartermaster's Department: *Provided*, That when any officer shall be detailed from civil duty, his temporary rank, pay, and emoluments shall cease, and he shall return to his usual rank in the department: *And provided further*, That during the time of any military department, there shall be not more than one army corps, it is lawful for the Secretary of War to assign to the charge of the duties of the department quartermaster.

Sec. 11. And be it further enacted, That at least two-thirds of all the officers of each grade or assigned rank provided for under the provisions of this act shall be selected from officers of volunteers now in the service.

Sec. 12. And be it further enacted, That all acts and parts of acts inconsistent with the provisions of this act be and the same are hereby repealed.

Approved July 4, 1864.

DISMISSALS

For the week ending July 30, 1864.

The order heretofore issued discharging Major Norman M. Finley, 3d U. S. Infantry, from the service of the United States, he has been dismissed, to date July 23, 1864, for inefficiency, neglect of duty in not reporting with his command, and absence from his command without leave.

NAVY GAZETTE.

NAVAL COURT-MARTIAL.

NAVY DEPARTMENT, July 16, 1864.

General Order No. 59.

At a Naval General Court-Martial, convened at the Navy Yard, Philadelphia, Penn., by order of Rear-Admiral S. P. Lee, U. S. Navy, of the Navy, was recently tried upon the following charge, preferred against him by the Commodore:

CHARGE—"Desertion."

Specification 1st. In this; that on or about the twenty-fourth day of February, in the year eighteen hundred and sixty-four, the said acting Third Assistant Engineer William Bell, did desert from the Navy Yard at Boston, Massachusetts."

Specification 2nd. In this; that on or about the twelfth day of May, in the year eighteen hundred and sixty-four, the said Acting Third Assistant Engineer William Bell, was apprehended at the United States steamer *Admiral*, at New York."

To Court found the said charge and specifications proved, and that the accused was guilty of the charge; and sentenced him "To be retired to the list of Third Assistant Engineers, to rank last on said list of two years, and to forfeit all pay now due him.

The proceedings, findings and sentence in the case are approved, and Acting Third Assistant Engineer Bell will join the ship to which he belongs, or report to the Navy Agent at Boston, Mass.

GIDEON WELLES, Secretary of the Navy.

AN ACT to authorize the Secretary of the Navy to provide for the education of naval constructors and steam engineers, and for other purposes.

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That the Secretary of the Navy be and he is hereby authorized to provide, by regulation to be agreed by him, for the education at the Naval Academy and at the Naval Academy as shall be a peculiar aptitude therefor as naval constructors, or civil and steam engineers, and who shall be appointed for the purpose, to be assistant naval engineers, or otherwise aided in such manner as may appear to him necessary and proper to promote the public service and fit them for such professions.

SEC. 2. *And be it further enacted*, That, upon the recommendation of the academic board, such persons connected with the academic and mechanical staff as may be employed at the Naval Academy, may be appointed as assistant naval constructors, or warrantos as engineers.

SEC. 3. *And be it further enacted*, That candidates for such appointment shall be subject to the examination of the Navy: *Provided*, That no person shall be eligible for appointment who shall not possess satisfactory evidence of mechanical skill and proficiency, and who shall not have served at least two years in the actual fabrication of steam machinery.

SEC. 4. *And be it further enacted*, That naval cadet engineers, when appointed, shall be under eighteen years of age, and shall have passed a mental and physical examination. They shall receive instruction at the Academy, where they shall be continued from time to time, according to the regulations established by the Secretary of the Navy, until they attend the test at any examination, or dismissed for misconduct, they shall not be entitled to receive any pay or to the service of a servant, except when at sea.

SEC. 5. *And be it further enacted*, That the academic course of cadet engineers shall be four years, and they shall receive pay the same as cadet midshipmen.

SEC. 6. *And be it further enacted*, That the number of chief engineers shall not exceed one for each first and second-rate vessel in the Navy, with such fleet, vessel, or squadron as the Secretary of the Navy may assign, as the wants of the service mainly require. And that, from and after the passage of this act, no person shall be appointed chief engineer of the Navy on the active list until he has followed forty chief engineer on duty, for the first five years after the date of his examination, two thousand dollars. After the first five years after the date of his examination, two thousand five hundred dollars. Every chief engineer on leave or waiting orders, for the first five years after the date of his examination, two thousand dollars. For the second five years after the date of his examination, one thousand dollars. And for the second five years after the date of his examination, one thousand seven hundred dollars. After three years waiting orders, eight hundred dollars.

SEC. 7. *And be it further enacted*, That the provisions of the act entitled "authorizing the Secretary of the Navy to accept the equitable claims of constructors and engineers who have superintended work in the Navy Department," approved March 3d, 1863, be and the same is hereby repealed by adding to the same the following proviso, viz.: *Provided*, That where artificers are advertised and bid for in claims, and in the judgment of the head of the Department any one or more articles appear to be bid for at excessive or unreasonable prices, exceeding the previous shown there for current value, he shall be authorized to reject such bid.

Approved July 4, 1864.

AN ACT making an appropriation for issuing substitutes to vessels.

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That the sum of twenty-

five thousand dollars is hereby appropriated for the purpose of issuing substitutes to vessels in the naval service, to be available for the duration of the necessity of the Navy to which the appropriation is applicable, and to be expended as nearly as practicable in proportion by a committee of consisting of two officers of scientific rank, now or hereafter to be appointed for their examination.

Approved July 4, 1864.

Acting Master's Mate H. A. Vaughan, of the Mississippi Squadron.

Acting Volunteer Lieutenant Charles H. Sells, of the Mississippi Squadron.

ORDER REVOKED.

Acting Assistant Paymaster J. W. Fairfield, to Bridgeport, Conn.

Acting Assistant Surgeon Wm. Valentine Balmer, to the Mississippi Squadron and ordered to the *Tumberton*.

Acting Master A. A. Owen, ordered to the Potomac squadron and to the *Mongat*.

DISMISSED.

Acting Ensign James Wilcox.

Acting Master A. Alexander.

Acting Second Assistant Engineer Joseph Nolen.

Acting Second Assistant Engineer Edward Hafner, of the *Oleta*, Mississippi Squadron.

CORRECTION.

The announcement of the reduction of Acting Third Assistant Engineer William H. Seymour, of the Marine Corps Examining Board, serve for the term of two years, and to forfeit all the pay now due, was last week, by error, placed in the head of Orders Revoked, instead of under the separate title it required.

VARIOUS NAVAL MATTERS.

THE U. S. gunboat *Miami* was found on the 20th ult., 26 miles south of Cape Henry, in a disabled condition, and towed to Fortress Monroe by the transport steamer *Commodore*, from New Orleans.

THE Washington Chronicle says that the Navy Department is constantly being added to—a draft of new recruits being received weekly, and mostly from Philadelphia. Nearly all of them are credited to the quota of New York or Pennsylvania.

COMMODORE STRIBLING, commandant at the Philadelphia Yard, has notified the shipwrights employed there, that, inasmuch as wages have been raised to $3 per day in the Washington and Norfolk yards, the same rate will be allowed in the Yard, to take effect the first of August.

QUITE a number of gunboats are at the Washington Yard, some undergoing repairs and others awaiting orders. The revenue cutters *Tiger, W. H. Seward*, and *Wyanda* are lying off the Yard. The gunboats *Tuscarora* and *Sebago* have been taken up from the Lower Potomac. The steamers *Dean* and *Bibb* are nearly completed and will soon be ready for sea.

THE American fleet in Europe has been somewhat altered from its original composition. It now consists of the *Niagara*, 71; *Kearsarge*, 9; *Sacramento*, 11, all steamers. Of the *St. Louis*, 16, and *Constellation*, 24, sailing corvettes, the former is dismantled, the latter *Susquehanna*, 15, are or will soon be on their way thither. The *Dictator*, 4 is reclaimed, will follow after a trial trip to Bermuda. The fleet now in the Channel and the Mediterranean amounts to 21 guns; when reinforced it will carry 97.

THE fleet off Mobile consists of the following vessels:—Hartford (flag-ship), 28 guns; Richmond, 18; Brooklyn, 24; Monongahela, 12; Lackawanna, 14; Ossipee, 11; Metacomet, 6; Kennebec, 6; Port Royal, 6; Kennebec, 6; Pinola, 4; Itasca, 4; Pembina, 6; Penguin, 2; Tennessee, 6; Commodore, 4; Gadsden, 10; Galena, 14; Cowslip, Philippi, Gleason, Jasmine, Buckthorn, tugs. The Manhattan was to arrive about the middle of August, she being at Pensacola coaling.

The following additional prize cases have been adjudicated by the Fourth Auditor, and are now ready for payment:—Prize schooner *Paul*, captured by the U. S. steamer *Sagamore*; prize schooner *Napier*, captured by the U. S. steamer *Sagamore*; prize schooner *Jacob and Sara and Morgan*: prize schooner *Langrer*, captured by the U. S. steamers *Port Jackson* and *Sagamore*; prize schooner *Former Night* (again, captured by the U. S. steamers *Octorara* and *Fuga*: prize 55 bales of cotton, captured by the U. S. steamer *Conshaw*.

ADMIRAL Dahlgren reports the capture of the prize sloop *Hope*, of Nassau, while attempting to enter Charleston harbor, on the 19th ult., by the United States steamer *Lodona*, under command of Acting Volunteer Lieutenant Charles Wells. The prize was sent to Philadelphia to be adjudicated. The cargo will be sent to Philadelphia for adjudication.

THE machinery of iron-clad *Monadnock*, at the Boston Yard, is rapidly approaching completion, under the direction of Chief Engineer Zeigler and First Assistant Handall, and she will soon be ready for her trial trip. She now stands in the dock and is twelve feet of water, and when ready for sea will probably sit one foot lower. She will probably be one of the most comfortable vessels of her class yet constructed, there being a special fitting for ventilation, and powerful blowers for sending a draught through all her compartments. The captured side-wheel steamer *Fridcan Shandy* is in dock, undergoing thorough repairs. Side-wheel steamer *Rhode Island*, 24 guns, at the head of the wharf, completing her repairs and outfit. Screw-steamer *Owasasco*, 6, has not yet sailed, but had nearly finished taking in her stores on the 26. Frigate *Sabine* still lay in the stream on the 26, and was expected to sail for Portland in a day or two.

NEWS from Hilton Head of July 29th, says:—Admiral Dahlgren left for Charleston harbor in the *Philadelphia*, Monday afternoon. The *New Hampshire* lies in the stream, between the *Vermont* and the Wabash. The former will probably go to the North within a week, and after being repaired will be sent, it is expected, to Norfolk, as a receiving ship. Commodore Taeckher is to take command of the new and handsome officers' mess for the officers of the fleet. Captain Reynolds and his officers will in a day or two be transferred to the latter. The coast survey steamer *Bibb* is shortly expected here. The Fraser, Trenholm house at Belle Point, is now in the harbor.

A LETTER, dated June 6, has been recently received from the surgeon of the *Water Witch*, per flag of truce, stating that he was ashore at Rio Pongo, with fifteen officers, and had been hospitled at the vanvah, and the wounded ones are under his professional care. He says—The number of our wounded in the engagement was thirteen, of whom seven have since died, among whom was one killed. The party that captured us lost six killed and ten wounded. Our wounded are all doing well and likely to recover. Paymaster Bulline gained the admiration of friend and foe by his gallant conduct. He received a sabre stroke over the head, which stunned him for the time and left a wound, but not dangerous.

AT half-past one a. m. on the morning of the 1st instant, the officers of the U. S. steamer *Montauk* assembled in a body and serenaded their Captain, Lieutenant-Commander R. Barrett, with a full chorus brass band, in his residence in Boston. Lieutenant-Commander Barrett made his appearance, and was received with great applause. He made a few remarks, regretting that the time for their separation was so near, but that the fortunes of war had thus willed it. He called upon them always to maintain the common cause of the country, and never allow its honor to be tarnished, as it never had or would. He then invited them in, and having partaken of refreshments, the band played several more national and other popular airs.

THE following changes have taken place at the Brooklyn Navy Yard during the past week:—The U. S. steamer *Chippewa*, Commander Hussel, sailed on the 25th ult. The U. S. supply steamer *Release*, Acting Volunteer Lieutenant Ledyard, sailed on the 26th, with a large draft of men for the James River. The steamers *Maria Reed* and *Mary Crowley*, formerly tugs, have been purchased by the Government and in the transport service. The steamer *Tuscarora* is now being made to lay the keel of another new steamer near the Dry Dock. The U. S steamer *Kensington* went into commission on the 1st inst., Commander Frederick Rodgers in command of the Yard awaiting orders. The *Pontoosuc* received her crew on the 1st, and is now ready for active service. The U. S. steamer Queen will sail in a few days.

A RUNAWAY of men recently attempted to desert from the receiving ship Ohio, at the Boston Yard. Only one or two succeeded in getting away, and it is thought that one of the party which jumped overboard was shot by the guard. About 650 men left the Ohio last Saturday to go on board the *Connecticut*. They are to be distributed through the fleet, as fast as vacancies occur in vessels and others.

THERE are still some 1,500 men on board the *Ohio*, including some of the relief detachment and prisoners who took the oath of allegiance and entered our Navy. These "Worm's recruits," as they are termed, are distributed through our ships, one sixth of each ship's crew being composed of them. The Rhode Island is in the squadron and will probably sail early this week. The *Connecticut* sailed Saturday afternoon.

THE NAVAL ACADEMY.

THE following is a list of the candidates who entered the Naval Academy as midshipmen at the examination, July 20 to 31, 1864:—

NAME.	STATE	AGE.
Geo. R. Adams	New York	16.0m.
Robert Ames, Jr	Massachusetts	16.3
Lewis Ashman, son of an officer		17.1
Chas. S. Belknap, entered 3d class	New York	17.11
W. J. Barret	New York	17.6
W. H. Brownell	Rhode Island	17.2
R. M. G. Brown	Virginia	16.7
W. H. Bullard	Massachusetts	16.11
Arthur Burrals	Illinois	16.2
Andrew W. Bunce	Iowa	16.3
Charles A. Charlier	Iowa	16.11
Wm. Chandler	Iowa	16.6
Wm. Cowden	Pennsylvania	16.7
A. H. Colbath	Pennsylvania	16.7
Alexander Canning	Indiana	17.10
Webster Daly	Wisconsin	16.9
W. B. Dennison	Kansas	17.4
John P. Gay	Pennsylvania	16.11
Wm. Gamble	New York	16.11
James D. Goin	New York	16.11
Wm. H. Glassford	New York	16.4
E. H. Rigid, entered boy		16.9
Wm. Hall	New York	16.10
Royal R. Ingersoll	Michigan	16.7
W. T. Jones	New York	16.7
Duncan Kennedy	New York	16.7
C. A. Longwell	Pennsylvania	16.6
Aaron H. Lugg	New York	17.6
C. Longfellow	Pennsylvania	16.6
S. H. May	New Hampshire	17.2
Wm. Mortimer	Pennsylvania	16.8
R. Mitchell	Massachusetts	16.6
Wm. H. Mitchell, 1st lieut	New York	16.8
Edward S. Maltbie	New York	16.8
Wm. Mitchell	Pennsylvania	16.7
Nathan E. Miles		16.0
J. H. Oliver, son of an officer	Pennsylvania	16.5
Arthur H. Parsons	Ohio	16.10
Wm. Pittman	Virginia	16.9
C. W. Rauchenberger, son of an officer		16.10
Wm. Rogers	Pennsylvania	16.7
R. P. Rodgers, son of an officer		17.1
H. S. Ryerson	New Mexico	17.9
James R. Selridge	California	16.8
Chester A. Seymour	Illinois	16.7
Luther S Shook	Indiana	17.7
Charles A. Stewart	Pennsylvania	16.7
Jesse S. Smith	Vermont	17.11
N. Taylor	New York	16.7
W. C. Talbot	Kentucky	17.2
R. M. Thompson	Pennsylvania	16.8
W. E. Uhler	Pennsylvania	17.8
W. H. Wilson	Ohio	16.11
J. F. Wallis	Maryland	16.3

The next examination for admission, as appointed by the Navy Department, commences on the 20th of September next.

CASUALTIES AMONGST OFFICERS.

THE following list of casualties amongst officers is made up before it is possible to obtain official reports. We are therefore unable to guarantee its completeness or accuracy.

KILLED.

Ackerson, Lieutenant 91 N Y
Bunt, Lieutenant 2 Md.
Bowen, Lieutenant 10 N Y
Cobbett, Lieutenant-Colonel 91 Pa
Cresswell, Captain 1 Md
Dwight, Lieutenant-Colonel 39 Mass
Dutro, Lieutenant 49 Pa
Dyer, Captain 9 Vt
Ellis, Captain 39 Mass
Ellis, Lieutenant 24 N H
Ellis, Captain 57 Mass
Howe, Captain 32 Mass
Hodges, Captain 1 Md
Hodges, Lieut.-Colonel 39 Mass
Hall, Captain 2 Md Cav
Hall, Lieutenant 2 Md
Lindsey, Lieut. 2 Capitols 149 N Y
Lee, Lieutenant 2 Md Cav
Mix, Military, Lieutenant 11 C
Mitchell, Lieutenant 2 Md

WOUNDED.

Ashborough, Captain 45 Pa, flesh
Ayres, Major 91 Ark, M. Sh.
Adams, Lieut. 2 Md Cav, M. Sh.
Adams, Lieut.-Colonel 39 Mass, flesh
Adams, 2 Lt. 2 Md Cav S. S C, leg
Adams, Lieut. 2 Md Cav, flesh
Bassett, Lieutenant 91 N Y
Bowen, Lieut.-Colonel 10 N Y, flesh
Bowen, Lieut.-Colonel 39 Mass, flesh
Brown, Chas D, Capt. 39 Mass, amp
Bell, Capt. 2 Md Cav, M. Sh. thigh
Baldwin, L. Major 150 N Y
Bowen, Lieut.-Colonel 39 Mass, amp leg
Brookway, 1 Lt. 4 Md Cav, flesh
Brookway, 1 Lt. 4 Md Cav, flesh
Barron, J. Major 12 N Y, leg
Bennett, Lieutenant 2 Md Cav
Bennett, Lieutenant 2 Md Cav
Carter, Lieut. D C, eye and face
Carter, Lieut. D C, eye and face
Delaney, John, Captain 39 N Y
Dwight, Lieut.-Colonel 39 Mass
Dwight, Lieut.-Colonel 39 Mass
Dawson, Adjutant 2 Md
Dawson, Lieut. 2 Md Cav, M. Sh. leg
Davis, G. E. Adjutant 21 Mass, arm
Davis, Lieut. 2 Md Cav, flesh
Dodge, Lieut. 2 Md Cav, M. Sh. leg

Hathaway, W, Lieut 150 Pa, foot
Hall, Lieut. 2 Md Cav, flesh
Hall, Lieut. 2 Md Cav, flesh
Hall, Lieut. 2 Md Cav, flesh

(Guidhall Notice.)

A Card.—Owing to the enormous advance in the prices not only of the precious metals, but of every other commodity, I find it impossible to continue longer the sale of my Pens at old rates. This fact is yet exceedingly, as I had hoped to continue without change; but, having to buy gold as the present fabulous price, this is no longer possible.

My friends and the public will give me credit, however, for having struggled long and hard against the universal pressure to depreciate the Government credit and currency. The advance now made is not enough to cover me, with profit, at present rates, should it remain where it is, or go still higher, a further rise in prices must be made. In any case, however, I intend, henceforth, to sell at a better article for less money than it can be bought for elsewhere.

A circular, with engravings of all the sizes, styles, and present prices will be sent on receipt of letter-postage. Address

A. Morton,
No. 25 Maiden Lane, New York.

July 11, 1864.

Business Notice.

We notice that U. S. Hubbard, of New Haven, Conn., is Agent for the Wheeler & Wilson "Special," at $2 00 per year in advance—cheap enough. Try it a year.

MARRIED.

[Announcements of marriage should be paid for at the rate of fifty cents each.]

Herlihy-McKeever.—On board the gunboat Zeta, off Mobile, by the Rev. Father Quinlan, July 20th, Lieut. U. S. U. S., James H. Herlihy, Acting Ensign U. S. N., to Miss Rosa McKeever, of Perryton, Texas.

Ryan—Lamar.—In Waldo county, on July 3d, by Rev. Mr. Cummings, Capt. Thomas Ryan, U. S. A., to Miss Ida Lamar, of the same county.

Sharp—Hubbard.—In Boston, July 28th, Rev. Edward E. Hale officiating, Lieut. Col. Henry Sharp, of the 1st Connecticut Cavalry, to Miss Ellen M. Hubbard, daughter of the late Rev. E. D. Gue Hubbard.

DIED.

Ferguy.—On Friday morning, July 29th, at the "Soldier's Rest," in Washington, D. C., Mrs. Ferguy, wife of Sergeant Ferguy, of the 1st Regiment Veteran Reserve Corps, and daughter of the late Rev. George Bowman, of Carlisle, Pa.

Ramsay.—At Washington, D.C., on July 27th, of gastric fever, Amanda, wife of Brevet Brigadier General Francis C. Barlow, U. S. Volunteers.

Du Casse.—At Mobile, on Tuesday, July 26th, of wounds received in battle, Lieutenant John B. Du Casse, 14th U. S. Infantry, aged 21 years.

Bent.—At Hartford, N. Y., on Friday, July 29th, Elisha Bent, aged 84 years. He was the last surviving member of the old Continental Army.

Reynolds.—In New York, on Saturday, July 30th, from the effects of a wound received in battle, Major Thomas W. Reynolds, Assistant Adjutant-General, U. S. Army.

ADVERTISEMENTS.

Advertisements of a character suitable to the columns of the Journal will be received at the following rates, which in every case is less than the regular rates charged in other publications. Advertisements are requested to have their terms as short as possible.

$1,000 RECRUITING WANTED—FOR THE ARMY.

HIGHLY IMPORTANT TO SOLDIERS AND SAILORS.

INSURE YOUR LIMBS OR YOUR LIFE.

THE NATIONAL UNION LIFE AND LIMB INSURANCE COMPANY of New York, chartered by the Legislature and Governor of New York, having placed a security in the hands of the General Insurance Agent of the State, to the amount of U. S. Bonds, as security for all who deal with it, is now issuing policies as follows:

243 BROADWAY, N. Y.

Officers, Soldiers and Sailors can now, for a small sum, ensure their limbs, so that if either of them is lost, they can immediately secure a large sum of money for their use. Or, in case of death, to their connect, can make the insurance.

We believe that nothing has yet been devised of greater value to the soldier. Instead of spending your money in useless amusement or dissipation, make provision for the future, and avoid much trouble. Information and circulars sent to all parts of the country free of charge.

ORISON SLUNT, President.

Major WM. E. FRANCE, Vice-Pres't.

Colonel THOS. E. VAN BUREN, Treas.

JOHN L. CILLEY, Secretary.

EVERY DAYS' NEWS FROM THE seat of war lends additional interest to Ogilvie Gardner's Great Topographical Map of the MILITARY SITUATION

in Virginia, where every road and stream (made historical by battle) is accurately delineated. It can be obtained at 77 Cedar street, room 22 and 23.

(3D Agents wanted.) Price $1.

BALTIMORE AND OHIO RAILROAD

RE-OPENED!

This great National thoroughfare is again open for FREIGHT AND TRAVEL. The tracks and bridges recently destroyed are being replaced by new running stock, and all recent damages repaired so that the entire line of tracks are again in substantial condition, the well-earned reputation of the ROAD FOR THE PEOPLE, SECURITY AND COMFORT, will be more than sustained under the management of the business men, who have the unequaled attractions of natural scenery heretofore bestowed on this route, and the immediate open line to Border have associated numerous points on the Road, between the Ohio and the Atlantic, very valuable for pastoral but restrictive interests.

CONNECTIONS

At the Ohio River with Parkersburg and Pittsburgh; Central Ohio, and through to Cincinnati and Louisville; and through to Wheeling and Pittsburgh, and the Northwest, Centre, West and Southwest. At Washington Junction, for Washington City, and for Washington City and the Lower Potomac. At Baltimore with four daily trains for Philadelphia and New York.

TWO DOLLARS additional on Through Tickets to Baltimore or any Northern Office, gives the privilege of visiting WASHINGTON CITY en route.

This is the ONLY ROUTE by which passengers can procure through tickets and through checks to WASHINGTON CITY.

J. H. SULLIVAN,
General Western Agent, Baltimore, O.
GEORGE WEIGHT,
General Ticket Agent, Baltimore.
JOHN W. GARRETT,
Master of Transportation, Baltimore.

PROPOSALS FOR MATERIALS FOR THE NAVY.

NAVY DEPARTMENT,
BUREAU OF STEAM ENGINEERING, July 19, 1864.

Sealed proposals to furnish materials for the Navy for the fiscal year ending June 30, 1865, will be received at the Bureau of Steam Engineering, until 10 o'clock of the 15th day of August next, at which time the opening will be commenced.

The articles must be embraced in "Proposals for Materials for the Navy," that they may be distinguished from other business letters, and addressed to the Chief of the Bureau of Steam Engineering.

The number and artificers employed in the classes named and particularly described in the printed schedules, are given in the Navy Register, and to avoid a desire to offer, on application to the commandants of the respective navy yards, or to the Navy Department thereto, and those of all the yards upon application to the Bureau.

This division into classes being for the convenience of contractors, each class will be taken by itself unless as is actually required for this. The commandant of the navy yard will make selection with the view to the satisfactory delivery of their own yards, have a copy of the schedules of the class for which he makes selection only, but may be judged advisable he will be desirable to make application for any of the articles named in the list. In other things being equal, preference will be given to articles of American production.

Offers must be made for the whole of the class at any navy yard upon one of the printed schedules, or in strict conformity therewith, or they will not be considered.

Upon application to the Bureau, to the Commandant of any navy yard, or to any Navy agent, the specification, of awnings, and other necessary information respecting the articles will be furnished.

The contract will be awarded to the lowest bidder for the whole class, unless otherwise required by the act of 16th August, 1846, the Navy Department reserving the right to reject any bid which is not deemed reasonable.

The contracts will bear date the day the notification of them and deliveries can be demanded from that date.

Bonds with sureties in amount will be required to sign the contract, and the sureties must be residents of the United States, and must be approved by the district attorney, collector, or Navy Agent. An additional bond in double the amount of the bills until the contract shall have been fully executed; and signing of the contract will be approved in triplicate by the commandants of the respective navy yards, or by the Navy agent, and the pullets of delivery, in funds or certificates, at the option of the contractor, within thirty days after the warrant for the same shall have been passed by the Auditor for the Navy Department.

The following are the classes required at the respective navy yards:

KITTERY, MAINE.

Class No. 1, boiler iron; No. 2, bar iron; No. 3, boiler felting; No. 4, gun packing, &c.; No. 5, spermi oil; No. 6, lubricating oil; No. 7, engineers' stores; No. 8, lead for ballast and coal; No. 9, engineers' stores; No. 11, engineers' stores; No. 12, engineers' stores; No. 13, engineers' stores; No. 14, engineers' stores; No. 15, engineers' stores; No. 16, boiler and nuts; No. 18, copper; No. 19, tin, &c.; No. 20, anchor and No. 21, iron pipe; No. 22, engineers' stores; No. 23, machinery; No. 24, screws; No. 26, comm waste, pack ing, &c.; No. 28, engineers' stores.

CHARLESTOWN, MASS.

ELLIOT ARMS CO.,
464 Broadway, New York.

METALLIC COLLARS.

METALLIC COLLARS.

METALLIC COLLARS.

The only Collars made in metal furnishing a substitute for linen are manufactured by the American Emanuel Co., 376 Pearl, New York.

In whiteness, tightness, durability, pliability and fashion they are unsurpassed by linen collars.

Instantly cleaned with a cloth and water, they become immediately fit for wear again, and are thus economical, and are continually meeting the approval of military and naval gentlemen. Orders from the trade solicited.

A sample Collar sent by mail, prepaid, upon receiving, with measure of neck, one dollar for a "Turn Down," or seventy-five cents for a "Choker," to

C. H. WELLING,
54 Pine street, New York.

FOR NEWBURGH, CORNWALL, WEST POINT, POUGHKEEPSIE and HONDOUT—The new and fast steamboat FLOWERS leaves Jay st. Pier Every Afternoon at 4 o'clock.

PROPOSALS FOR LOAN.

TREASURY DEPARTMENT, July 25, 1864.

Notice is hereby given that subscriptions will be received by the Treasurer of the United States, the several Assistant Treasurers and designated Depositaries, and by the National Banks designated and qualified as Depositaries and Financial Agents, for the Seven-Thirty notes payable three years from August 15, 1864, bearing interest at the rate of seven and three-tenths per cent. per annum, with semi-annual coupons attached, payable in lawful money.

These notes will be convertible at the option of the holder at maturity, into six per cent. gold bearing bonds, redeemable after five and payable twenty years from August 15, 1867.

These Notes will be issued in denominations of fifty dollars, one hundred, five hundred, one thousand, five thousand dollars, and will be issued in blank, or payable to order, as may be directed by the subscribers.

All subscriptions must be for fifty dollars, or some multiple of fifty dollars.

Duplicate certificates will be issued for all deposits. The party depositing must endorse upon the original certificate the denomination of notes required, and whether they are to be issued in blank or payable to order. When so endorsed it must be left with the officer receiving the deposit, to be forwarded to this Department.

The notes will be transmitted to the owners free of transportation charges as soon after the receipt of the original Certificates of Deposit as they can be prepared.

Interest will be allowed to August 15 on all deposits made prior to that date, and will be paid by the Department upon receipt of the original certificates.

At the notes draw interest from August 15, persons making deposits subsequent to that date must pay the interest accrued from date of note to date of deposit.

Parties depositing twenty-five thousand dollars and upwards for three notes at any one time will be allowed a commission of one-quarter of one per cent., which will be paid by this Department upon the receipt of a bill for the same, rendered by the officer with whom the deposit was made. No deductions for commissions must be made from the deposits.

Officers receiving deposits will see that the proper endorsements are made upon the original certificates.

Further information will be given on application, or desired to give to applicants all desired information, and afford every facility for making subscriptions.

W. P. FESSENDEN,
Secretary of the Treasury.

SUBSCRIPTIONS WILL BE RECEIVED BY THE

ASSISTANT TREASURER OF THE UNITED STATES, Cor. of Wall and Nassau streets, New York.

WAR LETTERS
OF
A DISBANDED VOLUNTEER,
BEING
A COMIC HISTORY
OF
THE PRESENT ADMINISTRATION,
IN WHICH
THE FUNNY DOINGS
AND
QUEER DOINGS
OF
ABRAHAM LINCOLN
Are treated of in the MOST CONVULSIVE HUMOR-
OUS VEIN.
Price, cloth gilt, $1 50; half cloth, $1 25.

Wherever the English language is spoken, the Letters of A DISBANDED VOLUNTEER from various points of the world will be read with interest. WAR LETTERS are the very essence of the inimitable correspondence which the South of Thomas Nast has been for some time successfully using the cartoons upon words as the means of conveying to the public mind the ludicrous features of the management of the Latter. Under this comic surface runs a deep vein of the most serious satire, frequently setting but, perhaps, never been put to print. All the leading features of the Civil and Military Administration and military men of the day figure in the correspondence. As a book, it is both a comic civil and military history of the Administration, and no one that has a spark of humor in his composition can read it without enjoying it.

Mailed, free of postage, on receipt of price.
FREDERIC A. BRADY, Publisher,
39 to 52 Ann street, New York.

THE CAMPAIGN IN VIRGINIA.

THE "Second Invasion" of EARLY being ended, or, at all events, intermitted, we may resume the thread of our narration of its events from the point where the confusion in news made its suspension advisable. We have already recorded AVERILL's successful skirmish at Winchester on July 20th, which the Richmond *Examiner* describes as "the deplorable "affair in which RAMSEUR's division was humiliated "in the dust," and "three Confederate brigades had "to run away without even a formation in line of "battle." The enemy admits a loss of "300 or 400 "men and 4 guns." AVERILL was then joined by CROOK, who with his infantry had now returned from the unfortunate affair at Island Ford. On Saturday, the 23d, there was considerable skirmishing at Kernstown, four miles beyond Winchester, and our cavalry was driven back on the main body. On Sunday, the 24th, the enemy pressed his advantage, and, sending in his cavalry again, drove ours back in great rout through Winchester towards Bunker Hill. Our cavalry is said to have broken and fled in disgraceful style, completely uncovering the flanks of the infantry and forcing it back. General CROOK had at first drawn up in line of battle, and prepared for a hard contest; but the breaking of his cavalry at once forced him to retreat. CROOK's force was reported at about 10,000 men, consisting of AVERILL's and DUFFIE's cavalry and two divisions of infantry. The enemy was in greater strength, and, according to General CROOK, easily overlapped our line right and left, repeatedly outflanking it by brisk charges, and forcing a retreat from point to point. After the first struggle at noon, therefore, there was a running fight along the turnpike down to Bunker Hill, lasting till night. Five miles north of Winchester EARLY halted his main force, but kept his cavalry in hot pursuit, and with them drove us through Bunker Hill to Martinsburgh. Our loss in prisoners was quite heavy, and the loss from all sources was about twelve hundred, including among the killed Colonel MULLIGAN, of Lexington fame, whose brigade covered the retreat. It was stated, as a rumor, that we also lost four guns. If we may judge from General HUNTER's orders, our Shenandoah Army is again found wanting in the soldierly conduct which distinguishes their comrades of the Army of the Potomac. In one of these general orders, thirteen officers of various regiments are dismissed for deserting their command during the battle on the retreat, and going to the rear with false reports of our losses.

On Monday the enemy's cavalry continued the pursuit, and our Army, having reached Martinsburgh, paused a moment. A sharp artillery engagement ensued, and CROOK, having gained time to get off most of his trains by road and railroad, again fell back, and, on Tuesday, crossed the Potomac into Maryland, the enemy not molesting him. In the two affairs at Winchester and Martinsburgh the enemy suffered hardly less than we in killed and wounded, but lost no prisoners. A great deal of property was removed from Martinsburgh, goods in that vicinity having been kept off in as portable condition. Some stores, however, were seized by the enemy.

The enemy now held the west bank of the Potomac from Williamsport to Shepardstown. In Maryland and Southern Pennsylvania, the scenes of the former raid were renewed—the panic, the great stories, the fugitive people, the property of every species blocking the roads north and east, and all that strange spectacle already described in connection with the prev'ous raid. Meanwhile there were many stories of the crossing of the enemy in force on Tuesday, the 26th, again on Wednesday, and again on Thursday. But on neither of these days was there any fighting, and apparently no advance by the enemy, except that on Thursday afternoon a force was reported to have crossed the Potomac at Falling Waters, which place they held in some force. Our troops, rallying again, took possession of some of the upper Potomac fords, came down from Maryland Heights whither they had hurried, as usual, with their stores from Harper's Ferry, occupied the latter town again, and also Williamsport. As yet there was no trustworthy evidence that the enemy had crossed into Maryland at all. Indeed, on Wednesday night it was found that he was not opposite Williamsport; and, accordingly, on Thursday, the 28th, General KELLY crossed, and reoccupied Martinsburgh, which the enemy had already evacuated. But the enemy had an invading project in view. He crossed the Potomac with a few cavalry (for it was with a few thousand cavalry he now opposed us, his infantry being all in Virginia), and advanced on Chambersburgh on Friday. On Saturday morning, the 30th, a force of two or three hundred mounted men—the press dispatch from Harrisburgh says "it is positively "known that the number was but 208"—after dispersing some of our troops at Carlisle barracks, entered Chambersburgh and fired the town. The people, on hearing the day previous of the enemy's approach, had packed and sent away their merchandise and valuables, and many of them had taken themselves away also. No resistance was made by those who remained. MCCAUSLAND, who commanded the cavalry, asked $500,000, to ransom Chambersburgh from burning. This sum not being furnished, he promptly laid about 250 buildings, or two-thirds of the town, in ashes. The loss was more than a million of dollars. The town contained 6,000 inhabitants; and we have elsewhere given our opinion upon the conduct which permitted its destruction without striking a blow in defence. "The citizens, without protest, had submitted to plun-"der," says a sympathetic account, and in the same gentle spirit suffered their town to be burned. There must have been, also, some military misfortune, to call it by the most charitable name, to allow so bold a raid, by so insignificant a force, to be successful. But probably MCCAUSLAND's squad was supported by other troops near the town.

About 11 o'clock the enemy withdrew from Chambersburgh, and, immediately after, AVERILL with his cavalry rode into the town, and, without pause, ing to extinguish the flames, which now enveloped it, set out in pursuit of MCCAUSLAND. To explain the presence of AVERILL at this juncture, it will be necessary to state that, on Thursday evening, he commenced retreating from Hagerstown, which he had previously held, towards Carlisle. A part of his train, through the negligence and excitement of the railroad people, was captured next day by the enemy, who, as we have said, leaving Martinsburgh on Thursday, crossed the Potomac with cavalry at Williamsport on Friday. AVERILL was easily driven back on the Williamsport turnpike from Hagerstown to Greencastle during Friday. But that night the enemy left him, and, proceeding by another road to Chambersburgh, burned the town. News of the performance having reached AVERILL, he now assumed the rôle of pursuer, and followed the enemy due westerly through St. Thomas, Loudon and McConnellsburgh. As there were only 208 men that he pursued, the latter, of course, rapidly withdrew from AVERILL's command, and, at length, reached their reserves, which were in force probably equal to AVERILL—that is, between one and two thousand men. Towards evening AVERILL came up with the enemy's rear, eight miles beyond McConnellsburgh, and skirmished until after dark. A portion of the enemy's command continued the withdrawal on Sunday, the 31st, AVERILL following to Hancock. AVERILL's cavalry being badly jaded, both as to men and horses, by their frequent forced marches of late, now flying from the enemy and soon pursuing him, the chase was not very effectual, especially as MCCAUSLAND's battalion was well mounted. Many of AVERILL's horses fell exhausted, while the enemy kept in good condition. At Hancock the enemy apparently attempted to reorose the Potomac, but, AVERILL menacing him, he withdrew on the Cumberland pike, and quickly checked pursuit, if any was intended, by telling trees behind him and burning bridges.

On Saturday evening there was a great fright at Frederick, Monocesy, and Poolesville. On that day, MOSBY with about 50 men crossed the Potomac at Cheat's Ferry, galloped up the towpath to Adamstown, easily stampeded our picket there, consisting of 30 or 40 cavalry, cut the telegraph, robbed a few stores, and quickly retired. This affair stopped all the railroad trains in the neighborhood, and gave rise to a story of an invasion of Pennsylvania by 40,000 men under EARLY. On their return, a superior force of our cavalry stumbled on them near Conrad's Ferry, and had a trifling skirmish. On Sunday the enemy still held Duffield, six miles from Harper's Ferry, and a cavalry company, reconnoitering there, captured a few of the enemy's pickets, in a slight skirmish.

By this time, Pennsylvania was thoroughly aroused. The people of Pittsburgh had a meeting for defence on Sunday, having received notice from General CURTIN that "it is believed BRECKINRIDGE is march-"ing West." There was great excitement; and a suspension of business next day. On Monday, August 1st, Governor CURTIN convened the STATE Legislature for August 9th, to take prompt measures in so great a crisis. General CURTIN at the same time was reviewing the defences on the Ohio and Monongahela Rivers. The Sixth corps was arriving at the scene of action, after a hard march. On Tuesday the 26th, they set out from Georgetown, on receiving news of CROOK's defeat, and bivouacked at Rockville. Next day they marched to Hyattstown, reached Monocesy on Thursday, and, passing through Frederick, camped at Middletown. On Friday evening they reached Hallstown, three miles from Harper's Ferry. The force at that point, when Chambersburgh was sacked next morning, consisted chiefly of the Sixth corps, a part of the Nineteenth corps, and the infantry of HUNTER, under command of CROOK. In the course of Saturday, orders were received to move out in pursuit of EARLY's army, who were said to be ravaging Pennsylvania, and the whole force, with an immense wagon train, marched hard during that day and the next,

suffering somewhat from deaths by sunstroke, but encountering no enemy. After a long and severe march, the troops arrived at Frederick quite exhausted. There they rested, and there they were at last accounts.

Meanwhile, the light cavalry brigade of JOHNSON, which was our only enemy in Maryland, had, all unconscious of the pursuit, been sailing off toward Cumberland, having taken the Bedford and Cumberland road from Hancock, as we have said, leaving AVERILL's exhausted command to rest a few days in quiet near the latter point. General KELLEY with his cavalry now started to intercept the advance of JOHNSON and McCAUSLAND. On Monday afternoon at 4 P. M., the latter reached Folck's Mill, three miles from Cumberland, and sharply attacked KELLEY, who was protecting the town. A skirmish continued till after dark, with some artillery on each side, and the enemy, about 11 at night, moved back to Oldtown, being foiled in his raid on Cumberland. He left his killed and wounded in our hands, two cannon, and some waggons and ammunition. The loss was hardly more than thirty on either side. The same afternoon, Colonel STOUGH, with about 500 men, had been posted at Oldtown, to cut off the enemy's retreat. Whether a knowledge of this fact caused the enemy's withdrawal from Cumberland or not, does not appear. But at daylight of Tuesday, he came down upon Colonel STOUGH, and, after a brisk skirmish lasting nearly till noon, routed him and drove him towards Cumberland, capturing the Colonel and about ninety men. The enemy's loss in killed and wounded in this affair was about 30, while ours was not half that number.

On Wednesday, the 3d, there was no fighting of importance, but on Thursday, the 4th, the enemy marched against New Creek and attacked our garrison—a little over 1,000 strong—at that point. For a while our men were sorely pressed, but, reinforcements arriving, the enemy was foiled, and forced to withdraw. Our loss was said to be 80, and the enemy's was reported to be greater. The latter, about 8 o'clock at night, struck off on the Romney road to Moorefield, and there was no longer any doubt that the movement had become a retreat and pursuit. On the same day, there was a great panic at Harrisburgh, caused by another of those reports that a battle-army had crossed the Potomac and was invading the North. A Proclamation calling out 30,000 militia was issued by Governor CURTIN. Another grand removal took place of farmers and their property from various districts in the Cumberland Valley. It was reported that the enemy occupied Hagerstown on Friday morning with five regiments, and was pushing north. There were also very many other statements, which need not be repeated, as they proved to be fictitious. But it was true that a small force of the enemy's cavalry took possession of Hagerstown on Friday, and searched the stores, taking what property was left there. That day and the next, they moved up to Middleburgh, and on Saturday night returned to Virginia. On Sunday, the 7th, our cavalry again ventured down, and occupied Hagerstown. The same day General AVERILL overtook the enemy at Moorefield and routed him, capturing all his artillery, consisting of four pieces and many of his waggons and small arms, and 500 prisoners. Our loss was less than 50 men. The pursuit was kept up for many miles, and the enemy driven to the mountains. The present raid, therefore, is substantially over, though EARLY is still harassing in the Shenandoah Valley.

AT PETERSBURGH.

There have been many particulars sent North of the recent assault on Petersburgh, but nothing to substantially change the account we gave of it last week, or to invalidate the commentary then made. Dispatches, however, from headquarters, but not official, put our losses during the affair at 5,600, and the enemy's at 1,200. We should judge 5,000 to be a better estimate of our loss. The murderous effect of the enemy's fire from the hill, and the stubbornness of the resistance afterwards made from the captured fort by LEDLIE's division, are reiterated. Indeed, our loss will establish the former fact, and the enemy's, the latter; for his chief loss in killed and wounded was during his charges to retake the fort. It is also alleged that only BEAUREGARD's command, of three divisions, held the heights on the fatal Saturday. On the other hand it appears that none of the Fifth or Second corps were hotly engaged, though standing ready for a charge. Their combined losses were not over fifty. It is also certain that the enemy were much terrified at our explosion, and deserted the adjoining fortsfrom fear that they also were undermined. It was a long time before they returned to their work, and nearly half an hour before their whole strength was concentrated against us. Indeed, every fresh particular of the affair only shows that victory was snatched away while fairly in our grasp. A proper handling of troops would have carried Petersburgh.

On the 30th of July, DAVIES' brigade of GREGG's (Second) cavalry division, which was on our left, according to the plan of Saturday's battle, already explained, had a sharp fight with BUTLER's South Carolina command, and drove them from the field. The losses were not great on either side. General SHERIDAN's departure, soon after, to assume command in Maryland, devolved the charge of his cavalry corps on General GREGG.

Sunday's first flag of truce had some informality connected with it which caused its rejection. That being corrected, an armistice took place from five to nine of Monday, the dead were buried, and the wounded cared for. Many of the severely wounded had died during the long exposure, in great suffering; for the weather was extremely hot then, as it has been since. Immediately on the conclusion of the truce, picket firing commenced, and continued to-day, Tuesday, Wednesday, and Thursday, the principal firing being in front of the Ninth corps. The latter day was the PRESIDENT's Fast, and some religious exercises were held here and there. There was but little firing, most of the shots being from the enemy. The same day, General GRANT left for Washington. On Thursday, also, a short engagement took place between our gunboats and a battery on the north of the James.

It had been noticed that the enemy had strictly forbidden intercourse between his pickets and ours, since Saturday's repulse. This conduct naturally caused an attack from him to be expected, and deserters had reported that he was mining. This report proved correct.

About 5 o'clock on Friday evening, a mine was blown up in front of the Eighteenth corps. Rapid and continuous musket firing succeeded, and for a time there was prospect of a battle, the whole right of the line being engaged. But after a sharp artillery and musketry contest, the excitement subsided. Of the enemy's intention several accounts are given. The most probable is that, discovering a sap which our men had run out in front of the Eighteenth corps, he suspected we were mining from this point, and endeavored to blow up the work. He failed, his mine exploding several rods outside the head of the sap. A mass of earth was thrown up into the air, and hardly had the dust and smoke subsided, when our men were pouring their volleys into his works. The main artillery duel, which was very heavy, took place in front of the Eighteenth corps, and the enemy responded to our guns with vigor. But little was made no charge, however, and, except immediately after the explosion, did not expose himself beyond his works. The loss was not very heavy on either side. Among our officers killed was Colonel STEADMAN, commanding a brigade in AMES' division. After this affair, the lines remained subsided for several days. On Sunday, a party of deserters ran towards our lines, but were fired upon and badly cut up, our gunners mistaking their intention. About a dozen, however, reached our lines. That afternoon, the enemy opened sharply from his mortar batteries, and a duel of shells lasted till near nightfall. Major CHIPMAN, on our side, was severely wounded. On Monday, General GRANT returned from Maryland. It is now said General FERRERO commanded his division in Saturday's assault, and General WHITE acted as chief-of-staff to General BURNSIDE.

THE GEORGIA CAMPAIGN.

It is now settled that our loss in the raid upon the Macon Railroad, referred to last week, is hardly more than 1,000 men; and General MCCOOK is a prisoner. The railroad was successfully destroyed, and communication temporarily, at least, suspended, between Macon and Atlanta.

The chief event to be recorded occurred on Thursday, July 28th. On that day, General SHERMAN attempted to extend his line to the right, by subtracting his left corps successively and sending them to the other extremity of the line, in the manner so often practiced by GRANT in Virginia. The movement began on Wednesday night. But the enemy, observing the movement, and perceiving that it was SHERMAN's intent to swing around so as to hold the Macon Railroad, massed his troops in the same direction. About noon, STEWART's corps attacked LOGAN, who had just got into position on the right, his corps having been the first detached from its former position on the left.

At first, the enemy was successful in his attack, his cavalry turning our flank, and inflicting considerable loss. But, by the middle of the afternoon, the fortune of battle had changed, and our men, aided by hastily-built entrenchments, repulsed every charge of the enemy. An advance was then ordered, and the enemy was driven back to his own works, leaving the field in our possession. The fighting was very severe till nightfall, although there was little artillery firing. Our loss, according to one account, was about 1,500, and the enemy's probably as great.

Meanwhile, there was a general advance along the line, but our forces were driven back, the enemy being strongly posted. The Fourth and Fourteenth corps were hotly engaged, and there was heavy artillery firing in their front all day and night, and on the day succeeding. But night fell upon a divided field. Our right was at one time in great danger, but was handsomely rescued.

The most important event of the 28th, was the farewell of General HOOKER to his corps. On the same day General HOWARD assumed command of McPHERSON's Army of the Tennessee, as already noticed elsewhere. On Sunday, August 1st, General GARRARD, who, with 4,000 cavalry, had been operating on the Augusta road, returned. He had a severe time in getting away, and did much damage to the railroad track.

Should Mobile be captured, as now appears probable from the dispatches of Secretary STANTON, which are our only information thus far on that point, this event cannot fail to have a good effect on SHERMAN's campaign.

THE Union officers who were placed by the Rebel authorities under our fire on Charleston, were on the 4th, exchanged for the Rebel officers under Major Gen. McQUEEN, in retaliation, had brought to Charleston harbor. The following is a complete list of the Union officers exchanged:—Brigadier-General Seymour, Wessells, Strong, Scammon, Halpin, Heckman; Colonels T. G. Grover, R. Hawkins, W. Harriman, C. H. Lobman, O. H. Ingraham, W. D. Lee, H. Wells, H. O. Bellinger, H. L. Brown, E. L. Dana, E. Fardell; Majors D. A. Carpenter, H. D. Gant, J. N. Johnson, H. Lee, J. Jaudon, J. R. Lowell, W. C. Oswald, C. Hall, E. W. Bates, W. Y. Baker; Lieutenant-Colonels E. G. Hays, N. B. Hunter, T. N. Higginbotham, W. W. Stewart, A. W. Ellis, C. Mayfield, S. McCall, S. Thomas. The exchange of exchange on our side were conducted by Major John F. Anderson, of Major-General Foster's staff, assisted by Major E. N. Strong, also of General Foster's staff, and on the Rebel side by Major John Lay, of General Jones' staff. The released officers were received with joy from our fleet, and received many attentions from the officers of the Army and Navy present in the harbor. On the 5th they took transport for the North.

MAJOR-General Sheridan, commanding the new Middle Military Division, announces the staff of the division to be Lieutenant-Colonel James Forsyth, Assistant Inspector-General; Major Frederick G. Newhall, Aide-de-Camp and Acting Assistant Inspector-General; Captain E. B. Parsons, Aide-de-Camp and Acting Assistant Adjutant-General, Acting Chief Quartermaster; Captain W. H. Hesseh, Acting Chief Commissary; Aides-de-Camp, Captains M. V. Sheridan, W. C. Mecoy, Joseph O. Kent, D. Preston Conyngham, and Major G. A. Forsyth, Acting Aide-de-Camp.

BY command of Major-General Foster, the Sanitary measure, and to counteract the effects of malaria on the troops in the Department of the South, during the warm season, the following regulations, in sympathetic June, will be issued to the enlisted men, particularly those on duty in districts especially malarious or on excessive fatigue duty, and can be issued under the recommendation of surgeons of the district, approved by the district commander, at such times and in such quantities as the medical officer shall deem it necessary to keep the command in a healthy and active condition. Ordinary fatigue duty does not justify the issue of whiskey, and will be discontinued in future, except in the manner prescribed.

PROVOST-Marshal Ingraham will hereafter issue no passes to parties desiring to visit prisoners of war confined in the Old Capitol Prison in Washington, except upon the order of the Secretary of War, or the order of Colonel Hardie, acting under the direction of the Secretary.

ADJUTANT-General Fuller, of Illinois, has just effected a satisfactory adjustment with the War Department, by which it appears that the State has sent to the Army over 180,000 volunteers, and 35,376 more will calls except that of July, 1864, from a population of 1,700,000.

MEDICAL ARRANGEMENTS OF THE ANCIENTS.

IN a previous article on the Medical Arrangements of the Ancients, all the facts we had been able to collect at that time were presented to the public. Since then, a number of other works have been examined, which prove incontestibly the fact that the ancients paid all the attention they could to the care of the sick and wounded. Colonel GUSCHARDT, who published at the Hague and Berlin—1758-1773—a work in four volumes, entitled, "Military Memoirs or Concerning the Roman Legions," has collected many valuable facts in regard to the sanitary provisions of the military authorities of these Powers. In his remarks upon the Tactics of ARRIEN, translated by him, he establishes the fact that the Roman troops were well provided as to medical practitioners (*Tactique d'Arrien*, GUSCHARDT, ii, 114, f.). We translate:—

"The Ancients paid particular attention to providing that the Army he supplied with good doctors. XENOPHON, 6th Century, B. C., remarks that the Young CYRUS attracted to him the most capable one which he knew of, to accompany his expedition against his brother." (CYRUS, the most celebrated physician and surgeon of his time, was on his staff, and cured ARTAXERXES, after he had been wounded in the breast by CYRUS, who fell in the conflict. CTESIAS, having been present at the time the injury was received, and taken prisoner on the battle-field, joined into the service of ARTAXERXES, attended to his new royal patient, and won his regard, as he had previously that of CYRUS.) (XENOPHON, *Retreat of the Ten Thousand, Bib. His. and Mil.*, i, 477, 588.) "Among the Romans, each Cohort" (equivalent to a Continental Regiment) "had its surgeon or physician (according to POLYBIUS)" "had its surgeon or physician." This may be observed on the ancient monuments, whose inscriptions bear sometimes: *Medicus, Cohortis* II., *Tigilum* (Surgeon of the 2d battalion of the Wolf Watch, or Firemen) *de Cesare Trajano*, and mentioned by AUGUSTUS, and as it is fair to suppose their organization was complete throughout from the first, here we have a surgeon in a corps in the administration succeeding that of JULIUS CÆSAR. (Examine SMITH'S *Roman Antiquities*.) Consequently, it is no more than reasonable to deduce that there were surgeons in the time of JULIUS CÆSAR. (VEGETIUS, *Cohortis* V., *Praetorio* (Surgeon of the 6th battalion of the Imperial Guard); *Medicus Legionis* III., *Italic* (Surgeon of the 3d Italian Division). Consult (JOHN GAUTIER) ORUTERUS, born in 1560, a famous antiquarian, &c., and the *Thesaurus* of MURATORI, Italian antiquarian, &c., died 1750.)

In the tactics of ARRIEN, we have further interesting facts. He lived in the 2d Century, A. D., under the Emperor ADRIAN, and wrote with elegant simplicity, in a style resembling XENOPHON, "with the greatest beauty." He was a soldier and a historian, (*Tactica, Cohortis* V., *Praetorio* (Surgeon of the 6th battalion of the Imperial Guard); *Medicus Legionis* III., *Italic* (Surgeon of the 3d Italian Division). Consult (JOHN GAUTER) ORUTERUS, born in 1560, a famous antiquarian, &c., and the *Thesaurus* of MURATORI, Italian antiquarian, &c., died 1750.)

In the tactics of ARRIEN, we have further interesting facts. He lived in the 2d Century, A. D., under the Emperor ADRIAN, and wrote with elegant simplicity, in a style resembling XENOPHON, "with the greatest beauty." He was a soldier and a historian, and mentions, if does not visit our understanding of the calling as well as the French term "marchand." But all depends upon the original Greek word, as we have access only to the French translation.

JULIUS AFRICANUS, born in Syria, flourished in the 3d Century, A. D., and wrote in Greek. In the vi. and vii. books of his *Cester* (Gr.), he treated of the art of war and matters relating thereto. So says Colonel GUSCHARDT in his *Military Antiquities*, published at Berlin in 1773. At page 423, vol iii., chap. xxix., concerning the preservation of the health of the Soldiery, (GUSCHARDT, iii, 423.) says (JULIUS AFRICANUS) the author, "are very necessary in an "Army, in consideration of the many grievous maladies oc"casioned by fatigues and the variations of the seasons." He then goes on to indicate the most healthy articles of food, &c. Chap. xxx. treats of medical matters, and all else of the treatment of wounds. As he mentions that even large wounds need not invariably be closed by sutures, he proves that other methods were equally well understood. But chapters vi. and vii. (*Ibid*, 413), are still more important to the curious student of antiquity, as they refer to the precautions for the sufferings which soldiers experience under the knife of the surgeon. Here is a direct reference to surgical operations in the field and military hospitals. After this who can deny that Roman armies possessed an organized medical department?

ALEXANDER, 4th Century, B. C., had physicians in his Army. When he fell sick, in consequence of the fatigues he had undergone, or from bathing while overheated in the cold Cydnus, ARRIEN says, "All the physicians despaired of "his life, PHILIP, the Acarnanian, who followed ALEXANDER "and enjoyed his most intimate confidence, alone ordered a "medical draught" (*Bib. His. et Mil.*, ARRIEN i., 331, 2d).

ALEXANDER submitted to his treatment and recovered. Again, in his Indian campaign, ALEXANDER was wounded by an arrow which transfixed his cuirass and entered his chest, so that both air and blood issued from the orifice, showing that the cavity of the chest was injured. Such a case would require skilful treatment. His life was in danger, for the wound was deep and the loss of blood great. The physician, CRITODEMUS, of Cos, a Greek, attended to this case, which was difficult, as to permit a free escape of the blood. Such was the very treatment which would have been followed at this day, proving that ALEXANDER not only had a surgeon in his army, but that he also understood his business.

Finally, to close this article, it is stated:—

1st. In the consideration of the Army Organization of the Greeks, after enumerating the superior officers, "Besides "these" (the trumpeters, adjutants, hyperetes and heralds, just before mentioned), "numerous other persons were at"tached to the army, such as surgeons, cashiers, and every"sorts of war machines and baggage" (*Iconographie Encyclopedie, Military Sciences, Warfare of Antiquity*, text, vol. iii., p. 14. New York, 1851).

2d. Also that the Scriboni alluded to by the Emperor LEO as performing the duties of surgical aides and attendants, were a regularly recognized class of officers. "There "*military deputies* (Scribeni) had another office, that of the "care of the wounded soldiers, in which they took the place "of physicians." (DUCANGE'S celebrated *Medieval Latin Glossary, Art. Scribones*).

EFFECT OF THE SCREW PROPELLER ON STEERING.

In that late and most excellent compilation on Steamship, by Lieutenant-Commander ISHERWOOD, U. S. N., the author facetiously remarks, "That it is not very certain that coal "whips will altogether outlive tacks and sheets." Though fully agreeing with the sentiment expressed by this author's happy sarcastic, we are sure that no one who has been watching with an observing eye the rapid changes made by steam in naval warfare during the past few years, can deny the fact that coal whips are decidedly at a premium during the critical period of reaction.

In our day, when fleets are led into action without a single dot of canvas to be seen, and the large portion of our Navy consists of screw steamers, it will certainly not be bad time to endeavor to understand all of the peculiarities of the effects of the screw in handling this class of vessels.

The art of handling a vessel under canvas has been again and again most elaborately discussed, but there seems to be a deficiency of written instructions relative to handling screw steamers under steam alone. We do not attempt to fill up this deficiency, but will leave it to those who are perfectly able from experience to give all the desired information. But as the screw in steering a vessel when not under the influence of wind or current, we will ac tempt to examine. When this action under these peculiar circumstances is fully understood, it will obviously assist any one in comprehending the effects when under the more complicated influences of the winds and currents.

In relation to the effect of the fixed and most important inquiry would be to ascertain whether the ship is propelled by a right or left-handed screw. As the upper blade of a right-handed screw turns from port to starboard when the engine is going ahead, and the reverse of this designates a left-handed screw, the difficulty is easily made. Although right-handed screws are most generally used in our Navy, yet a few of the other description are also employed. In the following remarks we will examine the peculiarities of the right-handed screw only, as a similar course of reasoning can easily be applied to the left-handed screw by the reader.

We will first find why a right-handed screw steamer should turn with more ease and quickness with her head to port than with her head to starboard. If we can show these good reasons why this should be the case, we may perhaps question the pertinence of a remark made in a late able work on Seamanship, "that some propellers will turn more read"ily with the helm one way than the other."

Let us imagine, for our assistance, that the rotatory course of the screw is divided into four quadrants by the horizontal and vertical planes passing through the axis of the screw. As the blades of the screw pass through the lower quadrants of their course, they meet with a greater resistance than they do in the upper quadrants, on account of the greater density of the water at the lower. From this cause alone there would be a constant tendency to throw the stern to starboard, and hence have a constant effect in steering.

In the next place, as the water is driven from the face of the blades of the screw, in a direction at right angles to these faces, and as the water has a tendency to maintain this direction, it will strike any portion of the vessel with which it may come in contact with various effects. When the helm is hard a-starboard, the water receding from the ment, and at times may be found even far more useful than screw blade while passing through part of the lower starboard quadrant, will strike the rudder at an acute angle, and with a very slight effect; but the water from the screw blades while passing through part of the upper port quadrant will strike the rudder at nearly right angles, and hence with a considerably greater effect; thus the tendency of the water receding from the blades under these circumstances will be to throw the stern to starboard. Now, when we have this cause cooperating with the reaction of the water on the rudder, as the screw, as we have shown through the lower quadrants, together with the normal effect of the vessel from its position when hard a-starboard, we may expect the vessel to move with more ease and rapidity than under any other circumstances. When the helm is hard a-port, the lower receding from the screw blades while passing through part of the lower starboard quadrant, will strike against the lower and broadest part of the rudder at nearly right angles, and hence with considerable effect, having a tendency to throw the stern to port; while the water from the blades passing through part of the upper port quadrant will strike the upper part of the rudder at a very acute angle, and hence with a very slight effect. Thus it is obvious that with the helm hard a-port, the effect of the reaction of the water on the lower screw-blades in throwing the stern to port, is greatly counteracted by the fact that the water thrown against the lower part of the rudder has a tendency to throw the stern to port. With the helm a-starboard, we have all three causes cooperating in throwing the stern to starboard, but with the helm a-port we have one cause working in opposition to the other two.

From these causes we may naturally expect that a vessel, when going ahead, will turn with more ease and rapidity with her head to port than to starboard.

When the engine is backing, there is another series of causes and effects worthy of investigation.

In this case, the effect of the reaction of the water on the screw-blades as they pass through the lower quadrants is to throw the stern to port. The water, as it recedes from the screw in its rotation, has no effect on the rudder, but strikes against the quarter of the vessel. Bearing in mind the shape of the stern of a vessel, we observe that the water receding from the blades of the screw, as they pass through part of the upper starboard quadrant, strikes the starboard quarter of the vessel nearly at right angles, having a tendency to throw the stern to port; while the water from the blades passing through part of the lower quadrant will strike the port quarter of the vessel at an acute angle, and with a very slight effect.

Thus, when the above-mentioned two causes cooperate with the reaction of the rudder from its position when the helm is hard a-starboard, then we may expect the greatest total effect in throwing the stern to port. And when the helm is hard a-port, then it acts in opposition to the other two causes.

From this reasoning, we may naturally expect a vessel, when backing, to turn around with more ease and rapidity with her head to starboard than to port. Bearing these various causes and effects in mind, many persons, by their skillful combinations, are able to turn a screw steamer in a very limited space with great rapidity. In fact, we have frequently seen tried, with apparently great success.

One is, go ahead with the engine rapidly, with the helm hard a-starboard, and as soon as a little headway is gained, check it by reversing the engine. A repetition of this manœuvre soon has the desired effect in turning the vessel with her head to port. The other is, go ahead with the engine slowly, with the helm hard a-port, and when the vessel has gone as far as safety will allow, then reverse the engine rapidly, and when stern-board is gained, put the helm hard a-starboard. In either of these cases, this manœuvre has the desired effect in turning the vessel with her head to starboard.

We merely mention these two methods, knowing, however, that it is seldom they can be used to entire advantage, inasmuch as the direction and currents are constantly varying, the commander of a vessel novel tasks to perform. We observe that the English, in their late accounts of trial trips of naval steamers, note the exact time that it takes to turn the steamer in a circle under steam alone, with the helm hard down each way. They note, also, the number of degrees the helm is moved each way in these trials. They evidently think this data well worth ascertaining. In such emergencies as we must with occasionally, when the vessel itself is the projectile and the object upon the enemy (used, however, against the enemy alone), the quickness of a vessel on her heel, as well as the dexterity of her commander, are qualities of preëminent excellence.

In conclusion, we might remark, that each vessel, like a horse, has its own peculiar tricks, and all that can be done, practicely, is to endeavor to understand the general principles, and then more closely watch the peculiarities of each one under every series of circumstances presented. In other words, *experiment*. To be able to handle a screw steamer under steam alone, with that ease and ability possessed by some of our naval officers, is no slight accomplish-

commands. If any useful hints on this subject can be gained from this article, our object will be fully accomplished.

ADVICE FOR YOUNG EXECUTIVES.

In this journal for October 31st, 1863, the plan was proposed of giving to our deserving petty officers and leading seamen a "good conduct certificate," called in that article "continuous service certificate"; to be neatly printed on parchment, and, as analogous to a forward officer's warrant, or the commission of an officer of higher rank. The suggestion was such a good one, so practical, and altogether so desirable, that there is every probability of its being adopted. But, in filling out these records of a cruise, there must be exercised the most careful discrimination, for the unworthy gain the honorable distinction, and the value of the certificate become depreciated, as we have seen in the case of the present "honorable discharge." The commanding officer must necessarily defer, in a measure, to the opinion of the first lieutenant, and the latter cannot consistently refer up upon his memory. He should keep a "conduct book," to which he may refer at all times with confidence, or—which is of equal importance—he may turn over to his relief, should he be exchanged before the expiration of the cruise. And whether the conduct certificate should be issued or not, the conduct book is essential to the thorough carrying out of the duties of executive officers, and, advising all young and inexperienced officers to adopt it, their attention is commended to the following remarks by Captain Boutwell, U. S. N.:

"For the purposes of drill, the watch and station bill may be sufficient; but a conduct book, alphabetically arranged and judiciously kept, is almost the only source from which can be derived a correct estimate of the value of each man. It would relieve the first lieutenant from much uncertainty, and perhaps injustice, in the case of promotions to vacancy, patience, antecedents, capacity and conduct, as could be collected from his certificates, &c., together with a true record of his behavior—good and bad—while attached to the ship, were entered opposite his name. Cases will arise in which an irrelevant not only the granting or withholding of indulgence, but the punishment which the offense calls for. Mr. A.'s man's prospects depend; and it cannot but be a great relief to a conscientious officer to be able to refer to a body of reliable records, from which he may infer the probability of a case perplexed by the conflict or insufficiency of evidence. Should as the first lieutenant be absent when the case arises, the grounds on which he may arrive at a just decision, it is of great moment that he should have the means of collecting his general knowledge of the character of the particular offender charged against him. It is true the officer may be in direct discord with antecedents, but still, when testimony is contradictory, inconclusive or equivocal, it is not much astray if he cast the entries of the conduct book into the scale and consider the balance. To the entire success of the conduct book is too important a register to be entrusted entirely to the hands of a deputy. Its value consists in its thorough honesty, character, and the confidence to be felt in it, and particularly with these features, would be felt by the crew to be infallible. The master-at-arms may be an upright man, but he is not far removed from his fellow-petty officers. He puts his bows in turn with the ship's company; he has his likings and dislikings; he is not infallible; he may, in spite of right and wrong may be blunt and dull, or warped—unknown to himself—by minor considerations; his estimate of character may be based on an undue leniency or undue goodness, and so undue a depreciation of others; his prejudices may be more powerful than his judgment, and his temper may be of that stern nature that will not allow him to make extraordinary circumstances. All this may contribute to render the conduct book kept by him a very imperfect, if not unfair, picture of the morals of a seaman. But the book of the first lieutenant the case is different. From position, discretion, and habit he is not likely to be biased unfortunately by unworthy considerations; he has seen his men under all circumstances, felt their natures in moments of mood, marked their zeal in hours of danger, and read them thoroughly on occasions which strip the disguise off the most artful. A record of conduct kept by such a man diligently and conscientiously, and sanctioned by the signature of a subordinate's hand, would probably be found not only one of the best aids to the captain, but one of the best promoters of good conduct that an officer could command.

"The right management of men is difficult under any circumstances, but especially so in the political world of a ship. The interference of the executive must be constant, it must be vigorous, and to be tolerable must be judicious. The superiority of prevention to cure is proverbial, but it is only the close observers who will detect the early stages of a disorder, and the firm hand that will make use apply the efficient remedy, and only a thoughtful student of human nature who can administer it so adroitly as to make it almost imperceptible. Many officers are so unfortunate in his day that some endeavored to conceal by great severity their own unskillfulness and want of attention, and that the men were beaten into insubordination."

The desire to rule upon principles of commingled justice and kindness, is as widely separate from unhealthy "good fellowship" as the "loudest democracy of popularity-seeking could wish.

There is one other subject to which we would invite the attention of those likely to be called upon to fill the office of executive, and that is, the absolute necessity of observing a regular system in carrying on the duties of the ship—be it large or small. Cultivate system, for a want of it will certainly neutralize the most perfect organization. If a systematic administration does not come naturally through the "champ of order," it is advisable to prepare a routine table for self-guidance. An erratic and whimsical first lieutenant is the horror of all good men-of-war's men.

NEW PUBLICATIONS.

JOURNAL DES SCIENCES MILITAIRES. The June number contains a translation of Rear-Admiral Goldsborough's Report on Iron-clads, by Lieutenant de Cuverville. Captain Tremblay contributes a long essay on Life-preserving Apparatus and Life-boats, with a project for the organization of a Central Society for regulating the preservation of life in case of shipwreck, both on ships and on the shores of France. The author, on the History of Perspective, by M. le Commandant Poudra, which has been continued through several numbers, is concluded in the present. The author was a professor in the staff school, and this work is a continuation of his course of perspective there taught. The article on the Battle of Waterloo, by Captain H. V. Tyler, which our readers have already perused in the Army and Navy Journal, is translated by V. Prof. The remaining articles are Military News and the Military and Maritime Review. Paris: J. Corbaeb.

JOURNAL DES ARMES SPECIALES ET DE L' ETAT MAJOR. The contents for the number of the 15th of June are as follows: New Studies upon Rifled Arms for Infantry, by Captain de Piennes, translated from the German by Captain Tardieu (continued); Theory and General Construction of Rifled Cannon, by Lieutenant A. Ruthey, translated from the German by Lieutenant Colonel Wendenbourg; Pamphy, or, Arms of all times and of all peoples, by A. M. Perrot, with 24 cuts (continued); On the Profession of Arms, by Brigadier Don Osabis (continued); Paris: J. Corbeab.

UNITED PROVINCIAL MAGAZINE, N. C. and Lynchburg, Va. This number has very interesting and handsome cartoons drawn by Acting Major Otto Botticher from the life. It never having been our fortune to personally inspect either of the prison-grounds so carefully sketched, we cannot give any opinion as to the fidelity of the scenes. But if all the rest of the work is as correctly done as the two cartoons here (and that may be easily believed), the pictures are worthy of no little praise. We recognize familiar countenances in some of the officers, and presume others can do as much. The only fault is, that, by the necessity of the coloring, all the heads feature a certain sameness, and the Saltillo and the Salisbury jail-grounds are entirely softened away. By comparison with an ordinary camp or garrison, these apartments are luxurious, and contrasted with the nightly hivouacks at Petersburgh and Atlanta, they are a sort of paradise. All the torn and soiled garments are left out of sight, just as the tailor's, and hard boards are polished into veneering. The faces look happy, and a *dolce far niente* pervades the scene in Libby, while at Salisbury a pleasant game of ball is going on. But these holes of gayety and comfort are not the holes of the earth in which the rats dwell. The drawing is careful and accurate, and the pictures may be entirely commended to the thousands who have friends in these prisons, as well as to the happy graduates who have procured their exchange. Gouph & Co., New York.

MILITARY TOPOGRAPHICAL MAP OF EASTERN VIRGINIA. By Charles Ellet. This map shows the routes taken by the several Army corps, and the battle fought in the present campaign. In the battles, the positions of the various corps are indicated in colors, and the map is a useful companion in tracing out the history of the campaign. Published by Captain R. Cleaveland, New York.

CORRESPONDENCE

VETERINARY SURGEONS.

To the Editors of the Army and Navy Journal:

Sir:—The position of the position of veterinary surgeons in the United States service has hitherto attracted little attention from those interested in the efficiency of the cavalry. A more general interest has been not occupied that position which the importance of their occupation and the duties of the office would seem to require. The late action of Congress, however, in the matter of pay in this class of surgeons has advanced one step in the right direction.

The office of veterinary surgeon was created by an act of Congress passed March 3d, 1855, in which it was provided that their appointments should be by the President, and their rank that of Sergeant-Major. It was a very liberal salary; in reality. It should command corresponding abilities. Unfortunately, however, the requirements of the time for closing Congress did not permit time to define the duties of the office, and the appointments to the twenty-one vacant office was to be guided, and to this day, with the exception of an order notifying them that they are not allowed clerks, they have received no instructions, and therefore no two any communication bearing upon the subject. In consequence, many good practitioners have never carried out their views at all, and others have had to be content with some regulations with which they were unacquainted. As a case in point, I can state that the first and last professional order I ever received was from my then commanding officer, upon my appointment to the position. It was that he knew of no regulation to meet the case, but ordered me to treat the horses as though they were my own. It is to be hoped, however, that the evil here complained of may, ere long, be remedied. By the act of July 17th, 1862, contract field veterinary surgeons were permitted to hold a convention to draw up the necessary rules and regulations, to be submitted to some competent authority for inspection and approval, it would, I am sure, result in vast benefit to the cavalry service, and save the lives of a large number of valuable animals.

The veterinary surgeon, by daily personal inspection of the animals under his charge, and a prompt treatment of all the horses laboring under disease or lameness, is enabled to make a morning report each day, showing at a glance what troops are fit for service, disabled, or irreparable horses are in the command. The misfitting of a saddle, deficiency of nose bags, cruppers, and other necessary horse equipments, the inefficiency of the blacksmith, the deficiency of shoes, are all legitimate subjects for the attention and report of the veterinary surgeon, so that deficiencies may be supplied in time and the evil averted before it has the order to move comes. To enable this to be done systematically and properly, it will be found necessary that he the best way to place the veterinary department on the same footing as in most of the European armies; that is, to attach a veterinary department to the cavalry bureau. In members should undergo a thorough examination as to their proficiency before admission, and be able to prove themselves deserving of the honor conferred upon them. It is so in England, France, Austria, and Prussia. One of the advantages of such an arrangement would be the presence of a head who was a professional man, to whom reports might be sent, and who could transmit an immediate reply. Such a course could be a saving of much time and many valuable lives. C.

THE ARMY REGULATIONS.

To the Editor of the Army and Navy Journal:

Sir:—It is a source of mortification to many officers that the Regulations of the Armies of the United States are deficient in a number of points. When the Regulations formed only a few hundred men, and every officer of ordinary sociable qualities held acquaintance with every commission in the Army, they may fail to be a subject of much discussion. But now, since the Army has grown to its present enormous proportions and embraces all shades of intellect and comprehension, which has not kept pace with its growth, and to-day, there exists in practice of guard mounting, drese parades, inspections, funeral ceremonies, and approach and retreat marches, as wide a difference as one can imagine to have existed in the drill and dress of the allied armies of the Russian crusade and Light Guardsbald's Italian patriots. These differences in practice are not limited to the exercises I have named, but are as numerous as the points of difference between the two armies point, not defined in the clearest English by the Regulations. Only yesterday I heard an officer of high rank inquire, as a General parade was forming, "Is the Army Regulation parade or follow the escort?" After the consultation of the Blue Book, and an exposition of each officer's opinion, the latter remarked, "I will have the officer of the day see Navy Journal, doubtless, would decline the honors of umpirage, yet I will refer to it, as the last resource of the doubters, as to whether the "adjutant should stand on the right at guard mounting until he gives the command 'Front,' and then pass to the proper place and there stand in front at first." General McArthur, commanding the post and defence of Vicksburgh last winter, was at one time, I think, desirous of having the drill of the line officers should hold and dispense a bucket of champagne on no less question than of whether the regimental adjutant presented the sword toward the Brigade or Division commanding officer, on dress parade, prior to sending a company for the colors, and on returning with them. I have listened to structions, and read endorsements concerning the address of correspondence, also at variance with each other. Some points, not entirely beyond the ordinary regimental relations to higher authority should be attached to the Regulations of the brigade to which the regiment is attached. Others, including those instructions which should be sent through the brigade adjutant, addressed to the adjutant of the general whose attention is desired. These statements of differences might be extended indefinitely at any are of little importance, but these I have given are sufficient for illustration of the deficiencies of the Regulations, and are confined only to the War Department's own acknowledgment of their deficiencies in authorizing, approving, and publishing Manuals and Orders, Circulars, Instructions Bulletins of the Adjutant-General's Department, Instructions to Mustering Officers, Instructions on Outpost and Patrol Duty, and Troops in the Field, Regulations for Signal Service, and so *forth*. A revision of the book and full exposition of everything necessary for the regulation of *any* officer's official intercourse with his superiors and equals, would be a voluminous, as the authority that ordered the exposition could also order the Army to be disbanded after the latter, and the present embodiment vastly changed, without loss on any known contingency.

Since the days of Hardee, eighty mark many a ¶ of the authorized infantry tactics of the U. S. Army, and it has been suggested by minds of very ordinary fertility, that "Right Face!" "Left Face!" and "About Face!" should be a lower of tactical strength, is encircled by the mystical and doubt-engendering cipher.

An enumerated list of officers' regulations speak ill certainly for the ability of our officers and the attention of those in authority. And I am sure, were a new, *truly revised, full* and complete U. S. regulations, and a new U. S. infantry tactics, prepared under the auspices of the War Department, and with the advice of a board of officers, graduated from a major-general to a second lieutenant, would be highly gratifying to the Army. And the yearly convention of a board of officers to revise, amend and publish once and eventually, if not immediately, give us laws for both government and service that are clear and concise.

Vicksburgh, Miss., July 30, 1864.

Daniel Worrell, of New York, who contracted to deliver 1,200 horses to the Government in February last, at St. Charles, Mo., has been tried by court-martial for failure to fulfill his contract, found guilty, sentenced to imprisonment in the sum of $2,000 to the Government, and to be imprisoned until paid. The President has approved, but directs his imprisonment to be during loyal and security satisfactory to the Secretary of War to pay the amount.

VINDICATION OF COLONEL ULRIC DAHLGREN.

A LETTER FROM REAR-ADMIRAL DAHLGREN.

UNITED STATES FLAGSHIP PHILADELPHIA, }
CHARLESTON HARBOR, July 31, 1864. }

I have patiently and sorrowfully awaited the hour when I should be able to vindicate fully the memory of my gallant son, Colonel ULRIC DAHLGREN, and lay bare to the world the atrocious imposture of those who, not content with abusing and defacing the remains of the noble boy, have knowingly and wickedly sought to blacken his fair and spotless name by a forged lie.

That hour has at last come. I have before me a photographic copy of the document which the inhuman traitors at Richmond pretend was found upon the body of my son, after he had been foully murdered in the dead of night, and who, on the pretext that this paper disclosed an intent to take the lives of the arch-rebel and his counsellors and to destroy the city of Richmond, have not scrupled to mix the most shocking barbarities on the remains of the young patriot, and to exult like dastards over his sad fate.

I can say with truth that the publication of this paper, a base, atrocious forgery—to palliate that the wickedness of the act is only equalled by the meanness with which it has been perpetrated and adhered to; for the miserable scuffle did not confine themselves to the general terms of a mere allegation, but published the paper in all the precision of a photographic *fac simile*, as if not to leave a doubt for cavil.

I felt from the first just as if I knew the fact that my son never wrote that paper—that it was a forgery; but I refrained from giving utterance to that faith until I had seen a sample of the handwriting of my child, having, now, it could say, as I say now, that a more fiendish lie never was invented.

For the poor wretches who did the work I have not a word—it was their trade, their daily bread; and they pretended to be in a high moral condition of mind to perform it not only for a rope. I leave them to the price for which they have bartered their souls. But what doom do they deserve who have lauded to the utmost of their base merit by it—who devised it that they might justify to the world the gratification of their vengeance on the heroic dead, by desecrating the inanimate body of one whose life and pure purpose was to release the weary captive from the most abominable bondage, and who, if he had lived, was fated not to peril his own life? What shall be awarded to these high-minded and honorable men—the leaders of the chivalry—the high functionaries of the State—that are supposed to disdain even the semblance of wrong?

And yet these are the criminals who conceived the thought, and, in order to carry it into effect, have come to them if that daring young soldier had reached the portals of their hostile and direct liberty to the very captives, vented their rage on him in cold body, and gave out their names and their cause for a lie.

It is difficult for me to control my utter baseness in say but the most abandoned felons, and yet it is only of a piece with the entire conduct of the chivalry, leaders and followers, in all the acts of their hot and cowardly career, so untimely death of Colonel DAHLGREN. The forged lie was but the seat to deeds of inhumanity and horror that no one could enact or conceive of who was not lost to all but a morbid with that of the brute.

It is well known how the cruel usage practiced on the Union soldiers who were imprisoned at Richmond had become a theme at the North, and that their redress from slow and horrid death by famine was sought in vain. This was day by a wound received in a charge through Hagerstown, pending the battle of Gettysburg, and the consequent illness nearly unto death, by which he was for a long time laid carried him through the crisis, but the wound was not perfectly healed; he was still weak and could only move on crutches.

No sooner was he apprised of what was contemplated, than he sought, with the true instinct of a commander, one of comrades pining in loathsome dungeons—of men with whom he had ridden side by side amid the deadly conflict, and a strong sympathy for their sufferings, under the ignominious of his gallant heart, he felt that duty called him there, and the reluctant consent of the authorities was at last yielded to his most earnest entreaties.

It is not my purpose here to narrate the whole course of the noble enterprise in which he fell a victim to his zeal; but no one had seen Colonel DAHLGREN in his full vigor sit his charger more gracefully or better endure the incessant and multiplied hardships of that ride, by day and by night, in shine and storm.

The failure of his column to connect with that of General KILPATRICK at the time fixed by the latter, caused the death of so noble a soldier as ever gave life to a great cause.

On Tuesday night, March 2, after dark, Colonel DAHLGREN was encamped at Richmond, and came in contact with the rebel infantry stationed at the outer works. At such a time of peril, for every one of the enemy's troops, as well as that of cavalry, hastily a gunshot from the stronghold of Rebellion, the splendid courage of the young leader never blazed more brightly. The officer who commanded the force in front who had never served with him before, writes in admiration of the perfect self-possession with which he rode in front of the line and kept the men in order under the fire of shell. Then came the charge, scattering the Rebels like chaff.

This done, it only remained for the column to push on Richmond and endeavor to gain the Union lines below. The night was dark, the rain fell in torrents, and the cloaks of the men were saturated. Still on they went, with Richmond at full speed. Sad to say, the advance with Colonel DAHLGREN became separated from the main body, and at dawn of Wednesday he found himself, with a little party of seventy men, in the very midst of a hostile country.

Still holding on the swift tenor of his way, he crossed the Pamunkey and reached the Mattapony not long after noon. The men and horses had been crossed over the river, the low wintering in the water, and the party was about to resume their course, Colonel DAHLGREN remaining alone on the southern bank. The chivalry had now gathered in the bushes and deliberately opened fire on him, though they saw plainly that he was crippled by the loss of a leg and only stood erect by the aid of the crutches on which he leaned; the waters of the river separated him from every helping hand, and it were easy for a strong and resolute man to rush forward and bear away by main force the enfeebled frame of the wounded officer. But any manly deed was a flight far above what the chivalry contemplated; they could assassinate him from the ambush, because it attained their base purpose without risk to their own craven carcasses. In after scorn of such abject fear, Colonel DAHLGREN laid them some time under their hiding places, and discharged his pistol at them defiantly.

The contrast thus presented might well inspire the pencil of the satirist.

But the young warrior was not to close his glorious career there. He was to open day. Then were those of them who knew him—the gallant Ninth Virginia had fled him in the battle-charge—who had met him in a spirit unworthy of numbers, and had been driven in every direction until they stalked out of the town like whipped cats. So they condescended to parley with the single and ragged a deep forest, and awaited the coming of the Union troop.

This happened about midnight, and repeated volleys, from time to time, announced the fact to the camp.

The gallant youth fell pierced by many balls at the head of his men, and, according to the rebel account, the struggle about its shattered tenement the chivalry began to strip off his clothing. Whether the detestable purpose was accomplished history does not say, but it is highly probable the famous wretches passed to make sure that life was extinct before they severed a finger from his hand in order to secure a ring given by a lady friend, and which he wore as a heart that is now as still as her own.

It was not until daylight disclosed the utter helplessness of the survivors that the cowardly host heart of grace and consummated their brave deed by marching the wearied and hatchet) prostrate form of their victim. It is the fact that this led them by the body of their young chief, just as it lay, stripped and covered with mud, but yet honored by the tokens which told that it had been the object of loyalty to the cause of his country. The absent limb told of recent battlefields, and the breathless body gave assurance that the last sacrifice had been made. The soul of the brave had already had been laid down, and thus was redeemed the solemn oath of fealty to the United States.

To my request for the well-known gallantry of their victim, no feeling for his extreme youth, entered into the thoughts of those accustomed to deeds of blood, and the sight of the mournful sight were the relics of the noble dead permitted such repulture as a hasty grave could afford.

But it remained for the chivalry of Richmond to crown the work of the forged document. But presently it came to the upper chivalry at Richmond that one of the leaders of the expedition was left behind, and that he was the probable consequence of the success of the undertaking—for they had every reason to believe that the enterprise against the prisoners would respect no person—they sought a pretext for the meditated villany on the body of Colonel DAHLGREN by the production of a paper, which, while the original concoction was so recklessly executed that the shameful deceit could not fail to be apparent to any one having the least knowledge of the style of the writing of educated men.

So the remains of the heroic dead were torn from the grave, mutilated in the most shocking manner, and the fragments and gaze of a mob; then hurried away, in the obscurity of the night, to some nameless spot, whence it was intended that no trace should ever be recovered.

There was an ingenuity in this contrived villany from which the mind recoils with horror.

Contrast the last days of the corpse of the Union soldier—his devotion to it, even to death; his calm, undaunted courage, graced by every military virtue; his fidelity to the last to his duty and official officers, so ily required; contrast these with the craven cowardice of the ruffians who beset him with their deadly weapons, and the fiendish barbarity of his body, and worse than these, the crimes of the higher chivalry, who made use on the dead as such only could have conceived. Contrast all this and it were not hyperbole to say did Ulric DAHLGREN—so true, so gentle and so brave—than to live as those do who, to destroy his fair name, have gratified and have not assassinated—have forged a lie, to their eternal infamy.

It was not only in the dark hours of closing life that Colonel DAHLGREN's admirable qualities were exhibited; his whole life was ennobled by the presence of every trait that adorns the hero.

He had not completed the first year of his manhood when he was so busily accumulated; yet by his bravery and discretion on many a battle field he had won the high but well deserved rank of colonel of cavalry. That commission was transmitted with the following letter:

WASHINGTON, July 24, 1863.

DEAR SIR—Enclosed you have a commission for colonel, without being appointed by the President, Secretary of War, &c. Your past and meritorious service has, I think, entitled you to this distinction. Your commission will be forwarded to you as soon as completed by distinguished merit such as yours. I hope you may properly receive it, and that you may prize me to the instrument of your further advancement in the service.

With great regard, I am yours truly,

EDWIN M. STANTON.

Colonel ULRIC DAHLGREN.

He was tall, well built and graceful; his frame gave every promise of future strength, but as yet lacked the development of the matured man, and was divested of all spare flesh by a life of constant activity in the saddle.

To the casual observer he appeared like a very young and very difficult man; but upon closer observance, a moderate talker and always of pleasant mood. But beneath lay a character of the firmest mould, a constancy of purpose never to be diverted from its object, courage that was never disturbed by any danger, patient of the purest nature habitually in exercise, producing a course of life unblemished by the least meanness—a good son, a warm friend, dutiful alike to God and man. I can now look back over the whole of his young life and declare that in no instance did he ever fail in the most respectful obedience to my least wish. A more perfect and lovely character I cannot conceive.

His mind was of no common order, and he had been earefully educated. He was well read in the classics, a good mathematician, and expert with the pencil. He delighted in the study of languages, and was excellent in music. As a horseman not surpassed, but was a bold, practiced and elegant rider.

As a soldier his conception was quick, his judgment deliberate, but in execution rapid as lightning. No one would have supposed that he was the same unthinking youth he might have passed in a throng. Having spent so much of his leisure time with me in the Ordnance Department, he had a thorough knowledge of artillery and gunnery, which was often turned to good account in the field.

His courage was not of that rampant character so troublesome to friend as foe, but came forth, as it certainly at the first sign of danger.

His religious views he added a deep sense of religious obligation, having been carefully trained by a departed mother to the church and the Sunday school. But in this, as in many other respects, he was not demonstrative.

When apparently at the verge of death from a wound, and reminded of the danger, he smiled, said that he had long since made his peace with God, asking forgiveness of him and commending his soul to his Maker.

Thus he passed away this bright young life, at least in promise.

Nor is it only a father's love and affection that prompts such praise, as all who knew him will confirm.

Full testimony has been borne to his record in the school from which he had withdrawn but a few years before, and in the city of his birth and early life, where his loss has given lasting regret.

The large number of letters which I have received from those who knew him at school, and his story means me that my son appeared to others as he appeared to me.

One writes: "I had a great regard for him," another, from an entire stranger, who writes thus:—

* * * the impressed young DAHLGREN, with whom it had been my pleasure to be associated in the same recitation-room, and who was while he was in the city recovering from the amputation of his leg. He was a favorite with all his companions, was studious, and received marked attention both from military men and citizens. * * * I have often heard him spoken of in the highest commendations—the more so, perhaps, from the vivid impression which his noble bearing and gallant bearing had made upon the public mind and entered upon his fatal expedition. It was at one of Speaker COLFAX's receptions that I had the pleasure of being introduced to him, and had the pleasure of introducing quite a number of our friends to him. His gentlemanly politeness and affability impressed me favorably. I soon afterwards heard of his wounds with his leg, and of the operation by those who conversed with him. His fortitude and patience under suffering excited the admiration of all who saw him, but who had never met him, were ready to say that he was a brave man. * * * I have no doubt he was a conscientious young man. To some of those it was my privilege to say that I had met him, I have said that I was sure he was a Christian, as I was forced to his conversation at COLFAX'S. He whole soul seemed to be engrossed with the importance of his enterprise, and in the conversation with every one, however unconnected, would soon be turned to the subject uppermost in his mind. Everything he engaged for the assistance of its forwardness against the determined efforts of would-be friends, and with a number of gentlemen to whom he introduced to him he said, in a pleasant but earnest manner—'Gentlemen, I am engaged in a work of duty, and I expect to die in the Union Army and fight for my country. It is their duty, and ought to be the duty of every man to sustain a country that has done so much for us.' I would be in a high degree gratified if I could be of any service to you in this matter. * * * The considered conscience and sincere inspiration which his reference to our country's flag indicated, I have no doubt, was the case. * * * That all is a subject of deep sorrow that one so promising and so fully devoted to the cause of his country should thus early in life be cut down in such a ruthless manner."

Another writes from the social circle. Another letter shows him in the perilous hours of the expedition that preceded his death—from an officer who was near him at the time:—

His playful pleasantry and active control and inspired his companions with confidence and good humor. He was assured that he was intended, and as I rode beside him it was with the greatest pleasure that I observed the ease with which he controlled and managed his horse. (The column was now near Richmond.) We advanced, and as we approached the enemy's outposts, his skillful management of his steed, the enemy's fire very annoying; but I stopped in admiration of the coolness of the young hero, who sat his horse as though he was in a calm, as quiet, as brave, that it seemed to me the veriest coward must have caught the spirit of him.

When we gave the order to retire, he detailed our regiment for rear guard, and with the same coolness and courage with which he went up, but not to let the enemy drive us on the column. He then rode beside me. In the darkness I missed him, and saw him no more.

The last last letter he ever wrote was to myself. It was from the camp, just before putting foot in stirrup and about to start on the ride that terminated in his death-ride. He directed that it should only be given to me in the event of his not returning. He spoke of the danger of the undertaking, but said he would be ashamed to show his face again if he "failed to go in it." He expressed himself as fully able to do it, and his whole letter breathed the spirit. "I shall do it or return there is no better place to give up the ghost."

Such was the brave and generous spirit whose light has been so early quenched. That of which I myself have sufficed to rate the vengeance even of traitors. The shocking cruelty that has been exhibited in the mutilation of the dead, and the forgery of a forgery to justify it, will in the end recoil on the infamous ruffians.

Of the forgery I have only to say it has been as nothing. He had passed away to his final account, leaving behind him a name far beyond the reach of the chivalry. There are those left, however, whose pride and pleasure it will be to vindicate his fair fame, and he will be remembered as a young patriot of spotless life and purest purpose; honest, true and gentle, dutiful to every obligation, unselfish and generous to a fault; an undaunted soldier of the Union, who never struck a blow except at an armed enemy, but carefully and kindly respected the claims of defenceless women and children; an accomplished gentleman, a sincere Christian, and a martyr to the cause of his country from the almost fatal illness consequent on losing a limb in battle.

went forth to brave every hardship in the hope of aiding in the release of our captive soldiers from the dungeons of a merciless enemy, who for this treated his dead body with savage ferocity and hesitated not to forge his name.

Peace to the ashes wherever they rest; the balm on the young and fair brow of ULRIC DAHLGREN will never fade while there are men and women in the land to keep them green. JNO. A. DAHLGREN,

Rear Admiral, commanding United States South Atlantic Blockading Squadron.

THE ORGANIZATION OF THE ARMY.

AN experienced army officer sends us the following copy of a letter, addressed in October of last year to the chairman of the Military Committee of the Senate. Its suggestions will interest many of the JOURNAL'S readers:

Honorable Henry Wilson, U. S. Senate:

SIR:—Feeling a deep interest in the large standing Army which our country must have when this Rebellion is over, as well as in what such army shall be, I beg leave to make to you, who have so much influence in the matter, a few suggestions. I deem it advisable to commence organizing our future Army now. The time may be short in which to select the officers, the better, I should suppose, the selection would be.

Let Congress pass an act increasing the regular Army of the United States by thirty, forty, or fifty regiments—as many as may be deemed necessary.

Let these regiments be organized as follows:—For company officers (lieutenants and captains), let each general commanding an organized force in the field recommend to Meritorious officers of regulars or volunteers, and send them before a board composed of five commissioned officers, detailed by the general commanding the army in the field, from which the regular officers under his command. The board to be in session for six months, adjourning when there be not business before it, and meeting again on the call of the senior officer of the board; the commanding general having no power to remove members of the board, nor to put any one on after the board has been once formed, excepting to fill vacancies occasioned by death or by authority, over which he has no control. At the end of the six months, the general commanding may detail a new board.

The board before described and detailed will examine the candidate's qualifications, both as to general and military character in relation to each case to the commanding general, who will forward such favorable reports to the Secretary of War, for the action of the President of the United States.

For field officers (majors, lieutenant-colonels, and colonels), let the brigade commanders recommend to the division, the general commanding the separate army or department to which they belong, endorsed by the general-in-chief of the Army, and appointed by the President, by and with the Senate, in City, composed of not less than five general officers. Let the proceedings in each case be carefully reported upon by this board for forwarded to the general-in-chief, to be laid before the President of the United States for his action. Let the President, in making his selection, be governed by the new regiments from those examined and approved of as above described, and let the officers thus selected and assigned to the new regiments be informed that their appointments but remain in their old regiments, or corps, unaffected in rank or pay by the assignment, until the President of the United States orders their regiments to be mustered out.

My plan is, to have no men enlisted for these regiments until the Rebellion is crushed, and the Rebellion is crushed when, which I suppose, will not be until the Rebellion is quelled, and the volunteers about to be disbanded. Then, you see that the organization of the regiments may be rapid, whatever to the Government until its services are required.

I prefer regular officers for the lower board for more than one reason. 1st. I believe that there are a great many of volunteers who are deserving of appointments in the regular service who would prefer to remain where they are efficient. 2d. I consider that regular officers as a class are more competent than volunteers to judge and decide upon what qualifications are required for officers of the next even below.

I would also specify that the board to be assembled in Washington be composed of regular officers, did I know such a board could be assembled without delay to the service. The War Department alone can decide this.

I have supposed that the board for company officers be assembled in the department to which the candidate belongs, for the sake of greater convenience; and that it be composed of officers of the sub-portion of the department of him, because such board either knows the candidate, or has heard of him; can learn his character from his associates, and are thus better able to judge of his merits.

Candidates for the position of field officers will, in many cases, be brigade and major-generals, and a department board could not do them justice.

Should the war continue, those officers of volunteers thus selected and placed in the regular army will serve with a zeal and energy before unfelt. They will feel that they have a position and a character to fight for. As it is now, very many of the volunteer officers are only too anxious to return, when their three years are up, and desire to go through the time of service that remains as quickly as possible.

Where the honor lies, &c.,

FOLLY ISLAND, S. C., October 18, 1864.

THE town of Lavaur, in France where COUNT LAS CASES was born, is to have a statue in memory of the part so faithful friend of NAPOLEON I. The bronze count is to be represented holding in his left hand the "Memorial of St. Helena," and with his right pointing to the island of exile for which the Emperor addressed to him at the moment of his dismissal. The bas-relief represents—one, the count writing under NAPOLEON'S dictation with three word: "You will be the Scribe of St. Helena, and no one will be able to write of me and my doings with more fidelity or truth than you memoirs;" another represents English soldiers forcing the count from LOGGWOOD and carrying him into captivity. The second description is from a letter of a lady in which they were carrying you off, and it seemed to me as if Inhabitants of the South Sea Islands were dancing round

"the victim they were about to sacrifice." The letter passed on this to the general's bronze le—

"Your conduct at St. Helena has been, like your life, honorable and without reproach. I owe to both my esteem. "Boast of the fidelity you have shown me, and of the affection I bear you. Receive my embraces, and the assurance of my esteem and affection. NAPOLEON."

DEC. 11, 1816.

THE CHAIN-PLATING OF THE KEARSARGE.

MR. FREDERICK MILNES KNOX, in a pamphlet published in London, giving an account of the engagement between the *Alabama* and the *Kearsarge*, has prepared from information furnished to him "by the wounded and paroled "prisoners of the Confederate privateer *Alabama*, the officers of the United States sloop-of-war *Kearsarge*, and citizens of Cherbourg," states the following facts in regard to the chain-plating of the *Kearsarge*:

The chain-plating of the *Kearsarge* was decided upon by this writer. The vessel lay off Fayal towards the latter part of April, 1863, she took out her chain-plating, which had never, named the *Juno*. The *Kearsarge* being short of coal, and fearing some attempts at opposition on the part of the Portuguese, Mr. Thornton, Lieutenant-Commander JAMES S. THORNTON, suggested to Captain WINSLOW the advisability of hanging her spare anchor-cables over her sides. This was perfected her sliding cables. Mr. Thornton had served on board the flag-ship of Admiral FARRAGUT, the *Hartford*, when she was ordered past the Rebel fort the forts of the Mississippi to reach New Orleans; and he made the suggestion at Fayal through having seen the advantage gained by the same means. We have got the following extract from the log-book of the *Kearsarge*:—

HOSPS BAY FAYAL (May 1st, 1863).

From 8 to Merid. Wind S. S. E. & S. W. Moderate & fresh; pd. loaded, and fixed chains; fired 11 XI-inch shell. Commenced coaling; employed in getting chain on board. Mr. THORNTON, Lieut. R. H. SWASEY, Acting Master.

This operation of chain-mooring took three days, and was effected without assistance from the shore and at an expense of material of seventy-five dollars (£15.) In order to make the chain-plating effective, the chains were passed over with inch-deal boards, forming a case, or box, which stood out about 12 inches from the vessel's sides. This box would certainly excite curiosity in every port where the *Kearsarge* touched, and no register was made as to what this boarding covered. The writer has been perfectly cognizant of the entire affair, notwithstanding his shameless assertion of ignorance, for he spoke about it to his officers and crew openly at the time of the fight, declaring that the chains were only attached together with rope-yarns, and would drop into the water when struck with the first shot. I was not aware that the chains were to be hung up in the naval hospital at Cherbourg.

The chain-plating, while of value for defence of this chain plating, it was only struck once during the engagement, so far as I could discover by a long and close inspection. Nothing was found to be damaged except the one that it was struck twice, whilst others deny that declaration: in one spot, however, a 32-pounder shot broke in the deal covering and cut the bight of the chain, the ends of which fell into the water. The remainder is in my possession, and proves to be a very ordinary 24-inch chain. Had the shot been struck by the rifled 12-pounder shell of 8 or 9 32, the result might have been different; but in any case the chain-plating was of no use, as nothing save one link of the vessel's side was hit five feet above the water-line and nowhere in the vicinity of the boilers or machinery. Captain SEMMES is reported to have said that the portion of the chains so little worth, for he might have adopted the same plan before engaging the *Kearsarge*; but he confined himself to the simple fact that he had fired a few shells direction to his boilers, which, in addition to the 200 tons already in his bunkers, would make him pretty low in the water. The *Kearsarge*, on the contrary, was deficient in her coal, and she took what was necessary on board during my stay at Cherbourg.

The quantity of chain used on each side of the vessel in the main-tallied-of amounting is only 120 fathoms, and it covers a space amidships of 60 feet in length, by only 8 feet 2 inches in depth. The chain, which is single, not double, was and is stopped to eyebolts with rope-yarn and by nine thirds. (These were the only parts touched by the chain and the ship's sides). Is it reasonable to suppose that 960 feet of chain (the thickness of the links of the chain) could offer any serious resistance to the heavy 68-pounder and the 7-inch Blakely rifle of the *Alabama*—the former of which weighs nearly 9,000 pounds? What then becomes of the mistaken remark of the *Times* that the *Kearsarge* was "provided, as it turned out, with some protection against shot and shell?" Is there a declaration that she was "iron-clad?" The Career of the *Alabama* is ended by the chain-plating, says:—"Another advantage arising from the chain was that it kept the very low in the water, so low in fact, that the heads of the men who were firing could be seen from the deck of the *Kearsarge*'s deck." It is simply ridiculous to suppose that the weight of 240 fathoms of chain could have any such effect upon a vessel of the dimensions of the *Kearsarge*, in addition to the cable itself was part of the ordinary gear of the ship. Further, the *Kearsarge* was deficient in 70 tons of coal of her proper quantity at the time of action, while the *Alabama* had 350 tons on board.

THE WRONG SIDE.—The following extract from a letter, dated Havana, June 24, gives an account of the attack made by a United States vessel on the British ship *Lily*, at Galveston. The writer was on board the English vessel at the time, and his letter is published in an English journal:—We left Matamoras at 12 M., June 6, for Galveston, en route for Bermuda, to join the Commander-in-Chief, leaving the *Shannon* at Matamoras and *Rosalie* going to Tampico for coal. We had not got well out of sight of land in the Gulf of Mexico for the North. On the morning of the 11th, running in for Galveston, we observed a steamer standing out from the land, but as usual cannot tell what she was for half an hour. The weather clearing up, we saw three steamers steering for us under United States colors. We had our English blue ensign and pendant flying, and as they neared us we used our engines to communicate if they wished, as we did the last time we visited this place. Finding they took up their positions on our bow, beam, and quarter (their men at quarters cleared for action, and guns bearing on our ship), and not appearing anxious to speak us, we proceeded under full speed together for Galveston bar, about eight miles distant. Shortly after the gun-vessel on our starboard quarter fired a shotted gun to leeward and then another across our bows. We used engines to allow her to range ahead, and finding still she did not ha ha us, we said, "This is her Britannic Majesty's ship *Lily*, wishing to communicate with the senior officer of the United States blockading squadron off the Galveston." To reply to our hail she answered, "This is the United States ship *Princess Royal*. I will show you the way in." We then proceeded to the bar, where the three gun-vessels for Galveston. After we anchored the captain communicated with the senior officer of the blockading squadron, demanding an explanation of his conduct in firing at what he took to be an arms, the bows of a British ship-of-war, the nation being at peace with the United States. The reply was that the British ship *Princess Royal* come on board, and remained an hour with our captain. In the afternoon he sent his reply, which I believe was very conciliatory, solemnly disavowing any and all intention of insulting the flag of her Britannic Majesty. It all occurred through their fully believing us to be the Confederate vessel *Princess Royal*, now cruising in the West Indies, and the commander of the *Princess Royal* not being aware that the *Lily* had been sold and was in our service. As the *Florida* had run through their blockading squadron a Mobile under the English flag and precisely similar circumstances, he took the same view of the case as we did in trying to; but he should have hailed us first, as he was not more than 150 yards distant. We are not surprised at it, as many years ago the *Tartarus* has taken the *Pandora*, and every person who has seen both ships says we are sister vessels in hull and appearance. The *Florida* will be detained to another station, to prevent thus unpleasant mistakes occurring.

THE HOSPITALS OF THE FIFTH CORPS.—A correspondent of the New York *Herald* describes a visit to the hospitals of the fifth Corps:

To-day I spent several hours visiting our corps hospitals. Leaving trenches and batteries and earthworks and the noise of musketry and artillery behind us, we rode slowly following nearly three miles a winding road, we reach the hospital ground. The same site to wow occupied as that chosen directly after our arrival at the front. It was well located to be found, in the edge of a thick pine forest, away from the dust—the ground elevated, a creek running near, and a spacious open field for the erection of the hospital tents of six. weeks have greatly improved the natural advantages, and now field hospitals, with their convenient, scattered shapes, developed springs, dug wells and cleared the ground of the the tents from time to time, till further improvement can hardly be suggested. The hospitals are in charge one for each division of the corps, besides one for the artillery brigade. These hospitals, all under the direction of Dr. MILLER, MAJOR, and staff, are in the corps, each carefully separate, and under the care each of the surgeon-in-chief of the respective divisions. Though in appointments and extent they are alike, they differ in the style of permanent army hospitals at Hampton and places at the North, as field hospitals in this change comprise with any that this war thus far has developed. It would occupy too much space to describe these hospitals separately. Each one is arranged upon the most approved principles, and conducted by the wounded and sick, comprising what are known as the Army large hospital tents, and arranged in parallel rows, the operating tents, convalescent contingents, and connected with each the usual dispensaries, dining tents, kitchens, including labories, offices, officers' quarters, &c. Erecting each row of hospital tents a broad street is left between, throughout the grounds, are artificial booths, affording additional shade to the immediate surrounding trees. Most of the beds are raised from the ground and many furnished with comfortable straw mattress. There are bountiful supplies of medicines, hospital stores and delicacies for the sick, which is obtained from City Point, and luxuries in the way of lemons, jellies, canned meats and other articles of light and nourishing food. The inspection of the Sanitary and Christian Commissions, each of which organizations has a depot here. At the present time there are about three hundred and fifty-five wounded in the five hospitals.

THE UNITED STATES MILITARY MAINE CORPS.—Colonel Zulin, the new Commandant of the Marine Corps, has appointed as the late Colonel Harris, has assumed the duties of his office, and is now at Headquarters in Washington.

The large number of retirements, deaths and promotions, prior to the adjournment of Congress, caused many vacancies and chasms in the Marine Corps. The latter is now partially filled by the President in the appointment of the following young gentlemen as 1st Second Lieutenants—George Wells Ohlen, New York; John G. Reid, Pennsylvania; Indiana; Kent B. Davis, Delaware; A. S. Taylor, New Jersey; E. R. Robinson, New York; E. R. Banning, New York; J. K. Ward, D. C.

Among the changes that he announced are:—

Lieutenant-Colonel C. G. Kittridge, to be detached from Marine Barracks, Cairo, and assigned to Mare Island, California.

Major C. G. McCawley, from Navy Yard, Philadelphia, ordered to Marine Rendezvous, else Captain James Lowis, ordered to command at Marine Barracks, Cairo, Illinois.

Major T. Y. Field, from Norfolk Barracks, ordered to Navy Yard, Washington, else Lieutenant Colonel J. N. Jones, ordered to command Portsmouth Barracks, North Carolina.

First-Lieutenant J. C. Saltmarsh, ordered to Marine Guard, United States frigate *Sabine*.

THE War Department has granted Brigadier-General J. Warren Keifer the brevet rank of Major-General in the charges on which he was recently dismissed the service.

ARMY AND NAVY PERSONAL

GENERAL Sickles and Staff arrived at Washington last Saturday.

GENERAL Kilpatrick has resumed his command in the Army of the Cumberland.

IT is understood that Major-General Hooker will not be assigned to any command at present.

WILLIAMS College, in Massachusetts, has given the honorary degree of LL. D. to Major-General Butler.

JUDGE-ADVOCATE-GENERAL Holt arrived in Washington last Saturday morning, after an absence of three weeks.

COLONEL Ebenezer W. Pierce, of the 29th Massachusetts, has arrived at his home in Freetown, Mass., in a very low state of health.

MAJOR-GENERAL Brooks, who recently resigned his commission in the United States Army, has been stopping in Pittsburgh, the guest of Brigadier-General Negley.

COLONEL E. W. Rice, of the 7th Iowa, commanding 1st brigade of Brigadier-General Osse's division, 16th Army corps, has been made a brigadier-general.

BRIGADIER-General Payne has been assigned to the command of General Hincks' division of colored troops, and has proceeded to Chickahominy and assumed command.

COLONEL Chapman, of the 3d Indiana Cavalry, and Colonel McIntosh, both commanding brigades in Sheridan's cavalry, have been appointed brigadier-generals.

COLONEL John Boyle, Adjutant-General of Kentucky, has resigned his office and removed from Frankfort to Louisville to open a law office as a lawyer.

BRIGADIER-General Robert O. Tyler's friends in Hartford have subscribed a handsome sum of money to purchase for him a sword, and the Ames Company, of Chicopee, will make it.

BRIGADIER-General John R. Brooke is fast recovering from the effects of his severe wound, received in the battle of Cold Harbor, Va. He is still, however, unable to join his command.

BRIG.-GENERAL B. D. Carr, lately commanding at Yorktown, has arrived at Washington, and taken command of a division of colored soldiers across the Appomattox from Point of Rocks.

THE President has removed Colonel Bomford, Provost-Marshal-General of Pennsylvania, and appointed Captain Dodge, Mustering and Disbursing officer of that State, to fill the vacancy.

IT is understood that the sentence of the court-martial in the case of Surgeon-General Hammond is one of unexpected severity, while the case is that it suspends him from rank and pay for three years.

THE colonelcy of the Ninth New York Cavalry, made vacant by the death of Colonel Lansing, who fell in the fight at Trevilian Station, has been filled by the promotion of Lieutenant-Colonel Nichols.

BRIGADIER-General Jos. C. Sullivan has arrived at Cumberland and relieved Brigadier-General Kelly. He has just returned from a furlough of twenty days. The General will be assigned to a command.

COLONEL J. Egbert Farnum, of New York, has been ordered to take command of the Eleventh Reserve Corps regiment, and to report to the commanding officer at Point Lookout, where he will remain for the present.

BRIGADIER-General Stoneard is now at his home in St. Albans, Vt., on sick leave. He is suffering from a recent wound in the head, as well as from the effects of other wounds, and is much reduced in flesh and strength.

CAPTAIN Fuller, superintendent of telegraph of the Department of Gulf, has been appointed to a similar position in the Department of the Gulf. Hereafter he will have supervision of both departments, with headquarters at New Orleans.

IT was extensively published a few weeks ago that Lieutenant Maunsiler, Battery K, First United States Artillery, was killed. It was said that he was killed at Resaca Station; but it is now ascertained that he was wounded and is a prisoner at Richmond.

THE President has accepted the resignations of the following officers:—Captain Charles H. Lewis, 16th U. S. Infantry; Captain Lewis Wilson, 19th U. S. Infantry, Captains G. R. Vincent, 2d U. S. Infantry, and Lyman M. Kellogg, 18th U. S. Infantry, have been reinstated.

FIRST Lieutenant J. B. Fay, Fifth New Hampshire, for nineteen months past Acting Assistant Provost Marshal at the depot for stragglers, etc., in Concord, N. H., has been relieved from his duties and ordered to rejoin his regiment. His duties at Concord will be performed by Major J. H. Whittlesey, U. S. A., military commandant.

THE officers of the Second Brigade, First division, Cavalry corps, Army of the Potomac, as a token of their regard and esteem, presented Colonel Devlin a splendid horse and accoutrements. The presentation was formally made by Colonel Gamble, of the Eighth Illinois, and was responded to in a happy manner by the recipient.

THE officers of the French steam frigate *Guerriere*, now lying in New York harbor, were entertained by the officers of the Navy at the Naval Academy, Annapolis, on Wednesday last, and took a collation at the Naval Academy Hotel. The band at the 15th U. S. Infantry was ordered to the Academy grounds, and discoursed some fine music during the evening. A grand supper constituted the principal feature of the evening.

IN the case of Colonel W. M. Grosvenor, sentenced by general court-martial, convened at New Orleans, La., May 2, 1864, to be dismissed the service, an examination of the record was ordered by the President of the United States, who, upon the report of the Judge-Advocate-General, has ordered that the disability be removed on the ground that the sentence appears not to be sustained by the evidence.

A NEW York paper speaks of Brigadier-General R. O. Tyler as one "who has a high rank, a splendid horse and a foot either at Spottsylvania or the Wilderness." General Tyler received a severe wound in the Wilderness. General Harbor, on the 2d of June, but did not lose that important member. Under skilful treatment the foot has been saved, and although the process of recovery will necessarily be slow, there is a prospect that General Tyler will not even be lame.

THE proceedings in the case of Brigadier-General E. A. Wild, who was tried for disobedience of orders by court-martial, convened by order of Major-General W. F. Smith, have been submitted to Major-General Butler, and disapproved. It appears that prior to the sitting of the court General Butler had issued an order requiring that a majority of a court-martial convened to try officers commanding colored troops should be composed of officers of colored troops. In this case, the composition of the court did not comply with that order, and the President, upon the facts in the case, and merits of the case, announced that General Wild should be released from arrest and returned to duty.

A COMMUNICATION has been received from the general-in-chief of the United States Army, Brigadier-General William Birney, U. S. Volunteers, has been relieved from duty in the Department of the Gulf, and ordered by Major-General Foster to report to Major-General B. F. Butler at Fortress Monroe. Brigadier-General John P. Hatch, U. S. Volunteers, is assigned to the command of the District of Florida, to relieve Brigadier-General Birney. Brigadier-General A. E. Potter, U. S. Volunteers, is assigned to the command of the District of Hilton Head, and to relieve Brigadier-General Hatch. During the temporary absence of Brigadier-General H. W. Benham, Brigadier-General Potter will retain command of the District of Beaufort, in addition that of Hilton Head.

ADDITIONAL arrivals in New York during the week up there have been at the Astor House, Colonel E. W. Peirce, Twenty-ninth Massachusetts; E. W. Gantt, Arkansas; Lieut. Meredith, U. S. A.; Major Hall, Massachusetts; Thirty-second Massachusetts; Captain P. R. Stetson, U. S. Volunteers, and A. Budd, U. S. N. At the Brevoort House, Major-General H. W. Slocum, Major-General Q. A. Gillmore, United States Army. At the St. Nicholas, Brigadier-General W. H. Ludlie; Dr. S. T. Elliott, Army of the Potomac; Colonel Hall, Fifty-first Illinois, and Thirty-second New York Volunteers. At the Metropolitan, Capt. Russell, 4th U. S. Cavalry; General McClellan's staff; St. Louis; Major John Dean, of Missouri; together with Colonel E. R. Crider, Colonel T. G. Grover, Colonel H. L. Burnes, and several officers of the Regular Army.

CAPTAIN W. H. Harris, U. S. A., Chief of Ordnance of the Ninth Corps, having been ordered to report for duty at Bridgeport, Ala., to General Rousseau, has issued from a general order, dated August 1st, in which he says that "the commanding general regrets the loss of an officer distinguished for his zeal, ability and devotion to the welfare of his department. In the campaign of this corps in East Tennessee, and during the present operations in Virginia, while the duties have been often under circumstances of the utmost difficulty, the important duties of his position, his usefulness has never been confined to its limits, but he has always been forward, when the occasion required, to assume with alacrity and courage the office of an aide. The commanding general parts with him with the highest appreciation of his services and respect for himself, and his best wishes for his future welfare."

BY order of the Adjutant-General, Army of the Potomac, the following-named officers have been dismissed the service:—Captain A. M. Chantell, Co. D, 7th R. I.; Second Lieutenant W. H. Hammond, Co. K, 2d Connecticut Troops; First Lieutenant William Thomas, Co. D, 2d. Md. Veterans; Captain James Blaisdell, Co. K, 9th N. H.; First Lieutenant Charles H. Ford, Co. B, 9th N. Y.; First Lieutenant Judson Knickerbocker, 14th N. Y. Artillery; Captain B. B. Kaufman, 48th Pa. Veterans; First Lieutenant Alex. Hall, Co. K, 1st U. S. Colored Troops; First Lieutenant James Smith, 36th N. Y. Militia; Second Lieutenant Michael Gallagher, 1st U. S. Cavalry; Lieutenant Henry C. Powell, 1st Mich. S. S.; Captain Hooker A. De Land, 1st Mich. S. S., and to be sent to Dry Tortugas; Major James E. Mead, 1st N. Y. Dragoons; and First Lieutenant James H. Donnelly, Co. D, 3d N. J. Cavalry.

BY order of Major-General Hunter, dated July 29th, the following officers have been appointed aides at the convent battle of Winchester, and during the subsequent retreat, and for spreading false and exaggerated reports of the losses of the army, and for creating a panic-panic in the minds from the military service, subject to the approval of the President:—Captain John L. Hicks, Thirteenth New York cavalry; Captain Joseph Lentz, Eighty-second Pa. and Second third Ohio volunteer infantry. Captain D. S. Caldwell, One Hundred and Forty-third Pennsylvania volunteer infantry; Captain J. H. Spencer, Ninth West Virginia infantry; Captain John Johnson, Twelfth Pennsylvania cavalry. First Lieutenant Wm. Wilson, Fifth New York Lincoln cavalry. First Lieutenant William A. Williams, One Hundred and Forty-third Ohio volunteer infantry. Lieut. H. Hunt, First New York cavalry. Second Lieutenant Jones, Thirteenth Pennsylvania cavalry. Assistant Surgeon U. S. Newsom, Ninety-first Ohio volunteer infantry. Assistant Surgeon W. T. Corbin, Second West Virginia cavalry. Captain D. E. Gross, Twentieth Pennsylvania cavalry. Major J. H. Thorp, Twentieth Pennsylvania cavalry.

COMPILATION OF MILITARY LAWS.

LAWS IN RELATION TO COLORED TROOPS.

The President of the United States is authorized to employ as many persons of African descent as he may deem necessary and proper for the suppression of this rebellion, and for this purpose he may organize and use them in such manner as he may judge best for the public welfare.—*Sec. 11, July 17, 1862, Chap. 195.*

The President is authorized to receive into the service of the United States, for the purposes of constructing entrenchments, or performing camp service, or any other labor, or any military or naval service, for which they may be competent, persons of African descent; and such persons shall be enrolled and organized under such regulations, not inconsistent with the Constitution and laws, as the President may prescribe.

When any man or boy of African descent, who by the laws of any State is held to service or labor, shall enter into the military or naval service hereby authorized during the present rebellion his lawful war or borne arms against the United States, or aidered to their enemies by giving them aid or comfort, shall render any service to which he is permitted to be put hereunder and shall faithfully service to United States), his mother, and his wife and children, shall forever thereafter be free, any law, usage, or custom whatever to the contrary notwithstanding: *Provided*, That the mother, wife and children of such man or boy of African descent shall not be made free by the operation of this act except where such mother, wife and children owe service or labor to some person who during the present rebellion has borne arms against the United States, or offered to their enemies by giving them aid and comfort.—*Sections 12 and 13, July 17, 1862, chap. 201.*

All persons of color who have been or may be mustered into the military service of the United States shall receive the pay, clothing, clothing, arms, equipments, camp equipage, rations, medical and hospital attendance, pay and emoluments, other than bounty, or other relief, to which white troops mustered into the service of the United States of the arm of the service, from and after the first day of January, eighteen hundred and sixty-four and that every person of color who shall hereafter be mustered into the service of the United States as aforesaid shall be entitled to receive and to the different States of the parts of the United States, according to their number of Indians.

All persons enlisted and mustered into service as volunteers under the act, dated October seventeen, eighteen hundred and sixty-three, after three hundred thousand volunteers, who were at the time of enlistment actually enrolled and subject to draft in the State in which they volunteered, shall receive from the United States the same amount of bounty without regard to color.

All persons of color who were free on the nineteenth day of April, eighteen hundred and sixty-one, and who have been enlisted and mustered into the military service of the United States, shall, from the time of their enlistment, be entitled to receive the pay, bounty and clothing allowed to such persons by the laws existing at the time of their enlistment. And the Attorney-General of the United States is hereby authorized to determine any question of law arising under this provision. And if the Attorney-General aforesaid shall determine that any such person or persons are entitled to receive the pay, bounty, or clothing, in addition to what they have already received, the Secretary of War shall make all necessary regulations to enable the pay thereof to be made to the persons entitled thereto with such determination.—*Sections 3, 5 and 4, June 15, 1864.*

No person of African descent shall be employed who have been, or who may be hereafter, killed, or who have died or may hereafter die of wounds received in battle, or who have died or may hereafter die of wounds received in the service of the United States, and in the line of duty, shall be entitled to receive the pensions now provided by law, without other proof of marriage than that the parties had lived together as husband and wife for one year or more and had together as such for a definite period, next preceding the soldier's enlistment, not less than two years, to be shown by affidavits of credible witnesses, and the marriage shall be duly recorded in the application as free persons: *Provided further*, That if such parties resided in any State in which their marriage may have been legally solemnized the legal evidence shall be required.—*Section 13, July 4, 1864.*

NATIONAL SANITARY FAIR.

In view of the glorious and noble efforts of the "Sanitary Commission" in aid of the soldiers of the country, in this her hour of peril, in which the Christian Women of the land have borne so holy and earnest part of an eagerly deserving cheer—yea, the solace, succor, and sympathy of the whole people, the Sanitary Commission is to be therefore proposed to make an effort in their behalf, by gratifying a desire which has been expressed by many of the soldiers within that brave number, they may enjoy the added satisfaction that their exhaustless efforts are appreciated and applauded by the grateful people who are desperate in this way to express their interest in their welfare.

The Fair will open on the second Monday in April, 1865, and is to continue for a week, and is therefore made an appeal to the people to aid in the noble work, that it may be a good cause by contribution, either of money or articles of taste and value, that the Fair may be a success, so that the sum may only be brought before the public, to enlist the sympathy and co-operation of all.

APRIL 19, 1865.

The Committee ask the co-operation of all patriotic citizens and all of the objects of the accompanying circular.

It may not be generally known that, according to the necessary policy of the Sanitary Commission, that the Fair should be for women or incentive disease, can only remain a limited time in the hospitals and camps, and then according to their strength, return to their service.

It believes therefore that very many of the invaluable class of women who have been so long and so faithfully engaged in the field and country, are anxious for relief and rest, and that they only need to be assured of support—to those whose constitutions are shattered, a pension, a support, or a home for themselves, and to those who are disabled by wounds, an entire sufficiency for the following years of their life. It is proposed that we shall be more opportune to start the noble charity then one more remote; there is no time to be lost according to the number of those who have been in camp, while other portion of our fellow citizens have been in the field, and to keep alive the spirit of love for the country, to come forward and contribute liberally—to the rich from their abundance—to the poor according to their ability—to all a generous sympathy.

To those earnest and self-sacrificing women who are keenly alive to very demand of suffering humanity, an appeal of the kind has only to be made to secure a response worthy of them, and the object for which it is asked; and it is sincerely believed that a hearty co-operation will be given in every State and town, and that the means to establish one of the noblest and most necessary charities of our country will be secured.

NOTICE TO CORRESPONDENTS.

The Editor of this Journal will always be glad to receive from officers in the two services, correspondence and general communications of a character suited to its columns. It is necessary that the name of the writer should, in all cases accompany his communications, not for publication, but as a guarantee of good faith.

Officers are especially requested to give us early notification of all personal matters of general interest; of the assignment of couples of constellations to young officers; and military and naval events.

The Editor will, at all times, be pleased to respond, in these columns, to enquiries in regard to tactical and other matters.

The subscription price of THE ARMY AND NAVY JOURNAL is FIVE DOLLARS a year, or THREE DOLLARS for six months, invariably in advance. Remittances may be made in United States funds, or Quartermaster's, Paymaster's or other drafts, which should be at par payable at the order of the Proprietor, W. C. Church.

Subscribers who fail to receive their paper promptly, will please give immediate notice of the fact.

Subscribers ordering the address of their paper to be changed, should be careful to give their previous address.

The Editor does not hold himself responsible for individual expressions of opinion, in communications addressed to the JOURNAL.

The postage on the JOURNAL is merely seven a year, payable quarterly in advance, at the office where received.

All communications should be addressed to the ARMY AND NAVY JOURNAL, New York.

PUBLICATION OFFICE 59 FARR ROW, THREE BUILDINGS.

ANSWERS TO CORRESPONDENTS.

INQUIRER.—It is customary, for troops to march on dress parade with bayonets fixed. The command to fix bayonets is not given in the formula for parade but drawn in regulations. When marching on parade at "double quick," however, it has been found advisable to march with unfixed bayonets, in order to avoid accidents. In this case, bayonets should be fixed in each company before coming to PARADE—REST.

SUB U. S. O. T.—It is proper for an officer of whatever grade, when in command of a body of men in battle, to assign a guard commanded by a non-commissioned officer, or by the post of a single sentry, to acknowledge the salute from the guard or sentry with his sword. The rule is inevitable that all salutes should be acknowledged, and that officers in command of troops should have their swords drawn.

DEPARTMENT OF THE GULF.—After a battalion is broken into column for inspection, it is proper for commanders of companies to salute the inspector as he approaches to inspect their respective companies. If, however surgeons and hospital stewards are not commissioned officers, and therefore see 22, Act of March 3, 1863, does not apply to them. By paragraph 605, Army Regulations of 1863, ordnance sergeants and hospital stewards are entitled to rank with the ranks; they can, however, be discharged by sentence of a court-martial. They cannot be tried by a regimental or garrison court, unattached, unless by general commission of the proper convening power. Whether the law authorizing that officers may be reduced to the ranks for absence without leave applies to regular officers or not, we cannot say. In U. S. Army Book of Courts-martial " IV. This adjudges does not rank all other lieutenants, irrespective of his date of muster. His relative rank is not affected by his appointment as adjutant.

P. V. V.—Unavailable are non-commissioned officers and are entitled to warrants.

U. S. COLORED TROOPS. In our answer of June 11th, 1864, Gen. and Orders No. 43, A. G. O. should be added instead of 45 as stated. That order is so specific in its language that no reasonable doubt can be entertained that officers of U. S. colored troops take rank in their respective grades according to date of muster, and that the term " shall" is used in the law to express rule in its language that no reasonable doubt can be entertained that officers of U. S. colored troops take rank in their respective grades according to date of muster, and that the term "

without a sight of the enemy. In like manner, a part of AVERILL'S cavalry command was thoroughly jaded, horses and men, by incessant marches, hither and thither, at false alarms, retreating from an army who was not advancing, and pursuing an enemy who was not flying. But if, in addition, the mission of EARLY is to menace the Northern States with his force, so as to keep the Sixth corps at Washington, and to deflect to that region all reinforcements which would otherwise go to General GRANT, it is consoling to reflect that we have numerical strength enough still at Petersburgh for all present purposes.

It is an ungracious task ever to comment on the successful invasion of our territories, while we are carrying on an offensive war against the enemy's capital. Yet it is a task which has often fallen upon our Journals, and, long experience has shown that however logically we prove that the Shenandoah Valley cannot again be ceded to the enemy, the next morning may find him bestriding the Pennsylvania line. We have now recorded our belief that this last demonstration hardly reached the dignity of a raid. But in the light of experience, we would not insure Pensylvania against a genuine invasion before this paper gets to press. There is a gleam of hope in the apparent reorganization of some of the seriously conflicting commands in that region. The first task in the campaign should be the repossession of the Shenandoah Valley.

GENERAL COUCH AND MR. CAMERON.

A NUMBER of vigorous gentlemen, who form a sort of Vigilance Committee at Harrisburgh, styled the Committee of Public Safety, being lately in a state of pardonable excitement about the proximity of General EARLY to their city, and feeling very anxious to do something, concluded, in the lack of anything better, to pray the PRESIDENT for the removal of General COUCH from his command. This modest request was preferred, according to the telegram, through "General SIMON CAMERON"—under which martial title our readers may recognize their former able Secretary of War. Probably he was selected as the mouthpiece of the Committee on account of his wide celebrity as a master of military affairs, and his well-known strategic qualities; with the same of CAMERON would at once recall to President LINCOLN old Cabinet associations and successes, and appeal to him in that way, where he might not be impressed in any other. Though the request thus simply stated may well have required some assurance, the Committee did not stop here, but their leader further advised "the appointment of General CADWALDER to the position of Commander of this Department." As between Major-General COUCH and General CAMERON, of course, there can be no question that the palm of military skill and experience must be awarded to the latter. In like manner, the Committee having given their decision in favor of General CADWALADER, for him, also, General COUCH must lower his lance. Of the former officer, the country knows little, but certainly knows nothing ill. It is enough that he is the style of General to please the Pensylvania Committee, more than the hero of Malvern Hill. But had the substitute nominated been GRANT himself, the chief point of comment would be the cool proposition of a Harrisburgh Committee to turn one General out from his Department, and to select another whom they will have in his stead.

Such a proposition would strike one, considering its source and object, as remarkable at any time. But when it comes in the heat of a campaign, it is still more singular. It would be unpleasant for the military service if this sort of thing were to succeed, and an officer were liable to displacement whenever the majority of an irresponsible club of civilians in one corner of his command could be got to vote to that effect. We sometimes read of civil interference when the Government itself shifts its generals. What, if it had succeeded, should we have called an affair like this?

It added to the perplexity of cis-Pennsylvania observers, that, on or about the very day when the Committee's letter was drawn up, a telegram from this same city of Harrisburgh informed us that:

> The military authorities here are active and vigilant. Major-General Couch thoroughly comprehends the situation, and will certainly use the means at his disposal for the most effective and prompt defence of the people and property within his district.

What more could one ask? Certainly, if this Harrisburgh dispatch were true, General COUCH was doing nothing worthy of being excelled that city. What, then, the difficulty? Turning to a letter from Harrisburgh of one day later date, written to a New York daily newspaper, we learn that: "General COUCH has refused to declare martial law in the city, "although urged to do so by the Committee of Safe"ty, who by that means expected to be able to pre"vent all persons capable of bearing arms from leav"ing the city." Here, then, comes light. And how grievous an offence is disclosed. What! refuse to declare martial law in Harrisburgh! And, worst of all, even "although urged to do so by the Committee of "Safety!" Why, General, how could you? General COUCH might with as much propriety have flatly refused to incorporate the gentlemen of the Committee on his staff, as to thus reject their plan of campaign and the advice they "urged" on him. There was Pittsburgh, also, two hundred miles away, at this moment in a similar forces of excitement. It, also, had a Committee of Safety. Why shouldn't the General take their advice? And the hundred statians on the intervening railroad?—why not appoint all their selectmen to his staff, and declare martial law everywhere?

The fact was, every town in Southern Pennsylvania imagined it was towards that particular locality that EARLY was just then aiming all his enormous columns. While Harrisburgh and Chambersburgh were inflamed against General COUCH for not concentrating his attention upon them, Pittsburgh and Wheeling fancied it was they who were threatened with attack. Unfortunately for him, General COUCH seems to have thought so, too; and, accordingly, so warned the latter cities. Pittsburgh voted to go under martial law. General COUCH himself hastened to Pittsburgh, and, meanwhile, out came General CAMERON'S letter. But neither the danger at Pittsburgh nor the letter appeared to disturb his equanimity, for a reporter on the 3d of August notes that "the General "seemed to take things very coolly, and was evidently "in no wise alarmed at the situation of affairs."

And how did it turn out with this General who obstinately took things coolly, while every other man in the region was mad with excitement? The self-same telegram which told of Mr. CAMERON'S letter, also stated rather rhetorically:—"It is almost "certain that the Rebel heel no longer presses our "soil." And its news was true. The enemy was already crossing the Maryland line. A few days more found him out of Maryland also, and, as we write, he is as far up the Shenandoah as Winchester. Meanwhile, a fortnight has passed over the good people of Harrisburgh, and they telegraph confidently of their position and contemptuously of the Rebels. But the great point is, that they have done very well without that martial law which their committee, so urgently desired. Martial law, when rightly enforced, is only pleasant in the perspective. It is well to get on without it, if possible. Which was the better informed about its necessity, and about the real peril of Harrisburgh—the committee or the Major-General commanding them and the district—events have shown. The object of the committee was patriotic, indeed, for they only wished "to prevent all persons capable of "bearing arms from leaving the city"—probably having learned, by frequent and dear experience, that here, as in neighboring towns, the first news of the enemy's approach, no matter what his force, was the signal for a grand stampede of the able-bodied inhabitants. But perhaps General COUCH, admitting this point, concluded that men who would run away under such provocation, would not pay for the keeping.

In all this, we have not touched on the question of the military management of the affairs in General COUCH'S department, but only refer to the impropriety of the action of the Harrisburgh Committee. One of the charges, however, against General COUCH should not pass without comment. "It is asserted "that he ran away from Chambersburgh by special "train, without notice." This story may sound very credible in the ears of some of the people of that section, and the imputed conduct not only credible but justifiable in the view of others. But it would never receive much audience from those who have read of Chancellorsville, Fair Oaks, Antietam, and Fredericksburgh, or that of Malvern Hill, the chief honor of which still lies in dispute among several fine soldiers, of whom General COUCH is one.

A CORRESPONDENT, in a letter published elsewhere in this issue, forcibly presents the difficulties which grow out of the blindness of the Army Regulations on some matters. Many of the questions, in tactics and in the interpretation of the articles of War, which arise amongst officers might easily be settled by the reference of any clear-headed person to the authorised works; but there are some others which are not of such easy settlement, and to be in doubt about which does not always argue ill of the head of the questioner. It certainly would be a great advantage to the service, if these disputed points could be cleared up by a competent commission, and every Regulation made so lucid in its statements that to fail to correctly interpret it, would prove disastrous to an officer's reputation for common sense. As it is now, however, ordinary patience is too often exhausted in the effort to understand.

THE London *Times* of July 17, after rehearsing the results of some experiments made at Shoeburyness with an Armstrong 600-pounder, concludes that this weapon is capable of smashing through the strongest sea-going armor-clad that could be got to float, at a distance of 4,000 yards, or even more. It then informs its readers that "the Americans have now "literally hundreds of 600-pounder guns and have "just succeeded in casting at Pittsburgh a 20-inch "gun to throw a spherical shot of 1,600 lbs." It thinks the result of the experiments at Shoeburyness proof that we are not "altogether wrong" in trusting to heavy shot at low velocities, and frankly acknowledges that there is no charge of powder that could be expected to send the 1,600 lb. shot out of its gun which would not at close range "be sure to tell with almost "sinking effect on the vessel's boat of iron-clads." That will do for the *Times*. Even Englishmen, it seems, learn wisdom by experience.

THE exposed condition of the Pennsylvania frontier, and the manner in which the Rebels have taken advantage of it during the last few weeks, has induced Governor CURTIN to call a special session of the State Legislature to consider and adopt defensive measures. In his message to the body in question, the Governor recommends that fifteen regiments of minute men, in due proportions of cavalry, artillery and infantry, be at once organized, chiefly in the border counties; that they be clothed, armed and equipped by the State, and that they shall be regarded as independent of the United States militia. Four six-gun batteries of field artillery, will, it is supposed, be sufficient for any emergency that may arise. The plan seems to be a good one, and the only cause for surprise is that it was not matured long ago.

A VERY intelligent correspondent closes a private letter with the following striking words:—"The war "will terminate at the poor wounded soldier eaved "his comrades from being blown up by a mine. He "crawled bleeding over the sausage and soaked the "powder with his blood. We Northerners will soak "the South into incombustion with our blood, and "swarm them out as sand-flies swarm a light.

> "Still o'er their drowning bodies press
> "New victims, quick and numberless."

MR. Secretary STANTON has gratified the country by resuming the publication of his dispatches to General DIX, the opportunity for proclaiming reports of successful achievements inviting him to again appear upon the bulletin boards. Are we to understand from this that the amiable Secretary is unwilling to be the bearer of evil tidings? Are we always to associate his name with the joyful news of victory, and never with the dismal story of defeat?

IT is reported that the failure of the recent assault upon Petersburgh has been made the subject for the investigation of a court of inquiry: but we are unable to give any authentic list of the detail for such court.

THE remaining two companies of the 15th Mass. Vols., will be consolidated with the seven companies of the 20th Mass. Vols., the consolidation force to bear the designation of the latter organization. The remaining two companies of the 15th Mass. Vols., will be consolidated with the five companies of the 11th Mass. Vols., the consolidated force o bear the designation of the latter organization.

FOREIGN MILITARY AND NAVAL MATTERS.

In the course of the Shoeburyness competition with 12 pounder field guns, one experiment was made with their trails buried in the ground, so as to enable the guns to get the enormous elevation of 33 degrees. The results were that, in rough numbers, Mr. WITT worth averaged on several rounds the immense range of 8,800 yards, or a little short of five miles, and Sir WILLIAM'S shunt gun averaged about 6,700 yards, or short of farther by nearly two miles, while to Mr. WITTworth of nearly a mile and a quarter.

GENERAL DE TOLLEBEN has supervised the first portion of the famous defensive works at the entrance of Sebastopol. It consists of two volumes, and has been published in Paris, translated into French. The other two volumes, which will complete the work, are written, it will be remembered, was entrusted with the defence of Sebastopol. At that time (1854), he was only fourteen-and-odd, having rapidly reached that grade by brilliant services in the Caucasian war as an engineer. When he reached Sebastopol he was only 30 years old, and but for him the famous fortress would have fallen months earlier than it did. He is now a general in the Russian army.

THE eminent French chemist, M. BIANCHI, is the author of some curious experiments on combustion in a vacuum. He found that gunpowder, and also the fuse mixture, burn quickly if loose in an exhausted vessel, and suddenly caught in a compressed atmosphere two thousand degrees. If, however, the powder was placed, under similar circumstances, in a pistol, it inflamed with the detonation exhibited in the air. Gun-cotton slowly disappeared; the layer nearest the source of heat going first, but without the production of any light. In all these cases the products of combustion were the same as in air. Combustion also took place in nitrogen, carbonic acid, and other gases which do not support it, with little diminution of the ordinary rapidity of the process.

IN the country parts of France the soldiers have as usual received permission to aid the farmers in getting in the crops. In Nice it appears that the kind treatment is resorting to this same principle of keeping up a large army, but allowing or forcing the men to do other labor than mere exercising and drill. The *Nice Revue* remarks: "We wish with all our hearts to see the number of our soldiers reduced, or, at least, another use made of our accumulated forces. But the matter is far from being finished. An experiment is being made in the south of having our embankments made by gunboats and steamships; but this system, having it expected will be extended to the line, and as we are endeavoring to build our railways cheaply, it would seem to us useful if we could do the same to our security agree with our economical interests."

THE following are the names, according to the London *Morning Herald*, of the sixteen iron-clads of the British navy mentioned in the *Times*: *Black Prince*, *Warrior*, *Defence*, *Resistance*, *Hector*, *Valiant*, *Achilles*, *Minotaur*, *Royal Oak*, *Prince Consort*, *Caledonia*, *Ocean*, *Zealous*, *Hero*, *Lord Clyde*, *Lord Warden*, *Lord Clarence*. £294,964. Besides these sixteen, there are eleven in process of construction, namely, the *Agincourt*, *Northumberland*, *Bellerophon*, *Sultan*, *Monarch*, *Pique*, *Mirrel*, *Lord Clyde*, *Lord Warden*, *Pallas*, *Favorite*, *Viper*, and *Vixen*. The names of the floating batteries are the *Erebus*, *Terror*, *Thunderbolt*, *Etna*, *Glatton*, *Thunder*, and *Trusty*. Their respective cost was £82,039. £80,726, £80,230, £40,601, £37,305, £59,276, and £59,268.

A PARIS letter writer says that an accident has occurred to France a great engineer marshal. Marshal NIEL was thrown by either dog from a carriage, and had one of his ribs broken. A physician was called in and bruised, it is now stated that he is in a fair way to recovery, and out of danger. Marshal Niel has not met with the accident of American generals in the loss of money and watch at Aix-les-Baine, in Savoy. The Marshal's fury the next morning was such, that he demanded that every person in the house should be searched. He no doubt forgot that he was no longer in Mexico. The best part of his joke is, that it was well known that the Marshal had not passed through alone, and that probably the Phryne of the baths had stolen a march on the old soldier when he was off his guard. It seems he found occasion to make example where he had gained his marshal's baton to be ordinarily an impertinent mine.

THE Russian *Invalide* says that the construction of iron-clads for the Russian government commenced at Cronstadt in 1854. Since then the march of marine architecture has become quite important. There are now on the Russian sea and lake coast 26 iron-clads in process of completion: Two frigates, the *Sebastopol*, and the *Petropavlovsk*, each of 800 horse power, the first armed with 28 cannon and the second with 26. There are also three floating batteries, the *Perwenetz*, *Netrow Menin*, and *Kremlin*, each carrying 26 rifled guns. Finally, there are ten Monitors, some with single and others with double turrets, carrying steel rifled cannons eight inches thick. It is reckoned that all these will be finished before winter, and, in that case, Russia will have next spring at the opening of navigation in the Baltic, an iron-clad fleet of 17 vessels, carrying 157 pieces of artillery. All these iron-clads are intended exclusively for the defence of the shores of the Baltic.

THE *Cronstadt Messenger* gives interesting facts about the two Monitors *Vesuvius* and *Novik* recently launched. They are each 201 feet long on the exterior, and 159 feet 2½ inches in the interior; 46 feet wide, and 11 feet 5 inches draught. Each will cost the state about 619,000 roubles, which sum includes a large expense incurred in the transportation of all the materials from Cronstadt to the isle of Ocotsoumeky, where the launching took place. The hulls are entirely plated on the exterior. The launch was completely successful, and was conducted by the authority we translate, as very picturesque. The ships equestrophy painted in white, an advantageous color, especially for a snowy climate. They are furnished by Ericsson their impassing turrets and their smoke pipes, unjointedly and rapidly entered the water. Despite the distance of the shipyard from the centre of the town, the interesting spectacle had attracted a great concourse of people. The better classes occupied places constructed so as to furnish a good view, and the Neva was covered in every direction with many little tugboats filled with spectators. Music and a universal hurrah gave a warm reception to these two new iron vessels of the Russian iron-clad navy. Already, probably, the two Monitors have tried their engines.

THE *Kokireb*, built for the Viceroy of Egypt, and intended for the service of the Nile, recently made a trial of her powers in the Thames, for the inspection of the Lords of the Admiralty. This vessel of 358 tons burden, built by Messrs. Ditchburn & Mowbray, with engines of 50 horse power by Messrs. John Penn and Son, is entirely cased in armor two inches thick from stem to stern, and reaching from the gunwale to two feet below water. She has a flat bottom, screw apparatus, or shields, on deck, one forward and the other aft, each of which contains a long 18-pounder gun, and is also entirely covered over with armor two inches thick. Yet, notwithstanding all this large amount of armor protection, the draught of water of the craft, with her guns, stores, and 200 men on board, all on board, was something less than four feet, and the mean speed obtained by the vessel was nine knots per hour. The rudder is entirely under water, the screws always visible, and these are arranged to work one under each quarter. The powers of the vessel were tested in every way by Admiralty officials, and she was found capable of manœuvring and steering in the most satisfactory way, making the complete circle in 3 min. 25 sec. The *Kokireb* is a twin screw vessel, and with twin screws by Mr. Samuda is considered a victory in favor of this principle, as Mr. Samuda, until very lately, considered that a single screw was required for the double screws were more imaginary than real.

THE *London Review* in the course of an elaborate article on the British iron-clads of recent construction, says that the *Resistance* is the best of the best time a few weeks ago, and has since been repairing damages caused by the discharge, while justifying her name in the trial. The *Hector* is a gunnery vessel of peculiar health has provoked in Parliament. The damages, it is true, were not very serious, but then they were caused by the use of service vessels with blank cartridge. It is expected that in future, by removing the articles shaken or injured before the practice commences, the difficulty will be obviated; but this will at least involve delay in clearing for action. Graver defects, however, appear, from the report of Admiral FREMANTLE, to have become apparent on this preliminary trial. The iron-clad battery is square box, about thirty-two feet on the side, and within this the guns are supposed to be worked, and the funnel, wheel, and hatchway for stepping powder and shell, are included in it. The result is that "the guns at each broadside of the mess have not room to work the guns with that facility required." This evil, the *Review* is informed, is to be remedied to some degree by removing the funnel and wheel from the inside of the battery to the outside, making the ship's sittings to pieces, and room should be made to work them, there will still be serious difficulty in bringing the guns to bear in the way to the easiest possible position; and if we remember that the *Atalanta* was sunk not by any superiority in size, force, or even number of guns, but simply on the part of her antagonist, but by the more accurate firing of the *Kearsarge's* guns, it will be easy to conceive the serious nature of the defects to which Mr. REED'S first ship is subject.

AN interesting trial of the powers of gun cotton, as an explosive agent, was recently conducted at Neuwasser. The object was to demolish a portion of a masonry stockade, similar to what is commonly used in fortifications. It was composed of a double row of timber; the first consisting of six balks, each 10 ft. long by 12 ins. or 14 ins. square; the timber backing being formed of five balks 9 ins. to 10 ins. square. These balks were stuck about four feet into the ground, and firmly bedded. Two heavy logs, 7 ft. long by 14 ins. square, were laid in front of the stockade to form a bridge on which to place the shell containing the gun-cotton. The timber was the best Memel. The shell was made at the Elswick Ordnance Works, and was made of 3/8 inch iron. It was 16 ins. long by 12 ins. in diameter, and in its general outline was similar in form to one of Sir WILLIAM ARMSTRONG'S destructive shells. This cylinder contained 25 lbs. of gun-cotton. To preclude the possibility of any accident occurring, no one was allowed to approach the stockade nearer than about 300 yards. The cylinder was placed upon the bridge, and all being ready, the charge was ignited by the electric spark from a distance of 220 yards. The two centre timbers with their backing were blown clean away to rest with the ground, the large fragment having been hurled a distance of 130 yards; the others had been torn up into splinters. The posts left standing were forced over to an angle of 75 degs.; and a wide gaping breach was left in the centre through which an assailant could have easily entered. One of the timbers forming the bridge was torn to pieces by the force of the explosion. The other was considerably uninjured, but was hurled a distance of about 40 yards, although its weight was estimated at a quarter of a ton. The layer of earth covering the shell made a mound in the ground in front of the stockade, and immediately beneath the bridge, fully half a foot in depth. Portions of the shell were found in several directions; and many of the spectators carried away pieces of the torn and twisted fragments as mementoes of this exceedingly successful experiment. The great and rapid rarefaction of the Blyth and Tyne line, which runs near the spot, were cut through in one or two places without breaking the rails, as clean as if a man had done it with a chisel.

GUN COTTON AS MANUFACTURED BY VON LENK.

THE following description of the system of manufacturing gun cotton, as practised by General VON LENK, is extracted from an interesting paper on the "Chemical History and Application of Gun Cotton," contributed to the Royal Institution of Great Britain, by Professor ABEL, F. R. S., Director of the Chemical Establishment of the War Department of England:

The cotton, in the form of loose yarn of different sizes made up into hanks, is purified from certain foreign vegetable substances, and prepared for a bath consisting of weak solution of potashes, and subsequent washing. It is then suspended in a well-ventilated hot-air chamber until all moisture has been driven off. The hanks are then cut into tight hoses or jars, and at once removed to the dipping tank or vessel where its saturation with the mixed acids is effected. The acids of a specific gravity produced by experience, are very intimately mixed, in a suitable apparatus, in the proportion originally indicated by thatchemist, i. e., three parts of the strongest anhydrite acid for one of nitric acid. The mixture is always prepared some time before it is required, in order that it may become perfectly cool. The cotton is immersed in a bath of the mixed acids, one skein at a time, and stirred about for a few minutes until it has become thoroughly saturated with the acids. It is then transferred to a shelf in this dipping trough, where it is allowed to drain, and slightly pressed, to remove any large excess of acid; it is then carried upwards placed in a mechanical means, the gun-cotton being allowed to drip slightly moist to the touch. The skeins are then immersed singly into water, and about 5000 lbs. of cotton become completely saturated with it as quickly as possible. This result is best accomplished by plunging the skeins under a full of water, which soon becomes at once thoroughly drenched. If they are simply thrown into water and allowed to remain at rest, the heat produced by the union of a portion of the free acids with a little water will be so great as to establish at once a destructive action upon the gun-cotton by the acid present. The washing of the separate skeins is continued until no acidity can be detected in them by the taste; they are then arranged in frames or trees, and immersed in a rapid stream of water, where they remain undisturbed for two or three weeks. They are afterwards washed by hand, to free them from mechanical impurities, and from the last traces of free acid, and for a short time in a dilute boiling solution of potashes. After this treatment they are returned to the stream, where they again remain for several days. When quite pure, they are once more washed by hand, with soap, if necessary; the pure gun-cotton is then dried in a current of warm air, not exposure to air at a temperature of about 37° C.; to render it ready for use. A supplementary process is, however, adopted by General VON LENK, when the soluble glass (silicate of potassa or soda), for a sufficient period to allow it to become completely impregnated; removing the excess of liquid by means of the centrifugal machine; thoroughly drying the gun-cotton, thus "silicated," and finally washing it once more for some time, until all alkali is abstracted. LENK considers that, by this treatment, some silica becomes deposited within the fibre of the gun-cotton, which, on the one hand, assists in moderating the rapidity with which the material burns, and, on the other hand, exercises (in some unknown manner) a preservative effect upon the gun-cotton, rendering it less prone to undergo even slight

changes by keeping. The mineral matter contained in pure gun-cotton, which has not been submitted to this particular treatment, amounts to about 1 per cent. The proportion found in specimens which have been "silicated" in Austria and in this country, according to LENK's directions, varies between 1·5 and 2 per cent. It is difficult to and much how the addition of 1 per cent to the mineral matter, in the form chiefly of silicates of lime and magnesia (the bases being derived from the water used in the final washing), which are deposited upon and between the fibres, in a spurious manner, can, by any possibility, affect the question of the rate of combustion, or the keeping qualities of the product obtained by LENK's system of manufacture.

Gun-cotton prepared according to the system just described is exceedingly uniform in composition. The analyses of samples prepared both in Austria and at Waltham Abbey have furnished results corresponding accurately to those required by the formula $C_{12}\frac{H_7}{H_3}O_{10}\frac{O_4}{O_4}O_{10}$. In its ordinary air-dry condition it contains, very uniformly, about 2 per cent. of moisture—an amount which it absorbs again rapidly from the air, when it has been dried. The proportion of water existing in the purified air-dried cotton, before conversion, is generally about 6 per cent. When pure guncotton is exposed to a very moist atmosphere, or kept in a damp locality, it will absorb as much as from 6 to 7 per cent.; but if it be then exposed to air of average dryness, it very speedily parts with all but the 2 per cent. of moisture which it contains in its normal condition. It may be preserved with a charge of wet sand equivalent to the above period without injury; for, if afterwards dried by exposure to air, it exhibits no signs of change.

In these respects gun-cotton possesses important advantages over gunpowder. The normal proportion of hygroscopic moisture in the latter varies between three-quarters and one per cent.; but, if dried in any way to the extent of the most atmosphere, it continues to absorb water until, however far in the process it may have originally been, it becomes quite pasty. It need scarcely be stated that, when once gunpowder has become damp, it can no longer be restored to a serviceable condition, except by the most careful attention to the process of manufacture, starting almost from the commencement.

Perhaps the most vital consideration, bearing upon the possibility of applying gun-cotton to important practical purposes, are those which relate to the risk likely to be incurred in its manufacture, and ultimate use and keeping qualities. The manufacture of gun-cotton is unquestionably much safer than that of gunpowder; in fact, there is no possibility of accident until the dry state of cotton is reached,—as, in all other stages, the material is always wet, and therefore inexplosive. With the adoption of a proper system of warming and ventilation, in the drying chamber, the last operation is certainly not a more dangerous one than that of drying gunpowder. It is considered that the preservation of gun-cotton cannot as yet be so easily and satisfactorily disposed of. Specimens of gun-cotton exist, which were prepared according to LENK's system of pressure in 1846, and which have undergone no change whatever, on the other hand, it is well known that gun-cotton, which was believed to have been perfectly purified, has become extremely acid, and has even undergone so complete a decomposition as to have become unexplosive. Nitro-glycerine and other organic products, when prepared in close vessels, and especially when exposed continually, or occasionally, to light, have unexplodably become explosive—also from causes which are not yet understood. The fact has been particularly observed in samples of gun-cotton known to consist chiefly, or to contain some proportion, of the less explosive or lower substituted products of the gun-cotton especially prepared for the manufacture of collodion. Hence it is very probable that many instances are considered to have been well authenticated, of the unexplosive nature of gun-cotton, when stored in considerable quantities, or during exposure to very moderate degrees of temperature, not simply from an imperfect purification of the material, but also from the more or less imperfect conversion of cotton into the nitro-compound originally employed in the product.

There is no doubt that the improvements effected in the system of manufacture of gun-cotton have been instrumental in rendering it far more explosive than it has been in the early days of its production upon a considerable scale. At the same time, although General VON LENK and its warmest partisans consider that the process of drying is one which, if properly carried out, is perfectly safe

position. The Lancaster and Scott guns have now fired about 70 rounds, and are in very good condition; the French gun and the Ireland gun have each fired about 100 rounds, are somewhat injured. The damage, which is entirely owing to the vacancy left between the powder and shot, seems to have been caused, at first, by the use of small lubricating wads, which did not fill up the bore, and when once an indentation, however slight, is made, there is a tendency to increase. The Lancaster gun, though having a special wad, seems to have escaped better, except at the bottom of the bore, which shows a slight inclination to ream so that in the Scott gun; in other respects there is no damage or perceptible wear in the guns, which is very satisfactory considering the high charges which have been fired from them. The superintendent of the gun factories, Colonel CAMPBELL, R. A., was present during the first day's firing, carefully watching the guns, and left well satisfied with the strength of the first heavy rifled guns made under his superintendence.

ARMY GAZETTE.

TERM OF SERVICE OF OFFICERS.

WAR DEPARTMENT, ADJUTANT-GENERAL'S OFFICE, } WASHINGTON, July 30, 1864.

Circular No. 61.

It is announced, for the information and guidance of all concerned, that an officer of a three years' volunteer regiment may serve as produces a new commission at a date subsequent to that of his original commission, and will be held to service for three years from the date of his last muster in, and not for three years from the date of original muster in.

No muster in are authorized, or recognized by the War Department, for the mere purpose of a re-organization. It desires no muster rolls unless they are needed, as soon as brought to notice.

Where musters have been made, they will be considered by officers, or their assistants, for the unexpired portion of a term, and there is no claim to the payment of an officer, or his assistant, unless duly forwarded, through the proper Commissary of Musters, to the Adjutant-General of the Army, for the action of the War Department.

Regulations similar to the foregoing apply to organizations mustered into service for a period less than three years; the general rule being that a commissioned officer shall not be held to service beyond the period for which his regiment or company was originally accepted.

If officers of volunteer organizations do not desire to assume the advantages of their further organization, they will be considered as resigning by declining to muster in. (Circular No. 35, current series from this office, they are declined to be mustered in during the present earlier and only terms not having expired terms of the muster, under which they may be acting at the time.

E. D. TOWNSEND, Assistant Adjutant-General.

FAREWELL ORDER TO THE FOURTH CORPS.

HEADQUARTERS FOURTH ARMY CORPS, DEPARTMENT OF THE } CUMBERLAND, Near Atlanta, Ga., July 27, 1864.

To the Fourth Army Corps, Special:

It has been ordained that another command, the fifth, by no means a personal one, shall be added to those I have had the honor of corps that I have command to love and trust. The time of service of the present has nearly expired, and with it, unless renewed, my connection with it. Again, Admirably, Kingston, Guerrilla, Dallas, Resaca, Rocky Face, Ringgold, Chattanooga, Missionary Ridge, and Graysville, are names of conflict, in our less severe, where we have united many an endeared comradeship, which we have won by long and weary days and paternity, and where the graves has learned new to our mind respect the power of the living.

It is with pain that I realize my inability to reward your cheerful, devoted, and gallant service, as you deserve, and as I would do, by accomplishing results. I heartily appreciate the constant co-operation of the division and corps officers, and the unflinching zeal which they have been sustained by their own officers.

To them, and through them to the corps command, I tender my warmest thanks and unqualified commendation.

To all comrades in the corps, past and present, and untiring assistance from his staff that I have from mine. To them also I am more indebted.

Believing from my heart that our cause is right and just before God, I shall believe our corps is invincible, and that its future will sustain our brother to complete the work which He has enabled them so gloriously to bring to the present successful position.

O. O. HOWARD, Major-General.

MAJOR-GENERAL HOWARD ASSUMES COMMAND OF THE ARMY OF THE TENNESSEE.

HEADQUARTERS ARMY OF THE TENNESSEE, } BEFORE ATLANTA, GA., July 27, 1864.

In pursuance of orders from the President, the undersigned hereby assumes command of the Department and Army of the Tennessee.

I regret the gallant soldiers of th's renowned army that I fully realize the delicate nature of my responsibility.

Your late beloved commander was a personal friend; and while I unite with you in profound sympathy and regret for our irreparable loss, it shall be my constant aim to emulate his virtues and deeds.

O. O. HOWARD, Major-General.

OFFICIAL REPORT OF MAJOR-GENERAL LOGAN.

MAJOR-General Sherman, in transmitting the following official report to Major-General Halleck, says:

"Although the manner of it not exhale seems excessive, he is disposed to pay full credit to the report of General Logan, because the 15,311 is killed, wounded and missing, the enemy's dead alone on the field nearly equaling that number of his own."

HEADQUARTERS DEPARTMENT AND ARMY OF THE TENNESSEE, } BEFORE ATLANTA, GA., Monday, July 18, 1864.

GENERAL—I have the honor to report the following general summary of the number of my command killed, wounded, and missing, and at 23d inst.: Total loss in killed, wounded and missing, 4,521, and ten pieces of artillery, No. 1.

We have buried and delivered to the enemy, under a flag of truce sent by him, 1,500 of his dead. Of the number of the enemy's Army corps, one thousand of their killed.

The number of dead buried in front of the Fourth division of the same corps, includes those on the ground not now occupied by our troops, General Blair reports, will not be less than 1,000, and will swell the loss to two thousand.

The number of dead buried, buried in front of the Fifteenth corps up to the 18th, is 550, and the commanding officer reports that at least as many more are yet to be buried, which will swell the total still at work.

The number of dead buried in front of the Sixteenth corps was 472. We have over 1,000 small stand of arms, and other war material since reported. Hood's and Hardee's corps and Wheeler's cavalry engaged us. We have sent to the rear 1,000 prisoners, including 43 commissioned officers of high rank. We still occupy the field, and the troops are in fine spirits. A detailed and full report will be forwarded as soon as completed.

Respectfully,

JOHN A. LOGAN, Major-General.

Major-General W. T. SHERMAN, Commanding Military Division of the Mississippi.

ACKNOWLEDGMENTS TO TROOPS.

HEADQUARTERS SECOND ARMY CORPS, July 31, 1864.

General Orders, No. 38.

The Major-General Commanding desires to express to the troops his gratification with their conduct during the late movement across the James River, while all the troops who kept their ranks (the regiments there were very few) behaved with commendable soldierly manner, are deserving of praise. The following organizations were specially gallant and meritorious:

First Brigade, First Division, Second Corps—Fifty-eighth Massachusetts, and One Hundred and Twenty-fifth New York, and Seventy-sixth Michigan, and Seventh Michigan, of the Second Brigade, Second Division, distinguished part of the skirmishing line of General Barlow's division, and the Fifty-seventh Massachusetts, which was engaged on the morning of the 25th, and the skirmish line of General De Trobriand's brigade, General Morris' division, the Fifty-fifth Pennsylvania, One Hundred and Forty-seventh Pennsylvania Volunteers, for good conduct and severe loss in the right of the battery, and Seventy-sixth Michigan Volunteers, for gallantry in the reconnoissance of the 26th instant, and the Fifty-seventh Massachusetts, for the manner in which it maintain the high reputation they have heretofore acquired. The Major-General Commanding desires to call the attention of the officers of individual officers or soldiers, or organizations, and will reward them as the circumstances may warrant.

By command of Major-General MEADE.

(Signed) FRANCIS A. WALKER, A. A. G.

ACKNOWLEDGMENTS TO LIEUT.-COL. EGGLESTON.

HEADQUARTERS ARMY OF THE POTOMAC, } August 5, 1864.

Gen ral Orders No. 32

The Commanding General takes great pleasure in acknowledging the acknowledgments of the following commissioned officers of Henry Flowers, 43d Regiment Pennsylvania Veteran Volunteers, and the officers and men of the 43d Regiment, in the execution of the mine which was successfully exploded on the morning of the 30th ult. under one of the enemy's batteries in front of the 9th Corps. Colonel Flowers and his command have by the execution of the duties of the sales reflects great credit upon Lieutenant-Colonel Egglestone and the officers and men of the regiment, by whose energy and gallantry the officers and men of the regiment of the extraordinary labor and fatigue have been successfully performed. The General Commanding is worthy of the highest praise.

By command of Major-General MEADE.

S. WILLIAMS, A. A. G

ASSIGNMENT TO COMMAND.

WAR DEPARTMENT, ADJUTANT-GENERAL'S OFFICE, } WASHINGTON, July 28, 1864.

I. By direction of the President, Major-General Wallace resumes command of the Middle Department, will resume the command of the Eighth Army Corps, and will establish his headquarters within the limits from which he was temporarily relieved in General Orders No. 238.

II. The troops of Major-General Barlow's command, temporarily assigned to the Second under Brigadier-General Ward, will be returned to their proper command by direction of the President, hereby relieved from such assignment.

By order of the Secretary of War.

E. D. TOWNSEND, Assistant Adjutant-General.

THE MIDDLE MILITARY DIVISION.

HEADQUARTERS MIDDLE MILITARY DIVISION, } BALTIMORE, July 28, 1864.

General Orders No. 1.

In compliance with General Orders No. 249, dated War Department, Washington, August 3, 1864, the undersigned hereby assumes command of the Middle Military Division, which includes the following Military Departments: Middle Department of Washington, Department of Pennsylvania, Department of the Susquehanna. Until further orders the Headquarters Military Division will be at Harper's Ferry.

WINFIELD S. HANCOCK, Major-Gen. Comd'g.

DISMISSAL.

Captain Julius Jostrow, 10th Illinois Cavalry, dishonorably discharged the service of the United States by sentence of a General Court-martial of duty in not having the rolls and records of the company in his charge properly kept, for failing to make proper returns thereto, for the interests of the enlisted men of his command, and violating the 9th Article of War. Dismissal to date from August 2, 1864, paragraph 2 orders No. 26, current series Adjutant General's office.

NOTICE TO DELINQUENTS.

The following officers, having failed to report at the headquarters of the Army for the officers hereinafter specified, are hereby notified that they will stand dismissed from the service of the United States unless within fifteen (15) days from August 8, 1864, they appear before the Board of Examination convened at Nashville, Tenn., by S. O. 147, which Brigadier-General John G. Caldwell, United States Volunteers, is President, and make satisfactory answer to the charges against them:

Absence without leave.

First Lieutenant A. S. Emerson and J. B. Bullock, 1st Michigan Cavalry.

Second Lieutenant W. Thomas Smith, 140th New York Vols.

Captain John B. Hall, 1st New York Dragoons.

For furnishing descriptive lists directly to enlisted men of their commands in violation of the orders of the War Department.

First Lieutenant Edward Hall, 1st New York Vols.

Lieutenant L. B. Foster, 81st New York Vols.

SENTENCES OF COURTS-MARTIAL

Second Lieutenant Byron Kinney, 3d New York artillery, to be cashiered for drunk and disorderly.

First Lieutenant James B. Donnelly, 3d New Jersey cavalry, to be mustered out of service at once, and forfeit all pay he may have due him, to dismiss without leave and disobedience of orders.

Major Theodore Wright, 7th New York cavalry, to be dismissed for constant proficiency to good order and military discipline. Disapproved, recommended to be mustered out.

First Lieutenant Herman M. Lillie, 4th New York heavy artillery, to be dismissed for conduct unbecoming an officer and a gentleman.

First Lieutenant Moses A. Powell, 1st Michigan Sharpshooters, to be dismissed the service for drunkenness, conduct unbecoming an officer, has his shoulder-straps and buttons to be cut off and his sword broken over the head and shoulders of the soldiers, and that the sentence be published in some newspaper in the county from which he came, for forwarding.

Second Lieutenant Wm. S. Colcord troops, to be cashiered, with loss of all pay and allowances due him, for drunkenness, conduct unbecoming an officer, has his buttons cut off and his sword broken in the presence of his regiment, and to be confined at hard labor at the Dry Tortugas for the period of one year, until the expiration of his term of service, for cowardice. Hard labor at Dry Tortugas, during.

Captain Hosker A. De Land, same sentence and charge of cowardice in the case of Major Lane. Dismissal of hard labor in his case.

Second Lieutenant James Smith, 39th New York State Militia, to be dismissed for drunkenness and false and slanderous accusations.

Second Lieutenant Wm. F. 4th New York Vols., to be cashiered for conduct unbecoming an officer and a gentleman.

First Lieutenant Wm. Hall, 6th New York heavy artillery, to be dismissed for disobedience of orders. Commuted to forfeiture of pay and allowances for three months.

MEDICAL DEPARTMENT.

ASSIGNMENTS.

Assistant Surgeon C. D. Gaylord, U. S. A., to 2d Rhode Island Infantry, Department Dix.

Assistant Surgeon W. T. Otis, U. S. A., to General Field Hospital, Army of the Potomac, Wheeler, Ga.

Assistant Surgeon P. S. Conner, U. S. A., to Artillery Battalion, 18th Army Corps.

Assistant Surgeon J. S. Smith, U. S. A., as Medical Director of Transportation, City Point, Va.

Assistant Surgeon J. H. Hall, as Medical Director, Department of the Northwest, Milwaukee, Wis.

Assistant Surgeon J. H. Kissane, U. S. A., to Hospital of 2nd Division, 18th Army Corps at City Point, Va.

Acting Assistant Surgeon C. H. Jones, U. S. A., to temporary duty in General Hospital, Baltimore, Md.

Acting Assistant Surgeon F. W. Randle, U. S. A., to Stanton Hospital, Fort Vancouver, W. T.

Surgeon W. H. Watkins, 1st Oregon Cavalry, to join his regiment in the field.

Assistant Surgeon E. M. Powers, U. S. V., to Post Hospital, St. Louis, Mo.

Assistant Surgeon J. B. Prescott, U. S. V., to Totten General Hospital, Louisville, Ky.

Surgeon J. L. Tees, U. S. V., as member of the Board at Louisville, Ky., and examiner of medical officers for volunteer troops.

Surgeon R. H. Gilbert, U. S. V., as Superintendent of hospitals, Louisville, Ky., and vicinity.

Assistant Surgeon J. Ford, U. S. V., as Surgeon in charge, Cumberland General Hospital, Nashville, Tenn.

Surgeon D. C. Dunbar, U. S. V., to the Department of the Gulf.

Assistant Surgeon J. H. Sherwood, U. S. V., to Camp Curtin, Harrisburg, Pa.

Surgeon J. M. Lents, U. S. V., as Medical Director, General Crooks, commanding Department of West Virginia.

Surgeon Philip Harvey, U. S. V., as Medical Director, District of South Kansas, Fort Riley.

Assistant Surgeon J. B. Ledlie, U. S. V., to General Hospital, Jefferson Barracks, Mo.

Assistant Surgeon W. A. Harvey, U. S. V., to Cavalry Corps Hospital, City Point, Va.

Assistant Surgeon D. R. Brower, U. S. V., to officer's hospital, Fortress Monroe, Va.

Assistant Surgeon C. B. Frazer, U. S. V., to Jos Hoit Hospital, Washington, D. C.

Surgeon William Threlkeld, U. S. V., to Sherman Hospital, Nashville, Tenn.

Chaplain Isaac L. Ely, U.S. A., to Slough Barracks Hospital, Alexandria, Va.

Chaplain Chauncey Leonard, U. S. A., to 1st Oveture Hospital, Washington, D. C.

Chaplain William Phillips, U. S. A., to General Hospital, Brest and Quarantine, Fort Pickens, Pensacola, Fla.

Lieutenant-Colonel R. H. Fallon, Medical Inspector U. S. A., as Medical Director, Division of the West Mississippi.

Surgeon Charles Page, U. S. A., as surgeon-in-chief, 4th Division, 4th Corps, Army of the Potomac.

Assistant Surgeon A. Hewit, U. S. A., to Hospital of 24 Division, 2d Army Corps, Army of the Potomac.

Surgeon G. M. Edson, U. S. A., as Medical Director, District of Harper's Ferry, Va.

Assistant Surgeon F. Reynolds, U. S. A., to Artillery Reserve Brigade, Cavalry Corps, Army of the Potomac.

Surgeon George Suckley, U. S. A., to Surgeon in charge, Military Prison Hospital, St Louis, Mo.

Surgeon William Thomson, U. S. V., as attending Surgeon, Alexander Barracks, St. Louis, Mo.

APPOINTMENTS.

Dr. E. W. Buck, of the 81st New York Vols., to be assistant surgeon of volunteers.

NAVY GAZETTE.

REGULAR NAVAL SERVICE

ORDERED.

Third Assistant Engineer Henry W Bulkley, to examination at Philadelphia.

Third Assistant Engineer Wm. R. Kilpatrick, to examination at Philadelphia.

Third Assistant Engineer John W. Healey, to examination at Philadelphia.

Third Assistant Engineer Jacob L. Bright, to examination at Philadelphia.

Paymaster J. O. Sargent, to Navy Yard, Boston, in charge of Provisions and Clothing at the Navy Yard, New York.

Lieutenant-Commander W. A. Kelly, to the North Atlantic Squadron.

Assistant Surgeon Charles S. Green, to the West Gulf Squadron.

Assistant Surgeon A. A. Hoeling, to the Naval Asylum, Philadelphia.

Commanders James F. Armstrong, and A. E. Hughes, to examination at Philadelphia, Penn., and Washington, D. C.

Lieutenant-Commander Wm. Gibbons, to Navy Yard, Mare Island.

First Assistant Engineer Philip Joch, to examination at Philadelphia.

Midshipman Edward E. Preble, to examination at Newport, R. I., as soon as he has completed his present cruise.

Midshipmen E. S. Jacobs, and J. W. Cowie, to the North Atlantic Squadron, to attend Naval Academy by 1st of October next.

Sailmaker George Thomas, to the Tuscarora.

Midshipmen E. T. Woodward, to examination as Ensign, and also to Torpedo service.

Midshipman John E. Pillsbury, to the Saco, returning to the Navy Yard, Boston, for want of further service.

Chaplain John Ribbles, to the South Atlantic Squadron.

First Assistant Engineer Henry W. Bolton, to the Sassacus.

Ensign C. T. Shutt, to the Sassacus.

Lieutenant-Commander W. A. Kelly, to the command of the Gunboat.

Lieutenant-Commander Wyber W. Queen, to temporary Ordnance duty at the Philadelphia Navy Yard.

Second Assistant Engineer Sydney Albert, Third Assistant Engineers Wm. Hughes, and Walter B. Smith, to examination for promotion at Philadelphia.

DETACHED.

Passed Assistant Surgeon John H. Hawkins, from the Naval Asylum, Philadelphia, and ordered to the St. Mary's (Pacific Squadron).

Assistant Surgeon George D. Stocum, from the Saranac, and ordered to the Naval Asylum.

Assistant Surgeon John T. Lusk, from the St. Mary's, and ordered to the Saranac.

Lieutenant-Commander Edmund Sarrell, from the command of the Gunboat, and ordered to the North Atlantic Squadron.

Paymaster William G. Mercy, from duty as Inspector of Provisions and Clothing at the Navy Yard, New York, and waiting orders.

Passed Assistant Surgeon A. Hodson, from the Naval Asylum, Philadelphia, and ordered to the North Atlantic Squadron.

Assistant Surgeon Frederick Kreeker, from the Naval Hospital, Norfolk, and ordered to the West Gulf Squadron.

Assistant Surgeon W. G. Lemon, from the Naval Hospital at New York, and ordered to the Naval Asylum, Philadelphia.

Lieutenant-Commander John Baker, from the receiving ship and waiting orders.

Lieutenant-Commander Wm. Gibbons, from the Canonicus, and ordered North.

Lieutenant Norman Farrow, from the Ledge, and ordered North.

Lieutenant-Commander John J. Cornwell, from special duty at Newport, R. I., and ordered to the Canonicus.

Carpenter A. O. Goodson, from the Tuscarora, and ordered North.

Gunner William Wilson, from the Tuscarora, and ordered North.

Boatswain T. Lynch, from the Tuscarora, and ordered North.

Assistant Surgeon George H. Cook, West Gulf Squadron, and waiting orders.

Lieutenant George W. Doty, from the Naval Rendezvous, New York, and ordered to the Naval Academy, Md. 18 Blake street, New York.

Lieutenant-Commander Edmund W. Henry, from command of the Gossamer, and to wait orders.

Assistant Surgeon Charles J Green, from the receiving ship at Boston, and ordered to the West Gulf Squadron.

RESIGNATIONS ACCEPTED.

Gunner William Burdett.

Midshipman W. F. Hall, of the Naval Academy.

LEAVES REVOKED.

Second Assistant Engineer F. G. Coggins, steam experimental duty at New York, and waiting orders.

VOLUNTEER NAVAL SERVICE.

ORDERED.

Acting Volunteer Lieutenant Henry Brown, to command the *Dunbarton*.

Acting Master Edgar Van Slyck, to command the *Merry Jones*.

Acting Master O. Thatcher, to command the *O. H. Lee*.

Acting Assistant Surgeon Upham, to command the *John Griffiths*.

Acting Assistant Paymaster Herman Dorr, to the Mississippi Squadron.

Acting Assistant Surgeon L. H. Boyer, to the *Circassian*.

Acting Assistant Surgeon T. Baldwin Mitchell, to medical survey at New York.

Acting First Assistant Engineer Jacob Tucker, to medical survey at Boston, Mass.

Acting Assistant Paymaster W. L. Pynchon, to the *Hetzel*.

Acting Assistant Paymaster Samuel W. Kay, to the *Gemsbok*.

Acting Master's Mate Samuel S. Withington, to the *Circassian*.

Acting Assistant Surgeon H. E. W. Searle, to the *Tuscia*.

Acting Ensign Lemuel Pope, to the *Eolus*.

Acting Master W. Lamb, to the *Eolus*.

Acting Master William H. Mills, to the *Scioto*.

Acting Assistant Engineer Charles Wilson, to the *Eolus*.

Acting Assistant Surgeon B. W. Mitchell, to the West Gulf Squadron.

Acting Third Assistant Engineer Charles E. Black, to the *Black Hawk*.

Acting Master Samuel Holt, to command the *Aster*.

Acting Ensign J. W. Snow.

Acting Master's Mate John R. Bailey, of the *Wilderness*.

Acting Ensign George Dunn, of the Potomac Flotilla.

Acting Ensign Israel Hasbrook, of the *Sirius*.

VARIOUS NAVAL MATTERS.

FRIGATE *Sabine*, 52, sailed from Boston last Saturday.

THE U. Steam frigate *Pocahontas*, arrived at St. Thomas, July 29 from Steamer *Wyoming*, 7, arrived at St. Helena, June 4, from Capetown.

THE U. S. steamer *Sacramento* put into Queenstown on the 29th July, short of coal.

CAPTAIN Walter John Cohn Laug, late commanding one of the Canard steamships, died in Liverpool on July 7, aged 44 years.

THE blockade runner *Falcon*, with three smoke stacks and one mast forward, left Halifax Sunday afternoon for Wilmington direct. She had her cargo on board.

THE U. S. steamer *Northerner* arrived at Philadelphia on the 8th, from Alexandria, for repairs. She will add for her place of destination in a few days. The greatest activity prevails at the Navy Yard at the present time.

THE supply steamer Massachusetts, Lieutenant West commanding, arrived off the Philadelphia Yard from the south Atlantic Blockading Squadron last week. She brought a number of passengers, invalids and prisoners.

THE U. S. steam sloop-of-war *Dacotah*, Commander Clay, from the blockading squadron off Wilmington, arrived at Boston on the 5th. Reports 31 vessels, and Cape Hatteras, spoke U. S. *Connecticut*, from Boston for the Southern coast.

FRIGATE *Sabine*, 52, lying in Boston harbor, is a practice ships for boys entered under the late act of Congress as apprentices. She was to sail for Portland, Maine, sometime this week, as there are a number of recruits in that city waiting for an opportunity to enlist.

GALIGNANI gives the following curious bit of information:—"Many persons are ignorant of the meaning of the word *Alabama*. The name of the vessel which sank the *Alabama*. Kearsarge is a river in the southern part of North America, falling into the Bay of Vera Cruz."

THE U. S. steamer *Metamora*, arrived at the Washington Yard from James River on the 6th. The fine steamer *Don*, which is to be added to the squadron now fitting for foreign service, is now under a business continues exceedingly active. The Eastern Branch Bridge a very important thoroughfare, is now being strengthened by many additional piles, piling and timber.

A SUMMARY of marine losses for July shows the loss of thirty-three vessels, and the total value of the property destroyed, captured and burned is $2,276,000. Of the vessels destroyed, one was captured and burned by rebel privateers. Since January 1st, the whole number of vessels lost is 238, and the loss in property is fixed at $13,545,150. April was the most disastrous month, the losses for that month being 62 vessels, valued at $2,100,650.

ORDERS have been received at the Philadelphia Yard to get the steamer *Don* ready for service at New York with the utmost rapidity, and the work upon her is being forward rapidly. A thorough examination of the frigate after she was put upon the dock showed that the copper sheathing was in good condition, and only such parts needed for her have been received at the Yard. It is expected that the vessel will be ready for sea in the course of a week or two.

THE following regulations have been issued by the Queen of Great Britain, recently communicated to Minister Adams at London, a notice that no vessel whatever is allowed to pass up the River Thames above Gallions Reach without a pilot, and no vessel can move on board, without special permission from the Admiralty. Applications must be made by foreign vessels to the Consuls of their respective countries for arrangements for the loading and safe custody of powder, &c.

THE U. S. ship-of-the-line *Vermont*, Commander H. K. Thatcher, U. S. N., commanding, arrived at New York on Wednesday from Port Royal 24 instant. Arrived off Charleston bar same day at 2:30 P. M., where she received on board for passage home the men from the vessels of the squadron whose terms of service would expire, whose terms of enlistment had expired. She sailed thence the same evening at 6 P. M. for this port. Arrived off Sandy Hook on the evening of the 31st, and anchored.

A DRAFFE paper informs us that an English-built yacht, the *Pearl*, now belonging to a French gentleman, has come into that port, and is amusing the sea-side visitors by exhibiting a number of relics from the famous, piratical craft of the same name, which the *Pearl* was in part also a spectator. Among these objects saved in a curious sotterkin, belonging to the captain, are the original articles of agreement by his own interests in the way of prize money, a complete list of all the vessels destroyed or captured by the *Alabama*. The list begins on the 5th day of September, 1862, and ends on the 5th of April, 1864, and, curiously enough, enumerates just 65 captures, answering to the number of Captain Semmes' chronometers. Seven vessels are described as ransomed, 47 as burned, and 10 as sold; and the work of destruction is estimated at a million sterling.

THE U. S. lighthouse tender *Mantis*, Captain Williams, bound from Key West to the East and West Pigeon Light Stations, with materials for the repairs of those places, was captured by a rebel launch, manned with twenty-two men, on the morning of the 26th inst., off Bahia Honda Key, after capturing two of her crew, rigging, and all of her cargo that they could carry away on a small fishing schooner—a prize of the day before—set fire to and destroyed her. Her crew was carried by the pirates to Key St. Louis, thence about seven miles up Wolf River, whence they proceeded to take the men to Mobile. The Captain of the *Mantis*, who was accompanied by his little son, managed to elude the vigilance of the guard, and effected his escape into the woods, and upon getting back to the river procured a boat, and after many difficulties arrived at Fort Pike. The pilots at the mouth of the Mississippi River say they are afraid to venture out on account of the presence of these armed rebel launches.

A LARGE U. S. steamer, to be called the *Chattanooga*, a new being built at the shipyard of Messrs. Cramp & Son, in Kensington, Pa. She is a propeller, and built with a view to great speed, like the Wachusetts, which is being constructed at the same yard. The extreme length of the *Chattanooga* is 350 feet; breadth of beam at fast; depth of hold 21 feet; draught of water, when equipped, 14 feet. Builm Hills, 11 feet. She measures 2,500 tons, and will have two horizontal engines, with 84-inch cylinders and eight bollers weighing about two hundred tons. Her shaft will be about 80 feet long, and her propeller, which is a four-bladed one, will have a diameter of 18 feet. She will be bark-rigged, and capable of carrying 400 tons of coal, of which she will consume about six tons per day. It is expected that her speed will average about 18 knots per hour. Her armament will be large and very formidable. The process of constructing her is rapidly advancing, and she will be ready for launching at an early day.

The following changes have taken place at the Brooklyn Navy Yard during the past week:—The U. S. steamer Grand Gulf, Commander Rowan, arrived on the 1st inst. The Admiral Commander Eaton, from the South Atlantic Squadron on the 5th. The old ship of the line *Vermont*, arrived on the 5th from Port Royal, Commander Thatcher, commanding. She has supply steamer Massachusetts in tow. The U. S. steamer *Calico*, which was placed on the dry dock at Port of Pike street, August 6th, has again come to the Yard, where the machinery are now on the way for. The side-wheel steamer *Rhea*, purchased by the Government is here and was expected to go into commission on the 13th. The steamer *Agawam* is also here and ordered to take the place of the *Osco*, and was to sail on the 12th or 13th. The second new steamer, the keel of which is now being laid, is to be called the *Quinnebaug*. The 10th a draft of two hundred and seventy-three men was sent to the Philadelphia Navy Yard to man the receiving ship *North Carolina*. The U. S. steamer *Kensington*, Commander Schoonmaker, sailed on the 3d. The U. S. steamer *Mercury*, Master Brown, on the 4th. The U. S. steamer *Queen*, Acting Volunteer Lieutenant Fur, commanding, on the 8th.

OFFICIAL DISPATCHES

WAR DEPARTMENT, WASHINGTON, August 8—P. M.

To Major-General Dix, New York:

The following dispatches from the successful operations against Mobile appears in the Richmond Sentinel of this date, as I learn from a gentleman who left Richmond for Mobile on the 2d instant:

FROM HEADQUARTERS OF GENERAL BUTLER,}
August 5—P. M.

To His Excellency A. Lincoln, President:

The following is the official report, kindly furnished from the Richmond Sentinel of August 6:

MOBILE, August 6, 1864

HON. J. A. SEDDON, Secretary of War:

Sir: Admiral Farragut's fleet of fourteen ships and three bomb-vessels passed Fort Morgan this morning. The *Tecumseh*, a Monitor, struck a torpedo and sunk. Admiral Farragut reports that after the torpedo engagement with the enemy's fleet, Admiral Buchanan had to go, and he (Farragut) took command. The fleet of Admiral Buchanan attacked near the hospital. The *Morgan* is safe, and will try to run up to-night. The *Gaines* is aground. The *Selma* is captured. Admiral Buchanan has been engaging Fort Powell all day.

D. H. MAURY, Major General.

Major-General Sheridan has been assigned temporarily to the command of the forces in the Shenandoah Valley, and will report to the Department of Washington, the Middle Department, and the Department of the Susquehanna and Southwest Virginia. He will receive into the following instructions:—

HEADQUARTERS, MIDDLE MILITARY DEPARTMENT,
HARPER'S FERRY, VA., August 6—4:40 P. M.

Major-General Hunter, Commanding:

Brigadier-General Averill reports that a scout has just returned at Martinsburg, who reports that Early's command, including the cavalry near Bunker Hill yesterday, and scattered this morning at daylight, was moving up the Valley. The following official has been received from General Averill, bearing date 11 A. M. to-day:

(Signed) RUTH. B. STRATTON, Secretary of War.

WAR DEPARTMENT, August 10—10:30 A. M.

Major-General Dix, New York:

The following official account of our operations at Mobile, extracted from the Richmond Enquirer of the 8th instant, is published for information of the public:

HEADQUARTERS, MOBILE, August 5, 1864.

"Friday night Lieutenant-Colonel Williams, commanding Fort Morgan, communicated with the fleet.

"Yesterday and to-day the enemy are shelling Fort Gaines.

"The fleet is ready and will be ready for the bay. Great confidence prevails.

"The forts are satisfied with the conduct of Lieutenants Richards, Shaley and Barnes, of the Navy."

HEADQUARTERS, MOBILE, August 6.

"It is painfully humiliating to announce that Admiral Buchanan of Fort Gaines at half past nine o'clock this morning by Colonel Anderson, commanding Fort Morgan, surrendered Fort Gaines. The powerful work was provisioned for six months, and had a garrison of 600 men. Fort Morgan was provisioned with the same supply for 3d Sacrifice without the sanction of General Page. General Page immediately dispatched a boat for purpose—but has not received it—nor has attention was attracted by signal guns. Page repeatedly telegraphed, "Hold on to your flag." The same night he visited Fort Gaines, and found Anderson on board the Yankee fleet attending the terms for surrendering the garrison. Page refused to surrender on his return, cut to surrender the fort, and relieve him of his command.

"Fort Morgan signalled this morning that the enemy had occupied the main batallia of the Yankee flag over the magazine of Fort Morgan.

"Anderson's conduct is officially pronounced inexplicable and treacherous."

Dispatches just received from General Sheridan report his forces moving against the army under Breckenridge. Early is at Berry ville's main body at Bunker Hill.

The morning of August 7 reported the expulsion of an ordnance boat yesterday, loaded with ammunition, at City Point wharf. No damage has been received. Colonel Babcock, of General Grant's staff, was slightly wounded.

No official report of consequence are reported to-day. Fortune of Sheridan's command are continuing to arrive, and the total loss will not exceed one thousand.

EDWIN M. STANTON, Secretary of War.

By direction of the President, Captain Julius Eichne, 16th Illinois cavalry, is dismissed from the service of the United States, to date July 11th, 1864, for neglect of duty, in not having the rolls and records of his company in readiness for its muster out of service, thereby working prejudice to the interest of the service, and of his command, and violating the orders of the War Department, as promulgated in paragraph 3, of Circular No. 36, current series. Commanding Generals of Armies and Department are directed to promulgate this order to their respective commands.

Upon the recommendation of the Medical Director, the disinternent of bodies is prohibited within the limits of the Army of the Potomac, until further orders.

A Fling at Captain Semmes.—The London *Guardian*, a paper which has a strong sympathy with the Confederates, publishes a letter from its Paris correspondent concerning Captain Semmes and his claims to the sympathy of the Junior United Service Club of London, from which communication we extract the following paragraph:

"Much discussion is still going on in French and American circles, and among naval men and lawyers, respecting some of the results of the late action off Cherbourg. Among others, a letter of the Confederate commander has not been well received, nor produced a good impression upon the generality of readers. The insinuation contained in it against Captain Winslow on the score of humanity is generally believed to be unjust, and, at all events, too serious and shocking to be brought against any man in so vague and unsatisfactory a form as that adopted by his opponents. Captain Semmes' expression that 'he did not know' that all wished to sink his adversary as he proved to be is simply laughed at as childish and ridiculous. It is like a spoiled boy who has caught a licking, blustering about the other boy's being satisfied. It was Captain Semmes' business to know what he was going to do, and then do it, or not, and take his chance. Under all the circumstances, Captain Semmes is certainly regarded here as a fitting object for popular ovations or public dinners, but the letter is considered one that proposed to be paid him by such a body as the Junior United Service."

The War Department has issued an order in the case of colored soldiers which directs that all soldiers enlisted for three years, on 19 1861, shall be mustered for pay accordingly, and be paid the difference between the account heretofore received and the full pay to which white soldiers draning the same period; the question of freedom to be considered by the oath of the soldier, taken in connection with such other trustworthy information as can be obtained. The order is issued in accordance of act of Congress approved July 4, 1864.

By command of Major-General Banks, all officers and enlisted men, prisoners of war, who were delivered at Red River Landing, July 22, 1864, by Colonel C. C. Dwight, Commissioner of Exchange, have been declared exchanged. Officers and men of the Confederate belonging to regiments in the 0th Army corps are ordered to report at once to Major-General J. A. Dougherty, U. S. Volunteers, at Natchez. Those belonging to regiments formerly comprising the 13th corps, to Brigadier-General T. W. Sherman, commanding defences of New Orleans. Those officers and enlisted men belonging to organizations whose terms of service has expired will at once be transported to their respective States, there to be mustered out, in accordance with Circular No. 36, War Department, May 2, 1864.

The War Department has decided that the allowance for clothing for three months men who have served less than that time shall be fixed for the full time of service, the same rule applies to six and nine months men. The 100 days men will be treated in this respect the same as the three months troops.

OFFICIAL DIRECTORY.

WAR DEPARTMENT.

Major T. M. Vincent, Assistant Adjutant General—Office, 15 H street.

Major D. W. Flagler, Assistant Adjutant General, Chief of Ordnance—Office, opposite War Department.

OBITUARY.

Passed away on Wednesday, 27th of July, having finished her course on earth, Adaline H. Peters, wife of Rev. Samuel Peters, of U. S. Battalion of the U. S. Army. In the high noon of the year, on the day, of the day, in the midst of usefulness, she ceased for her, and eternity began. The heart that ever felt for others' woes and the hands that so gentle administered to them were stilled in death in that soft hour. The eyes that only beamed in love upon kindred and in sympathy upon the stranger were closed in death upon the feeling scenes of earth. The pencil never uttered gelle, but opened oftenest to give expression to a brilliant fancy or a generous thought, or more loudly the silence of death to speak and wield mystery. No artist's pencil can picture her mysteriously as the fond recollection of those who, having known, can never forget her.

Gifted in mind and person, gentle, winning, genial, affectionate, she was dead and yet lives in the memory of those who loved and knewn her. "I am distressed for thee, my sister; very pleasant hast thou been unto me; thy love to me was wonderful, surpassing the love of women." A moldering angel to the sick and suffering soldiers of every rank, she felt at last a sacrifice to herself, while others in their behalf. And now she sleeps the sleep of death, and her spirit high is written in their grateful hearts. "In labors abundant, in sufferings often, in perils by her own countrymen, in perils in the city, in weariness and painfulness, and watchings often," she earned the rich reward promised to the adorable Saviour, "Blessed are the merciful for they shall obtain mercy."

Business Notice.

We notice that G. S. Hubbard, of New Haven, Conn., is Agent for "Hiram Brewster's" pipes, at $2 00 per pure to advance—cheap enough. Try it a year.

MARRIED.

[Announcements of marriages should be paid for at the rate of fifty cents each.]

Keith—Henderson.—On Monday, August 1st, by Rev. Dr. Wylie, Major, Keith, 1st Penn. Cavalry, to Miss Annie, only daughter of Lieut. Alexander Henderson, U. S. Navy, all of Washington.

Bresler—Johnson.—At Jacksonville, Fla., at headquarters, Tenth Army Corps, on the 4th inst., by Chaplain Wm. H. Rand, 10th Reg't. J. S. Swain, purser of the M. E. church, Cincinnati, Ohio, to Miss Mary E. Johnson, of Jacksonville, Fla.

Bowen—Bowen.—Only daughter of Samuel C. Bowen, Esq., of Providence, R. I.

Hoyt—Hoyt.—At Annapolis, Md., on July 29th, by Rev. Joseph P. Jenkins, U. S. A., Lieutenant R. B. Lemon, Jr., 1st Regiment Maryland Volunteers, to Miss Mary Hoyt.

Philadelphia.

PROPOSALS FOR LOAN.

Treasury Department, July 25, 1864.

Notice is hereby given that subscriptions will be received by the Treasurer of the United States, to several Assistant Treasurers and designated Depositaries, and by the National Banks designated and qualified as Depositaries and Financial Agents, for Treasury Notes payable three years from August 15, 1864, bearing interest at the rate of seven and three-tenths per cent. per annum, with semi-annual coupons attached, payable in lawful money.

These notes will be convertible at the option of the holder at maturity, into six per cent. gold bearing bonds, redeemable after five and payable twenty years from August 15, 1864.

The notes will be issued in denominations of fifty, one hundred, five hundred, one thousand, and five thousand dollars, and will be issued in blank, or payable to order, as may be directed by the subscribers.

All subscriptions must be for fifty dollars, or some multiple of fifty dollars

Duplicate certificates will be issued for all deposits. The party depositing must endorse upon the original certificate the denomination of notes required, and whether they are to be issued in blank or payable to order. When so endorsed it must be left with the officer receiving the deposit, to be forwarded to the Department.

The notes will be transmitted to the owners free of transportation charges as soon after the receipt of the original Certificates of Deposit as they can be prepared.

Interest will be allowed to August 15 on all deposits made prior to that date, and will be paid by the Department upon receipt of the original certificates.

As the notes draw interest from August 15, persons making deposits subsequent to that date must pay to the interest accrued from date of note to date of deposit.

Parties depositing twenty-five thousand dollars and upwards for those notes at any one time will be allowed a commission of one-quarter of one per cent., which will be paid by the Department on the receipt of a bill for the amount, certified to by the officer with whom the deposit was made. No deduction for commissions must be made from the deposits.

Officers receiving deposits will see that the proper endorsements are made upon the original certificates.

All officers authorized to receive deposits are requested to give to applicants all desired information, and afford every facility for making subscriptions.

W. P. FESSENDEN,
Secretary of the Treasury.

SUBSCRIPTIONS WILL BE RECEIVED BY THE

Assistant Treasurer of the United States, corner of Wall and Nassau streets.

First National Bank of New York, No. 4 Wall-st.

AFFORD FACILITIES TO SUBSCRIBERS.

PROPOSALS FOR MATERIALS FOR THE NAVY.

NAVY DEPARTMENT,
BUREAU OF STEAM ENGINEERING, July 15, 1864.

Sealed proposals to furnish materials for the Navy for the fiscal year ending June 30, 1865, will be received at the Bureau of Steam Engineering, until 12 o'clock of the 15th day of August next, at which time the opening will be commenced.

Proposals must be endorsed "Proposals for Materials for the Navy," that they may be distinguished from other business letters, and directed to the Chief of the Bureau of Steam Engineering.

The articles specified and embraced in the classes named are particularly described in the printed schedules, or in specifications which will be prepared and furnished by application to the commandants of the respective navy yards, to the Bureau of Steam Engineering, and those at the yards upon application to the Bureau.

The Bureau reserves to itself the right to reject any or all of the bids, each clause being only will be furnished as is actually required for the Steam Engineering and Navy Agent for each station will, in addition to the schedule of articles, send with it a printed copy of the schedule of the other yards, for examination only, from which any bidder for more than one will be desirable to make application for any of the articles of those yards. In awarding contracts, due preference will be given to articles of American manufacture.

Offers must be made for the whole of the class as per page 3 and 4 of the printed schedule, and must strict conformity therewith, or they will not be considered.

Upon application to the Bureau, to the Commandant of any yard, or to any Navy Agent, a form of offer, of guarantee, and other necessary information regarding the proposals will be furnished.

The contract will be awarded to the lowest bidder who has complied with the terms of the notice, or if none of such bidders, the Navy Department reserves the right to reject the bids, or to purchase at open market.

The contracts will bear date the day the notification is given and delivery must be commenced from that date.

Sureties in the full amount will be required for the contract, and their responsibility certified to by a United States district judge, United States district attorney, collector, or Navy Agent. An additional security, twenty per cent., will be required to cover the amount of the bills until the contract shall have been completed, and the articles delivered and duly approved in triplicate by the commandants of the respective navy yards, to the Bureau, or to any of the points of delivery, in funds or certificates at the option of the Government. Bills will not be paid to the warrant for the same shall have been passed by the Secretary of the Treasury.

The following are the classes required at the respective Navy Yards:

KITTERY, MAINE.

Class No. 1, boiler iron and rivets; No. 2, pig iron; No. 3, boiler tubing; No. 4, brass and composition castings; No. 5, copper; No. 6, lead; No. 7, spelter; No. 8, tin; No. 9, zinc; No. 10, sheet iron; No. 11, nails and spikes; No. 16, engineers' stores, No. 14, engineers' stores; No. 15, engineers' stores; No. 16, engineers' stores; No. 17, engineers' stores; No. 18, engineers' stores; No. 19, engineers' stores; No. 20, engineers' stores; No. 21, engineers' stores; No. 22, engineers' stores; No. 23, engineers' stores; No.

THE DERRINGER PISTOL.
TIFFANY & CO.,
550 AND 552 BROADWAY, NEW YORK,
SOLE AGENTS FOR NEW YORK AND THE EASTERN STATES.

By a recent arrangement with Mr. DERRINGER, the subscribers have undertaken the exclusive agency, for New York and the Eastern States, of the well-known pocket arm of which he is the inventor and only manufacturer. They propose always constantly in store a full assortment, comprising all sizes and finishes of this unique pistol, and will be at all times able to fill Trade Orders with promptness, at manufacturers' prices. The arrangement has become necessary on the part of Mr. Derringer, in order to protect the public from spurious articles sometimes sold for his wares, and that purchasers only, wholesale or retail, will be safe who appreciate this fact.

THE CAMPAIGN IN VIRGINIA.

THE Court of Investigation at Petersburgh has now taken the testimony of all the prominent actors in the disastrous assault, but its opinion is not yet announced. While it has been exploring the causes of the disaster, the enemy has sprung a mine on us, and with quite as little success as attended our own similar but more elaborate effort. This was intended as a countermine to a gallery thought to be commenced by our forces. We have already explained that the enemy did not follow their explosion with an assault. BEAUREGARD's account of the affair is as follows:—"An experimental mine was fired successfully last night "[Aug. 6th], in front of GRACIE's line. The enemy "appeared much alarmed. All quiet to-day." To judge from the Richmond papers, the enemy seems very anxious about our mining operations, and is on the alert to discover other tunnels against different parts of his works. "The extraordinary proclivities "of the enemy," says the *Enquirer*, "form the standing theme in Petersburgh." Accordingly, LEE is countermining busily here and there. Indeed, on both sides, there has been much digging done of late. The enemy is erecting stronger defences within his outer lines, and a new and strong redoubt has been discovered on his right, already nearly completed. He has been mounting new and formidable guns in our front also. In spite of these demonstrations, and of the frequent report that the enemy is endeavoring to turn our left, there are good grounds for supposing that he recently detached an important fraction of his command for temporary service elsewhere.

After the sharp skirmish and the artillery duel of Sunday evening, which took place principally in front of the Ninth corps, there was a lull in the contest, and Monday was particularly quiet. In the afternoon of Tuesday, the 9th, another heavy duel of mortars occurred on the right and right centre, lasting till nine o'clock. About noon of the same day, a calamitous explosion took place at City Point. An ordnance boat at the wharf was receiving fixed ammunition, when, by some accident, probably the careless handling and dropping of one of the cases, the whole cargo suddenly blew up, with a loud and continuous noise, which was heard throughout our line and in that of the enemy. A fearful loss of life and a large destruction of property resulted. The ordnance barge and one other were blown to fragments, and a number of buildings, offices, stores and tents, were thrown down. The high bluff on the shore was perforated with shells, balls, and bullets, and fragments of ammunition and parts of vessels and houses were scattered profusely for many yards. About 400 feet of the new warehouse were thrown down and its contents dispersed. The Post Office was exploded and its contents blown to the winds. Some of the boats in the river received a large number of shots. Most horrid of all, the limbs and shattered bodies of the unfortunate bystanders were everywhere to be seen, on shore and in the river. The Provost Guard was promptly at hand, restoring order and relieving the sufferers, and, with the aid of a tug, which threw six streams of water, extinguished the flames. The loss in life was 60 or 70 killed, including 12 soldiers and 40 Government laborers, and about 130 wounded, including 3 officers, 4 soldiers, and over 100 laborers. "Twelve whole bodies "and twenty bags of fragments" had been buried up to the 11th. Many of the killed were sunk in the river. The 20th New York regiment suffered most.

From Tuesday, the 9th, until Saturday, the 13th, there is little to record, beyond the usual story of picket and artillery firing, and the suffering caused by the intense heat, the latter being exaggerated, as correspondents say, by the annoyance of summer insects, and especially of the swarms of flies. On Thursday afternoon and evening, however, the firing was unusually sharp, and before daylight of Friday the whole line was aroused by a furious cannonade from the enemy's batteries, right and left, lasting more than an hour. It arose from an advance of our picket lines during the night. In the course of the day, the enemy's new work, built near the exploded one, announced its completion by a rapid fire from its armament. Another duel of mortars took place in the evening. But the casualties of the day were not large. The mortar duel was repeated on Saturday evening, and picket firing was kept up all night along the line to cover important movements on the James. The same evening General BURNSIDE turned over the Ninth corps to the temporary command of General WILCOX, and started North on leave of absence. About twenty deserters came into the lines.

THE CANAL AT DUTCH GAP.

On the James, meanwhile, important events were occurring. On Wednesday, the 10th, a force had been thrown across the James at Dutch Gap. Here, there is a great bend in the river, forming a peninsula called Farrar's Island, which a neck of land less than half a mile wide connects with the north shore. This isthmus was to be cut by a canal. If completed and occupied, it would save a circuit of six miles in a bend crowded with obstructions and torpedoes, and guarded by the rebel gunboats, which had their station at Dutch Gap. If completed and occupied, it would also flank the enemy's strong and important position at Howlett's which we have before described as sweeping the river near this point with heavy batteries. It would necessitate to the enemy the construction of a new and more extended line of defence, requiring a larger complement of men to defend it, and especially it would bring our forces dangerously near to Fort Darling, having got rid of the obstructions at Dutch Gap. The work was prosecuted with impunity until Friday, when, soon after daybreak, the enemy collected in such force in the vicinity that our gunboats opened heavily upon them for several hours. At dawn of Saturday, two of the enemy's rams came down to the tongue of land, and, in their familiar spot, under the lee of the island, sheltered from our gunboats, opened fire upon the negro troops, who were digging the canal. The Howlett House battery, situated just above the point where BUTLER's line strikes the river, also opened, and was answered by our battery at Crow's Nest, near Dutch Gap. As the river is full of obstructions above the latter point, at the extremity of Farrar's Island, our gunboats could not run up to take part in the engagement. Our troops had already thrown up entrenchments along the line of the canal, but were now subjected to a fire from the Howlett House, on the west, and from the *Virginia* and *Richmond* on the north. But the men bravely continued their work, and the firing lasted till after noon without effect. A shot from the Crow's Nest battery dismounted a gun at Howlett's.

The enemy was evidently determined to dispute our advance, although one of the Richmond papers had affected to describe the canal project as only a valuable commercial improvement to the city. The point "was "of no impediment in the way of our trade, and the "bend, which is shut off from breezes from almost "every quarter, was always familiarly known by the "sailors, who held it in special dread, as 'Pull and be "'damned.'" But, on Sunday, the work on the canal was covered by an unexpected move. For some days previous a fleet of transports had been collected at City Point, and the Second corps was brought over from Petersburgh and embarked on them. This movement was noted by the enemy, who, not only observed the decided contraction of our line on the left, but also the transports. "GRANT," says a Richmond paper, "is moving large bodies of his troops cautiously "and quietly from our front. Where he is sending "them, we, of course, do not know, but they leave "City Point in transports and go down the river." So far, however, from being "cautious," the movement was ostentatious. The Second corps moved down the river with bands playing on Saturday evening, as if for Fortress Monroe. But, under cover of the night, the transports turned, headed up the river again at full speed, and soon reached Deep Bottom. There the corps was disembarked, and TURNER's and W. BIRNEY's divisions of the Tenth corps crossed on pontoons about two o'clock the same night to the same point, and joined FOSTER's division, which, as it will be remembered, has long held position there.

Early on Sunday morning, BIRNEY pushed out FOSTER's brigade of his Tenth corps towards the Rebel works, at Strawberry Plains, the position of which has already been described in our account of the feint at this same point before the late assault on Petersburgh. The brigade easily drove the thin line of the enemy's skirmishers before them, and, at length as their outer works were approached, the Twenty-fourth Massachusetts charged and carried them, capturing 70 prisoners. By noon, HANCOCK's corps was disembarked, and GREGG's cavalry having cleared the roads for it, moved up to the right of the Tenth corps, and got into position along the Newmarket road, being mainly on the right of Four-Mile Creek, while the Tenth was on the left of the same stream. The gunboats supported the rear or centre, and engaged the enemy's works, which replied both upon the boats and the troops. There was skirmishing in the afternoon, and, at length, a general advance of the Second and Tenth corps, with a charge and a brisk contest resulting in the capture of four guns and a line of breastworks. The particulars of this engagement are so confused that we shall suspend a detailed account of it till next week. It is also probable that other forces were checked, after advancing some distance with success, and lost about 500 men. Nearly 100 prisoners were captured by us during the day. On Monday, there was more skirmishing. The affair, so far, does not look to us like a serious movement on Richmond. Whether it will develope into that remains to be seen.

THE SHENANDOAH VALLEY.

After General GRANT's visit to Maryland, of which mentioned was made last week, the forces designated for the defence of the Valley, under General SHERIDAN, began assembling at Harper's Ferry, and the force consisted of the Sixth and Nineteenth corps and CROOK's division of Crook's and Averell's corps.

of cavalry, with some of HUNTER'S cavalry, being the brigades of DEVINS, CUSTER, LOWELL, and GIBBS. On Wednesday, the 10th, the column started down the valley. There was some skirmishing on Thursday and Friday, near Winchester, and again at Newtown. On Saturday our forces were as far as Strasburgh. But the latest report is that they have fallen back to Winchester, EARLY too strong for them in front.

THE ATTACK ON MOBILE.

WE have the pleasure of recording this week a brilliant naval victory gained in Mobile Bay by the hero of New Orleans, Admiral FARRAGUT. The admiral's own account furnishes all that is required to understand the nature of the battle; but we will add a collateral account of such details as would not properly be included in an official narrative. Mobile is situated at the head of Mobile Bay, about 30 miles from the Gulf. At the mouth of the bay is Dauphin Island, with a strait on each side. The eastern strait is the only one accessible to our fleet, its channel being about 20 feet deep, while the water in the other is only about 5 feet deep. Near the upper end of the bay is Dog River bar, where the water is about 9 feet deep. Two forts guard the mouth of the bay. Fort Morgan is at the end of the long, low, sandy point which makes out into the bay opposite Dauphin Island, and about 4 miles distant therefrom. On the latter is Fort Gaines. The channel runs close under the guns of Fort Morgan. A mile or more above Fort Gaines is Fort Powell, and adjoining are a water battery and some earthworks. Fort Morgan is a remarkably powerful fort, and all three are armed with the best guns in the Confederate service. The channel left open in front of Fort Morgan was about 1,500 yards wide, the rest of it being filled up with tiers of piles, connected by chains. Outside of the piles were the torpedoes.

On the afternoon of August 3d, the *Winnebago* (Monitor) steamed towards Fort Morgan, and threw a few shells into it, and on the noon of the next day, she did a similar favor for Fort Gaines. Soon after sunrise of August 5th, the fleet moved up the bay, two vessels abreast, so lashed together as to allow each ship to tow along its consort, in case of the crippling of the latter. The wooden fleet numbered fourteen vessels. The four Monitors, *Tecumseh*, *Manhattan*, *Chickasaw*, and *Winnebago*, were in advance.

Soon after 7, Fort Morgan and the enemy's four vessels which were lying under its guns, opened fire, and our advance slowing and the rear closing up into the prescribed order of battle, the whole fleet replied with tremendous effect, first with the rifled bow guns and then with broadsides, as soon as possible. The Flag-ship *Hartford* at once turned its attention to Fort Morgan, using its nine-inch guns with great precision, and the Admiral, in the maintop, where he had lashed himself, communicated his orders through speaking tubes. At 7.40, the Monitor *Tecumseh* struck a torpedo, and instantly sank, carrying down all but ten of her crew, and the gallant CRAVEN, her commander. A few were saved by a boat from the *Metacomet*, in the thick of the storm of shot and shell. The whole fleet was now running at full speed past the Rebel forts, amid volleys from them. Before eight the Flag-ship had got by Fort Morgan, and the rear had passed it half an hour later. During this time the three gunboats of the enemy, the *Selma*, *Morgan*, and *Gaines*, poured in a galling and raking fire. In the rear of the fleet was the Rebel ram *Tennessee*, which had attacked the fleet at the outset, and now stood towards them again. Accordingly, the ships were all cast off from their couplings, and the *Metacomet* attacked the *Selma*, while the rest of the fleet turned on the ram. After a brisk [illegible] and running fight, the *Selma* struck her flag to the *Metacomet*, Lieutenant-Commander JOUETT, being boarded, it was found that her decks were filled with the dead and wounded, and running with blood. Meanwhile, the ram down the ram. The *Lackawanna*; [illegible] severely, and [illegible] broadside of [illegible] feet. [illegible] and [illegible]

[illegible], on [illegible] are covered [illegible] scrapers were [illegible] and been given [illegible]

the encounter. The gunboats *Morgan* and *Gaines* escaped to the protection of Fort Morgan, and here the action closed.

The whole fight was gallantly conducted on both sides. The heroism of Admiral FARRAGUT in pitting his wooden ships against the formidable forts and the huge iron-clad, is apparent. The enemy's fleet, also, only surrendered after a desperate resistance, and the ram *Tennessee* went through a terrible engagement. So hot was the opening fire on Fort Morgan that the gunners were driven from the guns and the fort almost silenced, until the fleet had passed. Our loss in the whole affair was about 50 killed and 100 wounded, while about 100 went down with the *Tecumseh*, making a total of from 240 to 250. The Flagship suffered most severely, losing 19 killed and 23 wounded. Of our vessels, the *Tecumseh* was sunk, the fine dispatch-boat *Phillippi* was burned (the fate of her crew being as yet unknown), the *Hartford* badly crushed by the prow of the *Metacomet*, while each ship was trying to run down the *Tennessee*, and the *Oneida* badly injured in her works by the *Tennessee*, and carried off into shoal water by her consorts to avoid sinking. The other vessels suffered comparatively little. The enemy lost less than 40 in killed and wounded in his fleet, the *Selma* suffering most. The ram had but three killed. The enemy lost his ram and the *Selma*, and acknowledges that "the *Gaines* retired to Fort Morgan in a sinking condition." The *Morgan* was the only vessel of the four that escaped. He claims that the contest was one of 212 guns against 32; but he does not reckon his forts, to whose fire our fleet was considerably exposed.

While this action was going on, General GRANGER invested Fort Gaines in the rear, and also took in reverse the water batteries outside the fort, silencing them. The Monitor *Chickasaw* turned her attention to Fort Powell, situated at Grant's Pass, at the other end of Dauphin Island, and towed a steam barge out from under the guns of the fort. She then engaged the fort again vigorously. The operations of General GRANGER, in connection with those of the fleet, forced the unconditional surrender of Fort Gaines on the morning of the 8th, with its armament of 26 guns, its garrison of 56 officers and 818 men, and more than six months' provisions. Fort Powell met the same fate. Fort Powell was evacuated, and its armament of 18 guns left in our hands. At latest accounts Fort Morgan still held out, and Mobile had not yet been approached. But, at all events, the blockade running in this Bay is over.

MINOR OPERATIONS.

FROM the West there is little of importance to record. The banks of the Mississippi, and those of the rivers in Arkansas and Louisiana are still infested by guerrillas. The steamer *Madison* was lately fired into near Napoleon, on the Mississippi, and some soldiers wounded. The steamer *Bell* was set on fire with shells from a battery at Carrollton, and burned, on July 24th. On the 10th of August, a battery on the Arkansas shore fired on the *Empress*, and sixty shot struck her. A supporting force riddled her upper works with musketry, and eighteen discharged soldiers on board were killed and wounded. The pilot ashore was at length, and rescued the steamer. The same day, a sharp skirmish occurred at Abbeyville, La., between our cavalry under General HATCH and the enemy's under CHALMERS, in which a few prisoners and caissons were captured from the latter. On the 5th of August, the camp of the Eleventh New York cavalry near Donaldsonville, La., was surrounded by the enemy under Colonel SCOTT, and a demand made to surrender. Our forces cut their way through, with small loss, except that of about sixty men, mostly left sick in camp. Soon after, the camp was relocated.

Kentucky continues to be the prey of guerrillas, who rove about, plundering horses and stock, and occasionally skirmish with our troops. The town of Henderson was recently attacked by the enemy, but our gunboats protected it. Colonel KIRK's expedition to North Carolina returned to Knoxville on the 8th of July, with 150 prisoners, 60 negroes and 75 horses, having skirmished frequently during their month's trip, and having destroyed much Rebel property. On the 13th, a party of the enemy's cavalry crossed the Ohio into Illinois, and captured five steamers near Shawneetown, loaded with Government cattle.

Indian hostilities were resumed near Fort Laramie, July 21st, on an attempt of the Indians to steal horses. There have also been hostilities with the Sioux between Fort Rice and Fort Union, but nothing of consequence has occurred.

Land operations against Charleston seem to have been suspended. Our forces have evacuated John's Island, and, beyond the occasional shelling of the city, there is little of interest from Charleston Harbor. It is clear that the demonstration of General FOSTER very nearly proved a success. The attack on Fort Johnson was a surprise, and, but for misfortunes connected with the management of our own forces, might have been an important victory. A raid in Florida has been made by General BIRNEY, with some success. On the 24th and 25th of July, several bridges across the St. Mary's near Baldwin, were destroyed, and Baldwin was occupied and held, the enemy hastily evacuating the town. Some captures of cars and other Rebel property were made. It will be remembered that Baldwin is at the junction of two railroads, and about half way from Jacksonville to Olustee.

COMMANDER T. A. M. CRAVEN, U. S. N.

REAR-ADMIRAL FARRAGUT'S brief official dispatch announces that on the 5th of the present month, while passing the forts in Mobile harbor, the Monitor *Tecumseh* was struck by a torpedo, and that she sank with all her officers and crew, the pilot and one man only being picked up by a boat sent from the *Metacomet*, alone excepted. This leaves no room to doubt that her commander, Commander TUNIS A. M. CRAVEN perished with his vessel, and that the NAVY has lost one of its most skilful, devoted and scientific officers.

Commander CRAVEN was a native of New Hampshire, but received his appointment to the Navy while a resident of the State of New York, in February of 1829. Since that time he had seen about twenty-two years of sea service, while much the larger portion of the remaining years of his life was spent on shore in active duty as above. He served in 1830 in the sloop-of-war *Boston*, of the Mediterranean squadron, and in 1834 joined the sloop-of-war *St. Louis*, in West India waters. The following year he received his warrant as a passed midshipman, and in 1836 was for a short time engaged at the National Observatory, but soon asked to be relieved, and was, at his own request, placed on the Coast Survey, for whose duties he immediately displayed his rare aptitude. In 1841 he was promoted to a Lieutenancy and was attached to the sloop-of-war *Falmouth* till 1843, when he was transferred to the receiving-ship *North Carolina* at New York. A short time after he was on the steamship *Lexington*, and from 1844 to 1847 was on furlough. In the latter year he was on the cruises taken by the *Dale*, of the Pacific squadron. From 1850 to 1858 he was employed on the Coast Survey, with an official business the Isthmus of Darien, and leaving the Coast Survey in 1859, was appointed to the command of the steamer *Mohawk*, of the Home squadron, stationed off the coast of Cuba to intercept slavers. While in the Coast Survey he was an available employé as a hydrographer, and did the country constant and valuable service.

When the Rebellion broke out Commander CRAVEN was placed in command of the *Crusader*, and had an important share in preserving for the Union the fortress of Key West. The Board of Underwriters of New York presented his wife with a service of plate, and sent to him a complimentary letter, in appreciation of the desire he had always evinced to render each assistance to the commerce of one country, as could properly be extended in the performance of duty, and for rendering, on several occasions, important services to American vessels in distress, in the vicinity of Key West, Fla.

Commander CRAVEN received his present commission April 24, 1861, and in September, 1861, he left the *Crusader* and took command of the new screw sloop *Tuscarora*, which was dispatched across the Atlantic in search for the Rebel pirates. Though his failure to take the *Alabama* caused him much annoyance, he did good service, in blockading the *Sumter*, at Gibraltar and compelling the Rebels to abandon that vessel. He returned in July, 1863. Early this year he was ordered to the command of the *Tecumseh*, and sailed in her for Hampton Roads to join Acting Rear-Admiral Lee's James river flotilla. He was among the first to reach City Point, and, after a somewhat lengthened stay in the James River, his vessel was ordered to join Rear-Admiral FARRAGUT'S squadron, and here she met the fatal torpedo.

Commander CRAVEN was a brother of ALFRED CRAVEN, Esq., Engineer of the Croton Department in New York, and of Captain THOMAS T. CRAVEN, commanding the *Niagara*, now on duty in the English and French waters. His reputation was of the very highest, not only as an able and studious officer, but as a thorough seaman and a thorough gentleman. A brave, loyal, true-hearted man, we knew he met death calmly and with a good conscience.

NEW PUBLICATIONS.

SYSTEMS OF MILITARY BRIDGES. By Brigadier-General GEORGE W. CULLUM. New York: D. VAN NOSTRAND, 1863.

MILITARY BRIDGES. By HERMANN HAUPT. New York: D. VAN NOSTRAND, 1864.

THESE two recent works on bridges are sufficient in themselves to give a military student all the theoretical knowledge he needs in the course of an ordinary campaign. The treatise of Sir HOWARD DOUGLAS, indeed, is still standard on this topic, as the same author is standard on the other military field most liable to be touched. There is also the work of HAILLOT, which we believe was never translated from the French. In our own country, the subject of military bridges is introduced in general into engineering works, as, for instance, in Captain DUANE'S Manual for Engineer Troops. But for practical use to our officers, these two works are worth all preceding, because they are carefully adapted to the necessities and peculiarities of our own country, aim to suggest expedients for the precise difficulties which we meet, and, finally, are chiefly based on experience derived by actual practice in the American war and the present Rebellion.

And here it may be remarked that the wonderful expansion which has been given to military science by the present unhappy war, is almost incredible. Not, indeed, that the great principles which underlie the operations, and even the laws of strategy and the combinations of tactics, have been essentially changed. But the *material*, the ways and means, the appliances of engineering, the science of projectiles—these and similar branches of the military profession have made wonderful progress—and of course have rendered much more sensible than in that of military bridges. Mr. HAUPT well remarks that "in none of the works previously published" ed can be found plans for military *railroad* bridges"—and yet railroads play a part in our war of incalculable importance. GENERAL CULLUM'S work is chiefly devoted to the bridges in use by our Army, with reference, however, to the systems employed in Europe and British India. It pronounces as the great desideratum—"stability of structure, "activity of manœuvre, and minimum transportation of "the necessary equipage for overcoming any given gap." The first part of the work contains, with slight modifications, the earlier professional paper of the author, which our readers will remember, entitled "Military Bridges with Iron Rubber Pontoons." In the present work, he adds chapters on trestle bridges and Pontoon equipages, descriptions of foreign systems of military bridges, and directions for the preservation, destruction and reestablishment of bridges. As a captain in the corps of engineers, General CULLUM had the supervision of the devising, building, and preparing for service the various pontoon bridges that were sent to Mexico during the Mexican war, and from this service acquired much celebrity. As lieutenant-colonel in the corps of engineers, aide to General SCOTT, and chief of General HALLECK'S staff, while the latter was in campaign, as well as, more recently, in Washington, General CULLUM has had abundant opportunity to revise his opinions, and add to them the results of fresh experience.

The handsome volume of General HAUPT, illustrated by 69 very fine lithographic engravings, is a very elaborate contribution to the science of American military bridge building. It contains suggestions of new expedients and constructions for crossing streams and chasms. It has some very fine designs for trestle and truss bridges, and all is, as the book itself states, "adapted especially to the wants of "the service in the United States." The author is widely known, not only as a civil engineer, but as the late Chief of Bureau of Construction and Operation of Military Railways. His experience in Virginia in former campaigns was of great value, and its results may constantly be seen in the work before us. The discussions of military railroads are almost entirely new, and very important. And we cannot refrain from quoting a few lines to show with what absurdity ignorant criticism has often condemned the tardiness of operations in the Virginia campaign:

> European armies relied wholly upon wagon transportation and their ammunition trains. In case of retreat, the pursuers and the pursued are equally exempt, as a rule, from any serious embarrassment as their transportation is by rail. Of course, the retreating army would destroy bridges, and, perhaps, a few miles of track; nevertheless, the general he soon restored by fords, pontoon trains, or other expedients. This is widely different when a large army moves with its baggage and stores by rail, and marches after them without encumbrances, within the range of the operating forces at each end. The necessity of reconstructing bridges of sufficient strength to carry heavy trains, and often of preserving the road-bed and tracks, by the disparity of advantages between the advance and retreat is greatly enhanced, when the pursuers are marching with the distance between themselves and their base of supplies, with the constantly increasing danger of having their communications destroyed and cannot, by their rear, while the pursued are reducing the distance of transportation, both the necessity and the difficulty of reconstructing bridges rapidly on a line of road in good condition; the other advances slowly on a broken line, which must be reconstructed. It is not surprising, therefore, that the history of the present war scarcely affords an instance of the successful pursuit of a retreating enemy, but, on the contrary, of many signal failures. It could scarcely be otherwise, excepting where railroads did not exist, and both armies were equally encumbered, or equally unencumbered, by transportation.

In reference to the excessive amount of transportation generally connected with our Army, the author says:

> No one who has been familiar with business transactions, conducted with the efficiency and economy which mark the operations of individuals, can fail to experience emotions of pain and regret at the unnecessary expenditure for transportation, in proportion to the results derived from it. In the armies of the United States there have been, at times, as many as 4,000 wagons as one, exclusive of cattle; each animal requiring an amount of food, rail, and wagon transportation equivalent to five men; and he has cost, conducing to efficiency and mobility, the enormous baggage-trains have served to encumber roads, and often render movements impossible. If the practical suggestions of General McDOWALL could be adopted, the difficulties and expense of transportation, in part, would be obviated. Of the 4,000 wagons spoken of above, 2,000 would be sufficient, to a thoroughly equipped engineer command, for the purposes of long expeditions; could arms attain, even almost, to the range of such materials as the country afforded, without being so entirely dependent on them as they have been; the number of wagons could probably be reduced one-half, and the whole transportation of men and animals almost to one-third, of that which is now considered necessary.

To members of the engineer corps, these two works are familiar. But they are especially recommended to the numerous staff officers of our volunteer Army, to whom they will prove extremely useful. The country in which the Army operates is so thoroughly irrigated by rivers, streams and runs, that the science of bridge building has become of the greatest importance. Indeed, the whole GRANT'S ex- part of the engineering operations of the Army in the Chickahominy campaign will show how much of the delay of that campaign arose from the necessities of bridge building.

THE INTERVIEW WITH MR. DAVIS.

WE take from an article entitled "Our Visit to Richmond," in the September number of the *Atlantic Monthly*, the account of the interview of the self-constituted peace commissioners, Colonel JAQUES and Mr. J. R. GILMORE, with Mr. JEFFERSON DAVIS. It will be of interest to the Army as showing them what chance there is of obtaining a peace on the basis of the Union by other means than their own strong arms and stout hearts:

> Mr. BENJAMIN occupied his previous seat at the table, and all of us followed his example. He looked very well, iron-grey hair and beard, and a clear gray eye, full of life and vigor. He had a broad, massive forehead, and a mouth and chin denoting great decision of character. His left arm was enacinted and full of wrinkles, but his features were good, especially his eyes—though one of them bore a scar, apparently made by a sharp instrument. He wore a suit of grayish-brown, evidently of foreign manufacture, and as he rose, I perceived that he was five feet ten inches high, with a slight stoop in the shoulders. His manners were simple, easy, and quite fascinating; and he threw an indescribable charm into his voice, as he extended his hand, and said to us:
>
> "I am glad to see you, gentlemen. You are very welcome to Richmond."
>
> And this was the man who was President of the United States under FRANKLIN PIERCE! Could we know the heart, soul, and brains of the Southern Confederacy!
>
> His manner put me entirely at my ease—the Colonel also, I think, for he began the conversation. I replied:
>
> "We thank you, Mr. DAVIS. It is not often you meet men of our clothes, and our principles, in Richmond."
>
> "Not often, not often," he said, with a smile; "I trust your coming may lead to a more frequent and more friendly intercourse between the North and the South."
>
> "We assume that," I said.
>
> "Mr. BENJAMIN tells me you have asked to see me, gentlemen."
>
> And he paused, as if desiring we should finish the sentence. The Colonel replied:
>
> "Yes, sir. We have asked this interview in the hope that you may suggest some way by which this war can be stopped. Our people want peace; your people do, and your Congress does, and we think that we, also, have come to ask how it can be brought about."
>
> "In a very simple way. Withdraw your armies from our territory, and peace will come at once. We do not seek to subjugate you. We are not waging an offensive war, and have no wish to overrun Pennsylvania. We are as we are forced to invade you to prevent your invading us. Let us alone and peace will come at once."
>
> "But we cannot let you alone," I urged as you repudiate the Union. That is the one thing the Northern people will not surrender."
>
> "I know. You would deny to us what you exact for yourselves—the right of self-government."
>
> "No, sir," I remarked. "We would deny you no natural right. But we think Union essential to peace; and, Mr. DAVIS, *could* two people, with the same language, separated by a narrow boundary, live at peace with each other? Would not disputes constantly arise, and cause almost constant war between them?"
>
> "Undoubtedly—with this generation. You have sown such bitterness at the South, you have put such an ocean of blood between the two sections, that I despair of seeing any harmony in my day. But children forget their war, but we cannot."
>
> "I think the differences you speak of, sir," said the Colonel, "does not really exist. We must talk here as friends; our soldiers meet and fraternize with each other; and I feel sure that, in a few years, a common feeling of nationality would arise between us than has ever existed. The war has made us know and respect each other better than we ever did before. How many Northern men, sir, have had it from many of them—your leading citizens."
>
> "They are mistaken," replied Mr. DAVIS. "They do not understand the sentiment. How can we feel anything but bitterness towards men who deny us our rights? If you came to my house and drive me out of it, am I not your natural enemy?"
>
> "You put the case too strongly. But we cannot fight forever; the war must end at some time; we must finally agree upon something; can we not agree now and stop this frightful carnage? We are both Christian men, Mr. DAVIS. Can you, as a Christian man, leave untried any means that may lead to peace?"
>
> "No, I cannot. I desire peace as much as you do. I deplore bloodshed as much as you do; but I feel that not one drop of the blood shed in this war is on *my* hands; I can look up to my God with a clear conscience. I had no power to avert this war. I saw it coming, and for twelve years worked night and day to prevent it, but I could not. The North was mad and blind: it would not let us govern ourselves; and so the war came, and now it must go on till the last man of this generation falls in his tracks, and his children sow his musket and fight the battles, unless you acknowledge our right to self-government. We are not fighting for slavery. We are fighting for independence—all that our ctatermination was with have."
>
> "And there are at least four-and-a-half millions of us left; so you see you have a work before you," said Mr. BENJAMIN, with a decided smile.
>
> "We have no wish to exterminate you," answered the Colonel. "We would not if we could have—but there is no bitterness between the Northern and Southern people. The North, I know, loves the South. When peace comes it will pour money and means into your hands to repair the waste caused by the war; and it would now welcome you back and forgive you all the lies and bloodshed you have caused. But we cannot force you to arrest and reëstablish your government. And is not that already nearly done? Has not Virginia withdrawn her troops, and all the State resources. GRANT has shut you up in Richmond. SHERMAN is before Atlanta. Had you not, then, better accept honorable terms while you can retain your prestige and save the pride of the Southern people?"
>
> MR. DAVIS smiled.
>
> "I respect your earnestness, Colonel, but you do not seem to understand the situation. We are not exactly shut up in Richmond. If your papers tell the truth it is your capital that is in danger, not ours. Some weeks ago GRANT crossed the Rapidan to whip LEE and take Richmond. Lee drove him back in a bloody battle, and then GRANT started what your people call a 'brilliant flank movement,' and fought Lee again. Lee drove him second time, and then GRANT started on another flank march; and so they keep on—Lee whipping and GRANT flanking—until GRANT got where he is now. And what good result? GRANT has lost seventy-five or eighty thousand men—more than Lee has at the outset—and is no nearer taking Richmond than at first; and Lee, though he has lost heavily, is never beaten while completely in check, and has men enough to spare to invade Maryland, and threaten Washington! SHERMAN, to be sure, is before Atlanta; but suppose he is, what supposes he takes it? You know, that the further he goes from his base of supplies, the weaker he grows, and the more disorganized his army is. And Atlanta is not Richmond. So, in a military view, I should certainly say our position was encouraging."
>
> "As to money; we are richer than you are. You smile; but admit that our paper is worth nothing—it answers as a circulating medium, and we hold it all ourselves. If every dollar of it were lost, we should, as we have no foreign debt, be none the poorer. But it is worth something; it has the gold-basis of the cotton crop, which yours must be sending, and you owe all the world. As to resources; we do not lack for arms or ammunition, and we have still a wide territory from which to derive supplies. So, you see, we are not in extremities. But if we were—if we were without resources, and the whole Confederacy and its whole country were devastated, and our armies crushed and disbanded—could we, without giving up our manhood, give up our right to govern ourselves? Would you not rather die, and feel yourself a man, than live, and be subject to a foreign power?"
>
> "From your stand point there is force in what you say," replied the Colonel. "But we did not come here to argue with you, Mr. DAVIS. We came, hoping to promote honorable way to peace; and I am grieved to hear you say what you do. When I have seen your young men dying on the battle-field, your old men, women and children starving in their homes, I have felt I could risk my life to save them. For that reason I am here; and I am grieved, grieved, that we differ."
>
> "I know your motives, Colonel JAQUES, and I honor you for them; but what can I do more than I am doing? I would give my life gladly, if it would bring peace and good will to the two countries; but it would not. It is not myself alone you should address. It is that boy who desolate our homes, burn our wheat-fields, break the wheels of wagons carrying away our women and children, and destroy supplies meant for our sick and wounded. If your door lies all the misery and the crime of this war—and it is a fearful, fearful account."
>
> Not all, Mr. DAVIS. I admit a fearful account, but it is not all at our door. The passions of both sides are arrayed. Both sections have sown the dragon's teeth and shed down in cold blood, by yourselves. Elements of barbarism are entering the war on both sides that should make every man shudder. Retaliation is now the cry—and God, in God's name, then, let us stop it. Let us do something, concede something, to bring about peace. You cannot expect to conquer twenty millions. With only millions, BENJAMIN says you have, to hold out forever against twenty millions."
>
> Again Mr. DAVIS smiled.
>
> "Do you suppose there are twenty millions at the North determined to crush us?"
>
> "I do not. I suppose the government. A small number of our people, a very small number, are your friends—secessionists. The rest differ about measures and candidates, but are united in their determination to maintain the Union. Whoever is elected in November, he must be committed to a vigorous prosecution of the war."
>
> Mr. DAVIS looked incredulous. I remarked—
>
> "It is so, sir. Whoever tells you otherwise deceives you. I think I know Northern sentiment, and I assure you it is so. You know we have a system of lyceum-lecturing in our large towns. At the close of these lectures it is the custom of the audience to call for questions, and talk with the lecturer. This gives him an excellent opportunity of learning public sentiment. Last winter I lectured before forty a hundred of such associations all over the North—from Dubuque to Bangor—and I took pains to ascertain the feeling of the people. I found a unanimous determination to crush the Rebellion and save the Union at every sacrifice. The majority are in favor of Mr. LINCOLN, and nearly all of those opposed to him are opposed to him because they think he does not fight you with enough vigor. The radical Republicans, who go for the hangings and confiscations, are the men who will defeat him, if he is to be defeated. But if he is defeated before the people the

House will elect a worse man—I mean worse for you. It is more radical than he is—you can see that from Mr. ASTLEY ROCKINGHAM bill—and the people are more radical than the House. Mr. LINCOLN, I know, is about to call out five hundred thousand more men, and I can't see how you can resist much longer; but if you do you will only deepen the radical feeling of the Northern people. They will now give you fair, honorable, generous terms; but let them suffer much more, let there be a dead man in every house, as there is now in every village, they will give you no terms —they will not be in a condition to dictate terms of —

Pardon my terms. I mean no offence."

"You give no offence," he replied, smiling very pleasantly. "I wouldn't have you pick your words. This is a frank, free talk, and I like you the better for saying what you think. Go on."

"I was merely going to say that, let the Northern people once really feel the war—they do not feel it yet—and they will insist on having every one of your heads."

"Well, admitting all you say, I can't see how it affects our position. There are some things worse than hanging or extermination. We reckon giving up the right of self-government one of those things."

"By self-government you mean disunion—Southern independence?"

"Yes."

"And slavery, you say, is no longer an element in the contest."

"No it is not, it never was an *essential* element. It was only a means of bringing other conflicting elements to an earlier culmination. It fired the musket that was already capped and loaded. Slavery was not the cause of secession in the North and the South that will, however this war may end, make them two nations."

"You ask me to say what I think. Will you allow me to say that I know the South pretty well, and never observed those differences?"

"Then you have not used your eyes. My sight is poorer than yours, but I have seen them for years"

This laugh was upon me, and Mr. BENJAMIN enjoyed it.

"Well, sir, be that as it may, if I understand you, the dispute between your government and ours is narrowed down to the: Union or disunion."

"Yes; or to put it in other words: Independence or subjugation."

"Then the two governments are irreconcilably apart. They have no alternative but to fight it out. But it is not so with the people. They are tired of fighting and want peace; and so they have all the burden and suffering of the war, while not right they should have peace, and have it on such terms as they will."

"I don't understand you. Be a little more explicit."

"Well, suppose the two governments should agree to something like this: To go to the people on the two propositions: say, peace, with disunion and Southern independence, as your proposition—and peace, with Union, emancipation, no confederate, universal amnesty, as ours. Let the citizens of all the United States (as they existed before the war) vote Yes' or 'No' on these two propositions, at a special election within sixty days. If a majority vote disunion, our government to be bound by it, and to let you go in peace. If a majority vote Union, your people bound by it, and to stay in peace. The two governments can contract in this way, and the people, though constitutionally unable to decide on peace or war can elect which of the two propositions shall govern their actions. Let LEE and GRANT, meanwhile, agree to an armistice. This would sheathe the sword; and if once sheathed, I think it never would be drawn by this generation."

"The plan is admirable for impracticable. If the South were only one State, it might work; but as it is, if one Southern State objects to emancipation, it would nullify the whole thing: for you see even if Kentucky or Virginia should vote slavery out of South Carolina, nor the people of South Carolina vote it out of Virginia.

"But three fourths of the States can amend the constitution. Let it be done in that way—in any way, so that it be done by the people. I am not a statesman or a politician, and I do not know just what form it should be carried out; but you get the idea—that the people shall decide the question.

"That the majority shall decide it, you mean. We acceded to rid ourselves of the rule of the majority, and this would subject us to it again."

"But the majority must rule finally, either with ballots or bullets."

"I am not so sure of that. Neither current events nor history shows that the majority rules, or ever did rule. The contrary, I think, is true. We say, sir, the man who should go before the Southern people with the Union question, with any proposition which implied that the North was to have a voice in determining the domestic relations of the South, could not live here a day. He would be hanged to the first tree, without judge or jury."

"Allow me to doubt that. I think it more likely he would be hanged, if he let the Southern people know the majority couldn't rule," I replied, smiling.

"I have no fear of that," remarked Mr. DAVIS, also smiling most good humoredly. "I give you leave to proclaim it from every house-top in the land."

"But, seriously, sir, you let the majority rule in a single State; why not let it rule in the whole country?"

"Because the States are independent and sovereign. The country is not. It is only a confederation of States; or rather it was; it is now two confederations."

"Then we are not a people—we are only a political partnership?"

"That is all."

"Your very name, sir, 'United States,' implies that," said Mr. BENJAMIN. "But tell me, are the terms you have named—Emancipation, no confederation, and universal amnesty—the terms which Mr. LINCOLN authorized you to offer us?"

"No, sir, Mr. LINCOLN did not authorize me to offer you any terms. But I think both he and the Northern people, for the sake of peace, would assent to some such conditions."

"They are very generous," replied Mr. DAVIS, for the first time during the interview showing some angry feeling.

"But, sumnsty, sir, applies to criminals. We have committed no crime. Confiscation is of no account, unless you can enforce it. And emancipation! You have already emancipated nearly two millions of our slaves, and when you will take care of them, you may emancipate the rest. I had a few when the war began. I was of some use to them; they never were of any to me. Against their will you 'emancipated' them, and you may 'emancipate' every negro in the Confederacy, but it will be free! We will govern ourselves. We will do it if we have to roe every Southern plantation sacked and every Southern city in ashes."

"I see, Mr. DAVIS, it is useless to continue this conversation," I replied, "and we will close it. You, sir, have seemed to press our views with too much pertinacity. We love the old flag, and that must be our apology for intruding upon you."

"You have not intruded upon me," he replied, resuming his usual manner. "I am glad to have met you both. I had heard of you, and did not think that I would have died for it; but now it is to me only the emblem of oppression."

"I hope the day may never come when, Mr. DAVIS, when *I say* that," said the Colonel.

A half hour's conversation on other topics—not of public interest—ensued, and then we rose to go. As we did so, the Rebel President gave me his hand, and, bidding me a kindly good-by, expressed the hope of seeing me again in Richmond in happier times—when peace should have returned; but the Colonel his parting was particularly cordial. Taking his hand in both of his, he said to him:

"Colonel, I respect your character and your motives, and I wish you success in every good cause. I can only do you consistently with the interests of the Confederacy."

The quiet, straightforward bearing and magnificent moral courage of this brave, pure man, had evidently impressed Mr. DAVIS very favorably.

As we were leaving the room he added:

"Say to Mr. LINCOLN from me, I shall at any time be pleased to receive proposals for peace on the basis of our independence. It will be useless to approach me with any other."

When we went out Mr. BENJAMIN called Judge OLDS, who had been waiting during the interview—two hours—at the other end of the hall, and we passed down the stairway together. As I put my arm within that of the Judge, he said to me:

"Well, what is the result?"

"Nothing but war—war to the knife."

"Then it remains to be his ideas—let him alone," added the Colonel, solemnly.

CORRESPONDENCE.

A NEW FORMATION FOR INFANTRY.

To the Editor of the Army and Navy Journal:

SIR:—General CASEY'S Division Column formation is generally considered a very useful addition to the school of the battalion; but I believe that it has not the same object and advantages might be obtained by a more simple arrangement.

The formation I would suggest is that of a *doubled line.* For instance, assuming the battalion to consist of eight companies, and the Regiment, the commands might be:

1. Double line at company distance, 2. Battalion, forward face; 3. March, when the 1st and 4th divisions would play to the front, and the 2d and 3d to the rear. Commands: 1. Deploy doubled line; 2. Battalion, outward face; 3. March.

It will be remarked that the suggested formation possesses all the advantages of the "division column," in its front of four companies, and its small depth, with the considerable advantage of simplicity; and although the *detached* column of General CASEY causes a greater extension of surface between battalions, yet I conceive the compactness of the lines could be made such a matter of drill.

An examination into the facility with which this formation can be handled, and the simplicity as well as effectiveness of the various movements, would be unnecessary. It will, I believe, cause it to be favorably considered. In connection with some of these movements, it is unnecessary to particularize the commands, or position of officers, guides or file-closers; the military reader will easily comprehend what is required, according to the general principles of our system, and which need not be violated in executing these lines. Numbered blocks will much assist the examiner into the knowledge of the details of the movements.

"Doubled line against cavalry" to be formed by simply wheeling up the extreme right and left platoons of each line, those of the 1st and 4th being faced about at the caution-ary command), thus closing on the flanks the interval between the lines.

"Form square" to be accomplished by marching forward the two centre companies of the 1st line, a distance equal to the front of a company, while wheeling up the flank companies of each line, thus completing the 3d and 2d fronts of the square; or in place of wheeling, let them flank outwards from the centre, and form the 3d and 2d fronts of the 3d and 2d fronts. This latter plan is probably to be preferred, as it simplifies the reduction of the square, which will be executed by simply marching the fronts of the 2d front to the left, and those of the 3d front to the right. The two lines will thus be alternately formed, the 4th front marching forward into the interval between the flank companies of the 2d line.

"Double column" can be readily formed from "doubled line," by marching forward the two centre companies of the 1st line a distance equal to the front of a company, while the 3d and 4th face about and unite in rear of these companies; the 1st and 4th also facing inward and uniting behind the 2d and 7th companies.

"Double line" from "double column," can be formed by simply deploying the 2d and 4th divisions of the latter, and when the lines are formed, closing the 2d line to company distance on the left.

Simple column by division, from "doubled line" may be formed, my right in front, by marching forward the divisions of the right wing, each successively marching by the left flank into column in front of the left wing, as it finds itself in line with the position it ought to occupy. A reverse of this movement will form "doubled line" from column by division. A column by division can be formed left in front, by inverse means

If it be necessary for a battalion in "doubled line" to gain ground, say to the right, marching by company to the right would form a "double column," and this secures the advantages of that formation in case a "square" is required.

The "doubled line" can be readily changed to "column" or put in close order in four ranks, by withdrawing to the rear the files of the 1st line.

In the "Evolutions of a Brigade," there are several movements that I conceive might be facilitated by the proposed formation. Thus, when will occupy too much space to describe here; among them are "change front," and "change direction" of line of battalions.

The "doubled line" movements contemplate a battalion of eight companies. It is, I trust, settled, that in the future such will be the organization, but in case of ten companies the 9th and 10th companies will be formed to the rear in doubling the line, but marching by the flank, will form in front of the companies of the 1st line, thus giving a front of six companies to the line. These two flank companies will break and file to the rear to close the interval as in "doubling against cavalry." In case of nine companies the 9th will take position on the left of 1st line.

In case of only seven companies, the 7th company will take position on the 3d line, as eight companies were formed, leaving a blank in rear of the left company of the 1st line, which company, in "doubled line against cavalry," would file to the rear to close the interval as in the 9th flank, forming "square," if there to be an odd company, it will take position in line as a reserve.

If six companies only are present, the 1st and 6th companies will break to the rear and unite at company distance behind the two centre companies of the 1st line.

To "form square" with six companies, the flank companies of 1st line will file to the rear and compose the 2d and 3d fronts.

With less than six companies the "doubled line" will not be formed. It will be seen that I avoid some complication by considering the battalion composed as in line, and not in *column*, as is the case in "division columns." In movements to be executed independently by either line, the lines can be commanded respectively by the lieutenant-colonel and major.

Officers of large experience in the field may discover objections to the proposed innovation, and it is with some diffidence that I submit my ideas upon the subject; but feeling confident that many improvements are yet to be made in our present system, I forward this article for publication, in the hope that at least *some* of its suggestions may prove worthy of notice in case of a future revision of the tactics. FIELD OFFICER OF CALIFORNIA VOLS.

CALIFORNIA, July, 1864.

THE INVENTOR OF CHAIN-PLATING.

To the Editor of the Army and Navy Journal:

SIR:—In your issue of August 6th an article appears under the above head, in which we are informed "Vertas," giving to Chief Engineer JOHN W. MOORE, U. S. N., the credit of being the author or original inventor of the "Chain armor" system of protection to the sides of ships from shot and shell by heavy chains. "VERITAS" quotes from the official report of Rear-Admiral FARRAGUT in relation to running the gauntlet of Forts Jackson and St. Philip, below New Orleans, and thinks "this establishes the claim beyond question." The fact that Mr. MOORE received the above device and for the above purpose. I would take the liberty of mentioning the name of another gentleman, who, I am informed by many officers of the fleet in *Richmond* (to which vessel the "chain-plating" was first applied), and who are conversant with the facts, is justly entitled to the honor of being the original inventor. I refer, this, however, I do not desire to detract from the well-earned reputation of the able, skillful and scientific engineer, and as an honorable gentleman. "VERITAS" has been permitted to tell his story, I only desire simply to state the facts, and to tell mine as related to the *Richmond* during her last Gulf cruise, and what I state came under my personal observation.

Previous to leaving New Orleans, occurred the action with Fort Moffea, Pensacola harbor, at which time Chief Engineer ENOCH POTTS, then First Assistant Engineer of the *Richmond*, suggested the use of the spare chain cables of the ship, to protect the steam drum and tops of boilers from musket balls, &c. This is, in my opinion the first method of protecting a very exposed part of our navy would be found impregnable to shell fired from guns of moderate range and caliber. This plan was freely discussed by the engineer's mess, and no doubt, would have been used had time permitted. I do not know whether Mr. MOORE was aware of this plan or not, but it is certain that

The next time the matter came up, to my knowledge, was in the Gulf, in January, 1863, whilst the *Richmond* was there repairing, when I saw a letter from Admiral HART of the plan by which he proposed to secure the chain to the ship. It included two thicknesses of chain—each one was used—did not cover over much surface, was securely fastened and could have been carried at sea for an entire cruise if necessary, by hoisting over the sides and down in "bights," along the side of the ship in line with the main deck. I was personally shown Mr. HART'S plan and approve of this method of securing the chain, and proposed the use of a fore and aft chain, secured firmly to the ship and over which each bight should pass, so that the chain might be supported if cut, and not fall away by its weight, and drag and perhaps foul the propeller. This plan was applied by Mr. HART, and proved to be a valuable device for the chain was cut by shot and two bights separated, but could not fall and drag, being held by the longitudinal chain. This was only a part, however, of Mr. HART'S original plan.

The idea of the action with Fort Moffea was borne off

22, 1851, whilst the action below New Orleans and the preparation for the same, was in April, 1862, and not "Veritas" can show that Mr. Mosher proposed the use of chain-cables to protect the machinery of the *Richmond* from shot and shell *prior* to that date, but claims are certainly without just foundation. JUSTICE.

DESTRUCTION OF ORDNANCE STORES AT POINT, VA.

To the Editor of the Army and Navy Journal:

SIR:—The weather here during the past week has been very hot and oppressive, with the thermometer, in the day time, generally above ninety degrees in the shade, so that the act of getting a cool whiff of air from off the broad James, I went yesterday to City Point, accompanied by a military friend. The appearance of affairs there reminded us of the docks of a large city. Vessels were discharging, teams hauling goods away to the front, wagons laboring, trains of care running backward and forward; presenting altogether a lively scene of industry and activity. No wonder. From this point an army of many thousand men is furnished and clothed, to say nothing of the food for an immense number of animals, such as horses, mules, and fast cattle, used in war; and the mill must be kept steadily going.

After attending to some business, our party went over to Captain ——, a brother of the Lt. U. S. Cavalry, on duty at General GRANT's head-quarters. Here we met many officers from various parts of the Army. We were engaged in lively conversation, discussing the operations of war, when suddenly the earth trembled under our feet and the firmament shook with an awful explosion, followed by the report of thousands of cannon hurled from the heavens. The fragments showered down upon the spot where we stood in fearful quantities. The tent in front of which we were standing was demolished, two officers mounted on a sightly were wounded, and all dismayed by the terrible danger to which we were exposed. Flight, perfectly justifiable under the circumstances, was useless, one place being as dangerous as another, in the midst of falling timbers, solid shot, shells, Minie balls, and grape and canister.

Fortunately, the danger at last passed. Recovering ourselves from the shock, we rushed to the overhanging bank of the river, and, as soon as the smoke had partially cleared away, we beheld a scene which baffles description. Descending rapidly to the spot where the catastrophe had occurred, we found all the ordnance buildings and magazines demolished and the ruins on fire. Dead bodies were scattered about on the ground in all the forms of mutilation; a head here, a foot there, a trunk yonder, bearing no relation to the fearful power which had just been exerted, while the air was filled with the stench of burning flesh. At the time of the accident, a number of teams were near the dock, and the dead mules lying round here evidence that they had not escaped unscathed. A good many wounded soldiers were on top of a train of cars just starting for the front, many of whom were killed and wounded. It sounded in removing one from the top of a car whose skull was fractured and torn in. Of course, he was in the agonies of death. Captain PUTNAM, Inspector General of the Army of the Potomac (regulars) 24 division, 5th corps, and Captain HOSKINS, Quartermaster of the same brigade, were in great danger, not being more than fifty yards from the dock. Their horses, which Captain PUTNAM was down, but, thanks to a kind Providence, they escaped unharmed. Captain MASON and Lieutenant KANE of the 5th Cavalry were both badly wounded. It is useless to recapitulate the horrors. It suffices to say that four several times to one hundred men were lost, in addition to those mortally, seriously, and slightly wounded.

Many speculations are indulged in as to the cause, but nothing has been elicited that is far at all reliable as yet. It is one of those calamities the origin of which will remain, perhaps, a mystery for ever. All we know is that a barge loaded with ordnance stores has been destroyed, an immense loss of money to the Government, and many valuable lives to the Army.

The explosion is not a matter of surprise to me now that it is all over. On the contrary, the only wonder is that it did not happen before, for how could it be expected that many thousand pounds of powder could lie there for ever, with locomotives pulling their sparks over the explosive mass, teamsters and others smoking in immediate vicinity, without at last its taking fire and exploding with the result I have endeavored to describe. I am informed that it is the intention to construct a new separate dock for the reserve. The old story of locking the stable door after the steed is stolen.

S.

ARMY OF THE POTOMAC, August 10, 1864.

EDUCATION OF NAVAL CONSTRUCTORS AND ENGINEERS.

To the Editor of the Army and Navy Journal:

SIR:—In the columns of your last issue, I find that Congress has passed a law authorizing the appointment and education of a certain number of young men from the list of cadets at the Naval Academy, to be instructed for assistant "naval constructors," and engineers. After an experience of thirty-five years as an officer in the Navy, I have come to the conclusion that the only true and efficient way to prepare a young man for the competent fulfillment of the duties of either of these valuable branches of mechanics, is by means of a thorough practicable apprenticeship in the shipyard, in the machine shop, and on the engine-shop. These are the only places where the art of shipbuilding and engineering can be properly acquired. Under proper instructions, at a school, a young man may acquire the book draft, lay down a ship, to ascertain by mathematics her displacement, her centre of gravity, &c. But the knowledge how to frame, construct, and properly strengthen a ship can only be acquired by practice and experience. Many of the mistakes and blunders that have been made in the construction of our naval vessels, have occurred from the fact of there being too much theoretical knowledge used instead of sound practicable experience.

It is no disgrace for a young man to enter a ship yard or machine shop, and there learn the important and noble art of properly constructing a ship, or her engine. Yet, even in the Republican country of ours, our young men are ashamed to be called a mechanic by learning such noble professions as the above-named. And Congress must help them along in the false pride by having them *half-taught*, at a naval academy by theory. Already in the Engineer corps have we too many young engineers who have merely a theoretical knowledge of their profession. They go to some school, get a few points as to the power of steam, the strength and capacity to resist a given quantity, how to start and stop an engine; but let the engine break down, let it be required to repair some important part, and nine times out of ten you will find that first-class firemen, who are generally practical mechanics, are the ones to repair the damages. While I think it highly important that a certain number of young engineers is necessary, still to make a trusty, worthy, and competent engineer, practical experiences and knowledge are necessary. FORNES.

ARMY AND NAVY PERSONAL.

BRIGADIER-General Griffin returned to the 5th corps on the 9th, after a leave of absence.

MAJOR-General Palmer has been relieved by Major-General J. C. Davis in the command of the 14th corps.

CAPTAIN George S. Dodge, of Boston, Mass., has been appointed Assistant Provost-Marshal of Baltimore.

CAPTAIN Martin, Third Massachusetts battery, wounded in the Wilderness, has rejoined the Army on the south side of the James.

LIEUTENANT-Colonel C. A. R. Dimon, of the First U. S. Infantry (regulars), has been promoted to be Colonel of the same regiment.

BRIGADIER-General Shepley and staff have reported at the head-quarters of Major-General Butler, returning from a twenty days' leave of absence.

CAPTAIN George S. Dodge, quartermaster in charge of the water transportation at Bermuda Hundred, having been absent North on leave, has returned to duty.

MAJOR Henry Lee Higginson of the 1st Mass. Cavalry, has been honorably discharged from the service, for disability from wounds received in battle.

LIEUTENANT-Colonel G. Pierce has been assigned as chief quartermaster of the Ninth corps—a position which has been temporarily occupied by Captain Peter Heistand.

BREVET-Major-General S. J. Burbank, U. S. A., has been appointed to the command of a new military district, formed of that portion of Kentucky west of the Cumberland River.

MAJOR-General Burnside has left the 9th corps, and is now in Providence, R. I. Brigadier-General Wilcox was left temporarily in command of the corps, and Major-General Park soon assumed it.

COLONEL Gwynn, one hundred and eighteenth Pennsylvania Volunteers, wounded in the Wilderness, returned to the command of his regiment. He was still lame from his wound, having been shot in the thigh.

MAJOR-General Curtis arrived at Omaha, Nebraska, on the 10th. He has left there for the Platte river, to adopt decisive and efficient measures for the protection of the overland mail route and emigration.

LIEUTENANT-Colonel Rufus Ingalls, chief quartermaster of the Cavalry Bureau, has been promoted to the rank of colonel in the regular Army, and placed in charge of the first division of the quartermaster's department.

CAPTAIN Henry A. Hale, 10th Regiment Mass. Volunteers, lately appointed Assistant Adjutant-General of Volunteers, has been assigned to duty on the staff of General for duty in the 23d Army corps, Major-General Schofield.

COLONEL Collier, Eleventh Pennsylvania Volunteers, has returned to the command of the second brigade, Third division, 5th corps, which he formerly commanded. He has fully recovered from his wounds received at Spottsylvania Court House.

MR. J. C. Youngman, a member of the Fifty-first Pennsylvania, and for nearly three years clerk in the Adjutant-General's department of the Army of the Potomac, has been appointed by the President assistant adjutant-general of volunteers, with the rank of captain.

LIEUTENANT-Colonel Thomas H. Grow, Fifth corps quartermaster, and Captain J. D. Crittenden, quartermaster of the artillery brigade, have just been appointed full colonels, and ordered to report to Major-General Rufus Ingalls, quartermaster general of the Army, under the late act of Congress reorganizing the Quartermaster's Department.

A NEW York friend has presented to the Navy Boy, and How He Became a Rear-Admiral." It purports to be an autobiographical sketch and illustrations of the life of Rear-Admiral A. H. Foote. The author is wrongly in Lieutenant-Commander Breese, of the South Atlantic Squadron, and is known to the navy personally acquainted with the Admiral for several years.

THE President has formally confirmed the appointments of Major-General G. O. Howard as commander of the Army and Department of the Tennessee, and Major-General James McPherson, of Major-General H. W. Slocum to the command of the Army of the Ohio, vice Hooker, and of Major-General D. S. Stanley to the command of the 4th Army corps, vice Howard.

AMONG the passengers on the *Sun Jacinto*, which arrived at New York on Saturday last from the Gulf Blockading Squadron, via Tampa Bay and Sand Key were Rear-Admiral Theodorus Bailey; Fleet Surgeon, Admiral's Clerk; L. D. D. Voorhees, Acting Master; David Wilmarth, Assistant Paymaster; W. A. Leyvit, Second Assistant Engineer; George Dimon, Third Assistant Engineer; J. W. Locke, Naval Storekeeper's Clerk; E. I. Murphy, Paymaster's Clerk.

LIEUTENANT-COLONEL E. M. Green, Chief Quartermaster of the Department of Washington, has been appointed assistant quartermaster-general, with the rank of brevet brigadier-general, and assigned to the supervision of the Department of Ohio and the Cumberland, vice Colonel Swords, relieved. He will have charge of the forwarding of supplies to Major-General Sherman. Captain John Elliott, promoted to lieutenant-colonel, succeeds Colonel Greene as chief quartermaster at Washington.

THE officers of the Fifth New York regiment, whom the exigencies of the service and absence of several from wounds prevented meeting earlier, have met and passed resolutions regarding their former commander, the late Lieutenant-Colonel Windham. They say: "That in the death of Lieutenant-Colonel Cleveland Windham, from wounds received in action near Cool Harbor, Va., June 2, 1864, the regiment has lost a kind and gallant commander and the country a faithful and earnest soldier. That while deeply feeling our great loss, our heartfelt sympathy is with the bereaved mother, who, in the early interruption of the course of providence, has been bereft within a few weeks of both husband and son, while adding their testimony in this the hour of trial. That the officers of this regiment offer the usual badge of mourning for the period of thirty days."

ARMY OFFICERS AND THE GOVERNMENT.

WITH reference to the following letter, to which we gladly give space in these columns, Professor MAHAN writes us privately:—"The course of this gentleman (General Beall) "is, to say the least, hardly patriotic, whatever he may think. "Some may think it even worse. But every sound mind "must deprecate it at this moment. We must do all we "can to prevent the service from suffering from mortified "vanity."

NEWPORT, Monday, Aug. 9, 1864.

HON. HENRY J. RAYMOND—DEAR SIR:—More accident brought under my eye the following extract, which I enter said to be from Don CARLOS BUELL, Esq., late of the United States Army, which I found in a local journal:

"A policy which would have brought success was wisely devised by Congress in the beginning of the year; and from the favorable aspect of affairs throughout the country, the people of every part of it, of any interests as a whole or contest, but less than from a natural impulse, looked for a policy of general support. Congress has too often clouded of its due effect by the intrusion of sectional interests, and by the introduction of measures which, if not in their nature foreign to the war, at the expiration of a year, a system of specific and distinct legislation, and by the inadequacy of the means of execution and success rendered more difficult of attainment."

In noticing the above, I have not to speak personally of the writer, whom I have esteemed as a man and thought highly of as a soldier, but to give vent to my feelings of regret that, in the present crisis, country like the present a man who had enjoyed so large a measure of his country's honors and confidence, should not feel it his duty, under any circumstances, to do what he could not but know would be an injury to her best interests. That General BUELL has the right to complain of HALLECK and STANTON, but was the the best way to have them righted? That he has received wrongs at the hands of enemies, is more than probable. That he has a friend who has said that in the very step he has taken the best justification he could have for it is to be found in the opposite for their acts. *Qui vere sue d'arcuse* is a maxim which the student of law will turn to a LA ROCHEFOUCAULD in fond of quoting. May his enemies not say that he has done for himself in retreat as this, throws up the commission received from his country, may have held the confidence thus placed in him at too low a value, and that he has sacrificed for his own ill-will, a post, as he more particularly, or patriotism, that has prompted his act?

As I have stated, I deeply regret this on General BUELL's account. I regret it the more on that of my country, for he has the reputation of a good soldier, and with our losses of such men on the field of battle we cannot afford to lose any, worthy of being retained in any other way. But my greatest regret is for those who were looking to him among the soundest of our military chief authorities should have set this example to his fellow soldiers. The worst from the high source from which it comes. It is then, particularly to those of my younger comrades, graduates like himself from the military school, I would point out the false beacon, however bright it may seem. It is for them that I would offer the contrast of a WASHINGTON and a WELLINGTON, and of a Napoleon at Waterloo. Each honest by many and previous trials from their fellow countrymen, but bearing them with fortitude; forgetful of their private wrongs, and only mindful to their country. Ready to bear any odium, so long as they knew that, cost what it might, the public country should not suffer by their acts. It is upon such beacons that I would encourage them to fix their eyes unwaveringly. It is not only the true direction, and, even if it be not, it is how a matter to be glossing of popular applause, it is the best policy. The people, like a handsome woman, may be capricious, but they are never truly unconscious of the self-sacrificing. They may not give him the place that he desires, but will not withhold from him one that is desirable. Let them remember that the plaudits of a few applauds now is not the verdict of posterity; that the day will, sooner or later, come, when the full merits of every action will be measured by the proper rule and nothing be remembered but the glorious deeds of the battle-field, hardly maintained, to save a nation's existence. I can sum up in a few words the whole matter before them of Major-General GEORGE H. THOMAS, a Virginian by birth and family, one man who, up to the present hour, has never left the field for days of rest, and point to your wounds, and gained in their defence. This, as a great writer puts into the mouth of a true soldier, "is worth living for—more, it is worth dying for." Adieu! I am in the garden of duty honestly performed.

The civil struggle has presented many sad features to the

contemplation of the world, but, to my mind, none more so than the one of the soldier quitting the battle-field to spread his private griefs before the public. Thus, not only withdrawing the support of his own arm, but their support, willingly or otherwise, to unnerve the arms of others. Whilst I deplore, I can understand the action of those who decorated the flag to which they had sworn allegiance, to uphold the one they now fight under. The ties of kindred, the sacrifice of all social relations in setting others above personal views of ostensible duty, and even pecuniary interests, can readily account for this; but how can I to explain, upon any grounds that hold the slightest claim to the title of honor who have no such pressure to plead? What argument can they present to their country, which patriotism can endorse, to justify their act? What will be the verdict of posterity, if unhappily their names should survive the notoriety of the hour? Such an act with weak eyes may lead to consequences that, when resting with all petty griefs and feelings of revenge, they would shudder to think of incurring. The chasm between such an act and the most fearful of offences is narrower than it may seem. Neither ARNOLD nor MONCRAY, in their first hours of discontent and disappointment, probably dreamed of daring more than serving vent to their surcharged feelings.

I am now, dear sir, an old man *myself, other extremes.* What I have here written may not be to the words of wisdom, but they are the utterances of convictions honestly entertained, and my rule of duty. Brought at the age of fifteen into Gumaldis of our military hierarchy, Lieutenant-General SCOTT and General TRAVIS, the Nestors of our Army *very nearly*, my views of the military obligations of particularly as it affects those educated by the Nation, and, thus far, set apart for its service, may seem exaggerated. Time has but strengthened them, and, so far as in me lay, I have tried to impress them on all within the reach of my influence. Properly understood, I have no doubt of their correctness, and if acted up to in a spirit of fairness, no fears of their proving otherwise than healthful to the State.

And now but one word to say why we take this letter as uncalled for. This act of General BUELL affects not him alone. It affects me as a citizen. It affects the body to which we both belong—the grandeur of the Military Academy. It cannot fail to impair the confidence of many in that body, and in these to whose guidance the school from which they come has been entrusted by the Government. General BUELL may not have intended this, but the deduction is not far fetched.

Very truly, dear Sir, yours, &c.,

D. H. MAHAN.

MILITARY BOARDS, &c.

A Board is in session at Annapolis, Maryland, to examine into commissioned officers for promotion in the Regular Army. The members are: Brevet Major-General L. P. GRAHAM, Major T. HARRISON and Capt. EDWARD M. NEVIN.

Under General Orders No. 161, a Board is now in session at 212 F street, Washington, to examine into the qualifications of persons in enlisted regiments recommended to the General Mister—No. 161—for information how to get a furlough to regular duty.

A General Court Martial, for the trial of such cases as may be brought before it, is in session daily from 10 A. M. to 3 P. M., at No. 9 Bible House, Fifth Avenue, opposite Wall and Nassau Street, New York. The following officers compose the court: Brevet Major-General ROBERT C. BUCHANAN, Colonel H. E. DAVIES, Judge-Advocate; Colonel E. TRACY, 12th New York Volunteers; Colonel J. L. CHESTER, 120th New York Volunteers; Lieutenant-Colonel GEORGE H. SHARPE, 4th New York Volunteers; Lieutenant-Colonel GEORGE W. YOUNGHUSBAND, 164th New York Volunteers; Lieutenant-Colonel THOMAS E. RANDLETT, 7th Pennsylvania Volunteers; Major and Assistant Judge-Advocate GEORGE MACKEY, Judge-Advocate.

A General Court Martial, for the trial of such cases as may be brought before it, is in session at 41 Fourteen (14) st., near Pennsylvania Avenue, Washington. The following officers compose the court: Brevet Major-General R. S. EARNER, Colonel and Assistant Quartermaster P. H. CORBIN, 123d Penn. Volunteers; Colonel J. W. SHAFFER, 7th Regiment Cavalry; Colonel W. H. SMALLEY, 10th Maine Volunteers; Lieutenant-Colonel FRANCIS FESSENDEN, 3d New Jersey Volunteers; Lieutenant-Colonel H. S. HUIDEKOPER, 13th Pennsylvania Reserves; Major and Assistant Judge-Advocate A. HOWARD, United States Volunteers; Colonel H. BUTLER PRICE, 26 Pennsylvania Cav.; Lieutenant-Colonel and Assistant Judge-Advocate J. A. H. PUTT, United States Army; Colonel A. H. PUTT, additional aide-de-camp; Captain H. H. WILSON, 1st U. S. Artillery, Judge-Advocate; Major A. ASHLEY, 12th U. S. Volunteers, Judge-Advocate.

A Commission is in session daily, except Sundays, at 352 H street, corner of Seventeenth street, Washington, for the examination of cases of officers applying for increase of rank, or for re-appointment or re-instatement. Colonel J. D. LECKIE, Lieutenant-Colonel C. W. FOSTER, United States Army; Lieutenant-Colonel G. H. GUPPEY, 4th Cavalry.

A Military Commission, for the trial of such cases as may be brought before it, is in session at Parkersburg, West Virginia. Colonel ——, Assistant Adjutant-General, Washington, is the recording officer; Major-General BENJAMIN F. KELLEY, United States Volunteers; Colonel H. BUTLER PRICE, 26 Pennsylvania Cav.; Lieutenant-Colonel and Assistant Judge-Advocate J. A. H. PUTT, United States Army; Colonel A. H. PUTT, additional aide-de-camp; Captain H. H. WILSON, 1st U. S. Artillery, Judge-Advocate; Major A. ASHLEY, 12th U. S. Volunteers, Judge-Advocate.

NOTICES TO CORRESPONDENTS.

The Editor of this Journal will always be glad to receive from officers or others communications, correspondence and general communications of a character suited to its columns. It is necessary that the name of the writer should, in all cases accompany his communications, not for publication, but as a guarantee of good faith.

Officers are especially requested to give us early notification of all personal matters of general interest; of the movements of vessels of casualties among officers; and all such local matters.

The Editor will, at all times, be pleased to respond, to these columns, to enquiries in regard to technical and other matters.

The subscription price of THE ARMY AND NAVY JOURNAL is FIVE DOLLARS a year, or THREE DOLLARS for six months, invariably in advance. Remittances may be made through Express Companies, Quartermaster's, Paymaster's or other drafts, which should be to the order of the Editor of this Journal, W. C. Church.

Subscribers who fail to receive their paper promptly, will please give immediate notice of the fact.

Subscribers ordering the address of their paper to be changed, should be careful to give their previous address.

The Editor does not hold himself responsible for individual expressions of opinion, in communications addressed to this JOURNAL.

The postage on this Journal is twenty cents a year, payable quarterly in advance, at the office where received.

All communications should be addressed to the ARMY AND NAVY JOURNAL, New York.

PRIVATE CITIZEN 39 PARK ROW, TIMES BUILDING.

CAPTAIN HICKS, Superintendent of the Park Barracks, in New York, says that 700,000 rations have been served out to soldiers at that establishment since it was built. As most of the troops who have passed through the city to or from the war, have eaten but one meal at the barracks, this statement affords some idea of the vast army of men that has traversed our streets during the last three years. The barracks are now torn down, and the last vestige of them will soon be removed.

U. S. ARMY AND NAVY JOURNAL.

NEW YORK, SATURDAY, AUGUST 20, 1864.

NOTICE TO SUBSCRIBERS.

THOSE subscribers to the ARMY AND NAVY JOURNAL whose year expires with this, the closing number of the first volume, are reminded that to secure the continuance of the paper, the price of the subscription should be forwarded immediately.

THE BATTLE OF MOBILE BAY.

BY LETTER day to our naval calendar. The fifth of August will be "kept" by old salts, in years to come, as commemorating one of the proudest and most daring achievements of our own or any other navy. Just as some of our old commodores, veterans of the last war with Great Britain, would put on their fighting coats, and fight the battle over again on the anniversary of some one of PERRY's, or DECATUR's, or HULL's famous victories, so will the veterans of this war, in years to come, celebrate the passage of the Mississippi Forts, and the victory in Mobile Bay. Nor will they need to boast, over their grog—for the plainest and baldest story of these battles will excite the wonder and admiration of the listening youngsters.

In the attack on the forts and fleet of Mobile, FARRAGUT has displays such a rare combination of qualities for which he first became generally known by the brilliant passage of the Mississippi forts. In both these actions he showed himself as audacious as though he had not a grain of sense, and as prudent as though he had not a spark of audacity. He is as great in preparation as in action; he makes such novel and admirable use of his means as to baffle all the plans of the enemy; and having prepared himself with all the patience of the merest plodder, he delivers battle with an impetuosity which breaks down all resistance.

In many of his qualities FARRAGUT resembles Lord DUNDONALD, the last great admiral of British seamen; the Englishman, above all others, dear to the hearts of British seamen; the man whose energies were unfortunately wasted in petty squabbles with stiff and timid superiors, and to vain struggles with red-tape, which finally strangled the most brilliant naval commander Great Britain has produced, not even excepting NELSON. Like Lord DUNDONALD, FARRAGUT unites wonderful originality, in the conception of his plans, with the utmost intrepidity, coolness, and resource in action. It is not a little to the credit of our Navy Department that it has had the wisdom and foresight to give FARRAGUT his great opportunities, untrammelled by interference, instead of spoiling his plans and checking his ardor, as the British Admiralty did Lord DUNDONALD's.

The moral of the fight in Mobile is—"Get close to your enemy;" the nearer the better; the nearer the safer. The Rebels imagined that the ship channel leading so very close to the powerful Fort Morgan, or whatever it was called, was the passage; or, if the attempt were made, none would succeed. But in FARRAGUT's hands this peculiarity of the channel became an advantage to the attacking, and a weakness to the defending side. He carried his flag-ship, the *Hartford*, close as possible to the stone walls, and instead of trying to batter them down with heavy shot, actually drove the gunners from their guns by well-directed volleys of grape and canister. This would be almost incredible; but if it were not true, our fleet could not have passed the fort and water battery with so little injury as it received.

The novel and ingenious expedient of lashing his vessels together, two and two, to keep them thoroughly the Rear-Admiral had considered the dangers in his way, and how successfully he met them. Ist. If the exposed half of his fleet had been disabled, the other half would still have gone in, with but little injury. 2d. His battle line was not liable to disorganization, by any vessel dropping out, and perhaps fouling another; the *Oneida* was disabled, but her consort pulled her through, and the *Oneida's* men did not even leave their guns. 3d. If any vessel had been sunk, her consort would have surely and quickly saved the crew. 4th. His battle line was shortened by half, and the passage of course robbed of half its risks, to the fleet. These were the chief points gained by FARRAGUT's admirable and novel disposition of his force.

When he had got past the forts, he waited not a moment to attack the enemy's fleet. The ships were unlashed, and the flag-ship signalled to attack and capture or destroy the Admiral sought out the enemy's flag-ship. BUCHANAN appears to have been intent on the same purpose, and steamed towards the *Hartford* as soon as he could make her out. It is reported that he had set his heart on destroying the *Hartford*, and that he has said, since the action, he was not sure he had not the loss of his leg if he could have accomplished his desire. But he met an antagonist not easily overcome. If any flaw, if cautious hesitation had found a place in FARRAGUT's breast, the *Hartford* might have been sacrificed; for it was only in a close hug that wooden walls could hope to stand longer than the stiff and impenetrable iron monster, of whose power and strength, we now know, the Rebels justly boasted.

FARRAGUT signalled to close with the *Tennessee*, and crush her by vigorous ramming. Two steam-sloops ran at her, and struck her fairly; then the gallant old *Hartford* came, steaming into the *Tennessee's* broadside with her bow, then sweeping round, and pouring into BUCHANAN's parts from a distance of but twelve feet, a broadside of 9 inch solid shot, propelled by heavy charges of thirteen pounds of powder. The *Tennessee* ran up a white flag, and surrendered. It is said BUCHANAN is but little injured, a fact which shows her tremendous strength.

All this time FARRAGUT stood, high above the smoke of battle, in the main-top, lashed there that he might not be dashed from his perch by the shock of concussion with the enemy's ships. From there he had a clear view of the field, and was able to give his orders with precision and certainty. It will not have escaped the reader's attention, that, though the Admiral did not, for sufficient reasons, place his own ship in the van of the battle in passing the forts, no sooner did an accident cause the *Brooklyn* to slow, than he ordered the *Hartford* to pass her, and lead the advance.

Next to the gallantry and skill of their Commander, the accurate firing of our seamen gained as the victory. Their marksmanship shows that in this branch of the profession American sailors maintain the superiority which gained us so many brilliant victories at sea, in the war of 1812.

Admiral Smith, this last exploit of the American Navy will renew in Europe the discussion about the relative power of ships and forts. Indeed, there is reason for such questions as will be asked; and we may as well ask them too. If Mobile Bay was not impregnable to the attack of a wooden fleet, what harbor is? Is that of New York? The Rebels had prepared the most elaborate defences, they had every advantage possible —a strong fort, mounting it is believed 150 guns; the channel obstructed by rows of ships; torpedoes sank in the only passage-way left open; the guns of the fort trained upon this narrow gorge; and, lying behind, a formidable fleet of iron and cotton-clad steamers, under a captain of undoubted bravery. But all was in vain. Let us not be deceived; that not every body can do this trick. It requires a man of FARRAGUT's genius and unconquerable pluck, a man who, to quote the words of the Secretary of the Navy, is willing to take great risks in order to accomplish great results. Tennesseeans may be proud that their State has produced too such men as ANDREW JACKSON and D. G. FARRAGUT.

Let us hope that Congress will at its next session provide a proper reward for the old hero to whom we owe two such brilliant and important victories. Rear-Admiral is at present the highest grade in our Navy. It is an absurd designation, to be at the head; and we cannot think it would have been declared such had not the Naval Committees intended to leave the opportunity open to create the higher grade which the title *Rear*-Admiral supposes. It is not our custom to reward with grants of money, or with titles the great achievements of the Nation's leaders. But it is fit that such services as FARRAGUT has rendered, and as others may render during the war, should receive the acknowledgment which sailors and soldiers prize—no advance in rank. We have now the grade of Lieutenant-General in the Army; and FARRAGUT has gir

on cause for the establishment of equal grade in the Navy.

A GLANCE AT THE FIELD.

In place of the sluggishness which was generally predicted for it, the campaign has again started into activity. It cannot be affirmed, indeed, that either combatant is in a critical state, or is likely to be thrown into such by the possibilities of the coming week. For neither is staking all on a single coast. But it is nevertheless true, that the long summer struggle, which has gradually been unfolding its complications and simplifying them, now seems returning to the intricacy which prevailed at the start. Four points in the field of war divide our attention. First comes the historic James, on whose northerly bank the movement in progress, if it mean all that it pretends, involves the transfer of main operations from Petersburgh to Richmond, or to a section of the line between them. But it is very doubtful whether such a change is designed. Its purpose would be either to attack the enemy's capital by moving on one or more of that series of roads which run northwest to Rocketts out of the Kingsland and Long Bridge Roads, or else to menace Fort Darling. But, considering the force employed in that direction,—only two corps and a division of cavalry,—and the character of the manœuvres, neither of these two schemes as yet seems plausible. The movement so far is notably similar to the feint a fortnight earlier on the same spot. This manœuvre could properly be made in order to cooperate with SHERIDAN in the Valley, or, as a cover for distinct operations at Bermuda Hundred or Petersburgh, or, to protect the canal at Dutch Gap, whose successful construction will flank the enemy's strong and annoying battery at Howlett's. All our skepticism results from the meagreness of our information. A day may give to this apparent feint the impress of genuineness.

With regard to the Valley there is equal incertitude. Ten days ago General SHERIDAN organized a force, which, though made up, like its predecessors, of subdivisions unaccustomed to each other, yet surpassed them all in cohesion and strength. It is a formidable column, with some tried infantry, and some Potomac cavalry, and, if properly handled, is adequate to the great, important, simple, and yet hitherto never successful task, the mastery of the Shenandoah Valley. It has been the custom of our troops, from the days of BANKS downward, to start back from the first onset of the enemy's cavalry riding down the Valley, as if from a galvanic battery. It has seldom been thought a part of the authorized tactics to decide the question of superiority with the enemy, south of the Maryland border. Our forces have now reached the environs of Strasburgh, though an unpleasant rumor comes that they are once more "falling back" to Winchester before EARLY. This last report, let us hope, is as erroneous as many previous ones from that quarter. The possession of the Shenandoah Valley is the first requisite for the campaign. There is opportunity for many mistakes in campaigning elsewhere; but no doubt as to the need there. There is chance to employ time, money, and men experimentally elsewhere, without felicitous results; but here we should have force enough to shut the Valley up against any incursion of the enemy.

At Atlanta there have been heavy blows of late, not unlike those with which the Army of the Potomac opened its campaign. At present, our design is mainly to get on the enemy's communications, and his, to get on ours. So far, no substantial success has been achieved by either combatant in this particular. WHEELER's attack on Dalton has disastrously failed. And we cannot at present share the excessive anxiety for SHERMAN'S well-being which some journalists indulge. That his communications may eventually be severed by a determined effort, is perfectly obvious. But the enemy never yet has found af his command that super abundance of unemployed force which a successful operation of this kind will require. SHERMAN'S campaign has been a bold one, but its able and victorious conduct thus far is the best augury for the future.

Finally, at Mobile, a gallant sea-fight, with iron hearts in wooden walls, has handed to us the dominion of the Bay. Whether now we shall parue here, or besiege Mobile, is a little uncertain, though the latter plan seems the more probable.

So everywhere, then, there is visible a sort of equipoise of forces. The record of the week is all in our favor, so far as it goes, and the very stir has broken sway some boding clouds, and made the prospect cheerier. But yet the grand issue has not been materially affected. Now is the time for expectation, not for record. We wait on events. And let us all do so with stout hearts. One lesson at least we may derive from this poise of forces: that now in the very heat and urgency of the campaign, it is not the time for concerting propositions for surrender. Some day hence it will be the duty of the Nation to make peace. Now, its duty is to make war. We chose our leaders for the campaign less for their intuitive genius, than for a certain resolution and persistency which they had disclosed. When that confident determination is exhausted, their skill at fault, and their reserve of energy and invention gone, we may begin to believe the campaign over. And when the campaign is over, we may begin to consider the question of a peace without victory.

GENERAL SHERMAN'S OPERATIONS.

THE main effort of our Army in Georgia is still directed, as it has been for the past three weeks, toward completing the investment of Atlanta, by securing a firm hold upon its only remaining line of communication. At the date of the latest advices, the endeavor to extend the right flank of our Army for this purpose had met with but partial success, the Rebels resisting our advance with a spirit and determination indicating a full appreciation of the situation. On the 3d inst. a lodgment was effected but little less than by the Twenty-third corps on Utoy Creek, a small stream running east and west, four miles north of Atlanta. On the afternoon of the following day, the 4th, an assault was made on the Rebel rifle-pits in front of our left wing, for the purpose of covering an attempt on the right to throw the corps of SCHOFIELD and PALMER across the Macon Railroad between White Hall and East Point. This movement was in the main unsuccessful, though a position was secured somewhat nearer the railroad. On the 6th inst. another attempt was made to advance our right wing, but the Rebels were found too strongly entrenched to be dislodged, and our troops were forced to fall back without accomplishing their object, having suffered a loss reported at some 500 or 600. Our extreme position on the right was at last accounts, within three miles of East Point and one and a half of the Macon Railroad. Sufficiently near to excite the apprehensions of the enemy to necessitate their making a vigorous effort to prove against surprise. They occupy a very strong line of works on the arc of a circle extending around Atlanta, within the lines General SHERMAN has drawn about it. Between the two armies stretches a narrow belt of wooded and hilly ground, for which they are contending in a constant series of skirmishes. The enemy has a decided advantage in his fortifications and the greater facility of movement afforded by the interior position. Unless HOOD is heavily reinforced, however, General SHERMAN'S superiority in numbers should enable him ultimately to complete the investment of Atlanta. It is upon this question of reinforcement that success seems now to mainly depend. Every effort is being made by the Rebels to increase their force, and guns have been put into the hands of all the working details, their duties being entrusted to negroes. Negro drivers are also to take the place of the whites, who will be put into the ranks. This economy of men does not indicate that General HOOD has been reinforced from the East, as is asserted. Io the failure then of the succor expected from the trans-Mississippi Army, we do not see what he has to look for, except the militia of Georgia and its vicinity, to strengthen his army. According to a statement credited to General JOHNSTON'S subordinates, by his official report. June 25th, 1864, numbered 46,628 effective men of all arms, WHEELER'S cavalry included. Since then they have lost in three assaults 20,000 men, and by capture 5,000 more. Allowing them 3,500 received from Mississippi, and 8,000 militia from the levy *en masse* in Georgia, we have left but 25,000 horses and 8,000 militia. They may have received something more than this by calling in outlying detachments, and the Rebel press assert that their army has been considerably strengthened of late.

Elated by their success in repelling the late raid on their communications, in which General STONEMAN was captured, the Rebels are endeavoring to turn the tables upon General SHERMAN. On the 14th inst. the Rebel Major-General WHEELER, with a force of infantry and cavalry variously reported at from 1,700 to 5,000 men, appeared before Dalton, Ga., which was defended by a garrison of four hundred men under Colonel SEIBOLD. Approaching the town in line of battle, General WHEELER demanded the surrender of the place in the following terms:—"To prevent the "effusion of blood, I have the honor to demand the "immediate and unconditional surrender of the forces "under your command at this garrison." To which Colonel SEIBOLD replied:—"I have been placed here "to defend the post, but not to surrender it. B. "SEIBOLD, Commanding U. S. Forces."

On the receipt of this reply, an attack was made on the garrison, who retired into their defences where they succeeded in holding their position until the arrival of General STEDMAN with reinforcements, on Monday, the 15th, from Chattanooga, when the Rebels were forced to retreat after having done slight damage to the railroad track near Dalton.

The Rebels are finding great cause for self-gratulation in the failure of the cavalry raid against the Macon road, which they hope will put an end to attempts to disturb their communications in this way. The miscarriage of the expedition is charged to the failure of the three columns sent out from different directions to unite as was expected. The enemy were thus able to overwhelm each in turn. General STONEMAN, who was captured (not General MCCOOK as stated), purposed to release the prisoners confined at Macon, but would have accomplished little, even if not captured, as they had been sent to Charleston at the date previous to his arrival. He succeeded in destroying near Macon eleven locomotives, and several trains with Quartermasters's and Commissary stores.

A NEW Rebel privateer, called the *Tallahassee*, commenced last week a career of destruction along our North Atlantic Coast. She is an iron steamer, of English build, schooner rigged, and has no yards or topmast and has lost her stainless. She is a very long and narrow vessel, burns soft coal, and has about a hundred men on board, who are subject to the discipline and order of a man of war. It is said that she can make sixteen knots. Her armament consists of one pivot gun, three forward guns and one brass rifled gun of large calibre, on the starboard deck. Her captain is JOHN TAYLOR WOOD—an affable privateersman he is described to be—who writes C. S. N. after his name, and, being blessed with the loaves and fishes, he serves his masters by playing sad havoc amongst our merchantmen. It is impossible, as yet, to say what number of vessels he has fallen in with and how many have authentic accounts of the loss of a large number. He declares that he took more than fifty in one week, which is a little too much for the credulity of owners of the vessels—the most of them consting schooners—are bonded, but by far the larger part are scuttled and destroyed. The unpublished privateer came close to New York harbor, and in those busy waters made capture of six unfortunate craft, amongst them nine of the New York pilot boats. Apprised of her depredations, the Navy Department promptly ordered the following named vessels to forthwith start in pursuit, viz.:—The *Juniata*, *Susquehanna*, *Sonoma*, *Potomac*, *Dumbarton* and *Tristam Shandy*; on the 13 h, the *Mercedita*, *Aster*, *Vantic*, *R. R. Cuyler* and *Grand Gulf*; on the 15th, the *Tallahassee* and *Florida*. They all took different directions; but as yet we have no good news of the capture of the privateer to tell. It is reported that *Tallahassee* was said to have put into Halifax for coal—and sympathy.

To the brief record we elsewhere give of the services of the late Commander CRAVEN, we would add here a few words expressive of our high appreciation of the manly character and fine professional abilities of this gallant officer. He found his death in a vessel whose sea-worthiness and capacity for defence he had seriously doubted from the moment he first put foot upon her deck, and of whose fate, if not of his own, he hazarded predictions before she had passed the first week of her first cruise. Commander CRAVEN'S objections to the Monitor class of vessels were the result, not of the conservative prejudices of a seaman who scouted all innovations, but of a careful and candid study of their advantages and disadvantages. He was always ready to give them credit for their real merits, but he distrusted the safety of hastily adopting them as the models of all our fleet of ironclad ships of war. But, however the future may decide the broad question, Commander CRAVEN will not soon forget the Monitors which brought death to ROGERS and to CRAVEN.

This journal loses in Commander CRAVEN not only one of its frequent and most valued contributors, but also one of its firmest and most helpful friends. He was proud of his service, and was eager to aid in any undertaking that seemed to him likely to promote its interests and stimulate its zeal. Navy readers can be more benefited by no officer than it has lost in the Commander of the *Tecumseh*.

FOREIGN MILITARY AND NAVAL MATTERS.

The *Moniteur de la Flotte* announces as an important fact that an English mercantile house has ordered a ship of twelve hundred tons to be built at St. Nazaire. The *Moniteur* adds that French merchants formerly ordered ships to be built for them in England; but now the case is reversed.

THE French Government, with its fondness for detail, after appointing a committee to report on the carriages on which the big guns are to work, has now appointed another committee to report on the carriages on which the big guns are to work. Admiral DUPERRÉ, Vice-Admiral, is president of this committee, as also of the first.

The *Moniteur de l'Armée* says officially that "a notable part of the French army in Mexico is to be brought home this year, and in the enumeration of the regiments, battalions and companies which are to return in 1865, a large proportion than in this." "A notable part" will consist of about 10,000 men. As for the rest of the army, circumstances will decide the time of their return.

THE new English naval discipline bill which is passing through Parliament is a model of a bill, so far as its mechanism is concerned. All new clauses or new words altering the present naval law are printed in italics; all words that are in the last act, but are omitted now, are printed with a line struck through them. Three is a decimal of 0.3333 in the scale of punishments, from forfeiture of pay and imprisonment not exceeding two years, and with or without hard labor and corporal punishment, to the lesser grade of nay penalties, such as ear-ing, execration, drunkenness, uncleanness, or other scandalous action in derogation of God's honor, and corruption of good manners."

THE *Gazette de la Croix* says that, in the artillery train which took part in the battle of Solferino, in presence of the King, the objects fired upon were six plated targets, 15 feet long, 3 feet wide, and 44 thick. Seven shots were fired at each target at 1,250 paces, and eight at 625 paces, or half the distance. The projectiles in the former case weighed 120 pounds, in the latter 55, and were propelled now and anon shaped. Of these 15 projectiles, 13 were stuck into the plates, but not one entirely pierced them. Two of the projectiles rebounded, and it is reported that the plates furnished by the French house, PERIN, GOUDET & Co., made the best resistance. These plates are destined for the iron-clad frigates *Gloire, Magenta*, and *Solferino*, of the French navy, are clad. No balls entered more than 24 inches into the plates. The wood backing projected here and there in the palm in this respect, also. At our latest advices, there was to be another trial, in which the heavier guns were to be used at the shorter distance, in order to see which would gain the day, the plate or the projectile.

Our readers have already been informed of the contract made by the Mull Iron Company, to furnish to the Russian Government heavy forgings of an enormous size, to be used in the construction of an iron fort at Cronstadt. The *Journal des Sciences Militaires* says that the first operation of forging a 47 ingot had succeeded to perfection, in presence of a large number of visitors. For several years, the various military authorities of Europe have been making experiments on iron for granite in the construction of forts. But no real progress was made in this direction until the success of the Monitors of the American war proved the practicability of iron against artillery on land. The Belgian government has long had a contract with HOWEN & Co., of Liege, for forging 40 inch plates of great thickness, destined to the fortifications of Antwerp, and some of these are already, we believe, applied to their use. The *Journal* says that the enormous advantages which metal possesses over stone, not only in point of solidity, but also in permitting the vulnerable surface exposed to the enemy to hardly greater than the mouth of a cannon, have been frequently stated by scientific observers. But the great difficulty was in the impossibility of manufacturing masses of iron large enough. The experience acquired in making iron clad vessels has now overcome that difficulty, and the work of plating forts with enormous advantages which metal possesses over stone, not only in point of solidity, but also in permitting the vulnerable surface exposed to the enemy to hardly greater than the mouth of a cannon, have been frequently stated by scientific observers. ARMY GAZETTE.

ORDERS AND INSTRUCTIONS FROM QUARTERMASTER-GENERAL.

QUARTERMASTER GENERAL'S OFFICE,
WASHINGTON, D. C., August 4, 1864.

General Order No. 31

The following memorandum of orders and instructions during the month of July, 1864, is published for the information of all in the Quartermaster's Department:—

M. C. MEIGS,
Brevet Major-General, Quartermaster General, U. S. A.

Captain A. S. Flagg, to report to Brigadier General Ingalls, to the commanding general and to the chief quartermaster Department of the Cumberland for duty pertaining to his office. (Special Orders No. 242, Adjutant-General's office, July 1, 1864.

Captain James S. Van Duzer, to General Allen.] To report in person without delay to Brigadier General Allen, Chief Quartermaster, and by him to the commanding general of the Military District of Mississippi, for assignment to duty. Special Orders, No. 227, Adjutant-General's office, July 2, 1864.

Captain L. Gaston [To Quartermaster Gaston.] Relieved from duty in the Quartermaster General's office at Washington, and ordered to report in person to Major General Sherman, for assignment to duty by letter to the commanding general military division of the Mississippi, for assignment to duty. Special Orders No. 227, Adjutant-General Quartermaster of volunteers. Special Orders No. 227, Adjutant-General's office, July 2, 1864.

Captain James Ault. [To commanding general Army of the Potomac.] To report in person without delay to the commanding general Army of the Potomac, for assignment to duty. Special Orders No. 227, Adjutant-General's office, July 2, 1864.

Captain Robert A. McCormick [To Army of the Cumberland.] To report in person without delay to Major General Rosecrans, general and to the Chief Quartermaster Army of the Cumberland, for assignment to duty. Special Orders No. 227, Adjutant-General's office, July 2, 1864.

Captain John Mosher [To visit Washington.] Permission granted to visit Washington, D. C., on public business. Special Orders No. 227, Adjutant-General's office, July 2, 1864.

The following officers will report at once by letter to the commanding general Army of the Cumberland, for assignment to duty. Special Orders No. 227, Adjutant-General's office, July 2, 1864.

Captain Isaac R. Pratt, Assistant Quartermaster of volunteers.

Captain Charles A. Tupper, Assistant Quartermaster of volunteers.

Captain Thomas Tupper, Assistant Quartermaster of volunteers.

Captain J. G. Chandler, Assistant Quartermaster of volunteers.

1st Lieutenant W. Hall, Adjutant 16th Infantry. Special Orders No. 228, July 2, 1864.

Lieutenant-Colonel D. H. Tobin, Chief Quartermaster 8th Army corps [To Quartermaster General Meigs.] To report in person without delay to the Quartermaster-General United States Army, for assignment to duty. Special Orders No. 228, Adjutant-General's office, July 2, 1864.

Captain Arthur Ledoux [To Colonel Parsons.] To report in person without delay to Colonel J. B. Parsons, Superintendent Military Telegraph, Washington, D. C., for duty. Special Orders No. 228, service in connection with supply of steamers on the upper Arkansas. Special Orders No. 228, Adjutant-General's office, July 1, 1864.

Captain George H. Clemence [To Colonel McCallum.] To report in person by letter to Colonel McCallum, Superintendent U. S. Military Railroads, and in person to Captain John G Crabe, for assignment to duty. Special Orders No. 228, Adjutant-General's office, July 7, 1864.

The following named persons appointed A. Q. M. United States volunteers, are now drawing ample their appointments as such, their appointments are, by direction of the President, revoked:—

Richard P. Vandeveer, appointed April 21, 1862.
William E. Jones, appointed May 15, 1862.
Robert Mcleod, Appointed November 26, 1861.
Alexander Mcleod, appointed November 26, 1861.
Thomas Jones, appointed February 10, 1863.
Reuben Kinkead, appointed February 10, 1863.

Captain Charles Spofford, [To Colonel Parsons.] To report in person without delay to Colonel J. B. Parsons, Superintendent Military Telegraph, Washington, D. C., for duty. Special Orders No. 228, Adjutant-General's office, July 7, 1864.

Captain Thomas Swords [To be accepted.] Resignation accepted by the President, to take effect July 1, 1864. Special Orders No. 228, Adjutant-General's office, July 7, 1864.

Captain B. J. Van Valkenburg [To Lieutenant-Colonel Donald-son.] To report in person without delay to Lieutenant-Colonel J. L. Donaldson, Sen. and Superintending Quartermaster at Nashville, Tennessee, for assignment to duty. Special Orders No. 229, Adjutant-General's office, July 13, 1864.

Captain D. W. Reed [To Army corps.] To report in person by letter to the commanding general and to the Chief Quartermaster, Army corps, for assignment to duty. Special Orders No. 227, July 16, 1864.

Captain S. F. Kelley, Jr. [To Department West Virginia.] To report at once by letter to the commanding general and in person to the Chief Quartermaster Department West Virginia, for assignment to duty. Special Orders No. 227, Adjutant-General's office, July 16, 1864.

Captain A. Kingsbury [To Department Tennessee.] To report in person without delay to Major General Thomas, general and to Colonel D. Bingham, Chief Quartermaster Department of Tennessee, for assignment to duty. Special Orders No. 227, Adjutant-General's office, July 16, 1864.

Captain A. Lloyd [To Department Missouri.] To report by letter to the commanding general and to the Chief Quartermaster Department Missouri, for assignment to duty. Special Orders No. 227, Adjutant-General's office, July 16, 1864.

Captain C. L. Gorton [To Department of Kansas.] To report in person without delay to Major General Curtis, general and by letter to the commanding general of the Department, for assignment to duty. Special Orders No. 227, Adjutant-General's office, July 16, 1864.

Captain E. J. Farman. [To Department Cumberland.] Absent from duty at Chicago, Ill., to report in person to the Chief Quartermaster of the Department of the Cumberland, for assignment to duty. Special Orders No. 226, Adjutant-General's office, July 16, 1864.

Captain T. R. Dudley [To Inspector of Artillery, Washington, D. C.] Relieved from duty as Inspector of Artillery, Washington, to report at once by telegraph for duty to the Inspector of Artillery in the field. Special Orders No. 227, Adjutant-General's office, July 16, 1864.

Captain Austin C. Woolfolk [Appointment revoked.] Appointment not having been confirmed by the Senate, is by direction of the President, revoked. Special Orders No. 230, Adjutant-General's office, July 16, 1864.

Captain Charles Brown, A. D. C. to staff of the President, assigned to duty with Quartermaster 9th Army corps, with rank and pay of Lieutenant-Colonel, from July 1, 1864. Special Orders No. 230, Adjutant-General's office, July 16, 1864.

Captain Charles L. Barkley, leave of absence extended 20 days. Special Orders No. 230, Adjutant-General's office, July 16, 1864.

The resignations of the following named officers have been accepted by the President, to take effect as stated opposite their respective names, on condition that they receive no final payments until they shall have settled their accounts and certificates that they are not indebted to the United States. Special Orders No. 230, Adjutant-General's office, July 16, 1864.

Captain Henry C. Rogers July 12, 1864.
Captain Simon Forster, July 12, 1864.

The following officers will report in person without delay to General Rucker, Chief Quartermaster, Washington, D. C., for assignment to duty. Special Orders No. 244, Adjutant-General's office, July 21, 1864.

Captains J. O. Pugan and R. B. Lacey.

Captain D. C. Shaffer [To Department of Appalachian Mississippi.] So much of paragraph 30 of Special Orders No. 240, dated July 16, 1864, as directed his assignment to duty with Quartermaster 9th Army Corps, is by direction of the President annulled. Special Orders No. 244, Adjutant-General's office, July 20, 1864.

Captain D. C. Shaffer [To Department Virginia and North Carolina.] To report to Major General commanding general Department Virginia and North Carolina and to the Chief Quartermaster 18th Army corps, for assignment to duty. Special Orders No. 248, Adjutant-General's office, July 23, 1864.

Captain R. Reinkerhoff [To Pittsburgh, Pa.] Relieved from duty at Augusta, Me., to report in person without delay to Colonel D. Cross, Deputy Quartermaster-General, Pittsburgh, Penn., for assignment to duty. Special Orders No. 241, Adjutant-General's office, July 27, 1864.

Captain Greenberry L. Fort. [Chief Quartermaster 18th Army corps.] Assigned to duty as Chief Quartermaster 18th Army corps with rank and pay of Lieutenant-Colonel from July 31, 1864. Special Orders No. 251, Adjutant-General's office, July 27, 1864.

Captain T. R. Dudley [To Huntsville, Ala.] So much of Special Orders No. 244, Adjutant-General's office, as directs him to report to Inspector of Artillery in this city is revoked, to at once return to Huntsville, Ala., and settle the business with which he has been charged, at the completion of which to report in person to the Quartermaster-General. Special Orders No. 249, Bureau of Adjutant-General, July 27, 1864.

Captain G. A. Wheeler [To Augusta, Me.] To report at once by letter without delay to the commanding general Department of the East, for assignment to duty at Augusta, Me. Special Orders No. 251, Adjutant-General's office, July 27, 1864.

Captain E. Ganey [To Chief Quartermaster Army of Cumberland.] To report by letter without delay to the commanding general and to the Chief Quartermaster Army of Cumberland, for assignment to duty. Special Orders No. 251, Adjutant-General office, July 27, 1864.

SUPPLIES FOR PRISONERS OF WAR.

OFFICE OF THE ASSISTANT-GENERAL OF PRISONERS,
WASHINGTON, D. C., August 10, 1864.

First—By the order of the President, dated August 5, 1864, all persons are prohibited from visiting prisoners of war, except such as may hereafter be supplies of any kind will be furnished to prisoners of war from the United States, except in cases where the sick or wounded are relatives will be permitted to send them such articles of food as may be ordered by the surgeon in charge of the hospital in which those are they will be allowed. Only one suit of outer clothing and a change of under clothing will be allowed.

Second—It is further ordered that enlisted men of military prisons shall be permitted to receive packages of money, as follows, viz:—Writing materials, postage stamps, tobacco, cigars, pipes, matches, combs, soap, towels, brushes, shoe brushes, shoe blacking, shoe brushes, thread and needles, handkerchiefs, towels and pockets looking-glasses.

Third—The order will not be understood as prohibiting prisoners of war from receiving clothing or other articles, when ordered, from their relatives or friends residing beyond our lines, when forwarded to the care of the agent of exchange at Washington, so long as the prisoners of war held at Richmond and other Southern prisons are permitted to receive the same articles from the same manner from their relatives and friend in the loyal States.

W. HOFFMAN,
Colonel Third United States Infantry, Commanding General of Prisoners.

OPINIONS ON QUESTIONS OF MILITARY JUSTICE.

HEADQUARTERS ARMY OF THE POTOMAC,
August 6th, 1864.

Circular:

The following communication from the Judge Advocate of Military Justice is published for the information of all concerned:

WAR DEPARTMENT, BUREAU OF MILITARY JUSTICE,
WASHINGTON, D. C., August 4, 1864.

MAJOR GENERAL G. HARTSUFF, Acting Judge-Advocate Army of the Potomac—

MAJOR:—Your communication of the 28th of July has been referred to this office.

The following opinions are respectfully returned in answer to your inquiries, viz:

QUESTION I.—What increase of authority is given to Division Commanders by the act of Congress approved July 17, 1862, known as the Guerrilla Bill?

ANSWER.—None except that they are now authorized to portion or mitigate sentences of confinement in the penitentiary.

QUESTION II.—Have Division Commanders the power to order to carry into execution sentences of such courts?

ANSWER.—They have the same power to convene military commissions and to order the execution of their sentences as the Corps Commanders have.

QUESTION III.—Have Division Commanders the power to order execution of sentences of courts-martial in the absence of the Army Commander, or in other Government prisons or fortifications?

ANSWER.—They have this power in the case which are mentioned.

QUESTION IV.—Where the sentence of a general Court-Martial or Military Commission is approved by a Division Commander, and is confinement at hard labor or otherwise) at such prison, penitentiary, fortress, or military station as the Secretary of the War, or per authority shall direct; who is the proper officer to designate the prison, penitentiary, fortress, or military station to which the prisoner, or the officer who executed the Court or Commission?

ANSWER.—The Commanding General of the Army is "the proper officer." The court should indicate their intention.

(Signed) J. A. HODGES,
Major and Judge-Advocate, Acting Judge-Advocate General.

II. Paragraph III of General Orders No. 27, of March 14, 1863, from these Headquarters is hereby so modified as to allow the confirmation by officers reviewing the proceedings of Courts-Martial of sentences of imprisonment at hard labor, to be carried into execution at Albany, N. Y., for offences properly punishable by such confinement.

III. Judge-Advocates of Courts Martial and reviewing officers will be governed by the rules and regulations established in General Orders No. 3, current series, from these Headquarters. In general terms, all offences of which the Courts have jurisdiction, have been disregarded. A more careful observances by Courts and Judge Advocates of the instructions contained in General Orders No. 3, and No. 13, current series, and General Orders No. 61, of September 10, 1863, from these Headquarters, will be required.

By command of Major-General Meade.

S. WILLIAMS, A. A. G.

VULCANIZED LINEN WAGON COVERS.

QUARTERMASTER-GENERAL'S OFFICE, WASHINGTON,
August 9, 1864.

Special Order No. 22.

A board of officers will convene on Saturday, August 4, 1864 at 10 o'clock a.m., at the office of the Quartermaster-General, for the purpose of examining and reporting upon the subject of the propriety of purchasing Army wagon covers made of "vulcanized linen," of which a specimen submitted by Messrs. Joseph Lee & Co., of Philadelphia, will be presented for the inspection of the board. The cost of the article compared with that of the same at present used, as well as its quality durability, and fitness for the purpose proposed, will be carefully considered by the board.

DETAIL FOR THE BOARD.

Brigadier-General D. H. Rucker, United States Vols., Chief Quartermaster Depot of Washington;
Lieutenant-Colonel R. B. Ireland, Assistant Quartermaster United States Army;
Lieutenant-Colonel James J. Dana, Assistant Quartermaster United States Army.

M. C. MEIGS,
Quartermaster-General, Brev. Maj.-Gen.

JOHN B. MURRAY & CO.

WAR DEPARTMENT, ADJUTANT-GENERAL'S OFFICE,
WASHINGTON, July 26, 1864.

All officers connected with the BUREAUS of the War Department are hereby instructed not to recognize the firm of John B. Murray & Co., bankers and brokers, No. 57 Broad street, New York, as Government depositaries.

The chiefs of bureaus will promulgate this order to their officers for information.

By order of the Secretary of War:

E. D. TOWNSEND, Assistant Adjutant-General.

AWAITING ORDERS.

QUARTERMASTER-GENERAL'S OFFICE, WASHINGTON, D. C.,
August 2, 1864.

Special Orders No. 21.

Lieutenant-Colonel R. B. Ireland having, in compliance with Special Orders No. 174, paragraph II, Headquarters Department Ohio, June 2, 1864, reported to the Quartermaster-General, is hereby ordered permanently to proceed to Cincinnati, Ohio, as special inspector.

M. M. Gen. U. S. Army, Brev. Maj.-Gen.

REPORT OF MAJOR-GENERAL LOGAN.

HEADQUARTERS FIFTEENTH ARMY CORPS, }
ON BOARD CARS, ATLANTA, GA., July 29, 1864. }

COLONEL:—I have the honor to report that in pursuance of orders, I moved my command in position on the right of the Seventeenth Army corps, which was the extreme right of the army, on the morning of the 20th instant, at 7 o'clock and 20 m. I had during my advance in line of battle to a more favorable position, to be met first by the rebel infantry from Kinsher's and Lee's, who, after a desperate, and determined attack as had past events of the kind, at on the 20th, 22d, and 28th, were only prevented from breaking through us in front of them. The first onset was received and checked, and the battle commenced and lasted until about three o'clock in the afternoon. During that time six successive charges were made, which were as steadily repulsed, each time with heavy slaughter to the enemy.

Later in the evening my lines were several times assaulted vigorously, but each time with the result. The most of the fighting occurred on General Harrow's and Sherman's left, between the centre and right of the command. The troops could not have displayed more coolness or more genuine courage than they did. They always knew they would have been driven from their position, but they never thought of leaving it. Between the charges a few minutes are occupied to repeat orders for further conduct and skill in repelling the assaults.

My thanks are due to Major-Generals Blair and Dodge for sending me reinforcements at a time when I needed them.

My losses are 53 killed, 322 wounded, and 63 missing; aggregate, 572. The division of General Harrow suffered most severely. There were about 1,500 or 1,600 rebel dead buried. One hundred and six prisoners were captured, exclusive of wounded, who have been removed to hospital. I am unable to state the loss of my assailants, for the enemy did not withdraw until nearly daylight.

The enemy's line could not have been in full alignment, less than six thousand or even thousand.

I am, very respectfully, your obedient servant,

JOHN A. LOGAN,
Major-General Commanding Fifteenth Army Corps.
Lieutenant-Colonel WM. T. CLARK, Asst Adj.-Gen.

Endorsement.

HEADQUARTERS DEPARTMENT OF THE ARMY OF THE TENNESSEE, }
BEFORE ATLANTA, GA., July 29, 1864. }

In forwarding the within report I desire to express my high gratification with the conduct of the troops engaged. I never saw better conduct in battle. The determination to hold the position at all hazards, and to die in it if much were, was indefatigable, and the success of the day is as much attributable to the courage of the men as to the soldierly skill and the officers of this army, that commanded my observation, co-operated promptly and handsomely.

O. O. HOWARD, Major-General.

DEPARTMENTAL COMMANDS.

WAR DEPARTMENT, ADJUTANT GENERAL'S OFFICE, }
WASHINGTON, July 30, 1864. }

General Orders No. 311.

1. The Middle Department, and the Department of Washington, of the designations as old in West Virginia, will constitute the Middle Military Division.

2. Major-General P. H. Sheridan is assigned by the President to the temporary command of the Middle Military Division.

3. The part of Kentucky west of the Kentucky River is transferred to the Department of the Ohio. The State of Kentucky will constitute a Military District of the Department of the Ohio.

4. Brevet Major-General S. G. Burbridge is assigned by the President to the command of the Military District of Kentucky, with his present rank, and is authorized to exercise, under Major-General Schofield's direction, the powers of a Commander of an Army, powers which are not required by law to be exercised by such Departmental Generals.

By order of the Secretary of War:

E. D. TOWNSEND, Assistant Adjutant-General.

RESIGNATIONS OF MEDICAL OFFICERS.

HEADQUARTERS MEDICAL DEPARTMENT AT THE FIELD, }
NEW ORLEANS, LA., July 24, 1864. }

General Orders No. 109.

In accordance with orders from the Headquarters Military Division of the West, Washington, the resignations of officers of the service within the limits of this Department will be accepted, except by reason of disability certified by a Medical Board, and then in no case only after an examination and recommendation has been made by a board of medical officers.

By command of Major-General Banks.

GEORGE E. DAVIS, Assistant Adjutant-General.

THE FOURTEENTH ARMY CORPS.

WAR DEPARTMENT, ADJUTANT-GENERAL'S OFFICE, }
WASHINGTON, August 9, 1864. }

General Orders No. 241.

Brevet Major-General J. C. Davis is assigned to the command of the Fourteenth Army corps, according to his present rank, vice Major-General Palmer, relieved at his own request.

By order of the Secretary of War [from the Adjutant-General's office:

E. D. TOWNSEND, Assistant Adjutant-General.

DISMISSALS

For the week ending August 6, 1864.

Lieutenant-Colonel William Jones, 24 California volunteer cavalry, to date June 24, 1864, with loss of all pay and allowances due, for sudden and gross inferiority with the enlisted men of his command—withdrawing the latter, without his knowledge or consent, from active service, neglecting to look up said accounts for on his returns, thus causing the loss of a large amount of property, and generally neglecting and evading his duties; neglecting to charge an enlisted man, as required by army regulations, for a government pistol; and gambling.

Major Edward George F. Folsom, U. S. Vols., to date August 1, 1864.

First Lieutenant William G. Anderson, Adjutant 4th Indiana cavalry, to date July 11, 1864, for absence without leave, having been published officially and failed to appear before the commission.

Lieutenant-Colonel R. C. Hill, 15th Kentucky cavalry, to date July 30th, 1864, for desertion.

Lieutenant R. H. Fenton, 3d Delaware Vols, to date July 20, 1864, for absence without proper authority.

Second Lieutenant Joseph W. Beach, 9th New York cavalry, to date July 29, 1864, for drunkenness on duty, breach of arrest, and preventing a party from a government train under a sutler's guard belonging to an officer.

The order heretofore issued accepting the resignation of Captain A. J. Vidal, partisan rangers, has been revoked, and he has been dismissed, to date August 4, 1864, by sentence.

DISMISSALS CONFIRMED.

The orders of dismissal heretofore issued in the following cases have been confirmed:

Captain Carl Von Heinzle, 5th United States colored troops, for unbecoming conduct and conviction.

First Lieutenant William P. Miner, 4th Connecticut Vols, to date July 10, 1864, for absence without leave and without proper permission from proper authority, for breach of arrest, and for being grossly drunk in the presence of his men, and in the city of New Orleans.

Second Lieutenant Charles L. French, 6th U.S. colored infantry, for having neglected his regiment in consequence of long arrest and inconsequency.

DISMISSALS APPROVED.

The orders of dismissal heretofore issued in the following cases have been approved:—

First Lieutenant John M. Sharp, 11th New York Vols, to date July 29, 1864, for, after having been arrested upon charges of cowardice and misbehavior before the enemy, breaking his arrest, and leaving his line of battle, thereby trying by his own act to escape trial and inflict upon which to go and a resignation.

Second Lieutenant J. C. Mc Donald, 1st New York cavalry, to date July 28, 1864, for wilful violation of General Orders No. 127, current series, thereby attempting to secure his discharge from the service after the same had been refused.

DISMISSED OUT.

First Lieutenant Joseph T. Fearing, of Smith's independent cavalry company, Maryland volunteers, has been mustered out on discharge from the service of the United States, to date August 1, 1864, upon charges preferred by his superior officer, and forwarded through the commanding general of the Middle Military Division, as he was under other conduct showing him to be unfit for the position of an officer.

DROPPED FROM THE ROLLS.

By direction of the President, Surgeon Edward L. Hartz, Assistant Quartermaster, United States Army, has been dropped from the rolls of the Army, to date August 1, 1864.

DISMISSALS REVOKED.

The order heretofore issued dismissing Second Lieutenant Howard Bell, 1st Ohio cavalry, to date July 29, 1864, is revoked, and he has been honorably discharged, to date February 1, 1864.

RESTORED TO COMMISSION.

The following officers have been restored to their rank, vice from the date at which they relate their regiments for duty:—

Captain Charles H. Bowen, 2d Kentucky cavalry, provided the vacancy has not been filled by the Governor of its State.

Captain Charles Hall, 1st United States cavalry.

Captain Daniel D. T. Gordon, Assistant Quartermaster United States volunteers, dismissed as Captain 2d Colored Cavalry Mortar, has been restored to his former rank in the service.

SENTENCE DISAPPROVED.

The proceedings, findings and sentence of a General Court-Martial in the case of Brigade Surgeon Edward Wood, 35th Wisconsin Vols, has been disapproved, the records failing to show the offence of which he was convicted, and he will be released from arrest and restored to duty.

SENTENCE REMITTED.

The residue of the sentence of Second Lieutenant J. S. Winter, 10th Pennsylvania cavalry, has been remitted, on the ground of his having paid to the Paymaster of his regiment the remaining fraction of pay during imprisonment, and he has been restored to his commission in the regiment.

NOTICE TO DELINQUENTS.

The following officers, having been reported as the headquarters of the Army for the purpose, are hereby notified that they will be honorably mustered out of the service of the United States unless some sufficient reason to the contrary be shown to the Secretary of War, in connection with investigation, by U. of which Brigadier-General John A. Rawlins, Assistant Secretary of War, is President, and duties satisfactory defence to the charges against them:

Absent without leave.

First Lieutenant Henry Hall, 1st Illinois Vols.
Second Lieutenant G. A. Rogers, 9th Massachusetts Cavalry.
First Lieutenant Alexander Hamilton, 1st Potomac Veteran Reserve Corps.
Captain Edward Wilson, 7th New York Vols.
First Lieutenant Hubert Ambrosier, 3d New Jersey Cavalry.
First Lieutenant Charles H. Ellis, 1st Rhode Island Cavalry.

Absence from hospital at Annapolis, Md., without proper authority, and conduct unbecoming an officer and gentleman.

First Lieutenant Edward Kennedy, 1st Pennsylvania Vols.
Captain George B. Chainey, 53d Pennsylvania Vols.
First Lieutenant Charles Hall, 1st Rhode Island Pennsylvania Vols.
First Lieutenant William A. Kennedy, 1st Pennsylvania Cavalry.
First Lieutenant James O'Connell, 110th New York Vols.

SENTENCES OF COURTS-MARTIAL

TO BE CONFIRMED.

Captain William Chandler, 2d Rhode Island Vols, for misconduct in the presence of the enemy and conduct unbecoming an officer and a gentleman.

Captain James Dunsdale, Co. B, 5th New Hampshire, for conduct *prejudicial to good order and military discipline.*

First Lieutenant Julius Kuhckenbecker, 14th New York Artillery, for desertion.

Captain D. B. Kuhlman, 48th Pennsylvania Vols, for gross conduct unbecoming an officer.

Second Lieutenant George S. Wilkes, 105th New York Vols, and Second Lieutenant Joseph Gaskill, 9th New Jersey Cavalry, for speaking disrespectfully of his commanding officer.

Assistant Surgeon John B. Hamilton, U. S. Vols, for conduct prejudicial to good order and military discipline. Remitted and confirmed to a reprimand in general orders.

TO BE DISHONORABLY DISMISSED

First Lieutenant Alfred Groff, Co. G, 143d Pennsylvania Vols, to date to the 20th of August, 1864, for absence without leave, and to take an officer from and after the 8th day of May, 1864, and that the sentence, being, in the opinion of the reviewing officer, unjust, published in the newspapers in and about the camp and of the State of Pennsylvania, for the information of the people and soldiers, and he be finally resides, for misbehavior in the presence of the enemy and absence without leave.

First Lieutenant Joseph Cogan, battery H, 1st Pennsylvania Reserve light artillery, for absence without leave and a gross offence to the prejudice of good order and military discipline.

Assistant Surgeon John B. Hamilton, U. S. Vols, for conduct prejudicial to good order and military discipline. Remitted and confirmed to a reprimand in general orders.

TO BE CASHIERED.

Lieutenant-Colonel Daniel E. Gross, 5th New Hampshire Vols, for disobedience of orders.

Second Lieutenant John G. Jones, 8th U. S. colored troops, with loss of all pay and allowances for disobedience of orders, violation of the 45th Article of War, and conduct unbecoming an officer.

First Lieutenant William Thomas, Co. D, 3d Maryland Veteran Reserve, with loss of all pay and allowances due, for disobedience of orders, for robbing any office of trust or emolument under the United States, for conduct to the prejudice of good order and military discipline, for offences were on the general commanding may direct, for the term of two years, for conduct unbecoming an officer and prejudicial to good order and military discipline.

First Lieutenant Charles Hall, Co. E, 179th New York Vols, for drunkenness on duty, conduct unbecoming an officer and a gentleman and breach of arrest.

OTHER SENTENCES.

First Lieutenant J. W. Giese, 194th Pennsylvania Vols, to be reprimanded in general orders by the Major-General commanding the Department of the South, for using reprobrial and provoking speech to a soldier.

Samuel S. Sharpless, late engaged in the Army, privy to the forging of a draft for $10,000 and to conduct to such prejudice to the discredit of the army, to pay a fine of $100, and be imprisoned at such imprisonment shall not exceed three years.

NAVY GAZETTE.

THANKS TO REAR-ADMIRAL PARAGUT.

NAVY DEPARTMENT, }
WASHINGTON, D. C. August 15, 1864. }

SIR:—Your dispatch of the 5th instant, stating that you had on the morning of that day entered Mobile Bay, passing between Forts Morgan and Gaines, and encountering and overcoming the rebel fleet, I had the satisfaction to receive this day. Some preliminary account of your operations had previously reached us through rebel channels.

Again it is my pleasure and my duty to congratulate you and your brave associates on another victory achieved by our arms over any other commander, and only surpassed by that unparalleled naval triumph of the squadron under your command in the Spring of 1862, when, proceeding up the Mississippi, you passed Forts Jackson and St. Philip, and overcoming all obstructions, captured New Orleans, and restored unobstructed navigation to the commercial emporium of the great central valley of the Union. The Bay of Mobile was not only fortified and guarded by forts and batteries on the shore, and by submerged obstructions; but the rebels had also built and put there a formidable ram, commanded by their ablest naval officer, to dispute control in the Lower Navy, who, raise to the government of the Union, had devoted his country in the hour of peril, and brought his own against the flag which it was his duty to have defended.

The instructions under which you have acquired, above the illicit traffic which have been carried on by means of the ports in this part of the country, have given peculiar value to the success you have achieved.

Every vessel in war are seldom encountered with more skill and it was not expected that the harbor of Mobile would be assisted without danger. The loss of the monitor Tecumseh was a severe misfortune, with the Tecumseh, a vessel that was impossible to the guns of Fort Morgan, and the destruction of the torpedo, by the explosion of which no human foretold could guard. While the nation awards the highest honors to the brave men who will ever hallow and embalm the memory of the gallant and lamented dead, who perfect their first duty in the service of their country.

To you and the brave officers and sailors of your squadron, who participated in the battle, the department tenders its appreciation its thanks and those of the government and country.

Very respectfully, your obedient servant,

GIDEON WELLES, Secretary of the Navy.
Rear-Admiral DAVID G. FARRAGUT, Commanding, &c.

OFFICIAL DISPATCH FROM REAR-ADMIRAL FARRAGUT.

FLAGSHIP HARTFORD, MOBILE BAY, August 5, 1864.

SIR:—I have the honor to report to the Department, that this morning I entered Mobile Bay, passing between Forts Morgan and Gaines, and engaging the rebel fleet from Tennessee and gunboats of the enemy, viz., Admiral Buchanan's flagship

The Brooklyn, with the Gaines to my starboard, and the Hartford, with the Richmond on her port quarter, followed in close order.—*The Brooklyn*, with the Gaines to my starboard, with the Tennessee, Admiral Buchanan's flagship, and the Morgan, Commodore Strong's flagship, with the Tennessee on her starboard quarter. The line of the fleet was the proper position of the monitors or ironclads. The Tecumseh was in the advance, and fired the first gun at the enemy at 7 minutes 40 m. Fort Morgan opened upon me at 10 minutes past 7 or 30 m. The fire from the fort was terrific, and the fleet was under the fire of the main ship channel, there was some difficulty ahead, and the *Brooklyn* passed the line of obstructions, and the monitors and the Admiral passed the monitor Tecumseh was struck by a torpedo and sunk, going down very rapidly with nearly all on board. The fire of the enemy was fierce, with the exception of the pilot and eight or ten men, who were saved by a boat that was sent from the Metacomet, which was alongside of me.

The *Hartford* had passed the first buoys 6 o'clock, 6 d hailing myself raked by the rebel gunboats, I ordered the *Metacomet* to assist and go to the assistance of the Tecumseh. The rest of the fleet was proceeding in capturing. All the vessels had passed the forts by half-past eight, but the fleet was not collected together until about one o'clock, when I proceed to our near. A signal was at once made to all the fleet to fire on her and destroy her, which was done, and she was sunk in about ten minutes after the first gun. The Metacomet was the first that passed, and, though much injured, they have succeeded in capturing the gunboat Selma, with the exception of the pilot and eight or ten men, who were saved by a boat that was sent from the Metacomet

Sergeant R. R. Tinsley and G. S. S. Horner, to await orders.
Second Assistant Engineer William A. Cherry, to the *New Iron sides*.

DETACHED.

Commodore S. C. Rowan, from command of the *New Ironsides* and waiting orders.
Lieutenant-Commander George E. Belknap, Lieutenants Henry R. Robeson and John J Read, Surgeon Mattias Duval, Paymaster Thomas Rickett, Carpenter Theodore H. Hinman, and Boatswain John A. Birchall, from the *New Ironsides* and waiting orders.

OFFICIAL DISPATCH.

WASHINGTON, Tuesday, August 16.

To Major-General John A. Dix:

The following official report of the surrender of Fort Gaines and Fort Morgan, Mobile Bay, to Major-General E. R. S. Canby, has just been received from Major-General Granby:—

"Fort Gaines and Fort Morgan, with their garrisons still existed men, with the armament of 59 guns intact and provisions for twelve months, have been surrendered to me. They were occupied by our forces at 8 o'clock yesterday morning. Fort Powell was abandoned, blown up and evacuated. Fort Morgan mounts seventy-four heavy guns, is to condition for immediate service. General Granger will immediately occupy Mobile. Rear-Admiral Farragut will move into Mobile Bight; that Shenidan's index are all up and that his Army is in the best condition. Another dispatch, dated the 17th of August, reports that the stories of plunder taken from Maryland by the Rebels are all burning. They were very little, just enough to exhibit on, and no more, most of which has been taken from the Shenandoah Valley. Another dispatch, dated the 17th of August, be says "Sheridan's lady's train is a very small one, not exceeding 250 wagons, and the stories about accumulated plunder from Maryland are untrue."

The Department has received an unofficial report from Fortress Monroe, that mercenaries were being made yesterday in front of Petersburgh, but owing to the telegraph line being down no information has been received from General Butler.

The Department is without any intelligence from Atlanta.

Major-General Canby has assumed command of Mobile, since the capture of Fort Gaines.

EDWIN M. STANTON, Secretary of War.

VARIOUS NAVAL MATTERS.

Side-wheel steamer *Pontoosuc*, 10, Captain Stevens, arrived at Portland on the 15th from Boston.

Bark *Daylight*, 7, arrived at Portland on the 15th, from Fortress Monroe.

U. S. frigate *Macedonian*, and gunboat *Marblehead*, sailed from New Bedford 15th inst., on a cruise.

Side-wheel steamer *Mercury*, 2, is to be attached to the Potomac flotilla. She has arrived at Washington.

Iron-wheel steamer *Aroostook*, 10, lately built at New York, has arrived at Washington to be subjected to some slight repairs.

Assistant Surgeon of the Navy Fox visited the Portsmouth Yard on Monday, and was received with a salute of thirteen guns.

The Surgeon-General, of the Chilian Navy, has arrived in England, empowered to buy war vessels and order iron-clads.

The U. S. war steamer *Sacramento* arrived at Falmouth on the 24 ult., from Gibraltar.

The U. S. steamers *Wachusetts* and *Onward* were at Rio Janeiro July 8th.

The steamer *Narragansett*, Commander S. B. Woodworth, sailed from the Fraction Dock for Acapulco.

The frigate *Sabina* was spoken on the 11th inst., 32 miles East of Sandy Hook, cruising.

Gunboats *Tristram Shandy*, *Dunolah* and *Dunbarton*, sailed from Charleston Navy Yard on the 14th, in search of the rebel pirate *Tallahassee*.

The U. S. schooner *America* came into Newport, R. I., on the 16th, from an unsuccessful cruise in search of the rebel pirate *Tallahassee*.

The U. S. steamer *Miami* was in Newport harbor on the 18th She lay to Holmes' Hole when the news reached her Sunday morning of the destruction of the *Tallahassee* off the coast, and she at once got up steam and started in pursuit, following on in her supposed track until she fell in with the wreck of the *Bellona* and towed her in

The gunboat *Dunbarton* arrived at Newport on the 18th, from a cruise in search of the pirate *Tallahassee*. She sprung a leak while at the entrance to the harbor, and was towed alongside for instructions. The *Dunbarton* is an iron side-wheel steamer of about 600 tons, and was formerly a blockade runner. She carries four guns

The U. S. steamer *Iroquois* sailed last week from Rio, en route for Montevideo. She had stopped in the Straits of Magellan to cut wood, and on the opposite coast of Valparaiso she was overhauled. Among the passengers by the last steamer from New York, was Commander R. B. Davenport, U. S. Navy, who comes to relieve Commander Lamson of the U. S. steamer *Kearsarge* at Kingston (Jamaica). He will leave Panama by the steamer of the 9th inst., for Colon.

The U. S. steamer *Hermione*, Acting Volunteer Lieutenant Wm. Hoda sailed last Saturday from the lower quarantine, for New York, for the coast of Labrador, for the purpose of destroying the yellow fever which has appeared in the settlements of Labrador. On her way to the northern latitude she will keep a sharp lookout for the rebel pirate *Tallahassee*, which is supposed to be operating somewhere in the vicinity of the Banks of Newfoundland. The *Hermione* is about to cruise until every trace of the epidemic is completely removed.

The steamer *Niagara*, after taking in coal and provisions, left Liverpool on the 5th having arrived on the 3d. Her destination was unknown. The *Niagara* is going to the Mediterranean. The *Bay of Antwerp*, was daily crowded with visitors, very much as was the case with the *Great Eastern* when she first arrived at New York. They even organized excursions to various vessels for the like supposed object, and many of the visitors have given descriptions of their steamer and the vessels in the harbor. Every one seems to be filled with wonder and admiration at everything they see.

On the 15th, the anniversary of the birthday of Napoleon III., the French frigate *Guerriere*, to Newport, R. I., harbor, was covered with flags and streamers, presenting a beautiful appearance. She had the American flag at the fore. The *Constitution* and the *Saratoga* United States frigate, honored the occasion by firing a national salute to the merriment, and also to the display of bunting, and of American flags at the main and mizen mastheads, and at the peak with the French flag at the fore. The salute was returned by the *Guerriere*. There was a grand ball on board the latter vessel in the afternoon, in honor of the day.

A Philadelphia paper says:—A movement is on foot which, if successful, will make the Navy Yard in that city an extended portion of ground for its accommodation. It appears that for some time the Government has contemplated purchasing a portion of land between the Navy Yard and the Commodore Barney site, using the ground for naval purposes in connection with the present Navy Yard property. Application has been made to the Legislature of Pennsylvania by the Secretary of the Navy for permission to purchase and hold the ground. The Committee on Federal relations have the subject under consideration, and a favorable report will be submitted in a few days. The immense amount of work now doing at the Yard renders its enlargement very desirable.

The Navy Department has received information from Commander Otis A. Ostrander, commanding the U. S. steamer *Kansas*, that on the 21 of August an expedition, composed of one hundred and twenty-seven men, under command of Acting Commander Commercesses, captured twenty-six citizens who were building a meeting at the court-house of McIntosh County, Ga., for the purpose of forming a company for the rebel service. They destroyed the building and bungles, destroyed two bridges, and a large encampment which was intended for the coast-guard. This was accomplished in the night, and the men were back to their vessels by daylight the next day a single man. The Department has also received intelligence from Lieutenant-Commander R. F. Swain, of the steamer *Pocasola*, that an expedition under his command destroyed two salt mines on a creek leading out of Black river, six miles from its mouth. The mines were completely destroyed, together with one hundred and fifty bushels of salt. When the expedition was returning they were fired upon by the rebels, who were in the marsh bordering the creek. The tide being very low in some places, the men had to drag the boats over the mud. We returned the fire of the enemy, one man being armed with sprecer rifles, and fired so rapidly that we succeeded in driving the rebels from their position. We had forty-two men wounded, one mortally.

BUSINESS NOTICE.

We notice that C. S. HUBBARD, of New Haven, Conn., is Agent for "Parson Brownlow's" paper, at $2.00 per year in advance—cheap enough. Try it a year.

REDEMPTION OF $946 700 "SOLDIERS' SUBSTITUTE AND RELIEF FUND BONDS,"

OF THE

COUNTY OF NEW YORK.

PAYABLE SEPTEMBER 1, 1864.

Notice is hereby given that the "Soldiers' Substitute and Relief Fund Bonds" of the County of New York, becoming due and payable September 1st, 1864, with the interest thereon, will be paid on that day, on the presentation of said Bonds at the office.

PROPOSALS FOR A LOAN OF $946,700 OF "SOLDIERS' SUBSTITUTE AND RELIEF REDEMPTION BONDS," OF THE COUNTY OF NEW YORK.

Sealed proposals will be received at this office, until Thursday, August 25, 1864, at 3 o'clock P. M., when the same will be publicly opened, for the whole or any part of the sum of nine hundred and forty-six thousand seven hundred dollars of "Soldiers' Substitute and Relief Redemption Bonds," of the County of New York, authorized by Chapter 7 of the Law of 1864, and by an ordinance of the Board of Supervisors, approved by the Mayor May 4, 1864.

The said bonds will bear interest at the rate of six per cent. per annum, payable semi-yearly, on the first day of May and November in each year, and the principal will be redeemed as follows:

Five hundred thousand dollars on the first day of November, 1880, and

Four hundred and forty-six thousand seven hundred dollars on the first day of September, 1881.

The proposals will state the amount of bonds desired and the price per one hundred dollars thereof, and the persons whose proposals are accepted will be required to deposit with the County Treasurer, (at the Bank of North America) on Thursday, the first day of September, 1864, the amount so awarded to them respectively.

On presentation to the Comptroller the receipts of the County Treasurer for such deposits, the parties will be entitled to receive bonds for equal amounts of the par value of the sums awarded to them, bearing interest from September 1st, 1864.

Each proposal should be sealed and endorsed "*Proposals for Soldiers' Substitute and Relief Redemption Bonds*," and enclosed in a second envelope, addressed to the Comptroller.

The right is reserved to reject any or all of the bids, if considered necessary to protect or promote the interest of the County.

MATTHEW T. BRENNAN, Comptroller.
CITY OF NEW YORK—DEPARTMENT OF FINANCE,
COMPTROLLER'S OFFICE,
AUGUST 9, 1864.

FIRST NATIONAL BANK OF PHILADELPHIA,

FINANCIAL AGENT OF THE UNITED STATES.

UNITED STATES 7-3-10 TREASURY NOTES.

NEW PAYROLLS LOAN.

Under instructions from the Treasury Department, this Bank is prepared to receive subscriptions for Treasury Notes, issued in the form of Three Year Treasury Notes, bearing interest at the rate of 7-3-10 per cent. per annum, payable semi-annually in Lawful Money on the 15th days of August and February, and principal, of such of said Treasury Notes as are convertible at maturity, at the option of the holder, in 20 years from August 15, 1867, when payable by COIN, and redeemable after five and payable twenty years from August 15, 1867.

Coupon Notes will be issued in blank or payable to order, and may be covered by the subscription, in sums of $50, $100, $500, $1000 and $5000.

Interest will be allowed from the date of the subscription to the 15th of August next, the date of the Treasury Notes. Those who subscribe after the 15th of August next, will be required to pay the accrued interest on the Notes.

C. H. CLARK, President.

NEW 7-3-10 LOAN.—Coupons, pay-

able semi-annually on the 15th of August and February, for sale in these years, or funddable into 5-20 Loan at par at that time—for sale by

JAY COOKE & CO.,
114 South Third St., Philadelphia.

VETERANS! VETERANS!! YET

ANOTHER!!!—Volunteers ready to enlist for one, two or three years, either as companies, regiments, or individually, will receive the highest bounty paid in the United states, by communicating with the MERCANTILE, BANKERS AND GENERAL RETURNS ASSOCIATION OF NEW YORK. All letters promptly furnished. No delay after muster. Charge only one.

Office, 428 Broadway, New York.
Lieut.-Col. S. W. WINSLOW, Lieut.-Col. H. MCNIGHT, Authorized Agents.

U. S. 7-30 LOAN.

The Secretary of the Treasury give notice that subscriptions will be received for Coupon Treasury Notes, payable three years from Aug. 15, 1864, with semi-annual interest at the rate of seven and three-tenths per cent. per annum,—principal and interest both to be paid in lawful money.

These notes will be convertible at the option of the holder at maturity, into six per cent. gold bearing bonds, payable not less than five nor more than twenty years from their date, as the Government may elect. They will be issued in denominations of $50, $100, $500, $1,000 and $5,000, and all subscriptions must be for fifty dollars or some multiple of fifty dollars.

The notes will be transmitted to the owners free of transportation charges on soon after the receipt of the original Certificates of Deposit as they can be prepared.

As the notes draw interest from August 15, persons making deposits subsequent to that date must pay the interest accrued from date of note to date of deposit.

Parties depositing twenty-five thousand dollars and upwards for these notes at any one time will be allowed a commission of one-quarter of one per cent., which will be paid by the Treasury Department upon the receipt of a bill for the amount, certified to by the officer with whom the deposit was made. No dedeuction for commissions must be made from the deposits.

SPECIAL ADVANTAGES OF THIS LOAN.

IT IS A NATIONAL SAVINGS BANK, offering a higher rate of interest than any other, and *the best security*. Any savings bank which pays its depositors in U. S Notes, considers that it is payable in the best circulating medium of the country, and it cannot pay in anything better, for its own assets are either in Government securities or in notes or bonds payable in Government paper.

It is equally convenient as a temporary or permanent investment. The note can always be sold for within a fraction of their face and accrued interest, and are the best security with banks as collateral for discounts.

CONVERTIBLE INTO A SIX PER CENT. 5-20 GOLD BOND.

In addition to the very liberal interest on the notes for three years, this privilege of conversion is now worth about three per cent. per annum, for the current rate for 5-20 Bonds is not less than *nine per cent. premium*, and before the war the premium on six per cent. U. S. stocks was over twenty per cent. It will be seen that the actual profit on this loan, at the present market rate, is not less than ten per cent. per annum.

ITS EXEMPTION FROM STATE OR MUNICIPAL TAXATION.

But aside from all the advantages we have enumerated a special Act of Congress *exempts all bonds and Treasury notes from local taxation*. On the average, this exemption is worth about two per cent. per annum, according to the rate of taxation in various parts of the country.

It is believed that no securities offer so great inducements to lenders as those issued by the Government. In all other forms of indebtedness, the faith or ability of private parties, or stock companies, or even state communities, only, is pledged for payment; while the whole property of the country is held to secure the discharge of all the obligations of the United States.

While the Government offers the most liberal terms for its loans, it believes that the very strongest appeal will be to the loyalty and patriotism of the people.

Duplicate certificates will be issued for all deposits.

The party depositing must endorse upon the *original* certificate the denomination of notes required, and whether they are to be issued in blank or payable to order. When so endorsed it must be left with the officer receiving the deposit, to be forwarded to the Treasury Department.

SUBSCRIPTIONS WILL BE RECEIVED BY the Treasurer of the United States, at Washington, the several Assistant Treasurers and designated Depositaries, and by all National Banks which are depositaries of public money.

AND ALL RESPECTABLE BANKS & BANKERS throughout the country will doubtless

AFFORD FACILITIES TO SUBSCRIBERS.

HISTORY OF WEST POINT,

With the Origin and Progress of the
UNITED STATES MILITARY ACADEMY.
By Brevet Brig.-Gen. DAVID B. SIMS,
Adjutant of the Military Academy.

One volume, octavo, 450 pages, printed on tinted paper, beautifully illustrated with maps and fine engravings, chiefly from photographs taken on the spot by the author. Bound in blue cloth. Price, $5.00.

"Aside from its value as a historical narrative, it will come under notice as an oriental log guide book to the Military Academy and its surroundings. We have all heads of cadet life in the days of course by that of graduation, together with the description of the buildings, grounds and surroundings of the institution of those who have enjoyed at West Point the constituted authorities, as well as by the lists, in the scripture and illustrated portion, exposed to censure."—*New York Evening Post.*

"The second part of the book gives the history of the Military Academy. This is founded on the title, a description of the academic buildings, and the appointment to day of this admirably-located spot, with the manner of appointment of the cadets, course of study, pay, time of service, and much more of the information yearly becoming of greater value, for West Point has not yet reached its full stature."—*Army and Navy Journal.*

"The book is beautifully printed on silk, tinted paper, and contains a large number of illustrations and is those fine clear cut maps in which your true West Point is so much delighted."—*Boston Daily Advertiser.*

"We can see those without thanking Captain Boynton for the very full and interesting history he has collated in the book and for the clear statement of the history and condition of the Academy, and for adding to the present time."—*North American Review.*

ELEMENTS OF MILITARY ART AND HISTORY. By Edward de la Barre Duparcq, Chef de Bataillon of Engineers in the French Army, and Professor of the Military Art in the Imperial School at St. Cyr. Translated by Brig.-Gen. G. A. W. Gilmer, U. S. Engineers, and Lieut. Col. Henry W. Wallace, General-in-Chief, U. S. Army. 1 vol., octavo, cloth, $3.50.

HIGHLY IMPORTANT TO SOLDIERS AND SAILORS.

INSURE YOUR LIVES OR YOUR LIFE.

THE NATIONAL UNION LIFE AND LIMB INSURANCE COMPANY of New York, chartered by the Legislature and Governor of New York, having placed a portion of the bonds of the Reserved Insurance Agent of the State the sum of $100,000 in U. S. Bonds, as security for all who deal with it, is now issuing policies as the office.

No. 260 BROADWAY, N. Y.

Officers, Soldiers and Sailors can now, for a small sum, ensure their limbs, as that if either of them is lost, they will immediately secure a large sum of money for their own use. No any relative, with their consent, can make the insurance.

We believe that nothing has yet been devised of greater value to the soldier. Instead of spending your money in useless amusements or dissipation, make provision in this way against the days of trouble. Information and circulars sent to all parts of the country on application.
